[1] *United Gas Pipe Line Co.* v. *Mobile Gas Service Corp.*, 350 U.S. 332.
[2] *United Gas Pipe Line Co.* v. *Memphis Light, Gas and Water Division*, 358 U.S. 103.

of the Natural Gas Act makes such conditions necessary. A thorough consideration of the relevant authorities reveals nothing which would require rejection of the proffered filing. If staff's motion were granted it would completely deny us the exercise of reasonable discretion in the disposition of such filings. Accordingly, insofar as staff's motion requests rejection of United's filings as a matter of law it will be denied.

Assuming, without deciding, we have discretion to adopt staff's procedures, despite the absence of any rule or provision in Opinion No. 428 so providing, we do not believe it would be in the public interest to do so here. Insofar as the pipelines are concerned we have elected to set their rates on the basis of the individual companies cost of service. The history of this Commission shows that its practice with respect to the pipelines has been to accept rate schedules in proper form for filing whether or not the antecedent rate was company-made or Commission-made. We do not find that this practice has restricted us in the performance of our responsibilities for regulating pipelines under the Natural Gas Act; and, as the *Panhandle* case illustrates, we are not without remedy to quickly resolve the question presented by any abuse of this normal practice.

Laclede's motion filed September 1, 1964, raises several points which warrant our immediate attention. First, we wish to make clear that we do not intend to interfere with the examiner's conduct of the hearing except as may be necessary to clarify the procedure we have directed for this proceeding. In our procedural order in this docket issued August 24, 1964, we pointed out our intention that these proceedings implement the procedures contemplated by the court in *Panhandle Eastern Pipe Line Co.* v. *F.P.C.*, 236 F. 2d 606 (CA3). It is now apparent that some modifications or additions to that order are appropriate in order to achieve a more expeditious and efficient handling of United's filing. To this end we think the procedures should be carried out in three phases, unless sooner dismissed, as is suggested by staff's request for information directed to counsel for United and dated September 25, 1964. In adopting this procedure, however, we stress that we have not reviewed the substantive validity of staff's request for information. Thus we do not express any opinion at this time on the propriety of staff's request or the use to be made of the information. These matters should be subject to the control and determination of the examiner in the first instance.

In the first stage United should be required to show that circumstances have changed since the adjusted test year used in Opinion No. 428 in order to justify any further rate increase. Staff counsel has requested information on this subject in its letter of September 25, 1964. Other parties likewise should have opportunity to show that circumstances have changed in other respects. Of course, opportunity should also be afforded to show that circumstances have not changed. Upon the completion of this phase, the proceedings will be subject to a motion to dismiss on the ground that no change in circumstances has been shown by United or any of the other parties. United's whole rate proposal could be subject to such a motion, or the contentions and specific issues that have already been decided in RP63–1 could be dismissed.

Assuming that United's rate proposal is not wholly dismissed, the hearing in the second phase should be concerned with those issues that can be decided separately, expeditiously and have substantial effects on the cost of service. For example, such issues might include rate of return and corresponding taxes, but we will not specify what issues should be included in this category. This matter should also be decided by the examiner, at least, in the first instance. Upon the completion of this phase of the proceedings the examiner should provide for briefs and issue an interim decision subject to the filing of exceptions and review by the Commission. Any rate reductions or refunds will thus become

available as soon as possible for the benefit of the consuming public. All other issues should then be the subject of the third phase hearing which should be carried out in usual course.

The Commission orders:

(A) The staff motion of August 6, 1964, to reject United's filing of increased rates is hereby denied.

(B) Further proceedings shall be in conformity with the instructions set forth above, but shall otherwise be subject to the order issued August 24, 1964, the rules of the Commission and to the authority of the presiding examiner.

(C) Except to the extent granted by this order, the joint motion of Laclede and others is hereby denied.

CONTINENTAL OIL COMPANY, THE ATLANTIC REFINING COMPANY, TIDEWATER OIL COMPANY AND CITIES SERVICE OIL COMPANY, DOCKET NO. RI64–129

ORDER DETERMINING JURISDICTION ON ORDER TO SHOW CAUSE

(Issued October 23, 1964)*

Syllabus

1. Transfer of Ship Shoal leases by producer-respondents to pipeline effected a sale of natural gas in interstate commerce for resale, subject to provisions of Natural Gas Act. PP. 1168, 1172.
2. Whatever else instant lease transaction may be in addition to sale of natural gas in interstate commerce for resale, it does not, by such addition, lose its jurisdictional character. PP. 1168, 1173.
3. Circuit court's holding that transfer of leasehold interest is *per se* non-jurisdictional is not binding upon Commission where such ruling remains subject to review by Supreme Court. P. 1169.
4. Argument that Louisiana law prevents transaction from being sale of gas is without merit; jurisdiction depends on Natural Gas Act, not State law. P. 1174.
5. Argument that Interior Department has exclusive jurisdiction over transaction under Outer Continental Shelf Lands Act is unsound—there is nothing inconsistent between Secretary's duties and those of Commission respecting gas resources in area. P. 1176.
6. In proceeding pursuant to show cause order under Sections 7, 14, 15 and 16 of the Act, Commission *determines* jurisdiction and *requires* producers to make appropriate filings.

Bruce R. Merrill, Joseph C. Johnson and *Tom Burton* for Continental Oil Company

Stuart J. Scott and *Bernard A. Foster, Jr.*, for The Atlantic Refining Company.

Lloyd Armstong and *Clyde E. Willbern* for Tidewater Oil Company.

Gentry Lee, C. C. Cammack and *R. J. Leithead* for Cities Service Oil Company.

Stanley M. Morley, B. J. Williamson and *W. C. Braden, Jr.*, for Tennessee Gas Transmission Company.

Edwin F. Russell and *Harry G. Hill, Jr.*, for The Brooklyn Union Gas Company.

---

*Initial decision appears on p. 1169. Amended; rehearing denied by order issued December 21, 1964, 32 FPC 1487. Affirmed, *Continental Oil Co.* v. *F.P.C.*, 370 F. 2d 57 (CA5–1966); Petition for certiorari, denied June 12, 1967.

J. Harry Mulhern, Edward S. Kirby and *James R. Lacey* for Public Service Electric & Gas Company.

Morton L. Simons for Public Service Commission of the State of New York.

Robert L. Russell and *John J. Keating, Jr.*, for the Staff of the Federal Power Commission.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

This proceeding, which has been conducted pursuant to our show cause order issued September 19, 1963,[1] involves the question whether this Commission has jurisdiction under the Natural Gas Act over a sale by the above-captioned respondents to Tennessee Gas Transmission Company of certain leasehold interests in the Ship Shoal Field offshore southern Louisiana.

In our opinion of September 19, 1963,[2] we found, *inter alia*, that the Ship Shoal transaction between the CATC companies (respondents) and Tennessee constituted a sale in interstate commerce of natural gas for resale included within the provisions of Section 7(c) of the Act requiring certification by this Commission.[3] However, because the CATC companies were not parties to the *Tennessee* proceedings, an order was issued affording such companies an opportunity to "show cause, if any there be, why they should not be found to be or to have been engaged in the sale of natural gas for resale to Tennessee from the Ship Shoal Field subject to the jurisdiction of this Commission without having secured requisite authorization therefor * * *."[4]

On August 19, 1964, following full hearing and the submission of briefs, the presiding examiner issued his initial decision in which he found and concluded (1) that "the transaction involved in this proceeding is a sale of natural gas for ultimate public consumption within the meaning of the Natural Gas Act, but (2) that the recent decision by the Fifth Circuit Court of Appeals in *M. H. Marr, et al.* v. *F.P.C.*, No. 20560, *et al.*, decided August 3, 1964, reversing our decision in the "Rayne Field" case,[5] precludes the assertion of Commission jurisdiction in this case. The court held in *Marr* that a transfer of a leasehold interest is *per se* nonjurisdictional, being excluded by Section 1(b) of the Act which exempts "the production and gathering of natural gas" from Commission regulation.

Exceptions to the examiner's decision have been filed jointly by respondents, the Public Service Commission of the State of New York, the Pennsylvania Public Utility Commission, Brooklyn Union Gas Company, and the staff.

In our opinion, as in the examiner's, transfer of the Ship Shoal leases by respondents to Tennessee effected a sale of natural gas in interstate commerce for resale for ultimate public consumption. The facts concerning this particular transaction are described in detail in the examiner's decision. The reasons for our conclusion do not require repetition, being adequately set forth in the "*Rayne Field*" Opinion No. 378 and 378–A and in our earlier Opinion No. 403[6] relative to the subject transaction as well as in the examiner's decision in this proceeding, which we here adopt in all respects other than his ultimate conclusion regarding the effect of the circuit court's decision in the "Rayne Field" case. The evidence submitted by respondents and the arguments made in the hearing and in their

[3] *Id.* at p. 764.

[4] 30 FPC 758, 759.

[5] *Texas Eastern Transmission Corp., et al.*, Opinion No. 378, 29 FPC 249; Opinion No. 378–A, 30 FPC 153. [Ed. note—Fifth Circuit reversed, 381 U.S. 392 (1965).]

[6] See also *Tennessee Gas Transmission Co., et al.*, Opinion No. 413, 30 FPC 1477, issued December 12, 1963; *Saturn Oil & Gas Co.* v. *F.P.C.*, 250 F. 2d 61 (CA10), cert. denied, 355 U.S. 956.

briefs are unconvincing that this sale is in fact nonjurisdictional and do not suffice to meet the burden of proof required. Whatever else the CATC-Tennessee arrangement may be in addition to a sale of natural gas in interstate commerce for resale, it does not, by such addition, lose its jurisdictional character.

We do not agree with the examiner's holding that we are now bound by the *Marr* decision. Section 19(b) of the Act provides in part that "the judgment and decree of the court affirming, modifying, or setting aside, in whole or in part, any such order of the Commission shall be final, subject to review by the Supreme Court of the United States upon certiorari or certification as provided in [former] sections 239 and 240 of the Judicial Code, as amended." On August 14, 1965, the circuit court extended the stay of its mandate in *Marr* until November 11, 1964. In these circumstances, the conclusion of the circuit court is not binding[7] and we adhere to the views previously expressed and affirmed herein.

The Commission further finds:

(1) Respondents, and intervener Tennessee Gas Transmission Company, are natural-gas companies within the meaning of the Natural Gas Act and are subject to the jurisdiction of the Commission.

(2) The transaction involved in this proceeding constitutes a sale in interstate commerce of natural gas for resale, which is subject to our jurisdiction under the Natural Gas Act, and such sale, together with the construction and operation of any facilities necessary therefor, is subject to the requirements of subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Respondents have not shown cause why they should not be found to be or to have been engaged in the sale of natural gas to Tennessee from the Ship Shoal Field subject to the jurisdiction of the Commission.

(4) It is appropriate in the administration of the Natural Gas Act that further filings be required on the part of respondents.

The Commission orders:

(A) The initial decision in this proceeding is adopted as the decision of the Commission with the exception of the ultimate conclusion regarding the effect of the decision in *Marr* v. *F.P.C.*, 336 F. 2d 320 (CA5-1964); such conclusion is hereby reversed.

(B) Within 6 months of the date of issuance of this order, Continental Oil Company, The Atlantic Refining Company, Tidewater Oil Company and Cities Service Oil Company shall make such filings and take such steps as are necessary to bring them into compliance with the provisions of the Natural Gas Act, and more particularly with the provisions of subsections (c) and (e) of Section 7 of the Act, in respect to the sale of their reserves in the Ship Shoal Field to Tennessee Gas Transmission Company.

(C) The exceptions to the initial decision not granted herein are hereby denied.

INITIAL DECISION

OF THE PRESIDING EXAMINER ON ORDER TO SHOW CAUSE

(Issued August 19, 1964)

FRIBOURG, *Presiding Examiner:* On September 19, 1963, the Commission directed the four respondents (the "Catco" companies) to show cause why they should not be found to be or to have been engaged in selling natural gas to Ten-

[7] *El Paso Natural Gas Co.*, 18 FPC 838, 839; Opinion No. 308, 19 FPC 154, rehearing denied 19 FPC 299; *Placid Oil Co., Operator, et al.*, 28 FPC 768; *United Gas Pipe Line Co.* v. *Coastal States Gas Producing Co.*, Opinion No. 419, 31 FPC 406 at 409.

nessee Gas Transmission Company ("Tennessee") for resale subject to Commission jurisdiction without having secured requisite authorization to do so pursuant to Sections 7 and 4 of the Natural Gas Act and the Commission's regulations thereunder. The issue here is whether the Commission has jurisdiction over a particular transaction.

The transaction in question involves the Ship Shoal Field, on the outer Continental Shelf off the Louisiana coast. By Acts of Sale and Mortgage and Pledge dated May 10, 1961 and effective June 27, 1961, the Catco companies assigned and conveyed to two subsidiaries of Tennessee parts of two developed leases, down to the base of a stratum known as the MI sand. The Catco companies had acquired the leases from the United States in 1955 under the Outer Continental Shelf Lands Act, 43 U.S.C. § 1331 *et seq.* Seventeen wells were drilled up to May 3, 1960. Seven were completed as oil wells and one as a gas well. The latter was shut in, and no gas has been produced.

Under the Lease Sale Agreement the four Catco companies received $24⅓ million, partly in cash and partly in notes payable quarterly from 1962 until 1977. The total consideration is therefore $97⅓ million in cash and notes.

The notes are in two series designated "O" and "G," both of them the obligation of Tennessee Gas Supply Company, an affiliate of Tennessee. One series (the "O" series) is also the obligation of Tenneco Oil Company, which owns and operates all of Tennessee's domestic oil producing properties. The total amount of "O" series notes was $11,612,500 and Tenneco Oil Company, grantee of the oil portion of the transaction and obligee of the "O" notes, paid $387,500 in cash. Thus the amount of cash and notes paid by the company which received the oil portion of the transaction was $12 million, while the amount paid by the other grantee was $85⅓ million. The notes are non-interest-bearing. Their principal amount included the equivalent of an interest factor.

The buyers and sellers agreed that the total quantity of recoverable reserves of gas attributable to the net leasehold interest was 533,333,333 Mcf, and the total quantity of recoverable reserves of oil was 12,244,898 barrels, for purposes of establishing rights of the parties under the Acts of Sale and Mortgage and Pledge. If these agreed-on figures are applied to the respective total amounts of cash and notes in each series, they work out to 16 cents per Mcf for the gas and 98 cents per barrel for the oil, not taking into account the casinghead gas, natural gas liquids and condensates. A Continental Oil Company witness stated that there was a wide variation in the reserve estimates among the parties, that the actual amount of recoverable gas was not and could not have been ascertained, and that the reserve figure was merely an arbitrary one designed to serve only as a base for computing the purchase price adjustment in the event of redetermination of the price.

The agreements provide for a price redetermination, at the request of any party, during the seventh year following the signing of the agreements. In such event, the recoverable quantities of oil and gas are to be redetermined by arbitration proceedings. The total price paid is then to be adjusted by a formula. Under the formula, the amounts by which recoverable reserves are determined to exceed or fall below 533,333,333 Mcf of gas and 12,244,898 barrels of oil will result in an adjustment in the purchase price in the amount of 16 cents for each Mcf of gas and 98 cents for each barrel of oil above or below those quantities.

As part of the transaction, Tennessee was given the option to require the Catco companies to purchase all the crude oil to be produced from the properties, the price to be the average price posted from time to time in nine South Louisiana fields. The oil purchase provision was insisted upon by Tennessee during the course of the negotiations because of its desire to have an assured market for the oil, since it was not in the oil business.

The Respondents' Position

The Cateo companies' position is that this transaction is not within this Commission's jurisdiction because it is not a sale in interstate commerce of natural gas for resale. In support of this they argue that (1) the transaction is a lease assignment, not a sale of gas, and both the Commission and the courts have held that there is no Commission jurisdiction over this type of transaction, (2) the jurisdiction of the Department of the Interior is exclusive, pursuant to the Outer Continental Shelf Lands Acts, (3) Louisiana law and the contracts among the parties prevent this transaction from being properly defined as a sale of gas, (4) it is in any event not a sale in interstate commerce.

The Staff's Evidence

By motion dated January 29, 1964, the Commission staff moved that the Presiding Examiner require that the respondents make available to it certain information and documents relating to other transactions in which they had participated. The staff's motion was granted in every particular, and the hearing was recessed for approximately 2 months to permit staff to examine and evaluate the documents.

The conclusions drawn by staff counsel are based on a sampling of 1,400 documents examined out of an unknown number made available by the respondents. Out of these 1,400, staff came up with 45 exhibits consisting of documents from the companies' files. Of these 45, no less than 13 were withdrawn after having been offered for identification, because they were incomplete on their face, or for other reasons. The witness who sponsored the exhibits had been in charge of the examination of respondents' files, and was presented as a fact witness, not as an expert. He gave no careful reading or consideration to the contents of the documents he examined, and he made no analysis of their terms. He described 26 of the 45 as "standard" lease transactions but was unable under cross-examination to describe or enumerate the terms differentiating a "standard" lease transaction from any other. Apparently a "standard" lease transaction was considered to be one on a preprinted form. He was similarly vague as to the terms of other types of transaction.

The principal conclusion drawn by staff counsel from the evidence thus presented was that "the Ship Shoal transaction is a rarity among a rare type of transaction." Staff, however, had requested to be shown only documents relating to transactions with entities *other than* "a person owning, operating or affiliated with a natural gas pipeline." The elimination, at staff's request, of information on deals with pipelines makes it impossible to say whether the present transaction is or is not a rarity (except, of course, for the fact that is obviously unusually large). In any event, the Examiner is at a loss to know what conclusion he is expected to draw from its rarity, assuming such rarity to be the fact.[1] Staff concludes that "the exercise of jurisdiction by the Commission with respect to this type of a transaction will have little or no effect upon the general leasing activities of independent producers." The evidence is insufficient to warrant a conclusion as to what the "general leasing activities of independent producers" are, and in any event such activities are immaterial to the only issue here presented, namely, whether the Commission has jurisdiction of this particular transaction.

[1] Staff remarks upon "* * * the extremely limited number of transactions of this type within the two year time span prescribed by the Presiding Examiner for purposes of this investigation * * *." The Examiner prescribed no such limitation.

Legal Analysis

Whether the transaction is a sale of gas is a question that must be decided with reference to the meaning of the Natural Gas Act. The purpose of the Act is to regulate the sale of natural gas "* * * for ultimate public consumption for domestic, commercial, industrial or any other use * * *," Natural Gas Act § 1(b). The business of selling natural gas for ultimate distribution to the public is declared by Congress to be "affected by a public interest, and Federal regulation is therefore necessary." *Id.*, 1 (a).

The form of the transaction is of no consequence here. The functions of this Commission are concerned with the practical aspects, which are not to be disguised by legal technicalities. In a conventional sale of natural gas by a producer to a pipeline, the pipeline agrees to take gas in exchange for money over a period of time, and the producer, by "dedicating" a defined body of natural gas to the particular sale, gives up his right to dispose of it elsewhere. In the present transaction the pipeline pays out money for the leaseholds from which it proposes to extract natural gas by means of the expenditure of more money over a period of time. In either case, the pipeline pays money and ends up with gas. In either case, the producers receive money and give up their right to dispose of a defined body of natural gas to anyone but the named buyer. The leasehold, which in a conventional contract would be dedicated for use in the interstate market, is here transferred to the company which would use it to supply that market. The production costs here are shifted to the pipeline buyer, but when the gas is sold in interstate commerce the pipeline recoups not only its production costs, *i.e.*, the cost of bringing the gas out of the earth, but also the amounts paid for the acquisition of the gas in place. As the Commission correctly observed in *Texas Eastern Transmission Corp.*, 29 FPC 249, 256:

> * * * in the large a pipeline must be allowed to pass on its purchased gas costs to the ultimate consumer or it cannot continue to discharge its public service responsibilities.

The respondents themselves have contracted in such a manner that the conclusion can hardly be avoided that this is in substance, purpose and effect a sale of natural gas. They argue that the sale is that of a leasehold, which in form is true, but the contract on which they rely provides that the price of the leasehold shall vary in accordance with the amount of natural gas the leasehold is estimated to contain.

The testimony of their witness, John R. Scott, a banker familiar with oil and natural gas financing, is that the value of such leases depends directly upon the amount of recoverable reserves. These can be determined with a fair degree of accuracy in developed producing fields, but in new fields there can be wide variations among the estimates of good engineers. Consequently, this witness stated, it is not uncommon for contracts such as this one to provide for redetermination of reserves after the transaction is consummated, "in attempting to fix more reliably the value of the property assigned." He denied that this indicated that the buyer was seeking in effect to buy the mineral reserves, and said that the acquisitions he referred to "are historically the acquisitions of leases, related producing equipment, and all of the rights and privileges under such leases—not the mineral reserves as such." But if, as he states, the value and the sales price are largely dependent upon the estimates of recoverable reserves, it is clear that this is the main subject of the bargain and the other considerations are merely incidental. The redetermination provisions are, of course, an attempt to minimize possible errors in the parties' estimates of the reserves, and the attempt is along lines very usual in this type of transaction.

The testimony regarding the course of the negotiations also indicates that the form of the transaction was chosen merely as the most satisfactory way of achieving the result sought. Three pipe lines, of which Tennessee was one, made offers to buy portions of the leases, while three, of which Tennessee was also one, made offers to buy gas under conventional sales contracts. Tennessee's gas purchase offer was at 21.5 cents per Mcf at 15.025 psia, with 2-cent escalations every 5 years during a 20-year term. The respondents compared the net cash flow realizable under this proposal, discounted to present-day value, with the discounted net cash flow that could be obtained from the sale of the leasehold interests. It was found that the discounted net cash flow from a leasehold sale was greater. Under either proposition, it is evident that the respondents would end up with cash instead of reserves, and the testimony is clear to the effect that the amount of the discounted net cash flow was the guiding consideration in deciding which offer to take.

That the price per Mcf cannot be definitely ascertained until the leaseholds are exhausted does not prevent this from being a sale of natural gas. The buyer is spending a still unascertained amount of money to obtain a still unascertained amount of gas. It is true that Tennessee cannot tell how much gas it is getting, or how much it will have to pay for it, but the sale of a pig in a poke is still the sale of a pig.

Similiarly, it is immaterial that the transaction transfers not only rights to the gas, but to wells, to production equipment and to oil. If the sale with respect to gas is jurisdictional, it does not escape the Act by being associated with other matters concededly outside the Act's scope.

Nor can there be any doubt that the sale is for ultimate public consumption. In examining this question it may be noted first that whether the producer knows, at the time of a sale, that the gas will be resold for public consumption is of no consequence. The Act applies to sales "for resale for ultimate public consumption," not to sales which the producer knows to be for that purpose. If this were a conventional type of sale, the producers would not be exempted from regulation by their claim that they had no idea what Tennessee would do with the gas. It would make no difference if they had never before heard of the buyer. The Act is applicable to certain sets of facts regardless of who knows them.

The facts are that Tennessee is a vast pipeline engaged in the interstate transportation and sale of natural gas for ultimate public consumption. It requested authority, which the Commission refused, to spend $8½ million to connect the Ship Shoal reserves to its line. *F.P.C. Op. 403*, September 19, 1963, 30 FPC 759, at 762. In that opinion the Commission noted that throughout the proceeding Tennessee relied heavily on these reserves to support the proposed expansion of its jurisdictional pipeline facilities and that it stated, in its reply to exceptions:

> The sole purpose for acquiring the leasehold interests in the Ship Shoal field was to provide additional reserves and deliverability to meet the natural gas requirements of Tennessee's jurisdictional customers.

As the Commission ruled in an earlier case involving one of these respondents:

> A sale of natural gas to a natural gas company which has been found to be operating its facilities subject to the jurisdiction of the Commission is presumptively a sale subject to the jurisdiction of the Commission. The burden is upon one asserting nonjurisdiction to adduce evidence upon which such conclusion could be reasonably be based.

And the Court of Appeals for the Fifth Circuit there upheld the Commission, saying "We * * * are of the clear opinion that the Commission was right for

the reasons it gave," and pointed out that the seller had failed to offer any evidence to show that its gas is not destined for ultimate public consumption. *Continental Oil Company* v. *F.P.C.*, 247 F. 2d 904, 907.

The phrase "sale for resale" in Section 1(b) of the Act, referring to sales in interstate commerce, is intended

> * * * to give the Commission jurisdiction over the rates of all wholesales of natural gas in interstate commerce, whether by a pipeline company or not and whether occurring before, during or after transmission by an interstate pipeline company. *Phillips Petroleum Co.* v. *Wisconsin*, 347 U.S. 672, 682.

While it is true that the type of transaction here involved was not in issue in the *Phillips* case, the reasoning there is applicable. The Supreme Court pointed out (*Id.*, p. 682, f.n. 10) that the Act was designed to apply to all intercompany sales of natural gas at wholesale, even though the sale be from one company to another company which will resell to another corporation before the gas is finally sold to the public.

The argument that Louisiana law prevents this transaction from being a sale of gas is without merit. Jurisdiction depends on the Natural Gas Act and not on state law. Were it otherwise the powers of the Commission would vary from state to state, a thesis expressly rejected in *Phillips*, *Id.* at p. 681, on the basis of reasoning advanced in *Interstate Natural Gas Co.* v. *F.P.C.*, 331 U.S. 682, 691–2, and *F.P.C.* v. *Hope Natural Gas Co.*, 320 U.S. 591, 607–615. When Congress enacts a statute it does not ordinarily intend that the application of it shall depend on state law, and such an assumption will not be made except on a very clear showing that it is necessary. *Northern Natural Gas Co.*, v. *State Corporation Comm.*, 372 U.S. 84, 98; *Jerome* v. *United States* 318 U.S. 101, 104. It is not necessary here.

For the foregoing reasons it is held that the transaction here under review is a sale of natural gas for ultimate public consumption, within the meaning of the Natural Gas Act. We turn now to the question whether it is a sale in interstate commerce.

Respondents base their argument on the premise that the *sine qua non* of interstate commerce is movement, and that this, being a real estate transaction, involves no movement and hence is not in interstate commerce.

The Supreme Court has long recognized that the authority of Congress over interstate commerce is not limited to transactions which are part of any "flow" of commerce. Activities intrastate in character when separately considered come within the Congressional power if they are so closely and substantially related to interstate commerce that their control is essential or appropriate to protect that commerce. *N.L.R.B.* v. *Jones & Laughlin Steel Corp.*, 301 U.S. 1, 36–7. The Court was there dealing with the Constitutional limitations of Congressional power. The case leaves little doubt of Congress' power to regulate a subject so essentially a part of the interstate natural gas business as the natural gas reserves on which the business is based. The question remains whether that power has been exercised here.

Interstate commerce is not a technical legal concept, but a practical one, drawn from the course of business. *Swift & Co.* v. *United States*, 196 U.S. 375, 398. "We must accordingly mark the beginning and end of a particular kind of interstate commerce by its own practical considerations." *United States* v. *Yellow Cab Co.*, 332 U.S. 218, 231.

This record shows the transfer of a vast reserve of natural gas, located outside the boundaries of any State, into the hands of a pipeline company whose business

is the transportation and sale of natural gas within the United States. Interstate commerce, for purposes of the Natural Gas Act, is defined in Section 2 of the Act to include commerce "between any point in a State and any point outside thereof * * *". It is beyond question, and the Commission has already found, that the transfer was for the sole purpose of serving Tennessee's jurisdictional customers.[2] As previously noted, the Fifth Circuit said in *Continental Oil Company* v. *F.P.C.*, *supra*, that a sale of natural gas to a jurisdictional company is presumed to be a jurisdictional sale, and there are strong practical reasons why this should be so.

Jurisdictional pipeline companies are entitled to a fair rate of return on their prudent investments in property used and useful in the public service. If these reserves are so classified, consumers throughout Tennessee's whole service area become legally bound to pay compensatory rates on this huge investment, amounting in the first instance to over $97 million. It is this type of situation that Congressman Kenny was describing when, speaking in support of the proposed Natural Gas Act, he urged its passage for the reason, among others, that:

> As the situation stands now, the pipeline companies owning the oil fields can purchase any amount of land they wish and charge the value of all of that land as a reserve in fixing the rate at which the gas is sold at the city line when it is delivered over for resale in any State or community.—81 Cong. Rec. Part VI, p. 6726.

The burden on the ratepayer is not eliminated but merely modified if the properties, because not connected to the line, are held to be neither used or useful to the public, and thus not a proper part of the rate base. In that event the risk of loss falls upon the pipeline's investors, with consequent risk of impairment of its capital, and of its ability to render public service, and with the threat of increased cost of capital in the future—a risk which again falls on the ratepayer, who must pay the cost of capital as part of the company's cost of service.

Therefore, whether the properties are treated as part of the rate base or not, the impact on the consumer is undeniable. If they are not so treated, he is subjected to the risk of impairment of the company's capital, a risk that can result in no profit to him. If they are treated as part of the rate base, he pays for them, and does so at whatever price the pipeline chooses to pay. The price will tend to become a floor for future contracts of like nature, and, unless controllable by the Commission at this stage, will most probably result in a resumption of the upward trend in the wellhead price of natural gas—a trend which the Commission's activities have virtually halted during the past 2 years or more. In *Atlantic Refining Co.* v. *P.S.C. of New York*, 360 U.S. 378 (the "Catco" case), at page 388, the Supreme Court said:

> * * * The Act was so framed as to afford consumers a complete, permanent and effective bond of protection from excessive rates and charges. The heart of the Act is found in those provisions requiring initially that any "proposed service, sale, operation, construction, extension, or acquisition * * * will be required by the present or future public convenience and necessity." § 7(e), 15 U.S.C. § 717f(e) * * *

From this "bond of protection" the Catco companies now propose to slip. Such an escape would violate the whole intent of the Act. A crucial factor in the cost of natural gas to the ultimate consumer would have been fixed before Federal regulation could take hold.

---

[2] Tennessee Gas Transmission Co., Op. 403, 30 FPC 759, at 765.

The Committee reports on the bill which became the Natural Gas Act specifically stated that "sales for resale, or so-called sales in interstate commerce (for example, sales by producing companies to distributing companies) * * * have been considered to be not local in character, and even in the absence of Congressional action not subject to State regulation." H.R. Rep. No. 709, 75th Cong., 1st Sess., 1–2; S. Rep. No. 1162, 75th Cong., 1st Sess., 1–2. The words "sales by producing companies to distributing companies"—refer to the "Attleboro gap," *i.e.*, the area in which it had been held that state regulation is invalid even in the absence of Federal regulation. The use of the words "for example" in this context, indicate that this was not the only area of interstate commerce which the Act would cover. Sales by producing companies to pipelines are also covered, as *Phillips* showed. The whole scheme of the Act contemplates such coverage.

Only recently the Supreme Court, in *F.P.C.* v. *Texaco Inc.*, 377 U.S. 33, 43, quoted with approval H.R. Rep. No. 1290, 77th Cong., 1st Sess., 2–3, as follows:

> * * * The bill when enacted will have the effect of giving the Commission an opportunity to scrutinize the financial set-up, the adequacy of the gas reserves, the feasibility and adequacy of the proposed services, and the characteristics of the rate structure in connection with the proposed construction or extension *at a time when such vital matters can readily be modified as the public interest may demand.* [Italics added.] And see S. Rep. No. 948, 77th Cong., 2d Sess., pp. 1–2.

The transaction proposed here would give the Commission no opportunity to scrutinize the financial set-up at any meaningful time: the buyer could acquire reserves freely at any price it might choose to pay. It would give the Commission no opportunity to comment on whether the proposed acquisition, whatever its impact, is required by the public convenience and necessity: the buyer could obtain excessive reserves if it chose to do so for speculation, or to deprive a competitor. The Commission would have an opportunity, eventually, to scrutinize whatever rate structure might be built on such a purchase of leaseholds, but if the leasehold price were higher than that for which an equivalent amount of gas might be acquired through a conventional gas purchase contract, it is difficult to describe such an opportunity as an adequate one. The Commission would be faced with a *fait accompli* in the form of a rate structure having an excessive built-in-cost factor. That rate structure is applicable solely in interstate commerce and it is the Commission's duty under the Act to review it. If this sale is not in interstate commerce, the Commission's review power is crippled and the intent of the Act, as authoritatively construed in *F.P.C.* v. *Texaco*, *supra*, would go for nothing.

The argument that the Department of the Interior has exclusive jurisdiction of the transaction is, in this Examiner's opinion, not sound. The Outer Continental Shelf Lands Act, 43 U.S.C. § 1331 *et seq.*, does not show any intent to strip this Commission of any jurisdiction it would otherwise have. On the contrary, by its provisions the laws of the United States are extended to the Outer Continental Shelf "* * * for the purpose of exploring for, developing, removing, and transporting resources therefrom * * *," 43 U.S.C. § 1333(a)(1), except that mineral leases are administered by the Secretary of the Interior for the conservation purposes, 43 U.S.C. § 1334. The laws thus extended include the Natural Gas Act. There is nothing inconsistent between the Secretary's duties and those of the Commission with respect to natural gas resources in the area covered.

The "Rayne Field" Case

Despite all of the foregoing considerations, this Examiner is faced with a court decision which constrains him to hold that the Commission is without jurisdiction. On August 3, 1964, the Court of Appeals for the Fifth Circuit handed down its opinion in *Marr* v. *F.P.C.* (CA5 (1964), 336 F. 2d 320) *[Ed. note—Fifth Circuit reversed, 381 U.S. 392 (1965)] (the "Rayne Field" case), in which it held a transfer of leases to be nonjurisdictional, being excluded by Section 1(b) of the Act which exempts "the production or gathering of natural gas" from Commission regulation. The Court relied primarily on the Supreme Court's decision in *F.P.C.* v. *Panhandle Eastern Pipe Line Co.*, 337 U.S. 498, which so held. *Panhandle* was concerned with a transfer of leases by a jurisdictional pipeline to an intrastate use. The natural gas from the properties in that case was to be consumed wholly by a single purchaser within the State of Kansas. *Marr* could have been distinguished on that ground. It was not.

Marr could also have been decided with some reference to *F.P.C.* v. *Southern California Edison*, 376 U.S. 205, decided March 2, 1964 (the City of Colton case), in which the Supreme Court, drawing a parallel between the Federal Power Act and the Natural Gas Act, held that Section 1(b) of the Natural Gas Act "* * * cut sharply and clearly between sales for resale and direct sales for consumptive uses. No exceptions were made in either category for particular uses, quantities or otherwise." quoting from an earlier *Panhandle* case, *Panhandle Eastern Pipe Line Co.* v. *Public Utility Commission*, 332 U.S. 507. If, as the Colton and other cases indicate, Congress intended the Act to apply to those areas of Federal jurisdiction which the states cannot reach, it seems clear that *Marr* stands for the proposition that sales of leases are part of production and gathering within the meaning of Section 1(b) and consequently are not in interstate commerce. If this is true, it becomes irrelevant here that no state has jurisdiction over the Gulf of Mexico for purposes of the Natural Gas Act and that no state body is charged with determining the fairness of the price at which an interstate pipeline acquires its natural gas supplies.

But for the apparently continuing vitality of *Panhandle*, as construed in *Marr*, the Examiner would have held that the word "production" in Section 1(b) means the act of bringing forth gas from the earth, that the word "gathering" means the act of collecting gas after it has been brought forth and that, therefore, the "production and gathering" exemption does not apply to sales of leases. This is how Mr. Justice Black interpreted those words in the *Panhandle* dissent, 337 U.S. at p. 518, and it is relevant that the "production and gathering" exemption language does not mention the *facilities* used in production and gathering. Under familiar rules of construction, "* * * *an exception* to a statute will be construed so as to avoid nullifying or restricting its apparent principal purpose and the positive provisions made to carry them out." *Interstate Natural Gas Co.* v. *F.P.C.*, 156 F. 2d 949, 951. Such a construction would harmonize with the purpose of the Act and would be a reasonable one to adopt. *Cf. United States* v. *America Trucking Ass'ns.*, 310 U.S. 534, 543.

It is, however, the function of the courts to apply the proper legal principles to the actions of administrative agencies, and once they have done so the agencies and consequently the Examiners, are bound to their decisions.

ADDITIONAL FINDINGS AND CONCLUSIONS

Upon consideration of the record and the briefs filed in this proceeding, it is found and concluded, in addition to the findings and conclusions hereinbefore stated, that:

(1) Respondents, and Intervener Tennessee Gas Transmission Co., are "natural-gas companies" within the meaning of the Natural Gas Act and are subject to the jurisdiction of the Commission.

(2) The transaction involved in this proceeding is a sale of natural gas for ultimate public consumption within the meaning of the Natural Gas Act.

(3) Upon the authority of *Marr* v. *F.P.C.*, 336 F. 2d 320 (CA5–1964), it is concluded that said transaction is not a sale in interstate commerce, being exempt from the provisions of the Natural Gas Act by virtue of Section 1(b) of that Act, 15 U.S.C. § 717(b).

(4) Respondents have been shown cause why they should not be found to be or to have been engaged in the sale of natural gas to Tennessee from the Ship Shoal field subject to the jurisdiction of the Commission.

ORDER

WHEREFORE, *It is Ordered* that this proceeding be, and it hereby is, terminated.

ARTHUR H. FRIBOURG,
Presiding Examiner.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

HUNT PETROLEUM CORPORATION, DOCKET NO. G–15590; SUN OIL COMPANY (OPERATOR), ET AL., DOCKET NO. G–15632; SOUTHWEST GAS PRODUCING COMPANY, INC., ET AL., DOCKET NO. G–15663; FOREST OIL COMPANY (OPERATOR), ET AL., DOCKET NO. G–15766; TED WEINER, ET AL., DOCKET NO. G–15872; GULF OIL CORPORATION, DOCKET NO. G–15831; GENERAL CRUDE OIL COMPANY, DOCKET NO. G–15933

ORDER DENYING MOTION TO AMEND ORDERS REQUIRING PAYMENT OF REFUNDS

(Issued October 23, 1964)

On September 3, 1964, Tennessee Gas Transmission Company (Tennessee) filed a motion requesting the Commission to amend its orders requiring payment of refunds to Tennessee issued February 19 and April 14, 1964, in Texaco Inc., *et al.*, Docket No. G–15546, *et al.*, 31 FPC 438 and 924, respectively, so as to require payment of refunds in the above-designated proceedings[1] with respect to

[1] With regard to Docket No. G–15590, Tennessee listed the designation as "Petrol Production Company." With regard to G–15663, Tennessee listed the designation as "Douglas Whitaker." With regard to Docket No. G–15872, Tennessee listed the designation as "Texas Crude Oil (Rebstock & Reeves)." In its motion Tennessee also requested refunds from Dixon Management Corporation without indicating a rate suspension proceeding to which such producer was related. The Commission's records show no suspension proceeding relating to the properties formerly dedicated under Lloyd Smith's FPC Gas Rate Schedule No. 12 and subsequently transferred to Dixon Management Corporation.

tax reimbursement amounts collected from Tennessee relating to the additional one cent per Mcf Louisiana gas gathering tax declared unconstitutional by the Louisiana Supreme Court. The February 19 and April 14 orders provided for producer refunds to Tennessee in certain specified proceedings based on the court decision in *Tennessee Gas Transmission Company* v. *F.P.C.*, 322 F. 2d 1006, where the Court overruled the Commission's previous determination in an order issued March 5, 1962, in Texaco Inc., *et al.*, Docket No. G–15546, *et al.*, 27 FPC 441, that refunds were not required to be made by the producers to Tennessee.

In its petition for court review of the Commission's March 5, 1962, order, Tennessee did not seek review of that order insofar as it related to any of the above-designated proceedings.[2] Since Tennessee did not protect its rights with respect to such proceedings, the court decision issued in *Tennessee Gas Transmission Company* v. *F.P.C.*, 322 F. 2d 1006, is not applicable to the proceedings for the same reasons set forth in our February 19 order with respect to a similar request by Southern Natural Gas Company for relief. Tennessee, by failing to petition for review in the above dockets, has relinquished whatever rights it might otherwise have had to refunds.

The Commission finds:

It is necessary and proper in carrying out the provisions of the Natural Gas Act and the Regulations thereunder that Tennessee's motion filed September 3, 1964, in the above-designated proceedings be denied.

The Commission orders:

Tennessee Gas Transmission Company's September 3, 1964, motion filed in the above-designated proceeding is hereby denied.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

WARREN PETROLEUM CORPORATION (OPERATOR), DOCKET NOS. G–4165, CI64–1466, AND RI64–602

ORDER REOPENING PROCEEDINGS AND PROVIDING FOR FURTHER HEARING

(Issued October 23, 1964)

City of Perryton, Texas (Perryton), on September 24, 1964, filed an application for rehearing of the Commission's order issued August 28, 1964 [Unreported], in the above-entitled proceedings. By that order Warren was permitted to abandon the sale of gas under its Rate Schedule No. 29 to High Plains Natural Gas Company (High Plains) from the McLean (Sitter) Gasoline Plant, Wheeler County, Texas, in Docket No. CI64–1466 (G–4165) on the basis that all of the gas was sold in Texas and that transportation or sale in interstate commerce was not involved. Based on the abandonment authorization, the rate proceeding in Docket No. RI64–602 involving a proposed unilateral rate increase from 10 cents to 17 cents per Mcf under Warren's Rate Schedule No. 29, which had not been made effective subject to refund, was terminated, as moot.

---

[2] In its petition for review Tennessee petitioned for relief in Southwest Producing Company, Inc., *et al.*, Docket No. G–15663; however, in its brief filed with the court, it withdrew its petition with regard to such proceeding.

High Plains supplies gas to the City of Perryton for use in its distribution system. High Plains purchased a substantial portion of its gas supply from Warren prior to the abandonment authorization. By order issued April 10, 1963, 29 FPC 721, in Docket No. CP63–226 High Plains was granted certificate authorization to acquire and operate all the facilities of Public Service Corporation of Texas and to perform all acts and services previously made by Public Service to the extent that such facilities, acts, services, and sales are subject to the Commission's jurisdiction. High Plains owns and operates a 212-mile natural gas transmission system extending from Oklahoma into Texas. Through these facilities and some 57 miles of distribution facilities, High Plains sells gas at retail in seven communities in Texas and three communities in Oklahoma. High Plains also sells gas for resale in Perryton and Spearman, Texas, and Supply, Oklahoma. High Plains purchases gas both in Oklahoma and Texas.

Perryton filed a timely notice of intervention in Docket No. RI64–602 on February 14, 1964. However, Perryton did not file a notice of intervention in Docket Nos. CI64–1466 and G–4165 until September 24, 1964, almost a month after the abandonment authorization was granted. Perryton claims that it received no actual notice of Warren's abandonment application until it was served with a copy of the August 28 order despite assurances by High Plains that it would be notified. The abandonment application was noticed in the Federal Register on June 23, 1964, 29 F.R. 7956 and notices and petitions to intervene were due on or before July 13, 1964.

Perryton claims, among other things, in its application for rehearing that the Commission was not aware of all of the material and relevant facts involved in this case when it authorized the instant abandonment. Perryton avers, *inter alia*, that (1) High Plains proposes to raise Perryton's rate from 30¢ to 34¢ per Mcf based on the abandonment authorization, the effect of which was to make Warren's sale to High Plains a non-jurisdictional one and to free Warren of the filing and refund provisions of Sections 4(d) and 4(e) of the Act.[1] (2) High Plains is purchasing higher cost gas from Transwestern and/or from other parties at, or in excess of, 17¢ to replace reserves previously available and dedicated to High Plains from Warren at the Sitter Plant; (3) Warren is now selling gas to Transwestern at 17¢ without refund obligation from the Sitter Plant; (4) the net effect of (2) and (3) above is that there has been an exchange of gas in or affecting interstate commerce which will increase the weighted average field price to High Plains in Texas to 16.5¢ per Mcf in 1965 from 13.2¢ in 1963 and 12.8¢ in 1962; (5) High Plains has inadequate gas reserves with the cancellation of the dedication of Warren reserves; (6) High Plains' gas purchases from Warren will drop from 1021.3 Mmcf in 1962 and 524.6 Mmcf in 1963 to 385.9 Mmcf in 1965 under a new contract entered into between Warren and High Plains on April 28, 1964; and (7) abandonment authorization for High Plains' jurisdictional operations is a prerequisite to action on Warren's abandonment application.

In its answer filed on September 29, 1964, Warren states that (1) the needs of High Plains' Oklahoma customers are fulfilled from Oklahoma produced gas; (2) all of the gas consumed in Texas by High Plains' customers is produced in Texas; (3) no gas moving in any part of High Plains' system crosses any state line; (4) Warren under its intrastate contract has in effect agreed to supply

[1] The underlying rate under Warren's Rate Schedule No. 29 was 10¢. The unilateral proposed increased rate of 17¢ per Mcf under that rate schedule filed after the contract term had expired was suspended in Docket No. RI64–602 and when made effective would have been subject to refund.

High Plains the maximum amount taken by High Plains in any year under the previous contract, and therefore High Plains will continue to have an adequate supply of gas; (5) no gas consumed by High Plains' customers in Texas and Oklahoma will be purchased from any pipeline company; and (6) Perryton has not shown extraordinary circumstances for permitting intervention in these proceedings at this late date as required by Section 1.8(d) of the Commission's Rules of Practice and Procedure. The factual assertions above are based on a general affidavit of a High Plains' official included in the abandonment application but no details as to High Plains operations are adduced.

In the absence of protest by any interested party we granted the abandonment application on the basis of the general allegations in the application, including an allegation that its grant would result in better service to High Plains' customers, despite the failure of High Plains contemporaneously to seek abandonment of its existing authorizations to conduct interstate operations. In view of the allegations made in the instant application we believe it clear that a hearing in which the essential jurisdictional facts can be fully canvassed on an evidentiary record is appropriate. Extraordinary circumstances have been shown by Perryton which justify in our opinion its late filing of notices of intervention in Docket Nos. CI64–1466 and G–4165. It also appears that the participation of Perryton may be in the public interest. Since the jurisdictional operations of High Plains are related to Warren's application for abandonment, we also think it appropriate to make High Plains a party to these proceedings, as hereinafter ordered.

The Commission orders:

(A) For the reasons set forth above, the above-entitled proceedings are hereby reopened on our own motion for rehearing of the order issued August 28, 1964, herein for the purpose of setting these matters for formal hearing so as to determine whether the present or future public convenience or necessity permit the abandonment requested by Warren in Docket No. CI64–1466 in accordance with the provisions of Section 7(b) of the Natural Gas Act.

(B) Perryton is hereby permitted to intervene in Docket Nos. CI64–1466 and G–4165 subject to the Rules and Regulations of the Commission: *Provided, however,* That the participation of Perryton shall be limited to matters affecting asserted rights and interests specifically set forth in its notice of intervention; and *Provided, further,* That the admission of Perryton shall not be construed as recognition by the Commission that it might be aggrieved by any order or orders entered in these proceedings.

(C) High Plains is hereby made a party to the above-entitled proceedings.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

AREA RATE PROCEEDING ET AL (PERMIAN BASIN), DOCKET NO. AR61–1, ET AL.

ORDER DENYING MOTIONS FOR CLARIFICATION OF DECISION OF PRESIDING EXAMINER

(Issued October 26, 1964)*

The presiding examiner's initial decision and proposed order in the above-entitled matter was issued September 17, 1964. By its order of September 25, 1964 [Unreported], the Commission extended to November 23, 1964, the time

*Order issued November 20, 1964 denying rehearing, 32 FPC 1342.

for filing exceptions to the initial decision; extended to December 24, 1964, the time for filing replies to the exceptions; and fixed January 12, 1965, for the commencement of oral argument.

On October 5, 1964, 8 of the 14 proponents of the present motion moved that additional extensions of time be granted, and that oral argument be postponed until March 2, 1965. By order issued October 20, 1964, *supra*, p. 1143, the Commission granted that motion to the extent of extending the time for filing briefs opposing exceptions to January 15, 1965, and delaying oral argument until February 8, 1964.

The eight proponents of the motion of October 5, 1964, were joined by six others in filing the present motion on October 13, 1964. In short, the present motion requests that the Commission direct the presiding examiner to clarify certain aspects of the initial decision issued September 17, 1964. One of the movants, Pan American Petroleum Corporation, filed a supplemental motion October 14, 1964, specifying additional questions for clarification. On October 19, 20, and 21, 1964, Hunt Oil Company, The Atlantic Refining Company, The British-American Oil Producing Company, Southland Royalty Company, Westates Petroleum Company, and Perry R. Bass, Operator, *et al.*, joined in the motion of October 13, 1964.

We do not think that the motion is well taken. There is no provision in our rules for reconsideration of examiners' decisions for the good reason that such an additional procedural hurdle would unnecessarily delay the decision-making process. Any error, ambiguity, or omission in the initial decision and proposed order by the presiding examiner can be dealt with by the Commission in the course of its consideration of exceptions to that decision and order. No substantive rights of the parties will be prejudiced by adhering to the customary procedure. The motion and supplementary motion will be denied.

The Commission finds:

Good cause has not been shown for remanding the proceeding to the presiding examiner for clarification of the initial decision issued herein September 17, 1964.

The Commission orders:

(A) The motion that the Commission direct the presiding examiner to clarify his initial decision in this proceeding issued September 17, 1964, which motion was filed October 13, 1964, by Humble Oil & Refining Company, Amerada Petroleum Corporation, Cities Service Oil Company, Continental Oil Company, Gulf Oil Corporation, Marathon Oil Company, Pan American Petroleum Corporation, Phillips Petroleum Company, The Pure Oil Company, Shell Oil Company, Sinclair Oil & Gas Company, Socony Mobil Oil Company, Inc., The Superior Oil Company, and Texaco Inc., which motion was adopted by Hunt Oil Company October 19, 1964, by Perry R. Bass, Operator, *et al.*, and joined in by The Atlantic Refining Company, The British-American Oil Producing Company, Southland Royalty Company, and Westates Petroleum Company on October 20, 1964, be and the same hereby is denied.

(B) The supplemental motion that the Commission direct the presiding examiner to clarify certain portions of his initial decision issued September 17, 1964, which supplemental motion was filed October 14, 1964, by Pan American Petroleum Corporation, and adopted by Perry R. Bass, Operator, *et al.*, October 21, 1964, be and the same hereby is denied.

OPINION AND ORDER ISSUING CERTIFICATES OF PUBLIC CONVENIENCE AND NECESSITY, DETERMINING IN-LINE PRICE AND PROVIDING FOR REFUNDS

(Issued October 26, 1964)*

Syllabus

1. Exclusion of cost and economic evidence is proper in Section 7 producer certificate proceeding. P. 1185.
2. In determining in-line prices, Commission places greater emphasis on contracts contemporaneous with those involved here. P. 1185.
3. Dexter and Cranfield sales [the highest prices] accorded less weight than usually accorded permanent certificates in in-line proceedings because of history of prices in adjacent South Louisiana area and Commission's traditional refusal to establish price level at highest price charged in area. P. 1186.
4. Commission sets in-line price of 20.6 cents per Mcf for Mississippi area, including tax reimbursement. P. 1188.
5. Moratorium prescribed on filing of increased prices above 24 cents until January 1, 1968. P. 1188.
6. Refunds required where producer temporary certificates were so conditioned. P. 1189.
7. Where temporary certificate had no refund provisions, producers are afforded opportunity to file briefs, respecting whether and to what extent, refunds should be ordered. P. 1189.
8. Commission *issues* certificates of public convenience and necessity; *determines* in-line price and *provides* for refunds.

Justin R. Wolf, Charles A. Case, Jr., and *Woollen H. Walshe* for The California Company.

Albert C. McClain and *Jessee H. Foster, Jr.*, for Humble Oil & Refining Company.

---

*Initial decision appears on p. 1193. Opinion No. 445–A, issued December 22, 1964 denying rehearing, 32 FPC 1498.

J. P. Hammond, Harold H. Young, Jr., and *Carroll L. Gilliam* for Pan American Petroleum Corporation.

Thomas M. Knebel and *Bryce Rea, Jr.*, for Ridgway Management, Inc.

Sherman S. Poland, Richard J. Dent and *Hawley C. Kerr* for Skelly Oil Company.

John A. Ward III, Philip D. Endon, Charles F. Heidrick and *J. Colbert Peurifoy* for Sun Oil Company.

Carl J. Babin and *Saunders Gregg* for Union Producing Company.

Robert H. McFarland for State Oil and Gas Board of Mississippi.

Edwin F. Russell and *Harry G. Hill, Jr.*, for The Brooklyn Union Gas Company.

James O'Malley, Jr., Halcyon G. Skinner, Ronald D. Jones and *Eugene B. Thomas, Jr.*, for Consolidated Edison Company of New York, Inc.

James R. Lacey, J. Harry Mulhern and *Edward S. Kirby* for Public Service Electric & Gas Company.

S. G. Miller, H. P. Sullivan and *D. Blanken* for Philadelphia Electric Company.

William T. Coleman, Jr., and *Robert Maris* for Philadelphia Gas Works.

Barbara M. Suchow, Kent H. Brown and *Charles J. Cox* for Public Service Commission of the State of New York.

Herbert E. Squires and *Alan R. Squires* for Pennsylvania Public Service Utility Commission.

L. G. Folsom and *Alan Post* for Atlanta Gas Light Company.

Harry S. Littman and *Harold L. Talisman* for Alabama Gas Corporation.

John M. Kuykendall, Jr., for Mississippi Valley Gas Company.

Thomas M. Knebel and *Bryce Rea, Jr.*, for Willmut Gas & Oil Company.

Hugh J. Morgan, Jr., for Southern Natural Gas Company.

Wilbert O. Crain, David Klotz and *Vernon W. Woods* for United Gas Pipe Line Company.

William I. Harkaway and *David B. Ward* for the Staff of the Federal Power Commission.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

O'CONNOR, *Commissioner:*

This is a producer certificate proceeding under Section 7(c) of the Natural Gas Act where the only important issues are price and refund. There are involved 25 separate sales from fields in the State of Mississippi to Southern Natural Gas Company (17 sales), United Gas Pipe Line Company (7 sales) and Texas Eastern Transmission Corporation (one sale). The sales are made under contract, or amendments of earlier contracts, dated from 1957 to 1963 with prices ranging from 19.8 cents per Mcf to 21.5 cents per Mcf at 15.025 psia excluding any tax reimbursement. Upon application the Commission has granted a temporary certificate in each case. Details of the several applications, contracts and temporary certificates are shown in Appendix A hereto.

Procedurally the applications here were consolidated and, after a prehearing conference, were the subject of a hearing before the examiner on November 12, 1963. After the filing of briefs the examiner issued his decision on June 3, 1964. The examiner rejected cost and economic evidence and found an in-line base price of 20.0 cents for the period 1957–1962. To this he added an allowance for tax reimbursement of .618 cents representing about half the tax rate, pointing out that few contracts provided for the full rate. He required refunds of any revenues in excess of the total in-line price of 20.618 cents whether or not the temporary certificates contained refund conditions.

Eight producing parties have filed briefs on exceptions,[1] as has the Commission's staff and the Public Service Commission of the State of New York (adopting the staff's brief). In opposition variously to the exceptions are briefs of Humble Oil & Refining Company, Pan American Petroleum Corporation, and, jointly, of Philadelphia Electric Company, the Philadelphia Gas Works, Division of The United Gas Improvement Company and Public Service Electric & Gas Company (Intervenors).

Several of the producer applicants served jointly sponsored evidence purporting to show 1965–1970 projected annual demands for natural gas and required production, nationwide costs to producers and their financial requirements, trends as to supply-demand and market price-cost relationships, and the necessary area price required to compensate for costs and attract capital. The examiner sustained the objection of the staff to these items on the ground that the initial price is to be determined by the in-line price.

In view of the position taken by the Commission in *Skelly*, 28 FPC 401, and *Texaco Seaboard*, 29 FPC 593; its reiteration in *Union Texas Petroleum*, 32 FPC 254, Opinion No. 436, Docket No. G–13221, *et al.*; and its affirmance by the courts in *P.S.C. of N.Y.* v. *F.P.C.*, 329 F. 2d 242 (CADC–1964.), certiorari denied *Skelly Oil Co.* v. *F.P.C.*, 377 U.S. 963 (June 8, 1964), *California Oil Co.* v. *F.P.C.*, 315 F. 2d 652, 660 (CA10) and *The Atlantic Refining Co.* v. *F.P.C.*, 316 F. 2d 677, 680 (CADC), we think the examiner was correct in excluding this kind of evidence in a Section 7 certificate proceeding.

We are, of course, aware of the opposite result reached in *Callery Properties, Inc.* v. *F.P.C.*, 335 F. 2d 1004 (CA5–1964). The mandate of the Court of Appeals has been stayed in that proceeding to give the Commission time to file an application for certiorari. In these circumstances we see no reason to depart from the opinions cited above.

The record in these proceedings contains evidence on the gas contracts in the Mississippi area covering a number of years. The question arises as to what contracts should be used in determining the in-line price. The staff placed in evidence all contracts under permanent certificates dated June 7, 1954, through August 31, 1963, arguing that to avoid distortions caused by comparing too few sales all contracts for this period should be considered. The examiner agreed that a shorter period would be unduly restrictive, for appraisal of any price level requires a proper regard for historical facts. On the other hand the producers argue that the 1957–1962 period should be used and their witness introduced evidence on this basis.

This question is really one of emphasis, and the greater emphasis should be placed on the prices contemporaneous with those in question. The earliest date of a contract, or amendment, in the applications consolidated herein is October 28, 1957, and the latest is March 8, 1963. In *Skelly* (28 FPC at p. 408) the staff evidence extended from 1955, but the Commission tabulated and gave most thought to the comparative contracts for the years 1958–1960 that were roughly contemporaneous with the contracts involved in the proceeding, and this approach to the period was approved on review. *P.S.C. of N.Y.* v. *F.P.C.*, 329 F. 2d 242 (CADC). In *Texaco Seaboard*, 29 FPC 593, 597, the Commission used the same years to determine the in-line price for the contract executed on July 1, 1960. Here the period for special attention should start with 1957 and go to February 11, 1963, the date the last contracts shown by the staff study were executed.

---

[1] General American Oil Company of Texas, Pan American Petroleum Corporation, Union Producing Company, Sun Oil Company, California Company (a division of California Oil Company), Skelly Oil Company, Humble Oil & Refining Company, and Texaco Inc. (adopting Humble's brief).

The contracts executed during the 1957–1963 period for sales under permanent certificates in the Mississippi area are as follows:

Price (¢/Mcf)	1961 volumes (Mcf)	Cumulative volumes (Mcf)	Number of contracts	Cumulative contracts
11.0	176,000	176,000	2	2
14.0	558,562	734,562	1	3
15.0	972,000	1,706,562	2	5
17.0	346,553	2,053,115	3	8
17.5	89,015	2,142,130	1	9
18.0	1,482,846	3,624,976	5	14
18.5	2,341,778	5,966,754	2	16
20.0	5,169,484	11,136,238	28	44
20.25	6,813,676	17,949,914	4	48
21.5	29,796,157	47,746,071	3	51
Total	47,746,071		51	

All of the 20-cent contracts except two were for sales from the Maxie-Pistol Ridge Field to United. The four sales at 20.25 cents were from the Dexter Field and the three sales at 21.5 cents were from the Cranfield Field.

In the prior period June 7, 1954, through 1956 there were two contracts at 15 cents, 4 contracts at 19 cents, 1 contract at 18 cents and 54 contracts at 20 cents. All of these 20-cent contracts likewise represent sales from the Maxie-Pistol Ridge Field to United.

An issue arises with respect to the treatment of the seven sales at the highest prices from Dexter and Cranfield Fields. These sales were all to Southern Natural. They amounted to 6,813,676 Mcf from Dexter and 29,796,157 Mcf from Cranfield, or 8.5 percent and 37.16 percent, respectively, of the total 1961 volumes of 80,200,000 Mcf produced under the 1954–1963 contracts. They constituted about 77 percent of volumes delivered under contracts executed in the shorter 1957–1963 period.

Despite the large volumes of gas, the examiner eliminated these contracts. He concluded that the prices were essentially isolated and had no direct relation either to prices then generally current in the area or area price trends. The staff generally approved the examiner's position, adding that any weight accorded to these sales must be balanced against the background of a questionable history. Staff concluded that no sales should be permitted above 20.0 cents. The producers, on the other hand, object strenuously to exclusion of the Dexter and Cranfield sales saying that they are sales within the relevant area under contracts executed within the relevant period and are not suspect because of any litigation.

We conclude that the Dexter and Cranfield sales should not be completely excluded from consideration, but because of the history of prices in the adjacent South Louisiana area should be accorded far less weight than permanent certificates are usually accorded in in-line proceedings. In *South Georgia Natural Gas Co.*, 22 FPC 211, the Commission approved the price for the Cranfield sales and sales at the same price in the South Louisiana area. However, in *Placid*, 30 FPC 283[2] and *United Gas Pipe Line Co.*, 30 FPC 329,[3] the Commission found the price line in Southern Louisiana was 20.0 cents including reimbursements and, in effect, overruled the *South Georgia* case to the extent it applied to South Louisiana. Both the *Placid* and *United* cases depended on the suspect

[2] Remanded in *Callery Properties, supra.*

[3] Appeal dismissed as *Gulf Oil Corp.* v. *F.P.C.*, 330 F. 2d 824 (CA5).

prices doctrine. Prices above 20.0 cents had been subject to the *CATCO* litigation,[4] *United Gas Improvement Co.* v. *F.P.C.*, 283 F. 817 (CA9, 1960) and *Transcontinental Gas Pipe Line Corp.*, 20 FPC 264, remanded in *P.S.C. of N.Y.* v. *F.P.C.*, 361 U.S. 195 (1959). Here we are concerned with an area that we have considered sufficiently distinct so that we have separated it from the South Louisiana area. The prices for the Cranfield and Dexter sales are not subject to litigation; they are not equal to any other Mississippi prices subject to litigation other than in these proceedings; and they do represent a large proportion of the gas sold in the area in question. However, we cannot ignore that, were the *South Georgia* case before us initially today, that decision might well be different.

We agree with the examiner that the quality provisions of the contracts involved are sufficiently similar to those for the permanently certificated sales to permit a direct comparison of prices. Looking at the sales from 1954–1963, all of the sales involved here are made at the wellhead or in the field, as are most of the permanently certificated sales. In such matters as sulphur content, dehydration, and heating value the two groups of contracts are comparable. Most of the contracts for the subject sales provide for an escalation of 2 cents in 4 years, as do the Dexter and Cranfield sales, yet almost all of the 20-cent certificated Maxie-Pistol Ridge sales provide for an escalation only once in 5 years, representing less advantageous terms to the producer. The volumes in each group of contracts vary greatly. The sale with by far the largest volume is one of the Cranfield sales, a fact that should tend to reduce its comparability. Delivery pressures for the sales included here are 1000, 1100 or 1200 psig. Most of the permanently certificated sales are made at only 1000 psig, while the Dexter sales are at 1100 psig and the Cranfield sales are at 1200 psig. However, four sales from the Muldon field in 1955 are made at 1400 psig at the base price of only 19 cents, and two sales from the Beans Ferry field in 1960 are made at 1200 psig for only 17 cents.

We thus come to the principal question of the proper Mississippi price line. We will, as did the examiner, first determine an appropriate base price, and then determine an additional tax reimbursement allowance.

The tabulation, set out above, reveals that the preponderance of 1957–1963 certificates were issued at 20 cents. Thus, of the 51 relevant certificates, 28 were issued at 20 cents, and 16 more were issued at prices below 20 cents. For the full period of June 7, 1954, through August 31, 1963, 84 out of 116 certificates are at 20 cents, and 109 are at 20 cents or below.

For the contracts executed in the 1957–1963 period the weighted average price for gas moving under the relevant certificates, if full weight is given the Cranfield and Dexter sales, is about 20.6 cents. Two factors militate against giving these sales full weight: first, their previously discussed background; and second, the Commission's traditional refusal to establish a price line at the highest price charged in the area, particularly where, as here, there has been a decline in the area's weighted average base price. The record indicates that the weighted average base price rose from 19.1 cents in 1954 to 21.4 cents in 1958, but then declined to 19.2 cents in 1961 and 18.6 cents in 1962. On the other hand, by completely excluding these sales from consideration, a treatment we similarly find unjustified, the area's weighted average base price for contracts executed in the 1957–1963 period declined to about 18.4 cents. After careful consideration

[4] *Atlantic Refining Co.* v. *P.S.C.*, 360 U.S. 378.

of the most prevalent price at which permanent certificates were issued, and the weighted average base price moving thereunder—attributing appropriate probative value to the Cranfield and Dexter sales—we conclude, as did the examiner, that a base price of 20 cents is consonant with the public convenience and necessity.

To the base "in-line" price the examiner would add an allowance for the severance tax in effect throughout the period 1957–1963. The applicants would use the full 6 percent rate when included in the price, while the staff would have determined the price line (at 20.0 cents) on the basis of total price including tax reimbursements. During the period April 1, 1955 through June 30, 1958, the tax carried an added 0.84 cents which the examiner, applicants and the staff excluded from consideration. The examiner noted that the tax reimbursement provisions vary among the contracts. Generally the Maxie-Pistol Ridge contracts as originally filed do not provide for presently effective tax reimbursement but do provide for a 75 percent reimbursement of any future tax. Some of the Maxie-Pistol initial prices as shown in the staff exhibit reflect reimbursement of part of the temporary additional tax referred to above, and there is one instance where a Maxie-Pistol 20-cent initial base price has added to it a 1 cent tax reimbursement. The tax reimbursement added to the price for other fields, including Cranfield and Dexter, approximates 6.4 percent of the price because of the tax on a tax method of computation used in Mississippi. In view of the predominance of the 20-cent prices (without tax reimbursement for the tax now in effect except for one contract) we are of the opinion that the use of the lowest level reimbursement in the amount of 3.09 percent as exemplified by the sale from Shell Oil Company to Texas Eastern Transmission Company in the Skoam Field represents an allowance for the tax reimbursement which would be in line, and we specifically adopt the examiner's decision on this point. Using this approach we arrive at a total initial in-line price including tax reimbursement for the Mississippi area at the level of 20.618 cents per Mcf at 15.025 psia, which we shall round out to 20.6 cents per Mcf. This price will apply to all of the sales here involved.

In proceedings relating to the Southern Louisiana area, *Placid, United Gas Pipe Line Company* and *Union Texas, supra*, we prescribed a moratorium on rate increase filings above a certain level in addition to determining the price line. Although we realize that the *Callery* case discussed *supra* was decided subsequently and held it improper to place a moratorium on rate increase filings, as previously indicated, we do not consider ourselves bound by that decision. In order to protect the public a moratorium should be established, and we think that the appropriate level is 24 cents per Mcf with a time limit of January 1, 1968. The level at which prices will be triggered or redetermined is approximately at this level, which reflects other prices now in effect in the area (although subject to refund) and represents the highest increased price which we have previously permitted to be filed without setting for immediate hearing. In relation to the 20.6 cents per Mcf found here to be the price line it represents a reasonable limit on rate increase filings for the period of approximately 3 years in order to prevent new plateaus of prices from being established in the area but it also provides flexibility in making filings for the producers. Of course, in any case the filings will be subject to suspension and refund. Therefore we shall prescribe a moratorium on the filing of prices above 24 cents until January 1, 1968. If any of the producers involved here have a factual basis for taking a contrary view of the establishment of a moratorium at this level, they have opportunity to so state in applications for rehearing.

The examiner required each certificate applicant here to refund to his respec-

tive pipeline purchasers with interest a sum reflecting the difference between the price collected and the total price of 20.618 cents from the date of first delivery until the refund has been made. The temporary authorizations in these proceedings contained, as shown in Appendix A, provisions either for refunding with no floor, refunding with a floor of 20.0 cents, or refunding with a floor of 20.0 cents plus applicable tax reimbursements, or they contained no provisions for refunding.

The producers variously contend that the examiner has worked a basic inequity upon them where there was no refund condition in their temporary certificates or where their floor was higher than the examiner's "in-line" rate of 20.618 cents. They say they accepted temporary certificates permitting them to charge a certain rate, and have a right to rely on them. The Commission, they add, is obligated to act upon producer applications with such certainty as to allow them a choice. They also argue that the rates under temporary certificates filed with the Commission are the legally effective rates and the Commission is not empowered to determine the lawfulness of past rates or grant reparations. They say that the record here is insufficient to show whether it would be equitable to order refunds and the Commission must afford them an opportunity to show that a refund requirement would be inequitable.

Where there are refund provisions in the producer temporary certificates, we will herein condition the issuance of permanent certificates upon compliance with these provisions. See *Union Texas Petroleum*, 32 FPC 254, Opinion No. 436, Docket No. G–13221, *et al.*, issued July 23, 1964, at p. 265.

In the case of the producers having no refund provisions in their temporary certificates, a question of equity arises as to whether and to what extent a refund should be ordered. *P.S.C.* v. *F.P.C.*, 329 F. 2d 242 (CADC, 1964). In this situation we shall follow the procedure employed in the *Union Texas* case where we provided opportunity to file briefs and to present evidence on the issue.

In accordance with the recommendations of the examiner and our past practice we shall condition the certificates issued in these proceedings (except in Docket No. G–18447 with no such clause) to provide that take-or-pay clauses are subject to the Commission's ultimate disposition with respect to such provisions in the rule-making provision in Docket No. R–199, subject to the limitation that producers will not be required to file amended take-or-pay provisions for less than 80 percent of the annual contract quantities. The producers contend there is no evidence in support of this condition, but in our opinion no evidence is necessary to show that consumers involved should receive the protection of the final result of the proceedings in R–199, subject to a limitation to make producer certificates more definite.

The Commission further finds:

(1) Applicants herein listed in the caption of this opinion are engaged in the sale of natural gas in interstate commerce for ultimate public consumption and each is, therefore, a "natural-gas company" within the meaning of the Natural Gas Act.

(2) The sales of natural gas hereinbefore described, as more fully described in the applications, are made in interstate commerce, subject to the jurisdiction of the Commission, and such sales, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, are subject to the requirements of subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Subject to the requirements of our order herein and the conditions attached to the certificate herein issued, the applicants are able and willing properly to do the acts and to perform the services proposed, and to conform to the provi-

sions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The sales of natural gas by the independent producers referred to in the above paragraph (1), together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, are and have been required by the public convenience and necessity, and certificates therefor should be issued as hereinafter ordered and conditioned.

(5) The conditions attached to the certificates herein issued are required by the public convenience and necessity.

(6) Except as herein granted, the exceptions to the examiner's decision should be denied.

The Commission orders:

(A) Certificates of public convenience and necessity, and amendments to orders issuing certificates of public convenience and necessity, are hereby issued to the several applicants named in the caption of this decision for the sale of gas in interstate commerce for resale as proposed in several applications, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, upon the terms and conditions set forth below.

(B) Each certificate issued, and amendment granted, as provided in paragraph (A) above, is hereby conditioned to prohibit a total initial price, including all reimbursements and charges, greater than 20.6 cents per Mcf at 15.025 psia, from the date of issuance of this order until such prices may be lawfully changed in the manner provided by the Natural Gas Act.

(C) Each certificate issued in paragraph (A), is further conditioned to provide for a moratorium on the filing of all price increases in excess of 24 cents per Mcf, inclusive of tax reimbursement until January 1, 1968.

(D) Within 30 days from the date of issuance of this order each of the applicants receiving certificates or grants in paragraph (A) hereof, whose proposed total initial price exceeds the 20.6 cents aforesaid, shall file a supplement to its presently filed rate schedule, related to its respective application, reflecting the conditioned price as the total initial price in lieu of the higher initial price provided in the contract or amendment; provided that with respect to the reduction in rates hereby ordered, applicants need not comply with the notice provisions of Section 154.94(b) and the detailed submittal provisions of Section 154.94(f) of the Regulations under the Natural Gas Act.

(E) Within 60 days from the date of issuance of this order the applicants listed in this paragraph shall make refunds to their respective pipeline purchasers with interest at a rate of 6 percent per annum for all gas paid for prior to March 1, 1960, and 7 percent per annum thereafter until full refund has been made. For Skelly, G–14712; Central Oil, G–18477; Tidewater, CI61–1689; Pan Am, CI62–46; Humble, CI62–129 (first letter) and CI62–130; Sun, CI62–156 and G–8592; and Union, G–15077, the refund shall be equal to the difference between the price charged to and collected from the purchaser and 20.6 cents per Mcf applied to all volumes paid for by such purchaser under the respective contract or amendment which comprises a subject matter of this proceeding from the date of the first delivery of natural gas thereunder until the effective date of this order.

For Humble, G–19200 (original application); Calco, G–19345; and Pan Am, CI60–128, the refund shall reflect the difference between the price charged to and collected from the purchaser and 21.27632 cents per Mcf representing 20 cents plus the applicable tax, and shall be computed in the same way as for the other docket numbers above.

(F) With respect to the applications of Sun, G–19015 and CI63–283; Humble, G–19200 (amendment) and CI62–129 (remaining part); Monsanto, CI63–249; Calco, CI63–563; Texaco, CI63–1409, General American, G–18054, and Texas Pacific, G–19512, the decision whether refunds should be ordered as a condition to the permanent certificates is deferred for subsequent determination. Within 30 days from the date of issuance of this order the parties to this proceeding, to the extent desired, may file briefs directed to the issue whether refunds should be ordered in any or all of the dockets and the extent of such refunds, if any. Replies may be filed within 10 days of service of the briefs. Any party who wishes to introduce into the record evidence as to additional facts which might bear upon the ultimate determination of this matter shall file with its brief, within 30 days from the date of issuance of this order, a statement of such additional facts and of the evidence by which it is proposed to establish such facts.

(G) Within 10 days of the date of the refunds provided for in paragraph (D) hereof, each of the applicants shall file with the Commission its statement showing the amount of refund, its manner of computation, and the interest payments related thereto, and a statement from the purchaser acknowledging receipt thereof.

(H) The certificates herein issued, and the amendments herein granted, except in Docket No. G–18477, are upon the express condition that the allowance of the take-or-pay provisions in the applicant's contract or amendment is subject to the Commission's ultimate disposition with respect to such provisions in the rule-making proceeding in Docket No. R–199. Upon the establishment, by regulation or policy statement, of a general policy governing such provisions in producer contracts, each applicant shall, within 30 days, file its amended rate schedule in conformity therewith, acceptable to the Commission, provided that the applicant shall not be required to file a take-or-pay provision for less than 80 percent of the annual contract quantity and, provided further, that any rate schedule changes or modifications to be made in accordance with this paragraph shall be prospective only.

(I) The certificates issued by paragraph (A) hereof are not transferable and shall be effective only so long as each respective applicant continues the acts and operations hereby authorized in accordance with the provisions of the Natural Gas Act and the applicable rules, regulations and orders of the Commission.

(J) The grant of the certificates and amendments herein shall not be construed as a waiver of the requirements of Section 4 of the Natural Gas Act, or of Part 154 of the Regulations thereunder except as specifically provided in paragraph (C) hereof. Such grant is without prejudice to any findings or order which have been or may hereafter be made by the Commission in any proceeding now pending or hereafter instituted by or against the applicants or any one of them. Further, the action in this proceeding shall not foreclose nor prejudice any further proceedings or objections by the Commission relating to the operation of any price or related provision in the gas purchase contracts or amendments here involved.

(K) The certificate herein issued to Sun Oil Company in Docket No. G–19015 is conditioned upon its being accepted in writing by the applicant within 30 days of the issuance of this order.

(L) The examiner's decision is adopted as the decision of the Commission except where inconsistent herewith as in the treatment of the Cranfield and Dexter Field contracts and the computation of refunds.

(M) Exceptions not granted are hereby denied.

[1] As supplemented 2–22–61.
[2] 19 years, 2 months, and 27 days.
[3] Many of these prices are conditioned from higher prices, usually around 22.87¢.
[4] Refund provision in temporary certificate with no floor for whole or part of acreage.
[5] Refund provision in temporary certificate with floor of 20.0¢.
[6] Refund provision in temporary certificate with floor of 20.0¢ plus applicable tax reimbursements.
[7] No refund provision in temporary certificate for whole or part of acreage.
[8] As supplemented 2–14–61.
[9] As supplemented 3–8–63.
[10] Conditioned from 24.0¢ proposed.

INITIAL DECISION

OF THE PRESIDING EXAMINER UPON CERTIFICATE PROCEEDINGS UNDER SECTION 7 OF THE NATURAL GAS ACT INVOLVING INITIAL PRICES OF PRODUCERS

(Issued June 3, 1964)

SIMPSON, *Presiding Examiner:* The proceeding concerns applications filed by 17 independent producers pursuant to Section 7(c) of the Natural Gas Act (Act) for certificates of public convenience and necessity to authorize 25 separate sales of natural gas from fields located in the State of Mississippi,[1] in all to three pipeline companies, *viz*, Southern Natural Gas Company (Southern, 17 sales), United Gas Pipe Line Company (United, 7 sales), and Texas Eastern Transmission Corporation (Texas Eastern, one sale).

The filings, including a resubmittal, were effected at various times from November 25, 1957, to and including May 16, 1963. Two represent separate ratifications of an earlier contract,[2] three an amendment placing additional reserves under an earlier certificated contract or sale,[3] and two were supplemented by amendments adding reserves.[4]

Thereafter, on requests based principally upon various allegations of economic hardship and emergency, including flaring of casinghead gas and waste, payment of shut-in royalties, maintenance of leaseholds, drainage, and development requirements, the Commission issued a temporary certificate in each docket without prejudice, however, to such final disposition of the application as the record relating thereto may require, imposing in sixteen instances a price condition, and providing in eleven for a refund variously with or without a floor.[5]

Subsequently by order issued August 6, 1963, the Commission consolidated the foregoing matters for hearing and decision and, pursuant to the provisions of

---

[1] Applicants, dockets, and fields are: The California Company, a Division of California Oil Co. (Calco), G–19345, Hub, and CI63–563, Knoxo; Central Oil Co., Operator, *et al.* (Central), G–18477, Martinville; Dees, M. H., G–19207, Pistol Ridge; Discovery Oil & Gas Co., Inc., Operator (Discovery), CI60–834, Maxie-Pistol Ridge; General American Oil Co. of Texas (General), G–18054, Dexter; Hall, Stanton A. (Hall), CI61–520 Maxie-Pistol Ridge; Humble Oil & Refining Co. (Humble), G–19200, Hub, CI62–129, Knoxo, and CI62–130, Kokomo; McRae, L. C. (McRae), G–13803, Pistol Ridge; Monsanto Chemical Co. (Monsanto), CI63–249, Kokomo; Pan American Petroleum Corporation (Pan Am), CI60–128, Hub, CI62–46, Grange, and CI63–1020, East Muldon; Ridgway Management, Inc. (Ridgeway), G–18864, Maxie-Pistol Ridge; Joseph E. Seagram & Sons, Inc., successor in interest to Texas Pacific Coal and Oil Co. (Seagram), G–19512, Dexter; Skelly Oil Co. (Skelly), G–14712, Dexter; Sun Oil Co. (Sun), G–8592, Maxie-Pistol Ridge, G–19015, Dexter, CI62–156, Kokomo, and CI63–280, Knoxo; Texaco Inc. (Texaco), CI63–1409, Kokomo; Tidewater Oil Company (Tidewater), CI61–1689, Grange; and Union Producing Co. (Union), G–15077, Dexter. The foregoing fields are located variously in some nine counties including Forrest, Jefferson Davis, Lamar, Lawrence, Marion, Monroe, Pearl River, Simpson, and Walthall counties.

[2] Monsanto's application at CI63–249, and Texaco's at CI63–1409, each ratifying Sun's contract at CI62–156.

[3] Sun's application at G–8592; Skelly's at G–14712; and Union's at G–15077.

[4] Humble's applications at G–19200 and CI62–129, respectively.

[5] Conditioning the price at 21.5¢, plus tax, with a floor of 20¢: Humble, G–19200 (part); Calco, G–19345; Pan Am, CI60–128, each issued August 4, 1960. Conditioning the price at 21.5¢ including tax, with a floor of 20¢: Sun, G–8592; and Union, G–15077; and conditioning the price at 21.5¢, including tax, without a floor: Skelly, G–14712; Tidewater, CI61–1689; Pan Am, CI62–146; Humble, CI62–130; and Sun, CI62–156; dates of issue 1961 and 1963. With no price condition, but with a general refund requirement: Central, G–18477, issued June 3, 1959. The remaining temporaries issued at a price of 20¢ plus tax (Dockets G–19512, G–18054, G–18864, and CI60–834) in 1959, or at a price which did not exceed 20¢ (Dockets G–13803, G–19207, CI61–520, and CI63–1020) and were not conditioned. In seven instances the temporary was conditioning at a price of 21.5¢ including tax, with no specific reference to a refund: Sun, G–19015; Humble, G–19200 (part) and CI62–129; Monsanto, CI63–249; Sun, CI63–283; Calco, CI63–563; and Texaco, CI63–1409.

Section 1.18 of its Rules of Practice and Procedure, directed the holding of a prehearing conference on September 17, 1963,[6] for the purpose of effectuating expeditious disposition of the proceedings and determining a date for hearing. Notice having been duly issued and published, the prehearing conference was held by the Presiding Examiner as directed by the terms of the Order, aforesaid,[7] and, in further accordance with the latter and the Presiding Examiner's Order Specifying Results of Prehearing Conference and Fixing Date of Hearing, issued September 23, 1963, the consolidated proceeding came on for hearing and was heard on November 12, 1963. Seven of the applicants,[8] 11 of the interveners,[9] and Staff, were represented by counsel appearing at the prehearing conference, and the same and 3 additional interveners participated in the hearing.[10] The testimony of three witnesses was offered and received in evidence in whole or in part,[11] but the prepared testimony of four prospective witnesses jointly sponsored by certain Applicants was, on offer and objection thereto, excluded in whole or in part, the sponsors making their offers of proof.[12] In addition, the several applications and related rate schedules were offered and received as Items by Reference.

Initial briefs were duly filed by counsel for Calco, Humble, and Texaco (joint), Pan Am, Ridgway, Skelly, Sun, and Union, Tidewater adopting that of Humble and Texaco as its own. Reply briefs were duly filed by Mississippi Valley, the New York Commission, and Staff, and rebuttal briefs likewise by Calco, Pan Am, Skelly, Sun, and Union, Humble and Texaco, respectively, adopting that filed on behalf of Pan Am.

THE ISSUES

Section 7(e) of the Act provides, in part, that a certificate shall issue where it is found that the duly qualified applicant is able and willing properly to do the acts and to perform the service and to conform to the provisions of the Act and the requirements, rules and regulations of the Commission thereunder. However, issues which might have arisen in this connection are disposed of by an agreement proposed and accepted at the prehearing conference held in these

---

[6] Postponed, by Notice of the Secretary issued August 28, 1963, to September 18, 1963.

[7] As modified by the postponement. The conference proceeded with consideration of each of the matters included in the statement of purpose contained in paragraph (C) of the order issued August 6, 1963, *supra*. The participants stipulated as to arm's-length bargaining between buyers and sellers, as to sellers being "able and willing" in terms of the requirement stated in Section 7(e) of the Act, as well as to the method of introducing certain evidence. The Presiding Examiner's order provided dates for service of the prepared evidence, motions to strike or exclude directed thereto, and answers to the latter, and provided for joint sponsorship or adoption of evidence in lieu of individual presentation thereof. It also fixed the date of hearing as November 12, 1963, at the place and time therein stated.

[8] Calco, Humble, Pan Am, Ridgway, Skelly, Sun and Union.

[9] Consolidated Edison Company of New York, Inc. (Con Ed), Public Service Electric & Gas Company (Public Service), Philadelphia Electric Company (Philadelphia Electric), Philadelphia Gas Works Division of United Gas Improvement Company (UGI), Atlanta Gas Light Company (Atlanta Gas), Alabama Gas Corporation (Alabama Gas), Southern Natural Gas Company (Southern Natural), United Gas Pipe Line Company (United Gas), Mississippi Valley Gas Company (Mississippi Valley), Willmut Gas & Oil Company (Willmut), and Public Service Commission of the State of New York (New York Commission).

[10] The Brooklyn Union Gas Company (Brooklyn Union), Pennsylvania Public Utility Commission, and the State Oil and Gas Board of Mississippi (State Board).

[11] In whole that of Applicants' witness Gody (with a minor exception) and Staff's witness Miller; and in part that of Chairman McFarland of the Mississippi State Board.

[12] The exclusion related to the whole of the prepared testimony of Radford L. Schantz, Robert H. Park, and Sherman H. Clark, respectively, and a part of that of the witness McFarland.

proceedings September 18, 1963, by and on behalf of all 20 participants present wherein each applicant is stipulated to be "able and willing" within the meaning of the foregoing provisions of the Act.

As Section 7(e) also provides that the issuance of the certificate shall rest upon a finding that the proposed service, sale and operation, to the extent authorized, is or will be required by the present or future public convenience and necessity, and authorizes the Commission to attach thereto such reasonable terms and conditions as the public convenience and necessity may require,[13] the matter at issue with respect to each of the several applications in this proceeding is, briefly, whether the proposed sale or service, at the price proposed, is or will be required by the present or future public convenience and necessity, without or with conditions attached.

THE CONTENTIONS

Applicants address various contentions, hereafter considered, specifically to the applicability of the so-called CATCO doctrine and the method of determining the "in-line" price with principal reference both to the volume factor and the period of time to be used in determining a contemporaneous price standard.[14] Calco, Humble, Pan Am, Sun, and Tidewater also contend to the effect that applications proposing an initial price of 22.8¢ to 22.87203¢, including tax,[15] or less,[16] are "in-line" for the area (Mississippi), and should be permanently certificated. In other dockets Skelly (G–14712), Sun (G–8592) and Union Producing (G–15077) also contend that a certificate should issue on the ground that the price there proposed concerns acreage added under an existing contract already certificated at the same price, while Ridgway Management, adopting Staff's presentation, contends that its proposed price (20¢) is less than the "in-line" price for the area.

Applicants further contend that under Section 7 of the Act initial price is but one factor to be evaluated in determining whether a sale should be certificated; that evidence as to market conditions and as to cost, and economic matters of a type considered by the Commission in formulating guide line rates in the Statement of General Policy No. 61–1, issued September 28, 1960, 24 FPC 818, should also be considered as relevant and material to the issue of public convenience and necessity in this proceeding; and that the Presiding Examiner's rejection of a proffer of evidence of such nature was erroneous and denied Applicants their right to a full hearing on the issue as provided by Section 7 of the Act and guaranteed by the Constitution.[17]

---

[13] In the so-called "CATCO case," *Atlantic Refining Co.* v. *Public Service Commission*, 360 U.S. 378 (1959), the Court said, with reference to the issuance of a certificate under Section 7 (p. 391): "Where the proposed price is not in keeping with the public interest because it is out of line or because its approval might result in a triggering of general price rises or an increase in the applicant's existing rates by reason of "favored-nations" clauses or otherwise, the Commission in the exercise of its discretion might attach such conditions as it believes necessary."

[14] Applicants seek to have the "in-line" price determined with reference to other contracts dated within a 6-year period (1957–1962) as against the 9-year data (1954–1963) proposed by Staff.

[15] Calco: G–19345 and CI63–563, 22.8711¢; Humble: G–19200, CI62–129, CI62–130, and CI63–1409, 22.87¢; Pan Am: CI63–46, 22.87203¢, and CI60–128, 22.8¢; Sun: CI62–156 and CI63–283, 22.8677¢; and Tidewater: CI61–1689, 22.863¢.

[16] Pan Am: CI63–1020, 19.01¢; and Sun: G–19015, 21.55¢.

[17] So, Sun at Docket G–8592, where it proposes a price of 24.0¢, including tax. A related contention is to the effect that in determining the issue of initial price the Commission is faced with the same issue it decided in determining the area guide-line price level and that giving any effect to the latter in this proceeding would be to predetermine the issue of public convenience and necessity without recognition of the right of hearing.

The State Board contends that an area "in-line price" less than 21.5¢, inclusive of tax, would be prejudicial, arbitrary, and capricious.[18]

Staff contends that data available for a period of nine years (1954–1963) must be used in determining an "in-line" price, that such a price is represented by the result of 20.0¢ without allowance for tax reimbursement, and that with respect to contracts or amendments containing a higher initial price the certificate should be conditioned to require a reduction to 20.0¢, and where, and as, the existing temporary authorization so provides, a refund with interest.[19]

The New York Commission, adopting Staff's contentions, would, however, have refunds provided whether or not the temporary authorization so provides, and Mississippi Valley, relying upon Staff's evidence in the premises, contends for an "in-line" price of 20¢ per Mcf.

THE EVIDENCE AND FINDINGS

Jurisdiction

Participants do not challenge the jurisdiction of the Commission to issue the certificate for which Applicants severally apply, and it affirmatively appears from either the verified application,[20] sales contract,[21] relation to a previous certificate,[22] or other data,[23] that each Applicant is engaged under a temporary certificate, or will be engaged if certificated herein, in the sale in interstate commerce of natural gas for resale for ultimate public consumption, subject to the jurisdiction of the Commission, and that, accordingly, each is, or will be, a "natural-gas company" within the meaning of the Act, and such sales, together with the construction and operation, of facilities necessary therefor, are, or will be, subject to the requirements of Sections 7(c) and (e) of the Act.

The Exclusion of Evidence

Pursuant to the direction of the Presiding Examiner included in the order issued September 23, 1963, specifying results of the prehearing conference held herein on September 18, 1963, several Applicants and the State Board served certain various jointly sponsored evidence, consisting of the prepared testimony and exhibits of four proposed witnesses (Clark, Park, Schantz, and McFarland), which together purported to show, in brief: 1965–1970 projected annual demands for natural gas and the production estimated to be required in connection there-

---

[18] Beyond interest in revenues obtained from a tax of 6 percent on production, the State is owner of lands prospectively capable of production and is trustee for its educable children of approximately 600,000 acres. However it is not claimed that any of the acreage is directly involved in these proceedings.

[19] Staff considers an amendment to authorize the addition of acreage under an existing contract and certificate a "new" sale and so subject to the authority to condition provided by Section 7(e) of the Act. Staff further recommends that where the contracts contain take-or-pay provisions certificates be issued subject to the Commission's final order in the pending rule-making proceeding concerning this subject at Docket No. R–199, publicly noticed May 26, 1961, stating that this recommendation would apply in the instance of all but one of the certificates.

[20] Calco: G–19345, and CI63–563; General American: G–18054; Humble: G–19200, CI62–129, and CI62–130; Seagrams: G–19512; Texaco: CI63–1409; and Tidewater: CI61–1689.

[21] Central: G–18477; Discovery: CI60–834; McRae: G–13803; Monsanto: CI63–249; Pan Am: CI60–128, CI62–46, and CI63–1020; Ridgway: G–18864; and Sun: G–19015, CI62–156, and CI63–283.

[22] Skelly: G–14712; Sun: G–8592; and Union: G–15077.

[23] Dees (G–19207) and Hall (CI61–520): location of the field, name of the purchaser, and purchaser's system map as included in its FPC Form 2 report for the year ended December 31, 1962, of which last notice is taken.

with (Clark); nationwide costs to producers with respect to finding and developing gas supplies, and their estimated financial requirements (Park); trends as to supply-demand and market price-cost relationships (Schantz); and the area price asserted to be required to compensate for costs and attract capital (McFarland).[24]

Staff's objection to the foregoing[25] was upon the ground, substantially, that Commission decisions require that initial prices in producer certificate proceedings be determined by the area "in-line" price as of the time the contract in issue has been executed, rather than by cost data and financial requirements.

However, the Joint Answer to Staff's objection, filed by six of the joint sponsors,[26] contended, in brief, that the proffered evidence was of the same nature as the data and trends considered by the Commission in determining the area price levels in its General Policy Statement No. 61–1; that all factors bearing on the public interest must be evaluated and not just the "in-line" price,[27] and that the issue of present or future public convenience and necessity entails a consideration of future industry requirements.

Applicant sponsors now reargue the matter in their respective briefs, and two specifically urge the Presiding Examiner to reconsider the exclusionary ruling and reopen the proceedings to receive the matters in evidence.

As stated by the Presiding Examiner in the ruling which sustained the objection, the excluded items are substantially the same as those matters which have been held by the Commission not to be relevant in producer certificate cases, on the ground that ordinarily the initial price is to be determined by the "in-line" price in the area at the time the producer contract in question was executed and not on the basis of cash outlays or replacement costs. This holding, applied by the Commission in the *Skelly case*,[28] and sustained on appeal in *Continental Oil Company, et al.* v. *F.P.C.* (CADC), 329 F. 2d 242 (1964), is controlling, and, accordingly, Applicants' motion to reopen and receive is herewith denied.

The Period

The 25 contracts involved in this proceeding were executed variously in the years 1957, and 1959–1963, inclusive.[29] Due to the fact that, with the exception of 1955 and 1957, relatively few area contracts have been written in any one

---

[24] The sponsorships were: of Clark: General American, Humble, Pan Am, Skelly, Sun, Texaco, Tidewater, and Union; of Schantz: the same; of Park: Humble, Pan Am, and Texaco; of McFarland: the State Board, Calco, Humble, Pan Am, Skelly, and Union.

[25] Adopted by the intervener, UGI.

[26] Humble, Pan Am, Skelly, Texaco, Tidewater and Union; subsequently adopted by Sun and the State Board. While the joint answer related specifically to the proffered testimony of Clark and Schantz, three of the Applicants (Humble, Pan Am, and Texaco) adopted it in support of the proffered testimony of Park. The State Board also filed its separate answer which was also adopted by Pan Am.

[27] Citing *Atlantic Refining Company* v. *Public Service Commission*, 360 U.S. 378 (1959).

[28] Opinion No. 362.

[29] As follows: 1957, one; 1959, eight; 1960, two; 1961, eight, including amendments of contracts dated December 30, 1947 (G–14712), and April 23, 1958 (G–15077), respectively; 1962, four; and 1963, one, consisting of an amendment of a contract dated March 4, 1955 (G–8592). One contract (Dees, G–19207) which both joint Applicants and Staff consider as if dated contemporaneously with the affidavit affixed to the form filed with the Commission, to wit, July 29, 1959, was apparently dated, in fact, on March 30, 1955, but because of the general scope of the data in evidence this probable discrepancy is deemed of no significance. In the instance of each of three amendments, committing additional acreage, the date of the amendment is considered rather than that of the earlier contract.

year,[20] participants are in agreement that in these proceedings the "in-line" price must be determined on the basis of a span of years. They also agree that the "in-line" price must relate to the period of execution of the subject contracts.

Applicants propose that the "in-line" price determination be confirmed to a consideration of data which relates to the 6-year period 1957–1962, on the grounds of contemporaneousness and the alleged fact that the number of permanently certificated sales executed therein (52) and annual volumes related thereto (71,600,000 Mcf) meet all necessary standards including that of relevancy.[21] Staff would include in such considerations data related to all permanently certificated sales, commencing with the date of the *Phillips* decision (June 1954) and regardless of whether the transaction's date predated the basic period.[22]

Due to the fact that in the instance of each field in the area, purchases have been made by a single pipeline at a price which generally holds from the initial purchase through all subsequent transactions, Applicants' proposal that the data to be considered be limited to that of the shorter period is unduly restrictive for, in the circumstances of this case, substantial reliance cannot be placed upon any price level available without proper regard to historical effects and the implications involved in so doing.

General Price Developments Under Permanently Certificated Sales (1954–1962)[23]

Applicants' price witness testified to the effect that prices for gas of comparable quality have remained fairly stable over the past few years, as increases in Mississippi since 1954 have been smaller than those occurring elsewhere in the Southwestern area. However, price averages indicate that as to sales from the larger fields substantial increases have occurred in the area.

During the basic 1957–1962 period the weighted average tax inclusive initial price for fields with the larger 1961 deliveries ranged from 18.5¢ to 22.8587¢, as indicated:[24]

Field	Purchaser and number of contracts		1961 volumes (Mcf)	Weighted average price (¢/Mcf)
Cranfield	Southern	4	29,885,172	22.8587
Dexter	Southern	4	6,813,676	21.5493
Marie-Pistol Ridge	United	26	3,891,577	20.04
Ansley	United	2	2,341,778	18.5
Skoom	Texas Eastern	1	1,548,019	20.618
Total			44,480,222	22.09

[20] Fewer than 10 contracts were executed in any one of the 5 years 1958–1962, and the total volumes related to all contracts executed in the 3 years 1960–1962, represent but a portion of totals under contracts entered into in either 1958 (40%) or 1959 (60%). It may be noted that during the earlier period 1948–1953 there were relatively few long-term sales (16), and though associated volumes were sometimes large the prevailing initial prices (6.75¢ and 10.0¢) have no current relevancy.

[21] With respect to the latter allegation, Applicants include volumes (26,340,100 Mcf) related to 1957 and 1959 contracts (12) which superseded earlier short-term agreements and stated prices which were suspended by the Commission to various dates in each of the 4 years included in the period 1958–1961.

[22] Staff ultimately eliminates all but 82 sales priced uniformly at 20.0¢ and dated as follows: 1954, 8; 1955, 34; 1956, 14; 1957, 18; 1958, 5; 1959, 1; 1960, 1; and 1962, 1.

[23] No permanently certificated contract used herein is stated at a term less than 20 years (Exhibit No. 9) except for one of 16 years (1960), which represents a sale by Calco to Transcontinental Gas Pipe Line Corporation in the Sharon field which provided 1961 deliveries of 53,947 Mcf. None are suspect because subject to reconsideration or review.

[24] The minor 0.84 percent temporary tax paid during the period April 1, 1955, to June 30, 1958, is here included. Its retention has no material effect upon the results given.

The total of 44,480,222 Mcf from these five fields represents some 95% of the total of 46,940,509 Mcf for all fields,[35] while deliveries from two fields to one purchaser account for 36,698,848 Mcf or 78% of the latter total.

On the other hand, the permanently certificated sales of the preceding 3 years (1954–1956), resulting in 1961 deliveries of 31,734,211 Mcf, represented, substantially, those of the Maxie-Pistol Ridge field,[36] as indicated in the following:

Field	Purchaser and number of contracts		1961 volumes (Mcf)	Weighted average price (¢/Mcf)
Maxie-Pistol Ridge	United	57	28,912,748	19.98
Muldon	Texas Eastern[1]	4	2,700,000	19.0
Sharon	Transco	1	121,463	19.08
Total			31,734,211	419.89

[1] An apparent single "package" type transaction consisting of 4 well-head sales.

Of these, deliveries from the indicated larger field constitute 91% of the total, and from the two remaining fields 9% thereof. The weighted average price of 19.89¢ applicable to the total of 31,734,211 Mcf compares with the 21.80¢ determined for the total of 1961 deliveries of 46,940,509 Mcf from all fields in the basic period.[37]

The fact that this rise in average price was accompanied solely by the development of two larger type fields is further indicated by a consideration of corresponding volumes and prices set forth for an overlapping 4-year period (1955–

[35] Adding:

Field	Purchaser and number of contracts		1961 volumes (Mcf)	Weighted average price (¢/Mcf)
Little Creek	United	1	998,724	18.0
Magee	United	3	430,175	18.0
Baxterville	United	1	360,000	11.9689
Beans Ferry	Texas Eastern	2	318,553	17.00
Rodney	Tennas	1	176,000	11.0
Merit	Southern	1	94,888	20.0
Sharon	Transco	1	53,947	19.1584
Trebloc	Texas Eastern	1	28,000	17.00
Total			2,460,287	16.5784

[36] Sometimes stated as 2 fields.

[37] For the combined (1954–1962) periods, 47% of a combined total of 78,674,719 Mcf went to Southern, 45% to United, and 5% to Texas Eastern, thus:

Field	Purchaser and number of contracts		1961 Volumes (Mcf)	Weighted Average Price (¢/Mcf)
Maxie-Pistol Ridge	United	83	32,804,325	19.9882
Cranfield	Southern	4	29,885,172	22.8587
Dexter	Southern	4	6,813,676	21.5493
Muldon	Texas Eastern	4	2,700,000	19.000
Ansley	United	2	2,341,778	18.500
Skoam	Texas Eastern	1	1,548,019	20.618
Other		12	2,581,750	16.606
Total			78,674,720	21.04

1958) wherein Southern first acquired sources in the Dexter and Cranfield fields, as follows:

Field	Purchaser and number of contracts		1961 volumes (Mcf)	Weighted average price (¢/Mcf)
Maxie-Pistol Ridge	United	65	15,821,685	20.0573
Cranfield	Southern	1	23,066,734	22.8711
Dexter	Southern	4	6,813,676	21.5493
Muldon	Texas Eastern	4	2,700,000	19.000
Ansley	United	1	1,719,668	18.500
Sharon	Transco	1	121,462	19.0800
Rodney	Tenneco	1	176,000	11.000
Trebloc	Texas Eastern	1	28,000	17.000
Total			[1] 50,447,225	21.4001

[1] Of this total, deliveries to Southern constitute 59%, to United 35%, to Texas Eastern 5%, and to others something less than 1%.

While the weighted average price for the larger sources increased, during the course of these periods, from 19.89¢ to 22.09¢, due principally to deliveries from the Dexter field initiated in 1957 at a price of 21.5493¢ and from the Cranfield field in 1958 at 22.8711¢, the price for deliveries from the Maxie-Pistol Ridge field at the same time remained stable, and a later (1960) fairly substantial purchase in the Skoam field was made at a total initial price of 20.618¢.[38]

However, the evidence does not afford a basis for correlating volume and price.

Comparison of Proposed Prices

The testimony of Applicants' price witness was to the effect, in part, that the subject sales of this proceeding are generally in accord price-wise with other sales. However, a comparison of weighted average prices for sales permanently certificated with those for 20 sales at issue shows an increase in the 1957–1962 average from 21.8¢, for the former, to approximately 22.6¢ per Mcf, for the latter. Estimated annual volumes and weighted averages applicable to the foregoing conditionally certificated temporaries are as follows:[39]

	Purchaser and no. of contracts used		Annual volumes (Mcf)	Weighted average price (¢/Mcf)
Larger fields:				
Hub	Southern	3	7,571,900	22.8835
Dexter	Southern	3	464,000	21.5528
Maxie-Pistol Ridge	United	5	409,335	20.0542
Knoxo	Southern	3	1,413,600	22.8702
Total			9,858,835	22.7015
Remaining fields:				
Grange	Southern	2	610,800	22.872
Kokomo	Southern	2	381,600	22.869
Martinville	United	1	315,700	21.000
Muldon-East	Texas Eastern	1	228,000	19.8
Total			1,536,100	22.0305
Combined			11,394,935	22.6110

[38] Relative prices in the larger fields are reflected in the following:

Field	1954-56 (¢/Mcf)	1955-58 (¢/Mcf)	1957-62 (¢/Mcf)
Maxie-Pistol Ridge	19.98	20.0573	20.04
Cranfield		22.8711	22.8587
Dexter		21.5493	21.5493
Muldon	19.00	19.00	
Ansley		18.50	18.50
Skoam			20.618
Weighted average	19.8973	21.4445	22.09

[39] Except for two small sales from the Maxie-Pistol Ridge field, estimated annual deliveries are those presented in Applicants' Exhibit No. 7.

Of the foregoing, some 9,977,900 Mcf (88%) was purchased at a price equal to or in excess of 22.869¢, while 10,441,900 Mcf (92%) was purchased at a price equal to or in excess of 21.5528¢ for a weighted average of 22.8213¢ per Mcf.

Price Developments in the Basic Period (1957–1962)

In terms of 1961 deliveries five area fields, including Dexter and Cranfield, supplied 73,392,970 Mcf,[40] or 93%, of the total of 78,674,719 Mcf delivered from all fields under permanently certificated 1954–1962 contracts, while the two fields specified together delivered of 36,698,848 Mcf, or 47% of the latter total.

The evidence of record as to prices paid by others does not support those paid by Southern in its 1957 initial purchases of gas in the Dexter field and its 1958 initial purchase in the Cranfield field. The Dexter field increase of 1.4203¢ over the highest price previously paid in the Maxie-Pistol Ridge field by United, as the area's principal purchaser, and the like increase of 2.7387¢ in the Cranfield sale, were neither foreshadowed in prices paid by the other three pipelines in the area [41] nor reflected in later permanently certificated prices in other fields.[42] It appears therefore, that, despite the possible influence of volumes involved, Dexter and Cranfield prices are to be taken as essentially isolated, and as having no direct relation either to prices than generally current in the area or area price trends.[43]

Nor is the Commission's decision in *South Georgia Natural Gas Company, et al.* (22 FPC 211 (1959)), to the contrary, although cited by Applicants as establishing an area "in-line" price of 22.872¢ per Mcf. Reference discloses, however, that the Commission's decision in that case is not based simply upon price comparisons but more substantially upon consideration of elements of value provided by provisions of the contracts involved. The Commission there found that, while the proposed price (22.87 or 22.872¢) was higher than the highest total price then paid for gas in Mississippi, the contracts possessed important characteristics of value to the purchaser (Southern), including provision for minimum and maximum takes particularly favorable to the purchaser and for a flexibility of withdrawals peculiarly adapted to meet the purchaser's fluctuating demands.

[40] This total is composed of the following field deliveries:

Field	Purchaser	1961 volumes (Mcf)	Weighted average price (¢/Mcf)
Maxie-Pistol Ridge	United	32,804,325	19.99
Cranfield	Southern	29,885,172	22.8587
Dexter	do	6,813,676	21.5494
Ansley	United	2,341,778	18.50
Skoam	Texas Eastern	1,548,019	20.618
Total		73,392,970	21.2826

[41] United in the Maxie-Pistol Ridge field (20.0¢–20.1324¢); Texas Eastern in the Muldon field (19.0¢ and Trebloc field (17.0¢); and Transco in the Sharon field (19.08¢). The latter price, though for a relatively small quantity, was consistent with purchases of corresponding quantities being made by United in the Maxie-Pistol Ridge field. Further, of a total of 82 contracts executed in the 3½-year period from June 21, 1954, to December 1, 1957, just prior to the first Dexter field purchase, 57 contracts providing 1961 volumes of 27,460,828 Mcf carried prices of 20.0¢ or less, and 25 contracts providing volumes of 7,351,869 Mcf, and reflecting the effect of a temporary tax of 0.84 percent, carried prices of 20.12¢–20.1324¢.

[42] Except for a 1960 purchase by United in the Maxie-Pistol Ridge field at 21.0¢, subsequent prices did not exceed the 20.618¢ paid in 1960 by Texas Eastern in the Skoam field. A 1961 purchase, by United in the Maxie-Pistol Ridge field of magnitude relatively equal to that of its 1960 purchase in the same field was made at a price of 20.0¢ per Mcf.

[43] As previously stated herein, the evidence affords no basis for determining objectively what effect, if any, volume has upon price.

The Commission also gave weight to other factors such as accessibility, a high minimum delivery pressure (1200 psia), and the association of the Cranfield sale under a single contract with one from a field in east central Louisiana, in a manner considered to confer unusual benefits upon the purchaser.

The decision further relied, in part, upon an intrastate sale of a reserve located in Louisiana at a total price higher than that proposed for the Mississippi sale, as well as upon the fact that the overall effective increase in the purchaser's weighted average cost of purchased gas (0.05¢) was of little significance in comparison with the benefits received.

It also appears in *South Georgia* that the Commission related its consideration to a "general area" which included, at least, parts of east central and southeastern Louisiana as well as Mississippi.

Accordingly, it is concluded that in the *South Georgia* case, contrary to the contentions of Applicants, the Commission made no finding of an "in-line" price applicable to the Mississippi area.[44]

Type and Quality Provisions

Quality provisions are, in general, sufficiently similar to permit a direct comparison of prices as between permanently certificated sales and the subject contracts.

The more important type provisions contained in some 110 area contracts executed in the period 1954–1962, summarized by Staff (Exhibit 9) and in part by Applicants (Exhibit 8), generally provide a take-or-pay requirement, more often associated with a 1 year make-up period;[45] a field point delivery;[46] a maximum delivery pressure of 1000 or 1100 psia;[47] a minimum heating value of 950 or 1000 Btu per cubic foot,[48] generally without specific provision for price adjustment; a price escalation at either a 4 year or 5 year interval in steps of 2¢ and 1¢, respectively;[49] a price redetermination set generally for 1964 or 1966;[50] and a tax reimbursement currently averaging some 1.02¢ per Mcf plus 81% of additional levies.[51] In addition, the contracts generally limit the total sulphur content to 20 gr. and hydrogen sulphide to 1 gr. per hundred cubic feet, as well as water to 7 lbs. per MMcf.[52]

Similarly, provisions of some 48 contracts executed in the basic period (1957–1962, Staff Exhibit No. 9) indicate that the 1 year make-up associated with take-or-pay has been extended to 2 years;[53] the delivery point modified to include plant delivery;[54] the maximum delivery pressure substantially increased to 1200 psia;[55] price escalations have become dominantly a 2¢ step at a 4 year interval;[56] price redeterminations now fall principally in 1966;[57] and tax reimburse-

---

[44] In these proceedings the Commission refused to authorize prices of 22.87 or 22.872¢ in five of the temporary certificates on the ground that to do so would tend to establish a new predominant price plateau in the area: Tidewater, CI61–1689, issued August 14, 1961; Pan Am, CI62–46, issued September 14, 1961; Humble, CI62–130, issued October 17, 1961; Sun, CI62–156, issued October 17, 1961; and Humble, CI62–129, issued October 26, 1961.

[45] Contracts (88) representing 56% of 1961 total deliveries (78,674,720 Mcf).

[46] Contracts (93) representing 56% of 1961 deliveries.

[47] Contracts (88) representing 56% of 1961 deliveries.

[48] Contracts (92) representing 99% of 1961 deliveries.

[49] Contracts (94) representing 90% of 1961 deliveries.

[50] Contracts (86) representing 80% of 1961 deliveries.

[51] Basis of total 1961 deliveries.

[52] Respectively, 98%, 98%, and 87% of 1961 deliveries.

[53] Four Cranfield and 3 Dexter contracts representing 68% of 1961 deliveries (46,940,509 Mcf).

[54] Three Cranfield contracts representing 63% of total 1961 deliveries.

[55] Contracts (principally four Cranfield) representing 64% of total 1961 deliveries.

[56] Four Cranfield and 4 Dexter contracts representing 78% of total deliveries.

[57] Three Cranfield contracts representing 63% of total 1961 deliveries.

ment averages 1.167¢ per Mcf and 85% of additional levies;[58] while heating value and sulphur and water content specifications are substantially unaffected.[59]

With exclusion, for reasons previously given, of the Cranfield and Dexter field contracts insofar as these introduce a departure from 1954–1962 characteristics, the dominant take-or-pay make-up period reduces to the 1 year which predominated during the longer 1954–1962 period;[60] the delivery point again becomes dominantly a general field point;[61] the maximum delivery pressure reduces to the first stated 100–1100 psia;[62] price escalations revert to a 1¢ step at a 5 year interval;[63] redeterminations again fall principally in 1964;[64] tax reimbursement reduces to an average of 0.48¢ per Mcf with a dominant 75% provision against additional levies;[65] while heating value and sulphur and water content specifications generally remain the same.[66]

From the foregoing, it appears that but for variations introduced by Cranfield and Dexter field purchases, the predominant similarity of provisions of contracts executed within each of the two periods, 1954–1962 and 1957–1962, obviates necessity for a detailed examination of the relation of price to contract type provision in order to determine an area "in-line" price.

The dominant type provisions of the 25 subject contracts[67] are generally consistent with those which characterize the 110 contracts of the 1954–1962 period and as well as the 48 contracts of the basic and more recent 1957–1962 period, in that the former provide for take-or-pay, which, however, is now associated with a longer period of make-up;[68] a general field point of delivery; a maximum delivery pressure of 1,000 psia;[69] minimum heating values of 950 and 1,000 Btu per cubic foot,[70] generally without specific provision for price adjustment; a price escalation, here more generally of a 2¢ step at a 4 year interval;[71] a price redetermination as early as 1964;[72] and a tax reimbursement which, however, here averages some 1.257¢ per Mcf plus an 86.7% of additional levies.[73] Moreover, no significant departures are evident with respect to sulphur, sulphide, and water content specifications.

It is pertinent to note that earlier pipeline purchases in the Cranfield and Dexter fields (1957 and 1958) appear to directly set the pattern for dominant

---

[58] Basis of total 1961 deliveries (46,940,509 Mcf).

[59] Contracts representing 98–99% (water 85%) of total 1961 deliveries.

[60] Thirty-one contracts representing 85% of 1961 deliveries of 15,120,669 Mcf.

[61] Forty-one contracts representing 89% of 1961 deliveries of 17,144,352 Mcf.

[62] Thirty-six contracts representing 87% of 1961 deliveries of 17,055,337 Mcf.

[63] Thirty-two contracts representing 55% of 1961 deliveries of 10,241,661 Mcf.

[64] Twenty-seven contracts representing 40% of 1961 deliveries of 10,330,676 Mcf.

[65] Basis of 1961 deliveries of 10,241,661 Mcf.

[66] *I.e.*, 950–1000 Btu; 20 gr. of sulphur and 1 gr. of sulphide per hundred cubic feet; and 7 lbs. of water per MMcf, in contracts representing, respectively, 97%, 97%, 94%, and 58% of 1961 deliveries of 17,055,337 Mcf.

[67] With respect to which the evidence provides usable annual volumes for 20 contracts in a total of 11,394,935 Mcf, as follows: from Applicants' Exhibit No. 7 for 18 contracts, 11,368,400 Mcf; and from Staff's Exhibit No. 9 for two contracts (Dees and Ridgway), 26,535 Mcf. In the instance of five contracts usable annual volumes are not available (Skelly (G–14712), Monsanto (CI63–249), Union Producing (G–15077), Sun (G–8592), and Texaco (CI63–1409)), partly in view of the participants' election not to project certain estimated first month's volumes.

[68] Six contracts representing 71% of annual volumes available (11,394,935 Mcf)—2 years; seven contracts representing 21% of volumes—5 years.

[69] Eight contracts representing 73% of annual volumes available; *cf.*, eight contracts representing 23% of volumes providing for a maximum delivery pressure of 1,200 psia.

[70] Fifteen contracts representing 32% of annual volumes available—950 Btu; four contracts and 68% of volumes—1,000 Btu.

[71] Thirteen contracts representing 92% of annual volumes available—2¢ at 4 years; three contracts and 2% of volumes—1¢ at 5 years.

[72] Seven contracts representing 70% of volumes.

[73] Basis of estimated annual volumes of 11,394,935 Mcf.

type provisions and prices with respect to purchases in the relatively new Grange, Hub, Knoxo, and Kokomo fields which, in some 10 contracts, account for some 9,977,900 Mcf (87%) of the total annual volumes of 11,394,935 Mcf available.

The "In-Line" Price

The 1957–1962 period provides 47 contracts which carry a range of initial base prices and associated volumes as follows: [74]

Price (¢/Mcf)	1961 volumes (Mcf)	Cumulative volumes (Mcf)	Number of contracts	Cumulative contracts
11.0	176,000	176,000	1	
17.0	346,553	522,553	3	4
17.5	89,015	611,568	1	5
18.0	1,482,846	2,094,414	5	10
18.5	2,341,778	4,436,192	2	12
20.0	5,534,484	9,970,676	28	40
20.25	6,813,676	16,784,352	4	44
21.5	29,796,157	46,580,509	3	47
Total	46,580,509		47	

The weighted average price of 20.8¢ per Mcf includes the contracts for deliveries from the Cranfield and Dexter fields. With the elimination of the latter [75] the weighted average price becomes 19.06¢, but, while the number of contracts is reduced thereby by only some 15%, 1961 volumes are materially reduced to 9,970,676 Mcf or 21.4% of the total.

Weighting prices by estimated first month volumes (total 3,997,394 Mcf) instead of 1961 deliveries, reduces the average of 20.8¢ to 20.58¢, and eliminating the specified contracts reduces the adjusted average from 19.06¢ to 18.94¢. However, first month volumes, which are in fact only seller's preliminary estimates, are frequently inconsistent with respect to subsequent actual and reported deliveries.[76]

By comparison, the 20 subject contracts, with estimated annual volumes totaling 11,394,935 Mcf, produce a weighted average initial base price of 21.35¢ per Mcf which is not only 2.29¢ higher than the adjusted 19.06¢ weighted average above stated, but 1.35¢ higher than any preceding initial base price (20.0¢), other than those of the Cranfield (21.5¢) and Dexter (20.25¢) field contracts.

Weighting the base prices of Applicant's corresponding 38 contracts by annual volumes stated in Applicants' Exhibit No. 7 results in the same average price of 20.8¢ developed with respect to the 47 contracts contained in Staff's Exhibit No. 9,[77] and an adjusted weighted average of 19.15¢ which is substantially comparable with that applicable to Staff's 40 contracts, above.

However, averages of less than 20.0¢ can be expected only by omitting consideration of pertinent and material circumstances which relate to the history of the 20¢ price as developed in the Maxie-Pistol Ridge field, the most productive in the area. During the first half of the whole period of productive development

[74] Not including a 1961 contract with estimated annual deliveries of 360,000 Mcf, having an initial price of 11.2502¢ which, by terms of the contract, increased to 21.5¢ at the end of 4 months.

[75] Cranfield: 29,796,157 Mcf, at 21.5¢; Dexter: 6,813,676 Mcf at 20.25¢.

[76] As in FPC Form 2.

[77] While Staff, in general, uses reported 1961 deliveries, the joint Applicants, in general, use FPC Form 2 delivered volumes, as follows: for 1953–1954 contracts, 1956 deliveries; for 1955–1957 contracts, 1959 deliveries; for 1958, 1959, and 1960 contracts, 1960, 1961, and 1962 deliveries, respectively; and for 1961 and 1962 contracts, seller's estimated first month volumes projected on an annual basis.

in Mississippi (1954–1958), United's purchases in the Maxie-Pistol Ridge field were completely dominant over all like activity in the area, and the 20.0¢ price, appearing in 79 contracts providing 1961 volumes [78] exceeding even those of the more recently active Cranfield field,[79] became immediately and successively the area's fixed and dominant price in terms of number of contracts, volumes delivered, and period of duration. In addition lower initial base prices in 1955–1958 contracts of 11.0¢, 17.0¢, 18.0¢, and 19.0¢ were associated with relatively insignificant volumes [80] and the next higher price was in the level of the isolated Dexter field contracts. Nor do the 4 years which follow the years of maximum activity in the Maxie-Pistol Ridge field, produce prices and volumes which change the predominant standing of the 20.0¢ price, for while new Maxie-Pistol Ridge 20.0¢ contracts lose relative importance in terms of number and volumes,[81] the Dexter and Cranfield purchases of 1957, 1958, and 1959, with combined 1961 deliveries of 36,609,833 Mcf, comprise volumes and carry initial base prices which at least confirm a 20.0¢ price, as does a contemporaneous sale (1960) of a 1961 volume of 1,548,019 Mcf in the Skoam field. As in the preceding period, and against the foregoing considerations, sales in lesser fields at lesser prices of 11.25¢, 17.0¢, and 18.0¢ are entitled to little if any weight in determining the "in-line" price.[82]

Therefore, and because the evidence supports no other determination, 20.0¢ is found to be the dominant and "in-line" initial base price for the period 1957–1962, even though it relates substantially to transactions which involve one purchaser in one field and occurs as early as 1954.

Applicants' would add to an "in-line" base price the amount of the 6% severance tax in effect throughout the basic period (1957–1962).[83]

To make no provision for taxes would fail to allow for the fact that the absence of a provision for initial tax reimbursement, characteristic of 20.0¢ contracts, derives from a practice which originates in the transactions of a single purchaser (United), in a single field (Maxie-Pistol Ridge), at an earlier period (1954), and would accord no weight to the added fact that during 1957–1962 a significant number of contracts so provided,[84] in relation to a substantial volume.[85]

However, it appears from the evidence that in some instances, at least, the effective tax rate is absorbed in part by the seller. Thus, while the effective rate applicable to Cranfield, Dexter, Sharon and Baxterville field contracts runs

---

[78] *I.e.*, 32,303,147 Mcf.

[79] *I.e.*, 29,796,157 Mcf.

[80] Totally 4,745,132 Mcf, as follows: Rodney field (1958): 176,000 Mcf, 11.0¢ Trebloc field (1957): 28,000 Mcf, 17.0¢; Sharon field (1956): 121,463 Mcf, 18.0¢; Ansley field (1957): 1,719,669 Mcf, 18.5¢; and Muldon field (1955): 2,700,000 Mcf, 19.0¢.

[81] By 1958 purchases in the Maxie-Pistol Ridge field, represented by but five contracts, had already declined in terms of 1961 deliveries to a total of 2,059,581 Mcf.

[82] These prices, found in contracts dated 1959–1962, with related volumes, are—Baxterville field: 360,000 Mcf (estimated), 11.25¢; Beans Ferry field: 318,553 Mcf, 17.0¢; Little Creek field: 998,724 Mcf, 18.0¢; and Magee field: 430,175, 18.0¢. Additional sales at previously established prices of 18.0¢ and 18.5¢ in the Sharon and Ansley fields, respectively, did not exceed a combined total of 677,000 Mcf. Three 15.0¢ contracts executed in 1962 and 1963 appear to carry options that negative their usefulness for any purpose relevant to these proceedings, and, moreover, do not assist in establishing a decline in area prices (T. 176, 183).

[83] During the interval April 1, 1955, through June 30, 1958, the tax carried an added 0.84¢ which both Applicants and Staff would eliminate.

[84] *I.e.*, 13 contracts (1957–1961), inclusive of the Cranfield and Dexter field contracts, one in the Maxie-Pistol Ridge field, and the short-term Bolton field sale, or 27% of a total of 49 contracts.

[85] The 13 contracts provide 39,246,576 Mcf of 1961 deliveries, or 83% of a total of 47,499,071 Mcf.

approximately 6.4% of the price, that applicable to the Skoam field contract is but some 3.09% thereof. Accordingly, and to account for the fact that historically 20.0¢ contracts generally fail to provide a tax reimbursement, that few contracts provide for the 6% rate, and that the ultimate bargained effective rate varies even where applied, the rate to be applied herein to the "in-line" price should not exceed 3.09%, the minimum obtaining in the premises.[66]

Thus, the "in-line" price for the 1957–1962 period becomes 20.618¢ per Mcf, inclusive of all reimbursements.

Prices set forth in four contracts dated in the period 1954–1958 between United and its affiliate Union Producing Company, and eight dated in the period 1954–1956 involving farm-out acreage, have not been permanently certificated. Of the four sales of the former group the largest in terms of 1961 volumes, dated 1955, carried a total base price of 19.00¢ and the highest price totals 20.00¢. Of the eight sales in the latter group, five contracts carry a total initial rate of 20.0¢, one of 21.00¢, one represents a settlement rate of 20.1260¢, and another the guide-line price of 21.500¢. However, the only conclusion required with respect to these two groups is that, however considered, the prices represented are not of sufficient weight to cause modification of the conclusion herein previously stated as to the "in-line" price.

Guide-Line Price Effects (*General Policy Statement*). There is no indication in the evidence that the Commission's Statement of General Policy, issued September 28, 1960, 24 FPC 818, and amended October 25, 1960, 24 FPC 902, to provide a guide-line rate of 21.5¢ for the Mississippi area, is involved in any of the issues or has operated so as to affect the determination of the "in-line" price in these proceedings. Except for the initial base prices of the permanently certificated Dexter contracts of late 1957 and early 1958 and Cranfield contracts of late 1958 and early 1959 no price permanently certificated before or after the date of issuance of the Statement approaches the guide line price. With respect to the prices proposed by Applicants, the 21.5¢ base initial rate occurs in nine new instances after 1960, but it also appears in four new instances prior thereto, and with respect to each of two amendments offered to earlier contracts. While the 22.87¢ price as proposed in three instances dating prior to 1960, and in none after that date, in each of these the price relates to annual deliveries from the Hub field which are much in excess of those provided by later contracts. Further, in this connection, Applicants have not sought to make a showing with respect to the effect of the guide-line rate.

Refunds

Staff counsel proposes that refunds be ordered to the extent that Applicants have been put on notice of refund obligations by conditions stated in the temporary authorizations issued in these proceedings. The temporary authorizations were issued subject, variously, either to refunding with no floor,[67] or with a floor of 20.0¢,[68] or with a floor of 20.0¢ plus an applicable tax reimbursement,[69] or else

[66] The 13 contracts providing an initial tax reimbursement include the 7 Cranfield and Dexter field contracts and 1 exceptional Maxie-Pistol Ridge contract. Confining consideration to the five remaining contracts it is noted that the average effective rate for a Cranfield area contract (1960: 89,015 Mcf), and the Sharon (1960; 53,947 Mcf), and Skoam (1960; 1,548,019 Mcf) contracts is 3.34%; the average effective rate for these three plus the Baxterville contract (1961; 360,000 Mcf—estimated) is 3.67%; the same average for five contracts including the four foregoing plus the short-term 5-year Bolton field contract (1959; 558,562 Mcf), is 3.19; and that the lowest rate apparent in any single long-term period contract (Skoam) is 3.09%.

[67] Refund with no floor: Skelly, G–14712; Central Oil, G–18477; Tidewater, CI61–1689; Pan Am, CI62–46; Humble, CI62–129 (first letter) and CI62–130; and Sun, CI62–156.

[68] Refund with a floor of 20.0¢: Sun, G–8592; Union, G–15077.

[69] Refund with a floor of 20.0¢ plus applicable tax reimbursement: Humble, G–19200 (as to original application); Calco, G–19345; and, Pan Am, CI60–128.

no refund was set.[20] However, even in the absence of a specific refund provision a general reservation appears to the effect that the authorization issues without prejudice to final action of the Commission in the matter.

The question of whether a refund can be ordered when the temporary is not conditioned was considered in *Public Service Commission* v. *F.P.C.* (CADC) 329 F. 2d 242 (1964), where it was held, in effect, that in the granting of a permanent certificate power resides in the Commission to require a refund of excessive prices charged and received under the temporary, and that the inclusion in the temporary of a general reservation of "without prejudice," as to final disposition of the application, of itself would support conditioning the permanent certificate by a refund requirement. While the Court concludes that the exercise of the power in such circumstances would turn on equitable considerations and remanded the case for analysis and consideration of equitable factors pro and con, it is clear in these proceedings that where the authorization carries the general reservation Applicants have been on notice of the necessity of moving herein for further proceedings for consideration of matters of the nature specified, if such exist and reliance thereupon is intended.

In such circumstances, and the presence of either an adequate refund condition or the general reservation, the refund requirements of the order, hereinafter included as a part of this decision, are considered adequately supported, and the determination herein of an appropriate allowable tax reimbursement is deemed sufficient to meet the provision of the three temporary authorizations which provide a floor of 20.0¢ "plus applicable tax reimbursement."

Take-or-Pay Conditions

Staff Counsel seeks to have certificates issued in these proceedings (except in Docket No. G–18447) conditioned upon the outcome of the Commission's rule-making proceeding in Docket No. R–199, subject to the limitation that producers will not be required to file amended take-or-pay provisions for less than 80% of annual contract quantities. It is the general practice in the Commission's recent decisions to so condition producer certificates and the order hereinafter included as a part of this decision will so provide.

Further Findings and Conclusions

The sale of natural gas as proposed by each of the Applicants, together with the construction and operation of facilities subject to the jurisdiction of the Commission necessary therefor, are required by the public convenience and necessity; and the terms and conditions of the order included as part of this decision are required by the public convenience and necessity.

ORDER

Upon consideration of the record herein, the contentions set forth in the briefs and proposed findings of respective counsel, and for the reasons and upon the findings and conclusions set forth in the foregoing portions of this decision, of which this order is a part,

IT IS BY THESE PRESENTS ORDERED, subject to review by the Commission on appeal or on its own motion, as provided by its Rules of Practice and Procedure, that:

[20] No refund set: Sun, G–19015; Humble, G–19200 (as to amendment of application) and CI62–129 (part); Monsanto, CI63–249; Sun, CI63–283; Calco, CI63–563; Texaco, CI63–1409; General American, G–18054; Texas Pacific (Seagrams), G–19512; and other applications, where, however, the proposed initial total price does not exceed 20.0¢ (McRae, G–13803; Ridgway, G–18864; Dees, G–19207; Discovery Oil, CI60–834; Hall, CI61–520 (Staff's Exhibit No. 9 gives a price of 21.0¢ as compared with Applicants' Exhibit No. 7 of 20.0¢), and Pan Am, CI63–1020).

(A) Certificates of public convenience and necessity, and amendments to orders issuing certificates of public convenience and necessity, are hereby issued to the several Applicants named in the caption of this decision for the sale of gas in interstate commerce for resale as proposed in the several applications, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, upon the terms and conditions hereof, *to-wit;*

(B) Each certificate issued, and amendment granted, as provided in paragraph (A) above, is hereby conditioned to prohibit a total initial price, including all reimbursements and charges, greater than 20.618¢ per Mcf at 15.025 psia, from the date of issuance of this order until such prices may be lawfully changed in the manner provided by the Natural Gas Act;

(C) Within 30 days from the date of issuance of this order, each of the Applicants receiving certificates or grants in paragraph (A) hereof, whose proposed total initial price exceeds the 20.618¢ aforesaid, shall file a supplement to its presently filed rate schedule, related to its respective application, reflecting the conditioned price as the total initial price in lieu of the higher initial price provided in the contract or amendment; provided that with respect to the reduction in rates hereby ordered, Applicants need not comply with the notice provisions of Section 154.94(b) and the detailed submittal provisions of Section 154.94(f) of the Regulations under the Natural Gas Act;

(D) Within 60 days from the date of issuance of this order each of the Applicants to whom the provisions of paragraph (C) apply shall refund to the respective pipeline purchaser, with interest, a sum equal to the difference between the price charged to and collected from such purchaser and the total price set forth in paragraph (B), above, applied to all volumes paid for by such purchaser under the respective contract or amendment which comprises a subject matter of this proceeding, from the date of the first delivery of natural gas thereunder until the effective date of this order, the interest charge to be calculated at a rate of 6% per annum for all gas paid for prior to March 1, 1960, and at 7% per annum thereafter, until full refund has been made;

(E) Within 10 days of the date of the refunds provided for in paragraph (D) hereof, each of the Applicants shall file with the Commission its officially certified statement showing the amount of refund, its manner of computation, and the interest payments related thereto, and a statement from the purchaser acknowledging receipt thereof;

(F) The certificates herein issued, and the amendments herein granted, except in Docket G–18477, which is not involved, are upon the express condition that the allowance of the take-or-pay provisions in the Applicant's contract or amendment is subject to the Commission's ultimate disposition with respect to such provisions in the rule-making proceeding in Docket R–199. Upon the establishment, by regulation or policy statement, of a general policy governing such provisions in producer contracts, each Applicant shall, within 30 days, file its amended rate schedule in conformity therewith, acceptable to the Commission, provided that the Applicant shall not be required to file a take-or-pay provision for less than 80% of the annual contract quantity, and, provided further, that any rate schedule changes or modifications to be made in accordance with this paragraph shall be prospective only;

(G) The certificates issued by paragraph (A) hereof are not transferable and shall be effective only so long as each respective Applicant continues the acts and operations hereby authorized in accordance with the provisions of the Natural Gas Act and the applicable rules, regulations and orders of the Commission;

(H) The grant of the certificates and amendments herein shall not be construed as a waiver of the requirements of Section 4 of the Natural Gas Act, or of Part 154 of the Regulations thereunder except as specifically provided in paragraph (C) hereof. Such grant is without prejudice to any findings or order which have been or may hereafter be made by the Commission in any proceeding now pending or hereafter instituted by or against the Applicants or any one of them. Further, the action in this proceeding shall not foreclose nor prejudice any further proceedings or objections by the Commission relating to the operation of any price or related provision in the gas purchase contracts or amendments here involved; and,

(I) The certificate herein issued to Sun Oil Company in Docket No. G–19015 is conditioned upon its being accepted in writing by the Applicant within 30 days of the issuance of this order.

EWING G. SIMPSON,
Presiding Examiner.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

TRANSCONTINENTAL GAS PIPE LINE CORPORATION AND SOUTH TEXAS NATURAL GAS GATHERING COMPANY, DOCKET NO. CP64–283

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued October 26, 1964)

On August 17, 1964, Transcontinental Gas Pipe Line Corporation (Transco) and South Texas Natural Gas Gathering Company (South Texas), hereinafter referred to as Applicants, filed in Docket No. CP64–283, a joint application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of delivery points and the exchange and delivery of a maximum of 50,000 Mcf of natural gas daily on an interruptible basis, all as more fully set forth in the joint application.

South Texas proposes to deliver into Transco's existing 24-inch main line facilities at a proposed delivery point in Falfurrias, Jim Wells County, Texas, and at an existing delivery point in LaSalle County, Texas, up to a maximum of 50,000 Mcf of natural gas per day.

In exchange Transco proposes to deliver equivalent volumes of natural gas to South Texas at a proposed delivery point near the tailgate of the North Markham Plant of Marathon Oil Company in Matagorda County, Texas, which is located approximately 170 miles northeast of the two delivery points to Transco.

Transco and South Texas state that executed copies of the exchange agreement will be filed by each company upon issuance of the requested certificate authorization.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on October 23, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits submitted in support of the authorization sought, and upon consideration of the record finds and orders as hereinafter stated.

The Commission finds:

(1) Applicant, Transcontinental Gas Pipe Line Corporation, a Delaware corporation having its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of May 29, 1948, in Docket No. G–704 (7 FPC 24).

(2) Applicant, South Texas Natural Gas Gathering Company, a Delaware corporation [1] having its principal place of business in Corpus Christi, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of December 1, 1959, in Docket No. G–17050 (22 FPC 979, 993).

(3) The proposed exchange and delivery of natural gas between Transco and South Texas, the construction and operation of facilities, and the transportation of natural gas in interstate commerce, as hereinbefore described and as more fully described in the application and exhibits in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(4) The aforesaid proposed exchange and delivery of natural gas, construction and operation of facilities and transportation of natural gas are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Transco and South Texas are able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(6) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Transco's and South Texas's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3), (c)(4) and (e) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity be and the same is hereby issued to Transco and South Texas, jointly, in this proceeding authorizing the exchange and delivery of natural gas, the construction and operation of facilities, and the transportation of natural gas in interstate commerce, as hereinbefore described, all as more fully described in the application and exhibits filed in this proceeding upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder is hereby conditioned upon Transco's and South Texas's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3), (c)(4) and (e) of Section 157.20 of such Regulations.

(C) The facilities authorized by paragraph (A) above shall be completed and placed in actual operation within 6 months from the date of issuance of this order.

---

[1] State of incorporation changed from Texas to Delaware under Commission order issued May 1, 1963, in Docket No. G–17050 (29 FPC 873).

EL PASO NATURAL GAS COMPANY, DOCKET NO. CP65-37

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued October 27, 1964)

On August 7, 1964, El Paso Natural Gas Company (Applicant) filed in Docket No. CP65-37 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of five measuring and regulating stations and the sale and delivery of additional natural gas by means of said proposed stations to Washington Natural Gas Company (Washington Natural), Northwest Natural Gas Company (Northwest Natural) and Tucson Gas and Electric Company (Tucson Gas) for resale and distribution by said companies, all as more fully set forth in the application.

Washington Natural proposes to distribute natural gas in Yelm and Rainier, Washington; Northwest Natural proposes to distribute natural gas in North Bonneville, Washington, and Brownsville and Halsey, Oregon; and Tucson Gas proposes to distribute natural gas to customers in the immediate vicinity of Tucson, Arizona.

Applicant proposes herein to construct and operate two measuring and regulating stations in the County of Thurston, Washington, and one measuring and regulating station each in Skamania County, Washington, Lynn County, Oregon, and Pima County, Arizona.

The estimated cost of the proposed facilities is $38,500, which cost will be financed out of current working funds.

The third-year annual and peak day natural gas requirements of Washington Natural, Northwest Natural and Tucson Gas are as follows:

Name of resale customer	Annual (Mcf)	Peak day (Mcf)
Washington Natural:		
Yelm	21,302	198
Rainier	5,858	55
Northwest Natural:		
North Bonneville	9,400	105
Brownsville and Halsey, Oregon Tap	194,200	860
Tucson Gas: San Xavier, Pima County, Tap	94,500	920
Total	325,260	2,168

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on October 23, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, El Paso Natural Gas Company, a Delaware corporation having its principal place of business in El Paso, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order issued January 11, 1944, in Docket No. G-288 (4 FPC 486).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are to be used in the transportation and sale of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof and the proposed transportation and sales of natural gas by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities and the proposed transportation and sales of natural gas by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4) and (e) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity be and the same is hereby issued authorizing Applicant, El Paso Natural Gas Company, to construct and operate the proposed facilities and to sell and deliver natural gas as hereinbefore described, all as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b) (c)(1), (c)(3), (c)(4) and (e) of Section 157.20 of such Regulations.

(C) The facilities hereby authorized shall be constructed and placed in actual operation and the sales and delivery of natural gas authorized in paragraph (A) above shall commence, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within 6 months from the date on which this order issues.

Before Commissioners: Joseph C. Swidler, Chairman: L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

EL PASO NATURAL GAS COMPANY, DOCKET NO. CP65-68

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued October 27, 1964)

On September 11, 1964, El Paso Natural Gas Company (Applicant) filed in Docket No. CP65-68 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction during the calendar year 1965 and the operation of routine field facilities to enable Applicant to take into its certificated main pipeline system natural gas which will be purchased from producers thereof, all as more fully set forth in the application.

The purpose of this "budget-type" application is to augment Applicant's ability to act with reasonable dispatch in contracting for and connecting to its pipeline system new supplies of natural gas in various producing areas generally coextensive with said system.

The total cost of the facilities covered by this application will not exceed a maximum of $5,000,000, with no single project to exceed a cost of $500,000, which costs are proposed to be financed from current working funds.

Due notice of the subject application was published in the Federal Register on October 3, 1964 (29 F.R. 13619). No petition to intervene, notice of intervention or protest to the granting of the application has been received.

At a hearing held on October 23, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought, and upon consideration of the record,

The Commission finds:

(1) Applicant, El Paso Natural Gas Company, a Delaware corporation having its principal place of business in El Paso, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of January 11, 1944, in Docket No. G-288 (4 FPC 486).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that Applicant should submit within 60 days after the expiration of the authorization granted hereinafter, a statement in compliance with Section 2.58(c) of the Commission's Rules of Practice and Procedure.

(6) Public convenience and necessity require that the certificate hereinafter issued and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a) and (e) of Section 157.20 of said Regulations.

(7) The authorization hereinafter granted should be limited to construction during the calendar year 1965 and the total expenditures for facilities to be constructed thereunder should be limited to a maximum of $5,000,000, with no single project to exceed a cost of $500,000.

The Commission orders:

(A) Upon the terms and conditions of this order, a certificate of public convenience and necessity be and the same is hereby issued authorizing Applicant, El Paso Natural Gas Company, to construct during the calendar year 1965, the proposed facilities hereinbefore described, as more fully described in the application in this proceeding, and to operate such facilities only to take natural gas supplies from producers who have received authorization from the Commission to sell natural gas to said Applicant.

(B) Applicant shall submit within 60 days after the expiration of the authorization granted by paragraph (A) above a statement in compliance with Section 2.58(c) of the Commission's Rules of Practice and Procedure.

(C) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a) and (e) of Section 157.20 of said Regulations.

(D) The authorization granted in paragraph (A) above is hereby limited to construction during the calendar year 1965, and the total expenditures for facilities to be constructed thereunder are hereby limited to a maximum of $5,000,000, with no single project to exceed a cost of $500,000.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

FLORIDA GAS TRANSMISSION COMPANY, DOCKET NO. CP65-47

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued October 27, 1964)

On August 14, 1964, Florida Gas Transmission Company (Applicant) filed in Docket No. CP65-47 an application for a certificate of public convenience and necessity pursuant to Section 7(c) of the Natural Gas Act authorizing the construction and operation of certain facilities necessary to sell and deliver natural gas on a direct preferred interruptible basis to Edgar Brick Company (Edgar) for use in a new brick plant now under construction near Edgar, Florida, all as more fully set forth in the application.

Applicant proposes to construct and operate a line tap and approximately 100 feet of 4½-inch O.D. lateral pipeline extending in a general northerly direction from a point of connection on its existing 2½-inch Edgar Plastic Kaolin Company-United Clay Mines Company lateral in Putnam County, Florida, to a terminus at a point of connection with facilities for the receipt of gas to be constructed by Edgar, where a meter and regulator station will be constructed and operated by Applicant. By means of these facilities, Applicant proposes to sell and deliver to Edgar up to 2,300 M[1]Btu of natural gas per day and up to 300,000 M[1]Btu of natural gas annually.[1]

The subject natural gas will be used by Edgar as process fuel for the production of various types of brick to be marketed locally. The estimated cost of the proposed facilities is approximately $21,500, which will be financed out of funds on hand.

Due notice of the subject application has been given by publication in the Federal Register on October 1, 1964 (29 F.R. 13549). No petition to intervene, notice of intervention or protest to the granting of the application has been received.

At a hearing held on October 23, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including

[1] One M[1]Btu equals one Mcf of natural gas with a Btu content of 1,000 Btu per cubic foot.

the application and exhibits, submitted in support of the authorization sought, and upon consideration of the record,

The Commission finds:

(1) Applicant, Florida Gas Transmission Company (formerly Houston Texas Gas and Oil Corporation), a Delaware corporation having its principal place of business in Winter Park, Florida, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of December 28, 1956, accompanying Opinion No. 301 in Docket Nos. G–9262 and G–9960 (16 FPC 118).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate hereinafter issued to Applicant and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c) (3), (c) (4) and (e) of Section 157.20 of said Regulations.

(6) The certificate issued hereinafter should be granted on the express condition that the interruptible service authorized thereby shall be subject to any curtailment or interruption required to meet existing or future contracted maximum delivery obligations of Florida Gas Transmission Company for firm service to its customers.

The Commission orders:

(A) A certificate of public convenience and necessity be and the same is hereby issued to Florida Gas Transmission Company authorizing the construction and operation of facilities as hereinbefore described and as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are hereby conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c) (3), (c) (4) and (e) of Section 157.20 of said Regulations.

(C) The facilities hereby authorized shall be completed and placed in actual operation as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act within 6 months from the date on which this order issues.

(D) The certificate issued hereby is granted on the express condition that the interruptible service authorized herein shall be subject to any curtailment or interruption required to meet existing or future contracted maximum delivery obligations of Florida Gas Transmission Company for firm service to its customers.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

THE MONTANA POWER COMPANY, PROJECT NOS. 1869 AND 2252

ORDER PERMITTING WITHDRAWAL OF APPLICATION FOR LICENSE AND VACATING ORDER FIXING HEARING

(Issued October 27, 1964)

The Montana Power Company (Applicant) in March of 1929 acquired hydroelectric generating facilities at the Thompson Falls site on the Clark Fork River in Montana, the first unit of which had been placed in service in July of 1915. By order of March 15, 1949, 8 FPC 751, in Project No. 1869, the Commission authorized the issuance of a license to the Applicant for the development at this site, effective from January 1, 1938, and to terminate December 31, 1975. The license included provisions in Article 11 which obligated the licensee to make economical enlargements of the project in the public interest when directed by the Commission.[1]

On October 27, 1958, the Applicant filed an application, Project No. 2252, for a new 50-year license for the Thompson Falls site, based on a plan for redevelopment consisting of raising the reservoir 2 feet and installing about 35,000 kw of additional capacity. In view of the provisions in Article 11 contemplating such redevelopment under the existing license, the application, seeking a new 50-year license, raised a serious legal question on its face because granting the application would mean that the United States' right to recapture the project would be delayed some 35 years. It was apparent that if the Company had an urgent need for additional power it would have proceeded under its existing license so as to avoid the legal problem raised by its request for a new 50-year license.

The Commission by its order of September 11, 1964, consolidated the proceedings in Project No. 1869 and 2252 and fixed a hearing for December 8, 1964. Subsequently, on September 21, 1964, the Applicant filed a petition to withdraw its application in Project No. 2252, and on the same date also filed a petition for cancellation of the hearing fixed by the Commission's order of September 11, 1964. Applicant in its petition states that:

1. Plans for construction of a steam electric generating plant have progressed to a point where design and engineering plans have been made and contracts have been entered into for the purchase of equipment;

2. Since the filing of the application The Montana Power Company has contracted for a substantial quantity of power from the Hanford Atomic Reactor plant of the Washington Public Power Supply System;

---

[1] Article 11 of the license in Project No. 1869 provides:

Article 11. In order that the Thompson Falls Project may conform to a comprehensive plan for improving and developing the Clark Fork of the Columbia River, for the use or benefit of interstate commerce, for the improvement and utilization of water-power development and for other beneficial public uses including recreational purposes, the licensee as directed by the Commission, after notice and opportunity for hearing, shall enlarge the Thompson Falls Project to the extent that it is economically sound and in the public interest to do so in accordance with plans which the Commission shall find best adapted to such comprehensive plan; or in lieu thereof, the licensee shall surrender the license for Project No. 1869 and remove its structures from the river.

3. In addition to the Hanford power, substantial quantities of additional power will become available through Bonneville Power Administration by virtue of the recently implemented treaty with Canada relating to the storage of water in Canada and the coordinated operation of generating facilities on the Columbia River; and

4. There appears to be a probability that construction of the High Mountain Sheep Project will commence within the foreseeable future which will be a further source of power available to Applicant.

Montana attributes its withdrawal to the delay in processing its application in Project No. 2252 and claims that in the intervening time these above-mentioned alternative sources of power have been obtained and it now has a surplus of power available. Montana, however, fails to point out that it also had a power surplus in 1958 when the instant application was filed which continued during the intervening years. In 1956 during the hearing on the Low Mountain Sheep-Pleasant Valley development (Project No. 2173) of which The Montana Power Company was one of the four companies sponsoring the Applicant for license, the President of the Company testified that the Company would not be in a position to use its full share of the output of that development initially and that its share would probably be divided between two of the other sponsoring companies. At that time the contemplated construction schedule for the Mountain Sheep-Pleasant Valley Project No. 2173 was 42 months, with anticipated completion around August of 1959, if a license were issued.

In May of 1958, the Montana Power Company added the newly constructed Cochrane development with its rated generator capacity of 24,000 kw to its system. The license for the Cochrane development was issued by order of April 23, 1956 in Project No. 2188 (15 FPC 1330). It was thus apparent that at the time the application in Project No. 2252 for redevelopment of the Thompson Falls site was filed, the Company was not in need of additional power and that the principal purpose of that application was to obtain a new 50-year license for an existing project already held under license.

In light of these circumstances, the processing of the application for Project No. 2252 was held in abeyance pending disposition of another application raising the same question of the propriety of issuing a new license where in form an old license is surrendered but in substance the existing license would extend beyond 50 years. This was the application of the Pennsylvania Power & Light Company filed July 31, 1959, for Holtwood Project No. 2268, which was under license to that Company as Project No. 1881. It is significant that Applicant at no time pressed for a disposition of its application.

After oral argument in the proceedings on Holtwood Project No. 2268, the Commission on March 13, 1963, denied the application for a new 50-year license by its Opinion No. 380 (29 FPC 468). Rehearing was subsequently denied by the Commission's order of June 25, 1963 (29 FPC 1294). The application in Project No. 2252 was then processed and set for hearing.

It is clear in light of our opinion in the *Holtwood* case that the application for a new 50-year license for the Thompson Falls project should not be granted and in these circumstances we shall permit Applicant to withdraw its application for Project No. 2252. The Commission, however, reserves its right to require Montana Power Company after hearing to redevelop the Thompson Falls site under Article 11 of its license for Project No. 1869.

The Commission finds:

It will not be inconsistent with the public interest to permit withdrawal of the application for license in Project No. 2252, and to vacate the order of September 11, 1964, fixing hearing in Project Nos. 1869 and 2252, as hereinafter provided.

The Commission orders:

(A) The order of September 11, 1964, consolidating proceedings and fixing hearing in Project Nos. 1869 and 2252, is vacated.

(B) The petition filed by The Montana Power Company to withdraw its application in Project No. 2252 for license authorizing redevelopment of the Thompson Falls site on the Clark Fork River, is granted and the proceeding in Project No. 2252 is terminated.

(C) The right to further consider the obligations of The Montana Power Company under Article 11 of its license for Project No. 1869 is hereby reserved.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

SHELL OIL COMPANY (OPERATOR), ET AL., DOCKET NO. CI65-87

ORDER GRANTING MOTION FOR RECONSIDERATION AND AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued October 27, 1964)

On September 29, 1964, Shell Oil Company (Operator), *et al.* (Applicant) filed in Docket No. CI65-87 an "Application for Rehearing and Motion for Reconsideration" of the order of the Commission issued September 16, 1964 [not reported], in said docket. By said order Applicant received a certificate of public convenience and necessity authorizing the sale of natural gas in interstate commerce to Texas Eastern Transmission Corporation (Texas Eastern) for resale from the Sheridan Field, Colorado County, Texas, pursuant to a contract designated as Applicant's FPC Gas Rate Schedule No. 307.

In its certificate application filed in the subject docket on August 3, 1964, Applicant requested a certificate limited to a term of 8 years and stated that "This proposed sale for a term of eight (8) years has been tailored to take into account the needs of the purchaser, the surplus gas in the Sheridan Field, the ultimate construction of a new Sheridan Field processing plant, and the existing gas sales contracts with Texas Eastern and Iroquois." Applicant presented no detailed explanation of these facts to justify the limitation of the term of the certificate.

The order issued September 16, 1964, did not limit the term of Applicant's Certificate and stated, in part, in ordering paragraph (C) the following:

> Nor shall the grant of the certificates aforesaid for service to the particular customers involved imply approval of all of the terms of the respective contracts, particularly as to the cessation of service upon termination of said contracts, as provided by Section 7(b) of the Natural Gas Act.

In its motion for reconsideration Applicant sets forth in detail its reasons for requesting a limitation of the term of the certificate. All of the reserves in the particular area of the Sheridan Field are not dedicated to Texas Eastern. Rather, the contract provides that Applicant shall deliver a daily contract

quantity of 75,000 Mcf, a quantity computed to take into consideration the existing situation in the Sheridan Field. Two previous contracts have been executed for the sale of gas from the same reserves to Texas Eastern [1] providing for a daily contract quantity of 60,800 Mcf and to Iroquois Gas Corporation [2] providing for a daily contract quantity of 50,000 Mcf. Additionally, Applicant provides 50,000 Mcf per day to the Houston, Texas, industrial market. Applicant estimates that it will be able to deliver the daily contract quantity under the subject certificate for only the 8-year period set out in the contract. Deliveries beyond that time will result in a conflict between the subject contract and the prior contracts.

By letter dated October 1, 1964, Texas Eastern supports the motion of Applicant and states that it desires to purchase Applicant's excess gas to augment and conserve its existing gas supplies. However, inasmuch as Texas Eastern requires an assurance that excess gas will be available when needed, and inasmuch as Applicant is not in a position to dedicate specific reserves to the performance of its contract obligations, the contract is limited specifically to a term of 8 years. Texas Eastern states further that the guarantee of availability necessarily carries with it the obligation, without limitation, to drill wells, install compressors, build gathering systems, or do whatever may be necessary to maintain such availability, and that because of the limited reserves in the area it is not within the range of economic feasibility for Applicant to continue this guarantee beyond 8 years.

Texas Eastern states further that inasmuch as the subject sale is not confined to a specific reserve dedication, and inasmuch as Applicant may deliver gas from sources other than the Sheridan Field, Texas Eastern must be assured that it may discontinue purchases at the expiration of the contract term in order that it may plan future gas supplies in a manner which will permit minimum exposure to take-or-pay problems. This situation is stated to be especially acute in view of the relatively large volume of gas involved.

In view of the representations made by Shell and Texas Eastern, we conclude that, by reason of the physical and financial factors shown, this is a proper case warranting the issuance of a certificate for a limited period of time.

The Commission finds:

(1) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that the motion for reconsideration filed by Shell Oil Company (Operator), *et al.*, on September 29, 1964, in Docket No. CI65–87 should be granted.

(2) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the order issuing a certificate of public convenience and necessity to Shell Oil Company (Operator), *et al.*, on September 16, 1964, in Docket No. CI65–87 should be amended by limiting the certificate to the term of the contract.

The Commission orders:

The order issuing a certificate of public convenience and necessity to Shell Oil Company (Operator), *et al.*, on September 16, 1964, in Docket No. CI65–87 be and the same is hereby amended by limiting the certificate to the term of the contract.

[1] Authorized in Docket No. G–5004.
[2] Authorized in Docket No. G–4325.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

TRUNKLINE GAS COMPANY, DOCKET NO. CP62-41; TEXAS EASTERN TRANSMISSION CORPORATION, DOCKET NO. CP62-120

FINDINGS AND ORDER FURTHER AMENDING ORDER ISSUING CERTIFICATES OF PUBLIC CONVENIENCE AND NECESSITY

(Issued October 27, 1964)

On June 22, 1964, Trunkline Gas Company (Trunkline) filed an application to amend further the Commission's order issued January 25, 1962, 27 FPC 178, in Docket Nos. CP62-41 and CP62-120, as amended, to renew the authorization and to permit the continuation of the sale of natural gas and operation of the facilities therein authorized, until July 1, 1965, all as more fully set forth in the application to amend.

The order of January 25, 1962, authorized Trunkline in Docket No. CP62-41 to construct and operate certain facilities and to sell and deliver, on an interruptible basis, a maximum of 30,000 Mcf of natural gas per day to Texas Eastern Transmission Corporation (Texas Eastern) until July 1, 1962. Said order also authorized Texas Eastern in Docket No. CP62-120 to construct certain facilities and to operate same to receive gas from Trunkline until July 1, 1962. By subsequent order the authorization was extended to July 1, 1964, and the maximum daily volume limitation was increased to 36,750.

The application indicates that both Texas Eastern and Trunkline have derived benefits from the subject sale and both expect to continue to do so. Trunkline states that Texas Eastern continues to need gas when available from Trunkline and that Trunkline has found that the sales to Texas Eastern from time to time have improved Trunkline's gas supply position and have provided flexibility in operations. Texas Eastern is not obligated to buy and Trunkline is not obligated to sell, but there are occasions in the operation of both systems when a purchase and sale meets the system needs of each company. Therefore, Trunkline requests authority to continue said sale and operations until July 1, 1965.

Due notice of the filing of the application to amend and opportunity for hearing thereon has been given by publication in the Federal Register on September 26, 1964 (29 F.R. 13412). No protest or petition to intervene has been filed in this proceeding.

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued January 25, 1962, in Docket Nos. CP62-41 and CP62-120, as amended, be further amended as hereinafter ordered.

The Commission orders:

(A) In order to renew the authorization and to permit the continuation of the sales of natural gas and operation of the facilities therein provided; ordering paragraphs (A) and (B) of the Commission's order issued January 25, 1962, in Docket Nos. CP62-41 and CP62-120, as amended, be and the same are hereby further amended to read as follows:

(A) A certificate of public convenience and necessity be and the same is hereby issued authorizing Applicant, Trunkline Gas Company, to construct and operate the proposed facilities and to sell and deliver a maximum of 36,750 Mcf of natural gas per day at 14.65 psia to Texas Eastern Transmission

Corporation until July 1, 1965, as hereinbefore described all as more fully described in the application, as supplemented, in Docket No. CP62-41, upon the terms and conditions of this order.

(B) A certificate of public convenience and necessity be and the same is hereby issued authorizing Applicant, Texas Eastern Transmission Corporation, to construct and operate the proposed facilities in order to receive natural gas from Trunkline until July 1, 1965, as hereinbefore described, all as more fully described in the application, as supplemented, in Docket No. CP62-120, upon the terms and conditions of this order.

(B) In all other respects said order, as amended, shall remain in full force and effect.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

UNITED FUEL GAS COMPANY, DOCKET NO. G-10658

FINDINGS AND ORDER AMENDING ORDER ISSUING CERTIFICATES OF PUBLIC CONVENIENCE AND NECESSITY

(Issued October 27, 1964)

On July 30, 1964, United Fuel Gas Company (Applicant) filed in Docket No. G-10658 an application to amend the Commission's order issued September 18, 1956, 16 FPC 978, in said docket by authorizing Applicant to transport and deliver a maximum of 60,000 Mcf of natural gas per day, on an interruptible basis, to the E. I. du Pont de Nemours & Co. (du Pont) in lieu of the maximum deliveries of 35,000 Mcf per day heretofore authorized in this proceeding, all as more fully set forth in the application to amend.

The order of September 18, 1956, authorized Applicant to construct and operate certain facilities in order to deliver up to 35,000 Mcf per day, on an interruptible basis, to du Pont at its Belle Plant in Kanawha County, West Virginia. Du Pont utilizes natural gas in the manufacture of ammonia, ethylene glycol and other related chemical products. Du Pont has advised Applicant that it plans to improve and expand its facilities and, therefore, it desires to purchase additional quantities of natural gas.

No additional facilities will be necessary to provide the increased service to du Pont.

Due notice of the filing of the application to amend and opportunity for hearing thereon has been given by publication in the Federal Register on September 18, 1964 (29 F.R. 13090). No protest or petition to intervene has been filed in this proceeding.

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued September 18, 1956, in Docket No. G-10658 be amended as hereinafter ordered.

The Commission orders:

(A) The Commission's order issued September 18, 1956, in Docket No. G-10658 be and the same is hereby amended by authorizing Applicant to transport and deliver a maximum of 60,000 Mcf of natural gas per day, on an interruptible basis, to the E. I. du Pont de Nemours & Co. in lieu of the maximum deliveries

of 35,000 Mcf per day heretofore authorized in this proceeding, all as hereinbefore described and as set forth in the application to amend.

(B) The certificate, as amended hereby, is granted on the express condition that the interruptible service authorized herein shall be subject to any curtailment or interruption required to meet existing or future contracted maximum delivery obligations of Applicant for firm service to its customers.

(C) In all other respects said order shall remain in full force and effect.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

CENTRAL ILLINOIS PUBLIC SERVICE COMPANY, DOCKET NO. CP65-7

FINDINGS AND ORDER DIRECTING PHYSICAL CONNECTION OF FACILITIES AND SALE OF NATURAL GAS

(Issued October 28, 1964)

On July 6, 1964, Central Illinois Public Service Company (Applicant) filed in Docket No. CP65-7 and application pursuant to Section 7(a) of the Natural Gas Act for an order of the Commission directing Texas Eastern Transmission Corporation (Texas Eastern) to establish physical connection of its natural gas transmission system with facilities proposed to be constructed by Applicant, and to sell and deliver natural gas to Applicant for resale and distribution in the Village of Goreville, Johnson County, Illinois, and its environs, all as more fully set forth in the application.

Applicant asks that Texas Eastern be directed to construct and operate a line tap and metering and regulating station at or on its transmission line at a point approximately one-half mile north of Goreville.

Applicant proposes to construct, operate and maintain a town border station at or near the corporate limits of Goreville and from such station will construct gas distribution mains for the purpose of operating and maintaining a gas distribution system to serve the Village of Goreville and its environs. The connection between the city gate and Texas Eastern's proposed tap and metering station would consist of a 2-inch gas transmission pipeline approximately one-half mile in length.

The estimated cost of Applicant's proposed construction is $81,602 and will be financed by funds derived from internal sources.

The natural gas requirements for Goreville are estimated as follows:

	1st Year	2d Year	3d Year
Annual (Mcf)	9,431	14,063	18,588
Peak day (Mcf)	97	148	190

Applicant was granted a certificate of public convenience and necessity on June 2, 1964, by the Illinois Commerce Commission authorizing the proposed project. Applicant has also been granted a franchise by the Village of Goreville.

On August 6, 1964, Texas Eastern answered the application, stating that it will abide by whatever decision the Commission may make on the merits of the application.

Due notice of the filing of the application and opportunity for hearing thereon has been given by publication in the Federal Register on October 1, 1964 (29

F.R. 13549). No protest, petition to intervene, or notice of intervention in opposition to the granting of the application has been filed.

The Commission finds:

(1) Texas Eastern Transmission Corporation, a Delaware corporation having its principal place of business in Shreveport, Louisiana, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of March 30, 1949, in Docket No. G–1089 (8 FPC 228).

(2) Applicant, Central Illinois Public Service Company, is a public utility duly organized and existing under the laws of the State of Illinois, having its principal place of business in Quincy, Illinois, and is authorized by the Illinois Commerce Commission and by the Village of Goreville, Illinois, to construct, operate and maintain a natural gas distribution pipeline system and to engage in the business of distributing and selling natural gas in said community.

(3) It is necessary and desirable in the public interest that Texas Eastern be directed to establish physical connection of its natural gas transmission system with the proposed facilities of Applicant and to sell and deliver up to 190 Mcf of natural gas per day to Applicant, as set forth in the application in this proceeding and as hereinafter ordered and conditioned.

(4) Applicant should be prepared to receive natural gas from Texas Eastern within 1 year from the date of issuance of this order.

(5) The requirement that Texas Eastern serve Applicant, as proposed, will not place any undue burden upon Texas Eastern nor impair its ability to render adequate service to its existing customers.

The Commission orders:

(A) Texas Eastern Transmission Corporation be and is hereby directed to establish physical connection of its natural gas transmission system with the proposed facilities of Applicant, Central Illinois Public Service Company, and to sell and deliver up to 190 Mcf of natural gas per day to Applicant, all as hereinbefore described and as more fully set forth in the application in this proceeding.

(B) Applicant shall be prepared to receive natural gas from Texas Eastern within 1 year from the date of issuance of this order.

(C) Texas Eastern shall report to the Commission in writing the date of commencement of service to Applicant within 10 days thereof.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

CITIES SERVICE GAS COMPANY, DOCKET NO. CP65–21

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued October 28, 1964)

On July 20, 1964, Cities Service Gas Company (Applicant) filed in Docket No. CP65–21 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the installation and operation of meter and regulator facilities and the transportation of natural gas to Rounds & Stewart Natural Gasoline Company, Inc., of Wichita, Kansas, all as more fully set forth in the application.

Applicant proposes to serve Rounds & Stewart, a direct industrial customer, natural gas on an interruptible basis up to 1,000 Mcf daily for a 6-month period

for a recycling operation to determine whether the ultimate recovery of hydrocarbons from the Lost Springs Field in Marion County, Kansas, can be increased by recycling operations. Rounds & Stewart will pay an average price of 24.396¢ per Mcf for such natural gas during the 6 months period.

The estimated cost of the installation of the proposed facilities (tap, meter and regulator equipment) is $2,570, which will be defrayed from Applicant's treasury cash.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on October 23, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits submitted in support of the authorization sought, and upon consideration of the record finds and orders as hereinafter stated.

The Commission finds:

(1) Applicant, Cities Service Gas Company, a Delaware corporation having its principal place of business in Oklahoma City, Oklahoma, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of December 28, 1943, in Docket No. G–298 (4 FPC 471).

(2) The proposed construction and operation of facilities and transportation of natural gas by Applicant as hereinbefore described, and as more fully described in the application and exhibits in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid construction and operation of facilities and transportation of natural gas are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3), (c)(4) and (e) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity be and the same is hereby issued to Applicant, Cities Service Gas Company, authorizing the construction and operation of facilities and the transportation of natural gas for 6 months from the date of this order, as more fully described in the application and exhibits in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are hereby conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3), (c)(4) and (e) of Section 157.20 of such Regulations.

(C) The facilities hereby authorized shall be completed and placed in actual operation, as provided by paragraph (b) of Section 157.20 of the aforesaid Regulations within 6 months of the date on which this order issues.

(D) The facilities authorized by the certificate issued hereby shall be utilized to transport to Rounds & Stewart volumes of natural gas not to exceed 1,000 Mcf daily on an interruptible basis for a period of 6 months commencing with the date of issuance hereof.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

CITIES SERVICE GAS COMPANY, DOCKET NO. CP65-34

FINDINGS AND ORDER AFTER STATUTORY HEARING PERMITTING AND APPROVING ABANDONMENT

(Issued October 28, 1964)

On August 6, 1964, Cities Service Gas Company (Applicant) filed in Docket No. CP65-34 an application pursuant to Section 7(b) of the Natural Gas Act for permission to abandon certain segments of transmission pipelines located in Cowley and Crawford Counties in Kansas, Logan County, Oklahoma, and Carroll County, Missouri, all as more fully set forth in the application.

Applicant proposes (1) to abandon and salvage (a) approximately 12,478 feet of 8-inch and 16,069 feet of 6-inch pipeline of its Rainbow Bend line in Cowley County, Kansas, previously used to serve the requirements of Sunray Oil Company for lease operations (but now abandoned by Sunray), (b) approximately 36,600 feet of its West Lawrie 6-inch pipeline connecting its system with various producers in the West Lawrie field in Logan County, Oklahoma, no longer required due to field depletion, (2) to abandon in place (a) approximately 0.26 mile of its Carrollton 4-inch pipeline in Carroll County, Missouri, no longer required for service to Carrollton due to construction of a nearby 8-inch line by The Gas Service Company, (b) approximately 0.5 mile of its Girard 6-inch pipeline in Crawford County, Kansas, no longer required to serve Girard, Kansas, due to the construction of other facilities authorized in Docket No. CP63-66, and (3) to abandon by sale to The Gas Service Company approximately 0.59 mile of its Pittsburg 12-inch pipeline located in Township 30 South in Crawford County, Kansas, now located in a highly developed urban area, for use by Gas Service as a part of its Pittsburg distribution system.

Applicant states that the facilities which will be abandoned in place are not worth reclaiming. The facilities to be sold to The Gas Service Company will be sold for $7,435. The estimated cost connected with the facilities to be reclaimed is $26,000 with a salvage credit of $46,060.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on October 23, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorizations sought, and upon consideration of the record finds and orders as hereinafter stated.

The Commission finds:

(1) Applicant, Cities Service Gas Company, a Delaware corporation having its principal place of business in Oklahoma City, Oklahoma, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of December 28, 1943, in Docket No. G-298 (4 FPC 471).

(2) The facilities proposed to be abandoned, as hereinbefore described and as more fully described in the application herein, are used in the transportation and sale of natural gas in interstate commerce, subject to the jurisdiction of the

Commission, and such abandonment is subject to the requirements of Subsection (b) of Section 7 of the Natural Gas Act.

(3) The proposed abandonment of the aforesaid facilities is permitted by the public convenience and necessity and approval thereof should be granted as hereinafter ordered.

The Commission orders:

(A) Permission for and approval of the abandonment of the facilities hereinbefore described, as more fully described in the application in this proceeding, are hereby granted to Applicant.

(B) Applicant shall advise the Commission of the date of abandonment of the facilities as authorized in paragraph (A) above within 10 days of such abandonment.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

COLORADO INTERSTATE GAS COMPANY, DOCKET NO. CP64-234

ORDER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued October 28, 1964)

Colorado Interstate Gas Company (Applicant), Colorado Springs, Colorado, filed on August 26, 1964, in Docket No. CP64-234, an application to amend an order of the Commission issued August 10, 1964, 32 FPC 567, in Docket No. CP64-234, issuing a certificate of public convenience and necessity authorizing among other things, the installation of 2,640 Hp capacity in its Mocane Compressor Station. The application to amend seeks authorization to install 2,880 Hp capacity in the Mocane Compressor Station rather than the 2,640 Hp capacity authorized by the Commission order issued August 10, 1964, all as more fully set forth in the application to amend.

Applicant is unable to obtain two 1,320 Hp compressor engines, but is able to obtain two 1,440 Hp compressor engines in time to meet construction schedules.

Due notice of the subject application to amend and opportunity for hearing has been given by publication in the Federal Register on September 25, 1964 (29 F.R. 13353). No protest or petition to intervene has been filed concerning this amendment.

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued August 10, 1964, in Docket No. CP64-234 be amended as hereinafter ordered.

The Commission orders:

(A) The Commission's order issued August 10, 1964, in Docket No. CP64-234 be and it is hereby amended by authorizing Colorado Interstate Gas Company to install and operate greater compressor capacity in its Mocane Compressor Station than previously authorized, all as hereinbefore described and as set forth in the subject application to amend.

(B) In all other respects said order shall remain in full force and effect.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

MICHIGAN WISCONSIN PIPE LINE COMPANY, DOCKET NO. CP64-155

ORDER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued October 28, 1964)

On July 30, 1964, Michigan Wisconsin Pipe Line Company (Applicant) filed in Docket No. CP64-155 an application to modify an order of the Commission issued in Docket No. CP64-155 on June 2, 1964, 31 FPC 1333, which authorized, among other things, deliveries of natural gas to American Gas Company (American Gas), Allerton Gas Company (Allerton), Michigan Gas and Electric Company (Michigan Gas) and Wisconsin Fuel and Light Company (Wisconsin Fuel). The application to modify requests revision of Maximum Daily Quantity (MDQ) volumes of natural gas nominated in Exhibit I in Docket No. CP64-155 to the named customer companies, all as more fully set forth in the application to amend.

American Gas, Allerton, Michigan Gas and Wisconsin Fuel have informed the Applicant that they desire to execute service agreements to become effective September 1, 1964, for volumes at variance with their prior nominations which have been included in the Introduction to Exhibit I to the application in this proceeding. The following table sets forth the volumes shown in said Exhibit I and the revised nominations:

Company	Exhibit I nomination (Mcf)	Revised nomination (Mcf)	Increase or decrease (Mcf)
American Gas	2,712	1,200	(1,512)
Allerton	682	625	(57)
Michigan Gas	51,000	50,000	(1,000)
Wisconsin Fuel	33,200	34,300	1,100

Applicant has consented to the changes and the service agreements tendered for filing by Applicant on July 13, 1964, and requests that the said agreements become effective September 1, 1964. The requested effective date should be denied and the service agreements be made effective on the date of the issuance of this order. The service agreement with American Gas also provides for service to be rendered under Applicant's Rate Schedule ACQ-1, as requested by American Gas, in lieu of Rate Schedule SGS-1 under which American Gas previously received service.

Due notice of the filing of the application to amend and opportunity for hearing thereon have been given by publication in the Federal Register on September 26, 1964 (29 F.R. 13412). No protest or petition to intervene has been filed in the proceeding concerning this amendment.

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act, and the public convenience and necessity require (1) that the Commission's order issued June 2, 1964, in Docket No. CP64-155 be amended as hereinafter ordered, and (2) the executed service agreements filed with the Commission on July 13, 1964, be accepted for filing, effective on the date of this order.

The Commission orders:

(A) The Commission's order, issued June 2, 1964, in Docket No. CP64-155 be and the same is hereby amended by authorizing Michigan Wisconsin to change

maximum daily quantities to conform with volumes designated in revised nominations as set forth hereinabove, all as hereinbefore described and as set forth in the subject application to amend.

(B) The service agreements filed with the Commission on July 13, 1964, be accepted for filing, effective on the date of issuance of this order.

(C) In all other respects said order shall remain in full force and effect.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

NORTHERN NATURAL GAS COMPANY, DOCKET NO. CP64-188

FINDINGS AND ORDER AMENDING ORDER AUTHORIZING ABANDONMENT OF FACILITIES

(Issued October 28, 1964)

On July 14, 1964, as supplemented on August 24, 1964, Northern Natural Gas Company (Applicant) filed in Docket No. CP64-188 an application to amend the Commission's order, issued May 5, 1964, 31 FPC 1100, in said docket by authorizing Applicant to sell in place portions of the two 4-inch branchlines previously used to serve the City of Owatonna, Minnesota, and to construct and operate certain measuring facilities, all as more fully set forth in the application to amend, as supplemented.

The order of May 5, 1964, authorizing Applicant to abandon and remove the two subject branchlines and to construct and operate a new 6-inch branchline to replace the lines to be removed. Subsequent to the authorization of May 5, 1964, Owatonna and certain existing rural customers of Applicant offered to purchase portions of the two branchlines to be removed. Additionally, the rural customers will pay Applicant the cost of the necessary measuring facilities for said existing rural customers, which cost is estimated to be $522. Accordingly, Applicant requests authorization to abandon by sale rather than to abandon and remove portions of the two branchlines and to construct and operate measuring facilities for the existing rural customers.

The sale of portions of the branchlines will relieve Applicant of the cost of removal. Applicant will sell said lines for $1.00 and other good and valuable consideration.

Due notice of the filing of the application to amend and opportunity for hearing thereon have been given by publication in the Federal Register on September 25, 1964 (29 F.R. 13353). No protest or petition to intervene has been filed in this proceeding.

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued May 5, 1964, in Docket No. CP64-188 be amended as hereinafter ordered.

The Commission orders:

(A) The Commission's order issued May 5, 1964, in Docket No. CP64-188 be and the same is hereby amended by authorizing Applicant to abandon by sale rather than to abandon and remove portions of the subject branchlines and to construct and operate measuring facilities, all as hereinbefore described and as set forth in the application to amend, as supplemented.

(B) In all other respects said order shall remain in full force and effect.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

TEXAS EASTERN TRANSMISSION CORPORATION, DOCKET NO. CP64-5; ALGONQUIN GAS TRANSMISSION COMPANY, DOCKET NO. CP64-6

FINDINGS AND ORDER AMENDING ORDER ISSUING CERTIFICATES OF PUBLIC CONVENIENCE AND NECESSITY

(Issued October 28, 1964)

On July 30, 1964, Texas Eastern Transmission Corporation (Texas Eastern filed in Docket No. CP64-5 and Algonquin Gas Transmission Company (Algonquin) filed in Docket No. CP64-6, applications to amend the Commission's order issued December 19, 1963, 30 FPC 1559, in said dockets by authorizing each Applicant to construct and operate certain additional facilities, and, also, in the case of Texas Eastern to accelerate the construction of third-year facilities heretofore authorized by said order, and to sell and deliver additional volumes of natural gas, all as more fully set forth in the applications to amend.

The order of December 19, 1963, authorized Texas Eastern and Algonquin, among other things, each to construct and operate certain facilities increasing their respective pipeline systems' peak day capacity in order to sell and deliver additional volumes of natural gas. Texas Eastern was authorized to construct facilities over a 4-year period and to commence selling the additional volumes of gas with the 1964-65 heating season. Algonquin was authorized to commence selling certain additional volumes of gas on November 1, 1964, and certain other additional volumes on November 1, 1965.

Texas Eastern proposes herein to sell the following additional daily volumes to three existing customers and to one proposed new customer, York County Gas Company (York Gas):

Customer	Rate schedule	Commencing November 1964 (Mcf)	Commencing November 1965 (Mcf)	Total (Mcf)
Algonquin	GS		3,070	3,070
Lewis Gas Company	GS	322	698	1,020
The Brooklyn Union Gas Company	WS	10,200	15,300	25,500
York Gas	WS	4,590		4,590
Total		15,112	19,068	34,180

Texas Eastern states that the proposed deliveries are needed to meet the increased requirements of the above customers. Subsequent to the issuance of the original authorization in Docket No. CP64-5, said customers found that they needed the additional requested volumes of gas. The sale to Brooklyn Union is for a 2-year period ending November 15, 1966. Texas Eastern also proposes to construct and operate a metering and regulating station in York County, Pennsylvania, at an estimated cost of $54,000, in order to render the proposed service to York Gas. Further, Texas Eastern proposes to accelerate construction of the third-year facilities originally authorized in Docket No. CP64-5 in order to be able to render gas service as currently proposed.

Algonquin proposes herein to sell daily additional volumes of gas to three existing customers and to reduce the sale of gas to a fourth customer, the Norwood Gas Company (Norwood), all as follows:

Customer	Presently authorized (Mcf)	Additional request (reduction) (Mcf)	Total proposed commencing Nov. 1, 1965 (Mcf)
Cambridge Gas Company	18,775	500	19,275
Norwood	2,928	(230)	2,698
Providence Gas Company	31,000	2,000	33,000
Worcester Gas Light Company	17,200	800	18,000
Total		3,070	

Algonquin states that operating experience has demonstrated the need for and such customers have in fact requested the above changes in their maximum daily quantities commencing November 1, 1965.

Algonquin also proposes to construct and operate 23.9 miles of 30-inch pipeline loop between Glastonbury, Connecticut, and a point approximately one mile east of Mansfield, Connecticut, in lieu of constructing the 22.2 miles of 30-inch pipeline loop between Conventry and Pomfret, Connecticut, previously authorized in Docket No. CP64–6. Algonquin states that this change in facilities is required in order to render the proposed additional service.

Due notice of the filing of the applications to amend and opportunity for hearing thereon has been given by publication in the Federal Register on October 3, 1964 (29 F.R. 13619). The Brooklyn Union Gas Company filed a petition to intervene in these proceedings. The burden of said filing is that petitioner does not request formal hearing herein and does not object to the hearing and disposition of the subject applications under the shortened procedure provided for by the Commission's Rules, but that petitioner desires to preserve its rights to appear and participate fully in the event that this matter should be set for formal hearing. Inasmuch as a formal hearing is not being set herein, no further action on said petition appears necessary. No protest or other petition to intervene has been filed in these proceedings.

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued December 19, 1963, in Docket Nos. CP64–5 and CP64–6 be amended as hereinafter ordered.

The Commission orders:

(A) The Commission's order issued December 19, 1963, in Docket Nos. CP64–5 and CP64–6 be and the same is hereby amended by authorizing Texas Eastern in Docket No. CP64–5 to accelerate the construction of third-year facilities heretofore authorized; to construct and operate facilities for service to York Gas, and to sell and deliver natural gas as herein proposed, and by authorizing Algonquin in Docket No. CP64–6 to construct and operate the hereinabove described facilities in lieu of the facilities heretofore authorized and to sell and deliver natural gas as herein proposed, all as hereinbefore described and as set forth in the applications to amend in Docket Nos. CP64–5 and CP64–6.

(B) The facilities proposed to be constructed by Texas Eastern for the 1965–66 heating season shall not be included as gas plant in service prior to the commencement of such heating season.

(C) In all other respects said order shall remain in full force and effect.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

THE MONTANA POWER COMPANY, PROJECT NO. 2188

ORDER DETERMINING ACTUAL LEGITIMATE ORIGINAL PROJECT COST, NET CHANGES THEREIN, AND PRESCRIBING ACCOUNTING THEREFOR

(Issued October 29, 1964)

The Montana Power Company, Licensee for Project No. 2188,[1] filed statements from time to time of claimed cost pursuant to Sections 4.1 and 4.20 of the Commission's Regulations under the Federal Power Act, and recorded upon its books of account for the various developments of the project, an aggregate *recorded* project cost of $40,584,237.88 as of December 31, 1959.

For the constructed developments of the Project (Morony, Ryan, Rainbow, Black Eagle, Holter, Madison, Hauser and Hebgen), Licensee claims an aggregate actual legitimate original cost of $29,129,877.51 as of December 1, 1948, the effective date of the license. With respect to Licensee's newly constructed Cochrane development, the claimed cost is $10,621,373.91 as of December 31, 1958. Recorded cost changes for the constructed developments from December 1, 1948 through December 31, 1959. The initial cost for the Cochrane development and changes for the period from December 31, 1958 through December 31, 1959, total a net increase of $11,599,284.49, resulting in Licensee's total recorded project cost of $40,584,237.88 as of December 31, 1959.

The Commission's staff conducted a field examination of the Licensee's books, records and other data for the purpose of ascertaining the correctness of Licensee's claimed costs. As a result of that examination, staff proposed subject to Commission approval, certain adjustments which have been agreed to by the Licensee and are as shown in the attached Schedules. The adjustments effect a total reduction of $836,448.07 in the recorded actual legitimate original project cost as of December 1, 1948, from $28,984,953.39 to $28,148,505.32; a decrease of $342,401.05 in project cost for the period from December 1, 1948, through December 31, 1959, from $11,599,284.49, to $11,256,883.44 (including the initial cost of the Cochrane development); and resulting in a total project cost as of December 31, 1959, of $39,405,388.76.

By letter dated March 6, 1962, Licensee confirmed its agreement with the proposed staff adjustments and resulting project costs as shown in the attached Schedules I, I–A and II.

The Montana Board of Railroad Commissioners was advised by letter of this Commission dated July 27, 1962, as to the proposed staff adjustments and resulting project costs. By letter dated August 13, 1962, the Montana Commissioners indicated no objection thereto.

---

[1] The project, known as the Missouri-Madison Project, is located on the Missouri and Madison Rivers in Cascade, Gallatin, Lewis and Clark, and Madison Counties, Montana. The license for the construction, operation, and maintenance of the Cochrane development and the continued operation and maintenance of the constructed Morony, Ryan, Rainbow, Black Eagle, Holter, Hauser, Madison, and Hebgen developments, was issued pursuant to Section 4(e) of the Federal Power Act for a period of 50 years, effective as of December 1, 1948.

Articles 33 and 34 of the license provide for Commission determination of the actual legitimate original cost, accrued depreciation, and resulting net investment of Licensee in the parts of the project completed prior to the effective date of the license; the actual legitimate original cost of parts of the project completed after the effective date of the license and of any additions thereto or betterments thereof, and applicable accrued depreciation.

Licensee, as a part of its initial statement of project cost, claimed accrued depreciation applicable to in-service project properties associated with the constructed developments as the effective date of the Licensee in the aggregate amount of $4,782,210.41. Staff analysis of Licensee's provisions for project depreciation has not been completed, and the Staff recommends that the Commission defer for future consideration and determination all questions associated with Licensee's depreciation practices.

The Commission finds:

(1) Licensee, by its acceptance of the proposed adjustments, including the accounting dispositions and resulting project costs, and the Montana Board of Railroad Commissioners, by its lack of objection thereto, have obviated the necessity for notice and opportunity to protest provided in Sections 4.4, 4.5, 4.22 and 4.23 of the Commission's Regulations under the Federal Power Act.

(2) The proposed adjustments, including the accounting dispositions, are reasonable and appropriate for the purposes of the Federal Power Act, and, therefore, should be approved and directed as hereinafter provided.

(3) The actual legitimate original cost of Project No. 2188 as of December 1, 1948, is $28,148,505.32; the net increase or change in the actual legitimate original cost of the project for the period from December 1, 1948, through December 31, 1959, is $11,256,883.44 which includes the initial cost of $10,440,420.74 of the newly constructed Cochrane development; and the resulting actual legitimate original cost of the project as of December 31, 1959, is $39,405,388.76, classified by developments and primary plant accounts, as shown in the attached Schedules I and I–A.

(4) It is necessary and appropriate for the purposes of the Federal Power Act, that the determination of the accrued depreciation of Project No. 2188 be reserved for future Commission consideration.

The Commission orders:

(A) The provisions of Sections 4.4, 4.5, 4.22 and 4.23 of the Commission's Regulations under the Federal Power Act are hereby waived for the purposes of this order.

(B) The foregoing adjustments, including accounting dispositions, proposed by the staff and agreed to by Licensee, are hereby approved and directed to be made by Licensee.

(C) Licensee, to the extent that it has not already done so, shall establish and maintain control and subsidiary project plant accounts, showing the debit balance of $28,148,505.32 as the actual legitimate original cost of the project as of December 1, 1948, the debit amount of $11,256,883.44, as the net increase or change in the actual legitimate original cost of the project for the period from December 1, 1948, through December 31, 1959, and the debit balance of $39,405,388.76, as the actual legitimate original cost of the project as of December 31, 1959, all as more specifically shown in the attached Schedules I and I–A classified by primary plant accounts of the Commission's Uniform System of Accounts Prescribed For Public Utilities and Licensees.

(D) The matter of Commission determination of the project accrued depreciation for Project No. 2188 is hereby expressly reserved for future Commission consideration and decision.

(E) Licensee shall within 90 days from the issuance of this order, file with the Commission FPC Form No. 7 and certified copies of its adjusting journal entries in triplicate and submit two additional copies to the Regional Accountant in San Francisco, California.

SCHEDULE I

PROJECT NO. 2188 (MISSOURI-MADISON) THE MONTANA POWER COMPANY

SUMMARY OF CLAIMED AND RECORDED COST OF THE CONSTRUCTED PLANTS AS OF DEC. 1, 1948, AND RECORDED CHANGES THERETO, INCLUDING THE NEWLY CONSTRUCTED COCHRANE PLANT, FOR THE PERIOD FROM DEC. 1, 1948, THROUGH DEC. 31, 1959, WITH ADJUSTMENTS THERETO AND ALLOWED COST AS OF DEC. 31, 1959

SCHEDULE II

PROJECT NO. 2188 (MISSOURI-MADISON)

THE MONTANA POWER COMPANY

ADJUSTMENTS TO CLAIMED INITIAL COST AS OF DEC. 31, 1958 AND TO THE RECORDED CHANGES THERETO FOR THE PERIOD FROM JAN. 1, 1958, THROUGH DEC. 31, 1959, AND ACCOUNTING DISPOSITION THEREOF

No.	Account Title	Total	To adjust recorded cost to claimed cost as of Dec. 31, 1958				Adjustments to claimed initial cost as of Dec. 31, 1958		
			Subtotal	Claimed but not recorded	Recorded but not claimed	Reclassifications claimed but not recorded	Subtotal	No. 1 Nonproject items	No. 2 Overstated, understated, and unrecorded retirements
		(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
	NEWLY CONSTRUCTED PLANT								
	Cochrane development								
	ELECTRIC PLANT IN SERVICE								
	Hydraulic production plant:								
320	Land and land rights	$5,696.61					$5,696.61	($6,280.20)	
326	Roads, railroads, and bridges	(147,737.48)					(147,737.48)	(147,737.48)	
	Total hydraulic production plant	(142,040.87)					(142,040.87)	(154,017.68)	
340	Transmission plant: Land and land rights	240.60					240.60		
	Indirect construction costs:								
51	Warehouse supplies and expense	(64)					(64)	(64)	
61	Temporary construction facilities	(804.61)					(804.61)	(804.61)	
62	Construction equipment	(120.55)					(120.55)	(120.55)	
64	Labor expense	(1.25)					(1.25)	(1.25)	
65	Superintendence, timekeepers, clerks, etc	(442.35)					(442.35)	(442.35)	
66	Insurance, injuries, and damages	(13.62)					(13.62)	(13.62)	
67	Yard handling, hauling expense, winter protection	(6.02)					(6.02)	(6.02)	
	Total indirect construction costs	(1,389.04)					(1,389.04)	(1,389.04)	
	Overhead construction costs:								
71	Engineering	(7,130.55)					(7,130.55)	(7,130.55)	
72	Legal expense	(132.54)					(132.54)	(132.54)

PACIFIC GAS & ELECTRIC COMPANY, PROJECT NOS. 77, 78, 96, 99, 137, 175, 178, 184, 187, 233, 619, 1333, 1354, 1403, 1962, 2019, 2105 AND 2130

ORDER DETERMINING PROJECT ACCRUED DEPRECIATION AND PRESCRIBING ACCOUNTING THEREFOR

(Issued October 29, 1964)

The Commission has here under consideration the matter of the determination of the respective reserves for accrued depreciation applicable to the project properties of 18 licensed projects of the Pacific Gas & Electric Company. Under consideration is the initial accrued depreciation of the constructed portions of Project Nos. 77, 2105, and 2130 as of April 15, 1922, November 1, 1954, and January 1, 1955, respectively, and the accrued depreciation for Project Nos. 77, 2105, and the 15 other licensed projects as of December 31, 1954. The accrued depreciation for Project No. 2130 is determined as of January 1, 1955, the effective date of the license for that project.

The 18 hydroelectric projects[1] have been in operation for varying periods of time, and all were in operation as of December 31, 1954, or January 1, 1955, the terminal dates of the various periods of time of concern herein for all projects.

Previously, the Commission by various orders determined the respective amounts of accrued depreciation applicable to in-service project properties of a number of the projects as of the following dates:

Dates	Reference FPC reports	Project Nos.	Issuance dates of Commission orders	Depreciation reserve, approved amount
Dec. 29, 1921	21 FPC 377	78	Mar. 24, 1959	$55,840.00
Dec. 2, 1922	12th Ann. Rep. of Comm., p. 110	96	Mar. 28, 1932	89,849.69
Feb. 12, 1923	13th Ann. Rep. of Comm., p. 186	99	Apr. 12, 1933	44,220.00
June 26, 1947	19 FPC 448	137	Apr. 2, 1958	408,804.00
Apr. 30, 1925	12th Ann. Rep. of Comm., p. 112	178	Mar. 28, 1932	71,753.37
Feb. 23, 1922	28 FPC 15	184	July 3, 1962	2,917.00
May 1, 1939	9 FPC 534	1333	Feb. 27, 1950	202,842.40
May 1, 1939	9 FPC 542	1354	Feb. 27, 1950	868,113.31
Nov. 6, 1946	16 FPC 846	2019	Aug. 16, 1956	265,580.00

The Commission's staff made a field examination of the books, records and other data of Licensee for the purpose of ascertaining the correctness of the recorded initial accrued depreciation of the constructed portions of Projects Nos. 77, 2105 and 2130 as of April 15, 1922, November 1, 1954, and January 1, 1955, respectively, the changes therein, and in the recorded depreciation for

[1] Licenses for the eighteen projects were issued pursuant to the Federal Water Power Act or Federal Power Act and became effective on the following dates: Project No. 77, April 15, 1922; Project No. 78, December 29, 1921; Project No. 96, December 2, 1922; Project No. 99, February 12, 1923; Project No. 137, November 24, 1925; Project No. 175, July 28, 1922; Project No. 178, April 30, 1925; Project No. 184, February 23, 1922; Project No. 187, April 23, 1923; Project No. 233, October 23, 1923; Project No. 619, April 14, 1926; Project No. 1333, May 1, 1939; Project No. 1354, May 1, 1939; Project No. 1403, August 1, 1941; Project No. 1962, October 1, 1947; Project No. 2019, November 6, 1946; Project No. 2105, November 1, 1954; and Project No. 2130, January 1, 1955.

all the other projects through December 31, 1954 (in the case of Project No. 2130, January 1, 1955). As a result of that examination, the staff proposes no change in the respective amounts recorded by Licensee as accrued depreciation for the various projects involved herein, and recommends that such amounts be allowed. In recommending allowance of the recorded amounts the staff does not necessarily concur in the particular depreciation methods that were utilized by the Licensee for the eighteen projects.

By letter dated October 31, 1963, Licensee concurred in the recommendations of the staff.

By letter of November 14, 1963, the California Public Utilities Commission indicated no objection to Licensee's recorded amounts of accrued depreciation applicable to in-service project properties of the 18 projects considered herein, and the staff's recommendations with respect thereto.

The Commission finds:

(1) The staff's recommendations herein respecting Licensee's recorded amounts of accrued depreciation applicable to in-service project properties of the above-mentioned projects and the California Public Utilities Commission's letter dated November 14, 1963, have obviated the necessity for notice and opportunity to protest provided by Sections 4.4, 4.5, 4.22 and 4.23 of the Commission's Regulations under the Federal Power Act.

(2) The amounts of the initial accrued depreciation applicable to in-service project properties of Project Nos. 77, 2105 and 2130, the net changes in accrued depreciation applicable to in-service project properties of the various projects here involved and the total amounts of accrued depreciation applicable to in-service project properties of Project Nos. 77, 78, 96, 99, 137, 175, 178, 184, 187, 233, 619, 1333, 1354, 1403, 1962, 2019, and 2105 as of December 31, 1954, and of Project No. 2130 as of January 1, 1955, are in the respective amounts set forth in columns 4, 5, and 6 of the attached schedule, classified by functional groups as shown in columns 7 through 10.

The Commission orders:

(A) The provisions of Sections 4.4, 4.5, 4.22 and 4.23 of the Commission's Regulations under the Federal Power Act are hereby waived for the purpose of this order.

(B) The respective amounts of initial accrued depreciation applicable to in-service project properties of Project Nos. 77, 2105 and 2130, net changes therein with respect to those and other projects, and the respective total depreciation reserves for all projects considered herein, all as set forth in finding (2) above, classified by functional groups as shown in the attached schedule, are hereby approved.

(C) Licensee, to the extent that it has not already done so, shall establish and maintain reserves for accrued depreciation for Project Nos. 77, 78, 99, 137, 175, 178, 184, 187, 233, 619, 1333, 1354, 1403, 1962, 2019, 2105, and 2130, showing balances as of December 31, 1954 (Project No. 2130 as of January 1, 1955) in the respective amounts shown in column 6 of the attached schedule, classified by functional groups as shown in columns 7 through 10.

(D) Licensee shall within 90 days from the issuance of this order file with this Commission three certified copies of its journal entries showing compliance therewith and submit two copies thereof to the Regional Accountant, Federal Power Commission, San Francisco, California.

SCHEDULE

PACIFIC GAS AND ELECTRIC COMPANY
PROJECTS NO. 77, ET AL.

SUMMARY OF ACCUMULATED PROVISION FOR DEPRECIATION OF ELECTRIC PLANT IN SERVICE, PROJECTS NO. 77, ET AL., SHOWING INITIAL ACCRUED DEPRECIATION FOR THE CONSTRUCTED PROJECTS, NET CHANGES FOR ALL PROJECTS THROUGH DEC. 31, 1954, AND BALANCES ALLOWED, AS OF DEC. 31, 1954, CLASSIFIED BY FUNCTIONS [1]

CONSOLIDATED EDISON COMPANY OF NEW YORK, INC., PROJECT NO. 2338

ORDER CONDITIONALLY DENYING MOTION FOR HEARING AND DENYING REQUEST FOR POSTPONEMENT OF ORAL ARGUMENT

(Issued October 30, 1964)

This order involves a motion filed on October 19, 1964, by the Town of Yorktown under Section 1.12 of the Commission's Rules of Practice and Procedure. Yorktown, which is an intervener in this proceeding, requests that we amend our October 1, 1964, order to provide for a further hearing before an examiner in regard to the proposed route of the project transmission line and that, in order to permit such hearing, the oral argument now set for November 17, 1964, be postponed to some future date. Answers opposing the motion were filed on October 26, 1964, by staff and applicant.

An initial decision was issued in the case by the examiner on July 31, 1964. Briefs on exceptions to the decision, as provided in Section 1.31 of the Rules, were submitted thereafter by various parties, including a filing by Yorktown on August 21, 1964. In a motion filed August 27, 1964, Yorktown requested that the "hearings be reopened to permit further testimony on behalf of the Town of Yorktown." Our order of October 1, 1964, *supra*, p. 885, reopened the record to permit Yorktown to file, by November 2, 1964, such written testimony as it deems relevant to the issue of the location and characteristics of the project transmission line and affords applicant an opportunity to file rebuttal testimony by November 9, 1964. The order also set the proceeding for oral argument to take place before the Commission on November 17, 1964.

Yorktown's motion is predicated entirely upon the assumption that rebuttal evidence will be submitted by the applicant. Our order of October 1, 1964, permits but does not require the filing of rebuttal evidence. To this date no evidence of the type contemplated under the order has been filed by Yorktown and, of course, none has been filed by the applicant. Thus, in the present posture of the case, Yorktown's request for the opportunities of cross examination and the submission of rebuttal material to applicant's evidence must be held both speculative and premature. At the oral argument on November 17, 1964, Yorktown and the other parties may present such argument as they may care to make as to claimed deficiencies in the record, including those contained in the present motion. In any event it would be wholly premature to now grant further hearing for cross examination on evidence which has not been filed.

The motion for hearing will be denied at this time without prejudice to its renewal when no longer premature. The request for postponement of the oral argument, being dependent upon the granting of the motion for hearing, will be denied.

The Commission orders:

(A) The motion for further hearing is denied, without prejudice.

(B) The request for postponement of the oral argument set for November 17, 1964, is denied.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

DUKE POWER COMPANY, DOCKET NO. E-7122

ORDER ACCEPTING RATE SCHEDULES FOR FILING AND TERMINATING CERTAIN ISSUES OF ORDER TO SHOW CAUSE

(Issued October 30, 1964)

On August 21, 1963, 30 FPC 524, the Commission issued an order in this docket directing Duke Power Company (Duke) to show cause why certain provisions in it wholesale contracts are not unduly restrictive and therefore unlawful. Following discussion with the Commission's staff and other interested persons, Duke filed supplements to a number of its rate schedules and on August 12, 1964, 32 FPC 594, the Commission issued an order accepting those supplements for filing and terminating certain issues of the order to show cause. The remaining issues relate to territorial restrictions in Duke's contracts with rural electric cooperative customers and a resale limitation of 5 horsepower in its contract with the City of High Point, North Carolina.

On October 2, 1964, Duke, of Charlotte, North Carolina, pursuant to Section 205 of the Federal Power Act, completed the filing of 16 rate schedules for service to 16 rural electric cooperative customers in North Carolina and South Carolina. The contracts eliminate the territorial restriction referred to in the Commission's Order to Show Cause [1] from Duke's Standard Schedule No. 11–A, Rural Resale Service, and Standard Schedule No. 11, Rural Resale Service. The customers and the designations of the proposed rate schedules are listed in Appendix A attached hereto.

The Commission finds:

(1) It is necessary and appropriate for purposes of the Federal Power Act that the rate schedules listed in Appendix A attached hereto be accepted for filing effective November 2, 1964.

(2) It is necessary and appropriate for purposes of the Federal Power Act that the issues raised in the Commission's Order to Show Cause issued August 21, 1963, in this docket, with respect to restrictions in Duke's Standard Schedule No. 11–A, Rural Resale Service, and its Standard Schedule No. 11, Rural Resale Service, for customers listed in Appendix B to that Order, be severed from this docket and terminated.

The Commission orders:

(A) The proffered rate schedules referred to in finding (1) above are accepted for filing effective November 2, 1964.

(B) The issues raised in the Commission's Order to Show Cause issued August 21, 1963, in this docket, with respect to restrictions in Duke's Standard Schedule No. 11–A, Rural Resale Service, and its Standard Schedule No. 11, Rural Resale Service, for customers listed in Appendix B to that order, are hereby severed from this docket and terminated.

(C) Nothing contained in this order shall be construed as constituting approval by this Commission of any service, rate, charge, classification, or any rule, regulation, contract, or practice affecting such service or rate provided for in the rate schedules as above designated, nor shall this order be deemed as recognition of any claimed contractual right or obligation affecting or relating to such service or rate.

---

[1] The customers whose contracts contained the paragraph referred to in the Commission's order of August 21, 1963, are listed in Appendix B to that order.

(D) This order is without prejudice to any findings or orders which have been or may hereafter be made by this Commission in any proceeding now pending, or hereafter instituted, by or against the afore-mentioned company.

INVESTMENT TAX CREDIT UNDER 1962 AND 1964 AMENDMENTS TO INTERNAL REVENUE CODE; ACCOUNTING TREATMENT BY NATURAL GAS COMPANIES, DOCKET NO. R-232; INTERIM ACCOUNTING TREATMENT OF INVESTMENT TAX CREDIT UNDER 1962 AMENDMENTS TO INTERNAL REVENUE CODE BY PUBLIC UTILITIES, LICENSEES, AND NATURAL GAS PIPELINE COMPANIES, DOCKET NO. R-231

ORDER NO. 289

AMENDING THE UNIFORM SYSTEM OF ACCOUNTS AND ANNUAL REPORT F.P.C. FORM NO. 2 PRESCRIBED FOR NATURAL GAS PIPELINE COMPANIES

(Issued November 2, 1964)*

The Commission, in this order, is concluding the portion of this proceeding wherein, by notice issued January 15, 1963 (28 F.R. 528), it proposed the prescription of accounting requirements with respect to natural gas pipeline companies to reflect the tax credit for investment in certain depreciable property (investment tax credit) provided under section 2 of the Internal Revenue Act of 1962 (26 U.S.C. 38).[1]

Following the receipt of numerous responses to the invitation in the notice for the submission of comments on the proposals, oral argument was had before the Commission on October 7, 1963. However, due to the pendency in the Congress of legislation dealing with the investment credit, further consideration was postponed until after the enactment of the Revenue Act of 1964 (P.L. 88-272, Feb. 26, 1964).

Thereafter, on May 1, 1964, the Commission announced the accounting treatment it proposed to provide—that the accounting to be prescribed should afford the various choices afforded by the Congress in that Act to the companies affected. Then, as also announced, the Commission issued, on July 22, 1964, a notice of proposed rulemaking (29 F.R. 10473, July 28, 1964) with respect to natural gas pipeline companies. It is the subject matter of that notice which is now before us for action.[2]

The July 22 notice invited the submission of comments from interested parties by September 15, 1964. The time was extended to October 1 (29 F.R. 11756). Comments were received from 19 sources including pipeline companies, distributors, State regulatory agencies, firms of accountants, the NARUC Committee

*Published in the Federal Register on November 20, 1964 (29 F.R. 15020). Amended by order issued January 7, 1965, 33 FPC 27.

[1] On Jan. 9, 1963, the Commission had prescribed an interim accounting treatment (Order No. 261 in Docket No. R-231, 29 FPC 62, 28 F.R. 402) to be followed by the companies in closing their books for the year 1962 and in accounting for income taxes. Order No. 261 was continued in effect by a subsequent Interim Order, still effective as of the date hereof, issued in the instant proceeding January 23, 1964 (31 FPC 175, 29 F.R. 1567).

[2] It should be noted that the other notice of proposed rulemaking, issued on September 1, 1964, in this proceeding (29 F.R. 12735, September 9, 1964), relates to similar proposals affecting public utilities and licensees under the Federal Power Act. We will consider those proposals at a later date.

on Accounts and one federal agency. The majority of the responses approve the basic accounting proposed in the notice. Some requested clarification in texts, eight recommended deletion of the amendment (attachment C) which proposes an amendment with respect to annual reports to stockholders, four requested that we provide accounting for balances accumulated in 1962 and 1963 under the interim order of the Commission, five recommended removal of the provision that approval by the Commission is needed for accounting changes when a company changes its election to pass or not to pass on the benefits of the tax credit to consumers, two included recommendations for changes in the reporting schedules, and one, a natural gas company, objected to the rulemaking as being improper and requested a hearing to discuss the propriety of any action by the Commission in this matter.

All comments, recommendations and objections have been carefully considered. Many of the clarifying suggestions have been adopted and we will provide, as requested by four respondents, for the disposition of the investment tax credits which have been accumulated in Account 253 pursuant to the Commission's Interim Order of January 9, 1963, in Docket No. R-231.

We agree with the respondents making the point that when a company changes its method of accounting, as previously required in Account 255, Accumulated deferred investment tax credits, from a deferral to a flow-through basis, provided that such change is in accordance with the instructions in the texts of the accounts, that they need not report such change to the Commission for its approval. We are also revising paragraph A of Account 411.1, Investment tax credit adjustments, to require that account to be debited to the same extent that investment tax credits are used in calculating the current year's income taxes charged to Account 409, Income Taxes, but if any or all of such credits are to be passed on to customers currently, either at the election of the company or pursuant to State commission direction, then the amounts so passed on to customers should be treated solely as a reduction in income taxes for the year and no entries made in Account 411.1. This, we believe, clarifies the language proposed in the notice and more closely corresponds to the actual treatment of the investment tax credit to which the companies are subject.

Paragraphs 2 and 3 of the July 22 notice herein fully explain the provisions of the Revenue Acts of 1962 and 1964 upon which this proceeding is based and the conclusions the Commission reached with respect to the proper and adequate accounting treatment for investment tax credits. The statements there made are still pertinent and we here include their essence.

Under the Revenue Act of 1962, natural gas companies generally were allowed a credit on federal income tax of seven percent (7%) of investment in qualified properties. However, section 203(e) of the Revenue Act of 1964 has eliminated any authority on the part of the Commission to use the investment tax credit without the consent of the taxpayer to reduce the federal income taxes of a natural gas company in establishing its cost of service. Thus, insofar as federal regulation is concerned, gas pipeline companies are free to retain the tax savings derived from the investment tax credit and use them in any proper manner decided upon by company management, including reinvestment, payment in dividends to stockholders, or voluntary reduction of rates. Section 203(e) specifically recognizes that such natural gas companies might voluntarily pass along the tax credit to their customers in the form of lower rates.

In interpreting section 203(e) the Commission has concluded that the accounting should accommodate the choices afforded the gas pipeline companies by the Congress, and that it should give such companies the option in accounting for the investment tax credit to elect between (1) prorating the benefits of the investment

tax credit over a period of years by means of deferred account, or (2) reflecting the benefits of the investment tax credit in the income statement of the years in which the credits are earned.

Upon consideration of the entire record in this proceeding, *the Commission further finds:*

(1) The amendments herein adopted are necessary and appropriate for the purposes of the administration of the Natural Gas Act.

(2) Since the amendments to the Uniform System of Accounts herein adopted will, in effect, supersede the interim accounting prescribed in Order No. 261, in Docket No. R–231, issued January 9, 1963, and the Interim Order in Docket No. R–232, issued January 23, 1964, it is appropriate to rescind those orders insofar as they relate to accounting by natural gas companies.

(3) In view of the rescissions referred to in finding clause (2), above, it is necessary and appropriate for the purposes of the administration of the Natural Gas Act to provide, as hereinafter ordered, for the disposition of amounts of investment tax credits which have been accumulated in Account 253, Other deferred credits, pursuant to the directions contained in Order No. 261.

(4) Since it is desirable that the new schedule being added to F.P.C. Form No. 2 be made available for reporting for the year 1964, good cause exists for making the amendments herein effective forthwith.

The Commission, acting pursuant to the authority granted by the Natural Gas Act, as amended, particularly sections 8, 10 and 16 thereof (52 Stat. 825, 826, 830, 15 U.S.C. 717g, 717i, 717o), *orders:*

(A) Part 201, Uniform System of Accounts prescribed for natural gas companies, Subchapter F of Chapter I, Title 18 of the Code of Federal Regulations, is amended by adding at appropriate points therein three new accounts, viz., Account 255, Accumulated deferred investment tax credits, Account 411.1, Investment tax credit adjustments, and Account 420, Investment tax credits, to read, respectively, as set out in Attachment A, hereto. [Attachments A and B, omitted in printing.]

(B) F.P.C. Form No. 2, prescribed for natural gas companies by § 260.1 of Part 260, Subchapter G, Chapter I, Title 18 of the Code of Federal Regulations, is amended, effective for the reporting year 1964, by adding at appropriate points therein, two new schedules, viz.: Investment Tax Credits Generated and Utilized and Accumulated Deferred Investment Credits (Account 255), to read as set forth in Attachment B, hereto.

(C) Paragraph (c) of the aforesaid § 260.1 is amended by inserting between "Accumulated Deferred Income Taxes" and "Income from Utility Plant Leased to Others", the following new schedule titles:

"Investment Tax Credits Generated and Utilized."

"Accumulated Deferred Investment Tax Credits."

(D) The aforesaid Part 260 is amended by adding a new § 260.100 to read as follows:

"§ 260.100 General requirements for annual reports to stockholders and others.

All annual reports to stockholders and others shall include an appropriate summary of the investment tax credits generated and utilized and a statement of the accounting method elected by the company in connection with the utilization of the credits."

[Secs. 8, 10, 16, 52 Stat. 825, 826, 830; 15 U.S.C. 717g, 717i, 717o]

(E) Effective upon the issuance of this order, the provisions of Order No. 261 in Docket No. R–231 and the Interim Order of January 23, 1964 in Docket No.

R-232 are rescinded to the extent that they relate to natural gas companies.

(F) In view of our order herein rescinding Order No. 261, issued January 9, 1963, insofar as it relates to the interim accounting of natural gas companies, such companies shall dispose of the amounts of accumulated investment tax credits in Account 253, Other deferred credits, accumulated in accordance with the interim procedure established by that order during 1962 and 1963, as follows:

1. Companies which will not follow deferral accounting whereby all or a part of the tax credits are not to be passed on to customers in accordance with the provisions of this order and the text of accounts prescribed herein, shall credit all or such part of those balances as applicable to Account 420, Investment Tax Credits, for the reporting period ending December 31, 1964.

2. Companies which will not follow deferral accounting whereby all of a part of the tax credits are to be passed on to customers in accordance with the provisions of this order and the texts of accounts prescribed herein, shall credit all or such part of those balances as applicable to Account 411.1, Investment tax credit adjustments, for the reporting period ending December 31, 1964.

3. Companies which will follow deferral accounting for all or part of the investment tax credits in accordance with the provisions of this order and the texts of accounts prescribed herein, shall transfer the applicable balances from Account 253 to Account 255, Accumulated deferred investment tax credits. Any amounts in such balances shall be recorded in the same manner as if the procedures and instructions in texts of Accounts 255, 411.1 and 420, as promulgated in this order, had been effective in 1962 and 1963. In other words, amounts under deferral accounting procedures pertaining to 1962 and 1963 that would have been amortized in those respective years to Accounts 411.1 and 420 had this order been then in effect, shall be recorded in the same manner as the amounts to be amortized for 1964.

It is recognized that for 1964 the amounts that will be shown as credits to Accounts 411.1 and 420 will be overstated. It is believed that such amounts should not be sufficiently large in most instances to distort the net income of reporting companies. Separation of the amounts in Accounts 411.1 and 420 by years (1962, 1963 and 1964) will be shown in the schedules of F.P.C. Form No. 2 prescribed herein.

(G) The caption of Docket No. R-232 is amended, for the purposes of this order, to read as set forth above.

(H) The amendments herein made to Parts 201 and 260 and to Annual Report F.P.C. Form No. 2 shall be effective upon the issuance of this order.

(I) The Secretary shall cause prompt publication of this order to be made in the Federal Register.

Commissioner O'Connor *dissenting* to § 260.100 prescribed by Paragraph (D) of this order.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

CITIES SERVICE GAS COMPANY, DOCKET NO. RP64-9

ORDER REVERSING ORDER OF PRESIDING EXAMINER DENYING SUBPOENA

(Issued November 3, 1964)

We are here concerned with an appeal filed on August 31, 1964, by the Municipal Interveners[1] from an order of the Presiding Examiner issued August 20,

[1] They consist of The Municipal Group for Opposing Increase in Natural Gas Rates, the City of Springfield, Missouri, and the Board of Public Utilities of the City of Springfield, Missouri.

1964, denying their request filed June 15, 1964, for issuance of a subpoena *duces tecum*. The Municipal Interveners seek from several affiliates of the Cities Service holding company system,[2] information alleged to be relevant to issues said to arise in this case, which is a rate case under Section 4 of the Natural Gas Act (Act) involving Cities Service Gas Company (respondent), the pipeline affiliate of the Cities Service system. Under Section 1.23 of our Rules of Practice and Procedure, the relevance and materiality of the information sought must be shown to obtain a subpoena.

Respondent, by answer filed on September 10, 1964, opposes the Municipal Interveners' appeal on the grounds that the application for a subpoena was untimely filed, that the Municipal Interveners were guilty of laches, and that the information sought is not relevant or material to any issue in this case.

The information sought by the Municipal Interveners is discussed in three categories below.

First. The Municipal Interveners seek the information summarized below[3] concerning the sale on May 8, 1963, of the stock of Cities Service Gas Producing Company,[4] formerly a wholly owned gas-producing subsidiary of respondent, to an unaffiliated company, the Continental Oil Company. Cities Service Gas Producing Company had acquired all the production properties of respondent in 1954, and the effect of the stock transfer, which took place on May 8, 1963, was to turn control of such properties over to an unaffiliated company.

Related to the above request, the Municipal Interveners seek certain information, including balance sheet data, and income, plant, revenue and other data, all as more fully set forth in the application for subpoena.

In support of these requests, the Municipal Interveners contend that the above-described data is relevant and material to the issue of what is the proper purchased gas cost to respondent. They contend that the transfer of the Cities Service Gas Producing Company stock to an unaffiliated company is an attempt to increase the cost of the gas respondent purchases up to the "area rate" applicable to producers, and to obtain benefits for respondent in the form of part of the consideration received for the stock. Also, the Municipal Interveners contend that during most of the test period[5] respondent and Cities Service Gas Producing Company were 100 percent affiliated companies with identical officers and directors, and the gas purchase contracts may not have been at arm's-length. They argue that the above-described materials are essential to determine whether respondent has assumed unnecessary or imprudent gas purchase costs which the Commission may properly disallow under such cases as *Mississippi River Fuel Corp.* v. *F.P.C.*, 252 F. 2d 619 (1957). The Municipal Interveners further contend that the Commission's Opinion No. 414, issued January 9, 1964, in the *Union Producing Company* case, in Docket No. G–13811, *et al.*, 31 FPC 41, justifies treating a producing subsidiary as the producing arm of the pipeline company insofar as purchased gas costs are concerned.

The Examiner denied these requests on the ground that the above data is not relevant to any issue in this rate case. He noted that the rate base and the

---

[2] The parent of the system is Cities Service Company; certain of the affiliates are described hereinafter.

[3] They request details of the transactions involved in the sale of the stock of Cities Service Gas Producing Company to third parties in the last three years, including (1) the identity of all participants in negotiations, (2) the terms of sale, (3) all consideration to the seller and date of receipt thereof, and (4) the disposition of such consideration. Respondent in its rebuttal case has presented testimony covering a portion of this information.

[4] By order issued May 18, 1964, in Docket No. G–2737, we recognized the change in name of Cities Service Gas Producing Company to Continental Gas Producing Company, and redesignated filed rate schedules accordingly. In this order we use the former name, Cities Service Gas Producing Company.

[5] The test period is the year ended June 30, 1963; the stock was transferred on May 8, 1963.

cost of service of respondent would not be affected by the above-described stock transfer because the test year in this case, the year ended June 30, 1963, would be adjusted for known changes, including the transfer of the stock and the termination of the relationship between respondent and Cities Service Gas Producing Company on May 8, 1963. Also, he noted that sales of gas by the unaffiliated purchaser of the stock, Continental Oil Company, are themselves subject to regulation under Section 4 of the Act; and that no order can be issued in this case changing Continental Oil Company's rates, or applying sanctions against respondent because of the stock transfer. Accordingly, he held that issues arising from the stock transfer are "dead," and that the materials alleged to pertain thereto are not germane to this proceeding.

We conclude that the Examiner's denial of a subpoena covering the above-described information should be reversed. The information requested is directed toward the issue raised in this proceeding regarding the proper allowance in respondent's cost of service for purchased gas. Continental Gas Producing Company's filed rates are of course not in issue, but the allowance in respondent's cost of service for purchased gas costs is certainly a proper issue which must be resolved in the determination of its just and reasonable rates. The fact that the stock transfer did not need our prior approval before consummation is not controlling. That transfer does not foreclose interveners from attempting to show that respondent is not entitled to an allowance equal to continental's filed rates. Whether the Municipal Interveners' particular position regarding purchased gas cost allowance is supportable can, of course, only be determined on the complete record in this case. We believe the information sought by the Municipal Interveners is relevant to this issue.[6]

The Examiner should also receive such evidence responsive to the above evidence, and permit such cross-examination, as he finds necessary or desirable.

Second. The Municipal Interveners also seek the information described in the subpoena application concerning the operating expenses, plant investment, working capital, and revenues, etc., of two extraction plants of Cities Service Oil Company, which is an oil-producing affiliate of the Cities Service system. These plants, located at Wichita, Kansas, and Blackwell, Oklahoma, on respondent's main lines, extract heavier hydrocarbons from respondent's gas stream for sale in the form of natural gasoline, etc.

The Municipal Interveners contend that the above information is relevant to the issue of how these plants' extraction operations should be treated for the purpose of determining respondent's rates. They contend that on this issue the respondent has adduced evidence to support a cost allocation method like that applied to Panhandle Eastern Pipe Line Company's Tuscola extraction plant in Commission Op. No. 344, 25 FPC 787, 798 (1961), which the Municipal Interveners contend is not a proper method to apply in this case. Also, they do not favor the Staff's treatment of the plant operations, which involves crediting to respondent's cost of service revenues received from Cities Service Oil Company for reduction in the Btu content of respondent's gas. The Municipal Interveners contend that they need the information requested to support the treatment they recommend, which involves crediting respondent's cost of service with revenues

[6] See also our order issued May 18, 1964, in Docket No. G-2737, amending the certificate heretofore granted Cities Service Gas Producing Company to change the name of the certificate holder to Continental Gas Producing Company. That order notes that the application stated that "only a change in name and not a succession in interest has occurred." Also, as that order states, our action was without prejudice to any future decision with respect to the proper rate to be allowed applicant for natural gas produced from the properties involved, or with respect to the proper costs to be included in respondent's cost of service for the purchase of natural gas.

from the sale of liquids from these plants, less an amount allowable for the plants' cost of service and return. The Municipal Interveners contend that their recommended treatment was employed in respondent's most recent fully litigated rate case in 3 FPC 459, 480, and that it also has the approval of more recent Commission and court decisions.[7]

The Examiner denied the above request on the ground that the material sought is no longer relevant to any issue in this proceeding. He held that the Commission by order issued herein on July 10, 1964, 32 FPC 92, noted that it would provide for a separate proceeding to determine the amount to be allowed in respondent's cost of service for gas purchased from Cities Service Oil Company (and another affiliate not here involved).[8] Also, the Examiner said that on July 27, 1964, respondent agreed to the procedure prescribed in the said order, which made the matter of Cities Service Oil Company's cost of service moot in this proceeding.

We conclude that the Examiner's denial of a subpoena for the above-described information should be reversed.

Contrary to the Examiner, the separate proceeding prescribed by our July 10 and September 9, 1964 orders does not involve the issue of how the costs and revenues related to the extraction plants of Cities Service Oil Company should be treated in fixing respondent's rates. That order provides for determining the amounts to be allowed in respondent's cost of service for gas purchased from Cities Service Oil Company, but costs and revenues from the two extraction plants will be given no effect in such a determination. Therefore, the issues related to the proper treatment of the operations of the extraction plants in fixing respondent's rates are proper to consider in the present case. Indeed, as the Municipal Interveners point out, such issues have in fact been raised in this case by respondent and the Commission's Staff, each supporting a different recommended method for treating extraction plant operations.

The respondent contends that the extraction plant costs cannot be relevant in the absence of any showing that such activities are necessary, or at least useful for the conduct of their jurisdiction transportation activities; that respondent's direct testimony denies any such relationship; and that the direct testimony of the staff and the Municipal Interveners does not take issue with this contention, or support a contrary conclusion that the extraction activities have any useful relationship to the pipeline operations. Assuming, without determining, that such a showing is necessary before any extraction revenues can be credited, we note that one of these very plants has previously been held by this Commission to perform useful functions in and of pipeline operations, and that cross-examination of the witnesses who have testified that the situation is now different, has not yet been held. Under these circumstances, we do not believe we can conclude that the information sought would necessarily prove to be irrelevant or immaterial.

Accordingly, to provide a full record with respect to this controversial and difficult issue, and to permit the Municipal Interveners to support the method they recommend for treating the extraction plant operations in fixing respondent's rates, the Municipal Interveners are entitled to the information they request. The Examiner should also receive such evidence responsive to the above evidence, and permit such cross-examination, as he finds necessary or desirable.

---

[7] Among the decisions cited are Commission Opinions Nos. 269-B and 344-A, issued August 20, 1964, 32 FPC 634 and 636, respectively; *Cities Service Gas Co.* v. *F.P.C.*, 155 F. 2d 694 (1946); *City of Detroit* v. *F.P.C.*, 230 F. 2d 810 (1955); and *Panhandle Eastern Pipe Line Co.* v. *F.P.C.*, 305 F. 2d 763 (1962).

[8] See also Commission order issued September 9, 1964, 32 FPC 720, in this proceeding.

Third. The Municipal Interveners also seek the information described in the subpoena application, including "estimates" of operating expenses, plant investment, working capital, revenues, and operating data, etc., of an affiliate, Cities Service Helex, Inc. (Helex), which operates a plant for extracting helium from natural gas furnished by respondent.

The Municipal Interveners contend that this information is relevant because Helex extracts heavier hydrocarbons from the gas stream in addition to helium, and the information would show that revenues from the sale of such hydrocarbons should be credited against respondent's cost of service in the same manner as revenues from the two plants discussed in the preceding section. They say this information is material, in view of the large amount of gas consumed by the Helex operation.

The Municipal Interveners also say that they have not been dilatory in seeking this information, since they requested it at most only a month after learning that evidence based on such material would not otherwise be placed in the record. And they say that respondent's assertion that producing this material would excessively delay this case because three months would be required to analyze it and synthesize it in exhibits, is greatly exaggerated. They say they would require only four weeks to analyze and synthesize *all* the material they seek. As to difficulties alleged by respondents in supplying estimates, the Municipal Interveners state that they are willing merely to use the materials in their present form on the premises where they are located, if that would better suit the convenience of the parties involved.

The Examiner denied this request on the ground that the Commission's Staff has already made a full examination of the costs in issue, and that any small benefits from a further investigation of Helex would be outweighed by the lengthy delay resulting from granting this request. Also, he cited the Commission's order issued November 22, 1963, instituting this proceeding, which stated that the public interest requires expediting this proceeding to whatever extent is reasonably possible. And he pointed out that while under that order, all interveners were to have served their testimony by February 17, 1964, the Municipal Interveners did not ask the respondent for this information until April 1964, and did not file their subpoena until June 15, 1964; and that respondent's rebuttal case was filed August 18, and continuous cross-examination was scheduled to start September 15, 1964.

We conclude that here too, the Examiner's denial of a subpoena should be reversed.

As in the case of the information respecting the two extraction plants discussed above, the information requested concerning the Helex plant's extraction of hydrocarbons is relevant and material to the issue of the proper treatment of such operations in fixing respondent's rates. Considering all the circumstances, we do not think the Municipal Interveners' efforts to obtain this information has been dilatory. Also, we think that the delay that may result is outweighed by the desirability of making as full a record as possible concerning this issue, which is of growing importance in the regulation of natural gas. Here too, the Municipal Interveners are entitled to support their recommended treatment of such operations, and accordingly they are entitled to the information requested. If it is not available in the form sought, they are entitled to access to the sources of the information, upon such terms as the Examiner finds reasonable. The Examiner should also receive such evidence responsive to the above evidence, and permit such cross-examination, as he finds necessary or desirable.

The Commission orders:

(A) The Presiding Examiner's order issued in this proceeding on August 20, 1964, denying the Municipal Intervener's application filed on June 15, 1964, for a subpoena *duces tecum*, is hereby reversed.

(B) The Presiding Examiner is hereby directed to issue the subpoena requested in conformance with the determinations herein and to set the date for compliance therewith.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

PENNSYLVANIA POWER & LIGHT COMPANY AND METROPOLITAN EDISON COMPANY, DOCKET NO. E-7173

ORDER AUTHORIZING ACQUISITION AND MERGER OR CONSOLIDATION OF FACILITIES

(Issued November 3, 1964)

Pennsylvania Power & Light Company (Pennsylvania Power), incorporated under the laws of the State of Pennsylvania and doing business in that State, with its principal place of business in Allentown, Pennsylvania, and Metropolitan Edison Company (Metropolitan Edison),[1] incorporated under the laws of the State of Pennsylvania and doing business in that State, with its principal place of business in Muhlenburg Township, Berks County, Pennsylvania, filed a joint application on July 21, 1964, as amended or supplemented on August 27, 1964 and September 2, 4, 21 and 30, 1964, for an order pursuant to Section 203 of the Federal Power Act, authorizing Metropolitan Edison to acquire from Pennsylvania Power, a portion of said Company's facilities, subject to the jurisdiction of this Commission of a value in excess of $50,000 through the purchase thereof by Metropolitan Edison. Pennsylvania Power proposes to dispose of a section of 66 kv double circuit wood pole electric transmission line, approximately 7.6 miles in length together with all land rights appurtenant thereto and useful in connection therewith. The sale is to be consummated in accordance with the letter of agreement, dated July 10, 1964, between Metropolitan Edison and Pennsylvania Power for a purchase price of $90,000. The application indicates that this price was arrived at by arm's-length bargaining.

Pennsylvania Power is engaged principally in the generation, transmission, distribution and sale of electric energy. It serves a 10,000 square mile territory which embraces 29 counties in central eastern Pennsylvania including parts of the counties of Lebanon and Dauphin with a population of 2,265,000. Steam heating service is furnished in the City of Harrisburg.

Metropolitan Edison is also engaged in the generation, transmission, distribution and sale of electric energy. It serves a 3,274 square mile territory, which embraces all or part of fourteen counties in eastern and central Pennsylvania, including parts of the counties of Lebanon and Dauphin with a population of approximately 750,000. Steam heating service is furnished in the Cities of York and Easton, Pennsylvania.

Pennsylvania Power and Metropolitan Edison are part of the Pennsylvania, New Jersey and Maryland Interconnection, an Interconnection of utility systems

---

[1] A wholly-owned subsidiary of General Public Utilities Corporation, a registered holding company.

in the States of Pennsylvania, New Jersey and Maryland (PJM) and is connected through PJM to the systems of other companies in the States of Delaware, New York, Virginia, West Virginia and the District of Columbia. Both companies own networks operating at a nominal 66 kv, 110 kv, 132 kv and 220 kv interconnecting their generating stations and load centers and forming ties with other companies in the PJM interconnection. The section of wood pole line to be disposed of is presently part of a pole line consisting of two 66 kv, three phase circuits owned by Pennsylvania Power, one connecting its Pine Grove and Paxton Substations and the other its Pine Grove and Harrisburg Substations. Taps off those circuits supply Metropolitan Edison's Indiantown Gap Substation. Those 66 kv circuits, as a part of Pennsylvania Power's regional supply network, have declined in importance due to the growth of its 220 kv system and the establishment of a major generating source in the Harrisburg region at Brunner Island. The facilities to be acquired by Metropolitan Edison are the portion of that 66 kv double circuit from which taps extend to supply Metropolitan Edison's Indiantown Gap Substation. Pennsylvania Power proposes to retire all portions of those circuits remaining in its ownership except for a seven mile section of the Pine Grove-Harrisburg line near Harrisburg. The section of transmission line to be purchased by Metropolitan Edison will be connected to 69 kv transmission facilities to be constructed in its Lebanon Division from its Middletown Substation by way of its Hershey Substation and from its Frystown Substation thus forming a loop which will enable Metropolitan Edison to supply its Indiantown Gap Substation from its own system as well as providing other advantages.

The Indiantown Gap Substation taps and switches presently owned by Pennsylvania Power will also be transferred to Metropolitan Edison upon the termination of the Indiantown Gap Interconnection, presently provided for in an Interconnection Agreement (Pennsylvania Power Rate Schedule FPC No. 22). That agreement provides for payment under a formula which returns to Pennsylvania Power that portion of its investment which has not theretofore been returned to it by Metropolitan Edison through the payments made for the use of the facilities up to the time of termination.

According to the application, the proposed transaction is mutually advantageous in that Metropolitan Edison will obtain existing facilities at a cost substantially less than constructing comparable facilities new and Pennsylvania Power will recover a portion of its investment in facilities no longer useful for its own purposes.

The consideration of $90,000 will be $10,516.18 in excess of net plant of $79,483.82. On the books of Pennsylvania Power, the difference of $10,516.18 will be a gain on the sale plant and that company proposes to credit this amount to Account 421, Miscellaneous non-operating income. On the books of Metropolitan Edison, the difference of $10,516.18 will be an electric plant acquisition adjustment, which Metropolitan Edison proposes to eliminate by a debit to Account 426, other income deductions. The net plant was obtained from the total original cost of the facilities on the books of Pennsylvania Power of $117,528.62, and the accumulated provision for depreciation attributable thereto of $38,044.80.

Written notice of the application has been given to the Public Utilities Commission of Pennsylvania and to the Governor of that State. Notice was also published in the Federal Register on August 8, 1964 (29 F.R. 11482), stating that any person desiring to be heard or to make any protest with reference to the application should file a petition or protest on or before August 24, 1964 with the Federal Power Commission, Washington, D.C. 20426. No protest or petition or request to be heard in opposition to the granting of the application has been

received. By order entered September 9, 1964, the Public Utilities Commission of Pennsylvania approved the proposed transacton.

The Commission finds:

(1) Pennsylvania Power is a corporation organized and existing under the laws of the State of Pennsylvania. It owns and operates facilities, among others, for the transmission and sale at wholesale for resale of electric energy, which is transmitted between the States of Pennsylvania and New Jersey, and consumed at points outside the State in which it is generated, all of which facilities are in addition to, and do not include, facilities used for the generation of electric energy or facilities used in local distribution or only for the transmission of electric energy in intrastate commerce, or facilities used for the transmission of electric energy consumed wholly by the transmitter. Pennsylvania Power is, therefore, a public utility within the meaning of that term as used in Section 203 of the Federal Power Act.

(2) Metropolitan Edison is a corporation organized and existing under the laws of the State of Pennsylvania. It owns and operates facilities, among others, for the transmission and sale at wholesale for resale of electric energy, which is transmitted between the States of Pennsylvania and New Jersey and consumed at points outside the State in which it is generated, all of which facilities are in addition to, and do not include facilities used for the generation of electric energy or facilities used in local distribution or only for the transmission of electric, energy in intrastate commerce, or facilities used for the transmission of electric energy consumed wholly by the transmitter. Metropolitan Edison is, therefore, a public utility within the meaning of that term as used in Section 203 of the Federal Power Act.

(3) By the proposed sale of facilities Pennsylvania Power will dispose of a part of its facilities of a value in excess of $50,000, subject to the jurisdiction of the Commission within the meaning and subject to the requirements of Section 203 of the Federal Power Act.

(4) By the proposed acquisition of facilities Metropolitan Edison will merge or consolidate its facilities subject to the jurisdiction of the Commission with certain facilities of Pennsylvania Power, another person within the meaning and subject to the requirements of Section 203 of the Federal Power Act.

(5) Neither Pennsylvania Power nor Metropolitan Edison is, with respect to proposed transaction, as described above, subject to any requirement of the Public Utility Holding Company Act of 1935 or a rule, regulation or order thereunder, and neither company is, therefore, exempt from the requirements of Section 203 of the Federal Power Act by reason of Section 318 thereof.

(6) The proposed disposition of a portion of its facilities by Pennsylvania Power and the proposed acquisition and merger or consolidation of those facilities by Metropolitan Edison with its facilities will be consistent with the public interest for the reasons as set forth in the recital above.

The Commission orders:

(A) The proposed disposition of a portion of its facilities subject to the jurisdiction of the Commission of a value in excess of $50,000 by Pennsylvania Power and the proposed acquisition and merger or consolidation of those facilities with its facilities by Metropolitan Edison, as described above, are authorized and approved upon the terms and conditions as set forth in the application, subject to the provisions of this order.

(B) This authorization is subject to the condition that both Pennsylvania Power and Metropolitan Edison file appropriate journal entries based upon the

original cost of the facilities acquired by Metropolitan Edison from Pennsylvania Power within six months from the date of consummation of the transaction authorized herein.

(C) This authorization shall expire unless the transaction herein authorized is consummated within 90 days from the issuance of this order.

(D) The foregoing authorization is without prejudice to the authority of this Commission or any other regulatory body with respect to rates, service, accounts, valuations, estimates or determinations of cost, or any matter whatsoever which may come before this Commission.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

AREA RATE PROCEEDING (HUGOTON-ANADARKO AREA), DOCKET NO. AR64–1, ET AL; AREA RATE PROCEEDING (TEXAS GULF COAST AREA), DOCKET NO. AR64–2, ET AL.

ORDER DECLINING TO ISSUE SMALL PRODUCER REPORT FORM BUT MAKING COPIES AVAILABLE AS TRIAL AID FOR SMALL PRODUCER GROUPS

(Issued November 4, 1964)*

The Commission staff has submitted for our consideration a draft report form (Form 20) designed for response by producers who are subject to these new area rate proceedings and whose 1962 company-wide jurisdictional sales were under 10,000,000 Mcf. The report form is an abbreviated version of the all-areas questionnaire issued to major producers on October 30, 1963. The form provides a vehicle for the presentation of small producer data on a basis comparable to the data of major producers, while avoiding the much heavier burdens of the all-areas questionnaire.

Early drafts of the report were distributed by the staff to State agencies, small producer associations, and others and have been the subject of written comments and critical conferences. At the prehearing conference of July 28, 1964, the Chief Examiner set August 17, 1964, as the deadline for further comments. Most of the suggestions for changes in the form of the report have favored greater similarity to related parts of the all-areas questionnaire, and most of these suggestions were adopted. The only suggestion rejected in *toto* was a major producer request that the form be identical with the all-areas questionnaire. Otherwise the form of report is relatively uncontroversial. The participation of small producers, major producers, State agencies, distributors and others in conferences respecting the form was helpful to its improvement.

Texaco, Cities Service Oil, Pan American, Phillips, Shamrock, Gulf, Warren, Humble, Continental, Marathon, Socony Mobil, Skelly, and the Hunt interests request a mandatory report. Oklahoma Independent Producers Association requests a mandatory questionnaire for respondents above 500,000 Mcf in Oklahoma. The California PUC suggests a mandatory report for respondents but in a very scaled down form. However, the Texas Independent Producers and Royalty Owners Association (TIPRO) and independents such as Reuel W. Little and W. J. Copping oppose a mandatory report. TIPRO and the staff suggest a voluntary report.

---

*Reconsideration denied by order issued December 29, 1964, 32 FPC 1536. Petition to Review dismissed, *Amax Petroleum Corp.* v *F.P.C.*, 350 F. 2d 92 (CA10-1965).

We issued a report form, the so-called Appendices C, in both the Permian Basin and Southern Louisiana area rate proceedings, 27 FPC 20, 28 FPC 1001; those reports were sent out to all area operators as well as non-operators whose data were not covered by others. Without judging the representativeness or meaningfulness of the small producer responses summarized by the staff in those proceedings, we do know that many producers failed to respond or filed incomplete responses. At the same time, we are aware that data from public and trade sources were put in evidence in those proceedings relating to the special problems of small producers.

Under these circumstances we shall not at this time solicit and compile further small producer data; nor will we impose any obligation to do so upon any party to the proceeding. We do not mean thereby to discourage evidence by or about small producers in the new area rate proceedings or prevent producers or other parties to the hearings from demonstrating any differences between small producers and large or eliciting testimony as to any special small producer problem or circumstance. The report form provides one suitable means for small producer presentations. We therefore offer the printed form for groups of small producers, trade association interveners, or other parties who wish to gather their own data and, if it appears material and representative for substantial numbers of small producers or substantial volumes of gas, to present that data in the new proceedings.

The Commission finds:

(1) The small producer form will assist parties to the area rate proceedings in Docket Nos. AR64–1 and AR64–2 to gather and present small producer data which are uniform in meaning and comparable to the data submitted by large producers in answer to the all-areas questionnaire.

(2) The Commission will not require or request small producers to answer Form 20: a mandatory filing requirement would be infeasible because of the inadequate records of many small producers, and a voluntary filing requirement would be undesirable because of the uncertainty that responses would be representative.

The Commission orders:

(A) The Commission will not require or request the submission of data by small producers on report Form 20 drafted for use in the area rate proceedings in Docket Nos. AR64–1 and AR64–2, *et al.*

(B) Copies of FPC Form 20 (with filing instructions appropriately revised) will be made available in reasonable numbers upon request to the Secretary of the Commission to facilitate the private gathering and presentation of representative and material small producer group data in these proceedings.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

EL PASO NATURAL GAS COMPANY, DOCKET NO. CP65–52

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY AND PERMITTING AND APPROVING ABANDONMENT

(Issued November 4, 1964)

On August 20, 1964, El Paso Natural Gas Company (Applicant) filed in Docket No. CP65–52 an application pursuant to Section 7 of the Natural Gas Act for authorization to abandon certain facilities located in Hockley County, Texas,

and for a certificate of public convenience and necessity authorizing the construction and operation of certain facilities in said county, all as more fully set forth in the application.

The application indicates that Applicant's Slaughter Compressor Station in Hockley County was destroyed by fire. Said compressor station contained one 500 horsepower unit and appurtenant facilities. Applicant proposes herein to abandon the 500 horsepower unit and to construct and operate in place of said unit a 550 horsepower unit, together with appurtenant facilities. Applicant states that a unit comparable in size to the 500 horsepower unit is no longer manufactured, and, therefore, Applicant proposes to replace said unit with a 550 horsepower unit.

The total estimated cost of the proposed facilities is $210,000. Of this amount, the estimated out of pocket cost will be $78,000; the remainder of the estimated cost will be covered by an insurance claim credit of $130,000 and by a salvage value credit of $2,000. The estimated out of pocket cost will be financed out of current working funds.

By letter dated September 9, 1964, Applicant was issued a temporary certificate authorizing the construction and operation of the proposed 550 horsepower unit.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on October 29, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, El Paso Natural Gas Company, a Delaware corporation having its principal place of business in El Paso, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order issued January 11, 1944, in Docket No. G–288 (4 FPC 486).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are to be used in the transportation and sale of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The proposed construction and operation of the subject facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (b), (c) (3), (c) (4) and (e) of Section 157.20 of such Regulations.

(6) The facilities to be abandoned, as hereinbefore described, are subject to the jurisdiction of the Commission and the abandonment of such facilities is subject to the requirements of Subsection (b) of Section 7 of the Natural Gas Act.

(7) Such abandonment by Applicant, as hereinbefore described, is permitted by the public convenience and necessity and an order authorizing and approving same should be issued as hereinafter ordered.

The Commission orders:

(A) A certificate of public convenience and necessity be and the same is hereby issued authorizing Applicant, El Paso Natural Gas Company, to construct and operate the subject facilities, as hereinbefore described, all as more fully described, in the application herein, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are hereby conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (b), (c)(3), (c)(4) and (e) of Section 157.20 of such Regulations.

(C) The facilities hereby authorized shall be completed and placed in actual operation, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within six months from the date on which this order issues.

(D) Permission for and approval of the abandonment by Applicant of the facilities hereinbefore described, all as more fully described in the application in this proceeding, be and the same are hereby granted.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

JAMES P. EVANS, JR., ET AL., DOCKET NO. RI60-237

ORDER ACCEPTING OFFER OF SETTLEMENT, REQUIRING FILING OF NOTICE OF CHANGE, AND TERMINATING PROCEEDINGS

(Issued November 4, 1964)

On September 17, 1964, James P. Evans, Jr., *et al.* (Evans) submitted an offer of settlement in this proceeding pursuant to Section 1.18(e) of the Commission's Rules of Practice and Procedure, and in accordance with the refund policy for small producers set forth in our order in *Jack W. Grigsby (Operator), et al.*, Docket Nos. RI61-96 and RI62-536 (order issued August 6, 1964, 32 FPC 529). The offer relates to a proposed increased rate for a sale of natural gas to United Gas Pipe Line Company (United) under Supplement No. 1 to Evans' FPC Gas Rate Schedule No. 2, in the Baxterville Field, Lamar and Marion Counties, Mississippi. This is the only rate schedule of Evans presently on file. The proposed increased rate of 22.8827¢ per Mcf of natural gas would be reduced to 14.0¢ per Mcf at 15.025 psia., under the settlement; Evans annual revenues will be reduced approximately $17,350 below that which it presently is charging and collecting, and it will refund to United approximately $46,200, exclusive of interest. Additionally, Evans proposes a filing moratorium for any increase in rate for this sale, for a 36 month period beginning September 15, 1964, in accordance with our order in *Grigsby* (*supra*). No protests or objections have been filed to the offer.

The proposed settlement is consistent with the provisions of the Commission's Statement of General Policy No. 61-1, issued December 20, 1960, 24 FPC 1107, and its acceptance would serve the public interest.

Consistent with the action taken in the Commission's order issued July 8, 1964, 32 FPC 49, in Humble Oil & Refining Company, Docket Nos. G-9287 and G-9288, *et al.*, we shall require Evans to retain the amounts of refunds ordered herein until further order directing the nature of their disposition and also to submit within 30 days of this order to the Commission and to United a detailed

report setting out the amount of refund related to the subject rate schedule the volume of gas sold thereunder and the period covered. We shall also by separate action direct that United, within 10 days from the receipt of such report, submit a report of its own setting forth whether they intend to pass on all or part of such refund amounts to its customers, the names of such customers and the amounts of refund each should receive, or, if it claims to retain any portion of the refunds, a brief statement as to the legal or equitable basis of such claim. In the event such reports indicate that the refund will flow through to ultimate customers or distributing companies not subject to the Commission's jurisdiction, the Commission will authorize the release of such refunds by Evans (unless a state regulatory authority after notification of the sum to be made available to a company subject to its regulatory jurisdiction asks us to defer releasing the funds until it can determine their ultimate disposition). In the event that United (or a pipeline customer of United) indicates that it is asserting a claim to retain substantial refund sums the Commission will by further order prescribe the procedure for determining the relative rights to such funds of United or its customers.

Evans shall deposit the refunds required herein in savings accounts of any bank or savings and loan association where such deposits are insured by the Federal Deposit Insurance Corporation and shall credit all such interest earned thereon to the savings accounts. Each savings account shall not exceed $10,000.

However, we desire to make it clear that acceptance of Evan's offer of settlement shall not be construed as constituting approval of any future rate increase that may be filed under the subject rate schedule, and is without prejudice to any findings or order of the Commission in any future proceedings, including area rate or other similar proceedings, involving Evans' rate and rate schedule.

The Commission finds:

(A) The offer of settlement filed with the above-designated proceeding, on the basis described herein, as more fully set forth in the offer of settlement filed with the Commission by Evans on September 17, 1964, is in the public interest and appropriate to carry out the provisions of the Natural Gas Act and should be approved and made effective as hereinafter ordered.

The Commission orders:

(A) The offer of settlement filed with the Commission by Evans on September 17, 1964, is hereby approved in accordance with the provisions of this order.

(B) Evans shall file, within 30 days from the date of issuance of this order, a notice of change in rate providing for the 14.0¢ per Mcf rate specified in its offer of settlement. The notice of change shall be submitted in accordance with Part 154 of the Commission's Regulations under the Natural Gas Act.

(C) For the purpose of making refunds, Evans shall compute that amount of monies collected subject to refund in Docket No. RI60-237 in excess of 14.0¢ per Mcf under its FPC Gas Rate Schedule No. 2, together with interest at 7 percent, to the date of this order in accordance with the following percentages: 1963 and thereafter, 100%; 1961 and 1962, 70%; 1960, 25%; and thereafter Evans shall within 30 days from the date of this order submit a report to the Commission and serve a copy of such on United, setting out the amount of refunds (showing separately the principal and interest), the basis used for such determination and the period covered.

(D) Evans shall retain the amount shown in the report required under paragraph (C) above, subject to further order of the Commission directing the disposition of these amounts.

(E) Evans shall deposit within 45 days of the date of this order the refund amounts computed in accordance with paragraph (C) above in savings accounts in any bank or savings and loan association where deposits are insured by the Federal Deposit Insurance Corporation, with all interest earned thereon to be credited to the savings accounts. Each savings account shall not exceed $10,000.

(F) Upon full compliance by Evans with all the terms and provisions of this order, the proceedings in Docket No. RI60–237 shall be terminated and Evans shall be relieved of the existing surety bond in this proceeding.

(G) This order is without prejudice to any findings or orders which have been or may be made hereafter by the Commission, and is without prejudice to claims or contentions which may be made by Evans, the Commission staff, or any affected party hereto, in any proceedings now pending, including area rate or similar proceedings, or hereafter instituted by or against Evans or any other companies, person or parties affected by this order.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

MONTANA-DAKOTA UTILITIES CO., DOCKET NO. CP65–36

FINDINGS AND ORDER AFTER STATUTORY HEARING PERMITTING AND APPROVING ABANDONMENT

(Issued November 4, 1964)

On August 5, 1964, Montana-Dakota Utilities Co. (Applicant) filed in Docket No. CP65–36 an application pursuant to Section 7(b) of the Natural Gas Act for permission (1) to abandon certain facilities and the sale of natural gas to The Montana Power Company (Montana Power) and (2) to cancel Applicant's FPC Gas Tariff, Original Volume No. 2, effective January 1, 1965, and its Service Agreement with Montana Power, all as more fully set forth in the application.

Applicant is under contract to supply Montana Power with an average of 10,000 Mcf of natural gas per day, but not more than 15,000 Mcf on any one day until December 31, 1964. Under said contract Applicant is obligated to supply Montana Power with a long-term supply of gas, which it now will be unable to do. Montana Power is contracting for a long-term supply of gas from other sources and will not need the services of Applicant after the expiration date of said contract with Applicant *viz.*, December 31, 1964.

The estimated cost of retiring the metering and regulating facilities proposed to be abandoned is $750.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on October 29, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought, and upon consideration of the record finds and orders as hereinafter stated.

The Commission finds:

(1) Applicant, Montana-Dakota Utilities Co., a Delaware corporation having its principal place of business in Minneapolis, Minnesota, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by

the Commission in its order issued April 16, 1943, in Docket No. G–282 (3 FPC 968).

(2) The facilities proposed to be abandoned, as hereinbefore described and as more fully described in the application herein, are used in the transporation and sale of natural gas in interstate commerce subject to the jurisdiction of the Commission, and such abandonment is subject to the requirements of Subsection (b) of Section 7 of the Natural Gas Act.

(3) The proposed abandonment of the aforesaid facilities and service is permitted by the public convenience and necessity and approval thereof should be granted as hereinafter ordered.

(4) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Notice of Cancellation of Applicant's FPC Gas Tariff, Original Volume No. 2, and the Notice of Termination of Applicant's contract with The Montana Power Company dated November 26, 1954, relating to service under the said Gas Tariff (Sheet Nos. 1 to 13, incl.) be accepted for filing to be effective January 1, 1965.

The Commission orders:

(A) Permission for and approval of the abandonment of the facilities and service hereinbefore described, as more fully described in the application in this proceeding, are hereby granted to Applicant, Montana-Dakota Utilities Co.

(B) Applicant shall advise the Commission of the date of abandonment of the facilities and service as authorized in paragraph (A) above within ten days of such abandonment.

(C) Notice of cancellation of Applicant's FPC Gas Tariff and Notice of Termination of Applicant's Service Agreement with The Montana Power Company dated November 26, 1954, are hereby accepted for filing effective January 1, 1965.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

SOUTHERN CALIFORNIA EDISON COMPANY, PROJECT NO. 2198

ORDER DETERMINING ACTUAL LEGITIMATE ORIGINAL PROJECT COST, NET CHANGE THEREIN, AND PRESCRIBING ACCOUNTING THEREFOR

(Issued November 4, 1964)

Southern California Edison Company, Licensee for Project No. 2198,[1] filed its initial statement of claimed cost, pursuant to Section 4.20 of the Commission's Regulations under the Federal Power Act, on May 16, 1960, showing a claimed actual legitimate original cost of $406,254.94 as of May 1, 1959.[2] In addition, Licensee's books and records show for the period from May 1, 1959, through December 31, 1962, a net increase in project cost of $1,339.83, resulting in a total claimed project cost of $407,594.77, as of December 31, 1962.

The Commission's staff conducted a field examination of the Licensee's books, records and other data for the purpose of ascertaining the correctness of Licensee's

---

[1] The project, known as Santa Ana No. 3 project is located on the Santa Ana River in San Bernardino County, California. The license for the operation and maintenance of the constructed project was issued to Southern California Edison Company pursuant to Section 4 (e) of the Federal Power Act for a period of 50 years, effective as of May 1, 1959.

[2] Article 19 of the license provides for Commission determination of the actual legitimate original cost of the project, and of any additions thereto or betterments thereof.

claimed costs. As a result of that examination, staff proposed, subject to Commission approval, certain adjustments which have been agreed to by licensee and are as shown in the attached Schedule. The adjustments effect a total reduction of $2,346.14 in the claimed actual legitimate original project costs as of May 1, 1959, from $406,254.94 to $403,908.80. No adjustments in the claimed or recorded project costs are proposed for the period from May 1, 1959 through December 31, 1962.

By letter dated January 30, 1964, Licensee confirmed its agreement with the proposed staff adjustments and resulting project costs as shown in the attached Schedules I and II.

The California Public Utilities Commission was advised by letter of this Commission dated February 7, 1964, as to the proposed staff adjustments and resulting project costs. By letter dated February 17, 1964, the California Commission indicated no objection thereto.

Licensee, as a part of its initial statement of project cost, claimed accrued depreciation applicable to in-service project properties as of May 1, 1959 in the amount of $90,910.97. Staff analysis of Licensee's provisions for project depreciation has not been completed, and the staff proposes that the Commission defer for future consideration and determination the amount of accrued depreciation applicable to in-service properties.

The Commission finds:

(1) Licensee, by its acceptance of the proposed adjustments, including the accounting dispositions and resulting project costs, and the California Public Utilities Commission by its lack of objection thereto, have obviated the necessity for notice and opportunity to protest provided in Sections 4.4, 4.5, 4.22 and 4.23 of the Commission's Regulations under the Federal Power Act.

(2) The proposed adjustments, including the accounting dispositions are reasonable and appropriate for the purposes of the Federal Power Act and, therefore, should be approved and directed as hereinafter provided.

(3) The actual legitimate original cost of Project No. 2198 as of May 1, 1959, is $403,908.80; the net increase or change in the actual legitimate original cost of the project for the period from May 1, 1959, through December 31, 1962, is $1,339.83; and the resulting actual legitimate original cost of the project as of December 31, 1962, is $405,248.63, classified by primary plant accounts as shown in the attached Schedule I.

(4) It is necessary and appropriate for the purposes of the Federal Power Act, that the determination of the accrued depreciation of Project No. 2198 be reserved for future Commission consideration.

The Commission orders:

(A) The provisions of Sections 4.4, 4.5, 4.22 and 4.23 of the Commission's Regulations under the Federal Power Act are hereby waived for the purposes of this order.

(B) The foregoing adjustments including accounting dispositions, proposed by the staff and agreed to by the Licensee, are hereby approved and directed to be made by the Licensee.

(C) Licensee, to the extent that it has not already done so, shall establish and maintain control and subsidiary project plant accounts, showing the debit balance of $403,908.80 as the actual legitimate original cost of the project as of May 1, 1959, the debit amount of $1,339.83, as the net increase or change in the actual legitimate original cost of the project for the period from May 1, 1959, through December 31, 1962, and the debit balance of $405,248.63, as the actual legitimate

original cost of the project as of December 31, 1962, all as more specifically shown in the attached Schedule I, classified by primary plant accounts of the Commission's Uniform System of Accounts Prescribed for Public Utilities and Licensees.

(D) The matter of Commission determination of the project accrued depreciation for Project No. 2198 is hereby expressly reserved for future Commission consideration and decision.

(E) Licensee shall within 90 days from the issuance of this order file with the Commission FPC Form No. 7 and five certified copies of its adjusting journal entries showing compliance therewith, three to be filed with the Commission and two to be submitted to the Regional Accountant in San Francisco, California.

SCHEDULE 1

PROJECT NO. 2198 (SANTA ANA NO. 3) SOUTHERN CALIFORNIA EDISON COMPANY

Summary by detailed plant accounts of claimed initial cost as of May 1, 1959, and recorded changes thereto for the period from May 1, 1959 through Dec. 31, 1962 with adjustments thereto and allowed cost as of Dec. 31, 1962

TRANSCONTINENTAL GAS PIPE LINE CORPORATION, DOCKET NO. CP65-35

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued November 4, 1964)

On August 6, 1964, Transcontinental Gas Pipe Line Corporation (Applicant) filed in Docket No. CP65-35 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain facilities for a new delivery point for natural gas service to Piedmont Natural Gas Company, Inc. (Piedmont), all as more fully set forth in the application.

Applicant proposes to construct and operate a sales meter station and appurtenant equipment on its main 30-inch transmission line "A" near Stokesdale in Guilford County, North Carolina. Gas delivered at the proposed new delivery point will be used by Piedmont to provide additional natural gas service on an interruptible basis to the Formost Screen Print Plant, of Fieldcrest Mills, Inc., and to provide new firm service to a tourist court and residences in the area. The larger part of the load at this point will be the interruptible service. The third year over-all total annual volume is estimated to be 55,000 Mcf. The volumes of natural gas to be delivered at the new point will be out of allocations to Piedmont previously authorized by the Commission.

The proposed facilities are estimated to cost approximately $19,100, which cost will be initially financed by Applicant from its general funds. Piedmont has agreed to reimburse Applicant in full for the entire cost of facilities.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on October 29, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Transcontinental Gas Pipe Line Corporation, a Delaware corporation having its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of November 18, 1948, in Docket No. G-1143 (7 FPC 145).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are to be used in the transportation and sale of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4) and (e) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity be and the same is hereby issued authorizing Applicant, Transcontinental Gas Pipe Line Corporation, to construct and operate the proposed facilities as hereinbefore described, all as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4) and (e) of Section 157.20 of such Regulations.

(C) The facilities hereby authorized shall be constructed and placed in actual operation, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within six months from the date on which this order issues.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

CABOT CORPORATION (SW), DOCKET NO. RI62-3

ORDER ACCEPTING OFFER OF SETTLEMENT, REQUIRING FILING OF NOTICES OF CHANGE, AND TERMINATING PROCEEDING

(Issued November 5, 1964)

On October 1, 1964, Cabot Corporation (Cabot) submitted an offer of settlement in the above-designated proceeding, involving the jurisdictional sale of natural gas under Cabot's FPC Gas Rate Schedule No. 25 to Hugoton Plains Gas and Oil Company (Plains) from the Hugoton Field, Seward County, Kansas (Kansas Area) and Texas County, Oklahoma (Oklahoma Panhandle Area). Plains gathers and processes the gas in its Tyrone Gasoline Plant and resells the residue gas to Northern Natural Gas Company (Northern).

The presently effective rate is 18.92¢ per Mcf at 14.65 psia. The increased rate has been in effect subject to refund since July 29, 1961. Cabot's rate is based on a revenue sharing arrangement with Plains whereby Cabot is entitled as a contractual matter to receive a rate which is 1.1166¢ per Mcf (corrected for compressibility) less than Plains' resale rate to Northern. The rate in effect subject to refund was based on Plains' increased rate of 20.1628¢ per Mcf for the sale of gas to Northern which was suspended in Docket No. RI60-102. The proposed settlement rate is based on Plains' settlement rate of 15.75¢ which was approved by order issued October 8, 1963 in Docket No. RI60-102, 30 FPC 973.

In its offer of settlement, Cabot proposes to reduce its increased rate effective from July 29, 1961, to 14.6334¢ per Mcf at 14.65 psia, subject to any applicable contractual deduction for compression, if any. Refunds are not involved because Cabot has not collected rates above the proposed settlement rate.

Inasmuch as the proposed settlement rate is directly related through a revenue sharing arrangement to the 15.75¢ per Mcf resale settlement rate of Plains, acceptance of Cabot's proposed settlement is in the public interest. Our action here

does not constitute either a change in our present policy of suspending all increased rates above 11¢ per Mcf in these areas for the sale of pipeline quality gas within the meaning of the Commission's Statement of General Policy No. 61–1, as amended, or a change in our general settlement policy, but is based solely on the special circumstances presented in this case, in which the Commission's recognition of the agreement made by the parties does not affect the price to the pipeline purchaser.

Our action should not be construed as constituting approval of any future rate increases, if any, that may be filed under the subject rate schedule, and is without prejudice to any findings or order of the Commission in any future rate proceedings, including area rate proceedings, involving Cabot's rate and rate schedule.

The Commission finds:

The proposed settlement of the above-designated proceeding, on the basis described herein, as more fully set forth in the offer of settlement filed with the Commission by Cabot on October 1, 1964, is in the public interest and appropriate to carry out the provisions of the Natural Gas Act and should be approved and made effective as hereinafter ordered.

The Commission orders:

(A) The offer of settlement filed with the Commission by Cabot on October 1, is hereby approved in accordance with the provisions of this order.

(B) Cabot shall file within 30 days from the date of issuance of this order, a notice of change in rate providing for the 14.6334¢ per Mcf at 14.65 psia rates specified in its offer of settlement. The notice of change shall be submitted in accordance with Part 154 of the Commission's Regulations under the Natural Gas Act.

(C) Upon notification by the Secretary of the Commission that Cabot has complied with the terms and conditions of the order, the rate and charge of 14.6334¢ per Mcf at 14.65 psia, specified in its offer of settlement, subject to any applicable contract deductions, shall be effective as of the issuance of this order, and the above-designated proceeding shall be deemed terminated.

(D) The acceptance by the Commission of Cabot's offer of settlement is without prejudice to any findings or determinations that may be made in any proceeding now pending, or hereafter instituted by or against Cabot, including area rate or other similar proceedings.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

CENTRAL MAINE POWER COMPANY, PROJECT NO. 2329

ORDER ISSUING LICENSE (MAJOR)

(Issued November 6, 1964)

Application was filed on December 3, 1962 by Central Maine Power Company (Applicant) of Augusta, Maine, for a license under Section 4(e) of the Federal Power Act (Act) for constructed Project No. 2329, known as the Wyman Project located on the Kennebec River in Kennebec County, Maine, in the towns of Bingham and Moscow.

According to the application, the project, consisting primarily of a dam, reservoir and power plant, was constructed during the period 1928–1931. Apparently, there has been no major construction of the project after 1931.

Applicant requests a 50-year license effective from the date of its issuance. In its order issued May 21, 1954,[1] the Commission found the Kennebec River to be a navigable water of the United States. In accordance with the criteria set forth in our April 25, 1962, Opinion No. 357 (27 FPC 830), the license herein granted shall have an effective date of May 1, 1954 and a termination date of December 31, 1993.

The Secretary of the Army and the Chief of Engineers have advised that the plans of the project structures affecting navigation have been approved pursuant to Section 4(e) of the Act.

The Department of the Interior in reporting on the application has recommended for inclusion in any license for the project certain conditions in the interests of fish and wildlife.

The Commission finds:

(1) The project affects navigable waters of the United States.

(2) Applicant is a corporation organized under the laws of the State of Maine, and has submitted satisfactory evidence of compliance with the requirements of all applicable State laws insofar as necessary to effectuate the purposes of a license for the project.

(3) Public notice of the filing of the application has been given. No protests or petitions to intervene have been received. No conflicting application is before the Commission.

(4) The project does not affect a Government dam, nor will the issuance of a license therefor, as hereinafter provided, affect the development of any water resources for public purposes which should be undertaken by the United States.

(5) Subject to the terms and conditions hereinafter imposed, the project will be best adapted to a comprehensive plan for improving or developing a waterway or waterways for the use or benefit of interstate or foreign commerce, for the improvement and utilization of water-power development, and for other beneficial public uses, including recreational purposes.

(6) The installed horsepower capacity of the project hereinafter authorized for the purpose of computing the capacity component of the administrative annual charge is 96,000 horsepower, and the amount of annual charges, based on such capacity to be paid under the license for the project, for the costs of administration of Part I of the Act is reasonable as hereinafter fixed and specified.

(7) The 13.8/115 kv substation and all transmission circuits connecting the substation to the non-project 115 kv switching station mentioned in paragraph (B) below, and which were included in the application for license, are parts of the project within the meaning of Section 3(11) of the Act and should be included in the license for the project.

(8) The exhibits designated and described in paragraph (B) below conform to the Commission's rules and regulations and should be approved as part of this license.

The Commission orders:

(A) This license is hereby issued to Central Maine Power Company (Licensee) of Augusta, Maine, under Section 4(e) of the Federal Power Act (Act) for a period effective as of May 1, 1954 and terminating December 31, 1993, for the continued operation and maintenance of the Wyman Project No. 2329, located on the Kennebec River, Maine, a navigable water of the United States, subject to the terms and conditions of the Act, which is incorporated herein by reference as a

[1] Docket No. E-6456 (13 FPC 1076).

part of this license, and subject to such rules and regulations as the Commission issued or prescribed under the provisions of the Act.

(B) Project No. 2329 consists of:

(i) all lands constituting the project area and enclosed by the project boundary or the limits of which are otherwise defined, and/or interest in such lands necessary or appropriate for the purposes of the project, whether such lands or interest therein are owned or held by the Licensee or by the United States; such project area and project boundary being more specifically shown and described by the following exhibits which formed a part of the application for license:

Exhibit J; Sheet 1 (FPC No. 2329–1) "General Map, Flowage, Dam & Power Plant Areas";

Exhibit K; Sheets 1 to 5 incl. (FPC Nos. 2329–3 to –7 inclusive) "Detail Map, Reservoir."

(ii) a dam consisting of an earth dike (with concrete core wall) about 2,640 feet long and about 160 feet high; a reinforced concrete retaining wall 772 feet long and about 160 feet high parallel to the river course; a concrete gravity intake section 168 feet long and about 149 feet high; concrete gravity overflow sections totaling about 430 feet in length consisting of three shallow stanchion sections, three deep stanchion sections, three Tainter gate sections, a Broome gate section, and a log sluice about 22 feet wide and extending about 550 feet downstream from the face of the dam; (2) a reservoir about 14.4 miles long with a normal elevation of 485 feet (USGS Datum); (3) a reinforced concrete powerhouse containing three hydroelectric units each with a generating capacity of 24,000 kw; (4) a substation and transmission circuits connecting said substation with a non-project switching station; (5) an excavated tailrace extending about 7,500 feet downstream of the powerhouse; and (6) appurtenant electrical and mechanical facilities—the location, nature and character of which structures are more specifically shown and described by the exhibits hereinbefore cited and by certain other exhibits which formed part of the application for license and which are designated and described as follows:

Exhibit L; Sheet 1 (FPC No. 2329–8) "Plan and Sections, Concrete Dam"

Sheet 2 (FPC No. 2329–9) "Plan and Sections, Earth Dam & Retaining Wall"

Sheet 3 (FPC No. 2329–10) "Plan and Section, Intake & Powerhouse"

Sheet 4 (FPC No. 2329–11) "Retaining Wall Sections, Downstream Elevation—Dam"

Sheet 5 (FPC No. 2329–12) "Transformer & Bus Switching Bays"

Sheet 7 (FPC No. 2329–14) "Tailrace Excavation"

Exhibit M; Twelve typewritten pages, "General Description and Specifications of Equipment and Appurtenances", filed in the Commission December 3, 1962.

(iii) all other structures, fixtures, equipment or facilities used or useful in the maintenance and operation of the project and located on the project area, including such portable property as may be used or useful in connection with the project or any part thereof, whether located on or off the project area, if and to the extent that the inclusion of such property as part of the project is approved or acquiesced in by the Commission; also, all riparian or other rights, the use or possession of which is necessary or appropriate in the maintenance or operation of the project.

(C) This license is also subject to the terms and conditions set forth in Form L–3 (Revised August 1, 1964), entitled "Terms and Conditions of License for Constructed Project Affecting Navigable Waters of the United States" (32 FPC 1114), which terms and conditions, designated as Articles 1 through 29, are attached hereto and made a part hereof; and subject to the following special condition set forth herein as an additional article:

Article 30. The Licensee shall pay to the United States the following annual charge, effective as of May 1, 1954:

For the purpose of reimbursing the United States for the costs of administration of Part I of the Act, a reasonable annual charge as determined by the Commission in accordance with the provisions of its reguations, in effect from time to time. The authorized installed capacity for such purpose is 96,000 horsepower.

(D) The exhibits designated and described in paragraph (B) above are hereby approved as part of this license.

(E) This order shall become final 30 days from the date of its issuance unless application for rehearing shall be filed as provided in Section 313(a) of the Act, and failure to file such an application shall constitute acceptance of this license. In acknowledgment of the acceptance of this license, it shall be signed for the licensee and returned to the Commission within 60 days from the date of issuance of this order.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

SINCLAIR OIL & GAS COMPANY, ET AL., DOCKET NO. G–16760, ET AL.

ORDER REJECTING SETTLEMENT PROPOSAL

(Issued November 6, 1964)

On July 29, 1964, Texas Eastern Transmission Corporation (Texas Eastern) filed a Settlement Proposal and Motion for Severance of the proceedings in Docket Nos. CP63–192 and CP63–193 from the consolidated proceedings in Docket No. G–16760, *et al.* The settlement proposes to reduce the rate charged under Texas Eastern's Rate Schedule F–7[1] from 18.0¢ to 16.0¢ per Mcf beginning with the date of initial delivery until March 31, 1967,[2] with any amounts collected in excess of the 16.0¢ rate being refunded together with 7 percent interest. In the event that the pending consolidated proceedings result in a price below 16.0¢ per Mcf, Texas Eastern would reduce its rate accordingly under Rate Schedule F–7, and would refund the difference without interest from the date of Settlement until the date determining the in-line price. However, Texas Eastern would continue to charge 12.0¢ per Mcf under its Rate Schedule F–8[1] for sour gas through March 31, 1967, without refund in the event a lower in-line price for sour gas is determined. The settlement specifies that it is effective until September 1, 1964.

On August 17, 1964, the Commission Staff filed an answer in opposition to the proposal. In essence this answer contends that the proposal could result in the retention of excess monies collected under the 16.0¢ settlement rate prior to the date of determining the fina in-line price in the event that price is below 16.0¢ per Mcf, and that on the other hand, Texas Eastern has not ceded in consideration for settlement any rights which it could assert against the Commission's determination of an in-line price and ultimate ordering of refunds.

On September 15, 1964, Texas Eastern filed a document entitled "Supplement to Motion for Approval of Settlement Proposal and Severance of Proceedings". Therein, Texas Eastern extends the effective period of the original settlement and states that its escalations under the particular rate schedules involved herein would not result in increases for over three years and hence provide a more or

---

[1] The purchaser is Lone Star Gathering Company.

[2] Date of first periodic escalation.

less *de facto* moratorium comparable to that we approved in the *Socony* Settlement. In fact, however, by the terms of its contracts, Texas Eastern is precluded from filing rate increases prior to the end of the time period indicated. Thus, the offer provides no moratorium.

Hearings before the presiding examiner have already been held in these consolidated proceedings and briefs are due to be filed in the near future. It does not appear, therefore, that a substantial acceleration in the matter of Texas Eastern's applications could be achieved by settlement at this juncture. In view of this fact and the other foregoing considerations, we do not find that Texas Eastern has shown good cause why its proposed settlement should be approved at this time.

The Commission orders:

The Motion for Approval of the Settlement Proposal and Severance of Proceedings as filed on July 29, 1964, and supplemented by filing of September 15, 1964, is hereby denied.

Before Commissioners: David S. Black, Acting Chairman; L. J. O'Connor, Jr. and Charles R. Ross.

ARKANSAS LOUISIANA GAS COMPANY, DOCKET NO. CP64-78

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued November 9, 1964)

On September 30, 1963, as supplemented on February 28 and August 28, 1964, Arkansas Louisiana Gas Company (Applicant) filed in Docket No. CP64-78 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction during the calendar year 1964 and the operation of natural gas facilities for the sale of natural gas to direct customers and to distributors for resale, all as more fully set forth in the application and supplements.

Applicant proposes to construct approximately 200 pipeline taps on its existing system to deliver natural gas to individual domestic and commercial customers or for new town border connections or rural extensions to consumers, and approximately 150 pipeline taps for direct sales to consumers for road building, irrigation, agricultural, processing and general use in areas outside of local distributors' franchise areas.

The total cost of facilities proposed under this application will not exceed a maximum of $300,000 and the total deliveries to any one consumer will not exceed a maximum of 100,000 Mcf of natural gas per year.

Due notice of the subject application was published in the Federal Register on October 21, 1964 (29 F.R. 14449). No petition to intervene, notice of intervention or protest to the granting of the application has been received.

At a hearing held on November 5, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application, supplements and exhibits, submitted in support of the authorization sought, and upon consideration of the record,

The Commission finds:

(1) Applicant, Arkansas Louisiana Gas Company, a Delaware corporation having its principal place of business in Shreveport, Louisiana, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the

Commission in its order of January 26, 1943, in Docket No. G–252 (3 FPC 910).

(2) The facilities hereinbefore described, as more fully described in the application and supplements in this proceeding, are proposed to be used in the transportation and sale of natural gas in interstate commerce and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a) and (e) of Section 157.20 of said Regulations.

(6) The authorization hereinafter granted should be limited to construction during the calendar year 1964 and the total expenditures for facilities to be constructed thereunder should be limited to a maximum of $300,000, with the total deliveries to any one customer not to exceed a maximum of 100,000 Mcf of natural gas per year.

(7) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that Applicant should submit within 60 days after the expiration of the authorization granted hereinafter, a statement in compliance with Section 157.7(c)(8) of the Commission's Regulations under the Natural Gas Act.

(8) The certificate issued hereinafter should be conditioned upon Applicant's compliance with the provisions of Section 157.7(c)(7) of the aforesaid Regulations.

The Commission orders:

(A) Upon the terms and conditions of this order, a certificate of public convenience and necessity be and the same is hereby issued authorizing Applicant, Arkansas Louisiana Gas Company, to construct during the calendar year 1964 the proposed facilities hereinbefore described, as more fully described in the application and supplements in this proceeding, and to operate such facilities to sell natural gas to direct customers and to distributors for resale as hereinafter provided.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a) and (e) of Section 157.20 of said Regulations.

(C) The authorization granted in paragraph (A) above is hereby limited to construction during the calendar year 1964 and the total expenditures for facilities to be constructed thereunder are hereby limited to a maximum of $300,000, with the total deliveries to any one customer limited to a maximum of 100,000 Mcf of natural gas per year.

(D) Applicant shall submit within 60 days after the expiration of the authorization granted by paragraph (A) above a statement in compliance with Section 157.7(c)(8) of the Commission's Regulations under the Natural Gas Act.

(E) The certificate issued by paragraph (A) above is expressly conditioned upon Applicant's compliance with the provisions of Section 157.7(c)(7) of the

aforesaid Regulations and, further, shall not entitle any industrial customer to whom firm deliveries are authorized therein to any priorities or rights to additional gas for meeting any future increases in their requirements at the expense of firm resale customers desiring to acquire additional gas to meet any future increases in their requirements.

Before Commissioners: David S. Black, Acting Chairman; L. J. O'Connor, Jr. and Charles R. Ross.

EL PASO NATURAL GAS COMPANY, DOCKET NO. CP65-45

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued November 9, 1964)

On August 10, 1964, El Paso Natural Gas Company (Applicant) filed in Docket No. CP65-45 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing, for a term continuing through but not beyond December 31, 1965, the delivery of natural gas to Pacific Gas & Electric Company (PG&E), on an interruptible, best efforts basis, limited, however, to a quantity during such term not to exceed that quantity which PG&E has paid for in prior years, and has been unable to take, but has the right to take without further payment, all as more fully set forth in the application.

PG&E has presently paid for 70,147,076 Mcf (14.9 psia) of gas under Rate Schedule G of Applicant's FPC Gas Tariff, Original Volume No. 1. Of this amount, 26,365,612 Mcf are receivable by PG&E through the calendar year 1967 without further charge and the remaining 43,781,464 Mcf are receivable by PG&E through the calendar year 1968 without further charge. In order to enable PG&E to receive, at least in part, the said quantity of 70,147.076 Mcf on an accelerated basis, Applicant proposes herein to make gas available when requested by PG&E, on an interruptible, best efforts basis, in excess of the daily quantities which Applicant is obligated to deliver to PG&E and to other California purchasers on a firm basis.

Applicant and PG&E have entered into an agreement dated July 24, 1964, providing for the proposed deliveries.

The proposed deliveries will be made by use of existing facilities at an existing delivery point near Topock, Arizona.

On October 8, 1964, The People of the State of California and the Public Utilities Commission of the State of California filed a notice of intervention in support of the subject application.

After due notice, no petition to intervene, other notice of intervention or protest to the granting of the application has been filed.

At a hearing held on November 5, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, El Paso Natural Gas Company, a Delaware corporation having its principal place of business in El Paso, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order issued January 11, 1944, in Docket No. G-288 (4 FPC 486).

(2) The proposed transportation and delivery of natural gas by Applicant hereinbefore described, as more fully described in the application in this proceeding, will be in interstate commerce, subject to the jurisdiction of the Commission, and such proposed transportation and delivery are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The proposed transportation and delivery of natural gas by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c) (3) and (e) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity be and the same is hereby issued authorizing Applicant, El Paso Natural Gas Company, to transport and deliver natural gas during the period ending December 31, 1965, as hereinbefore described, all as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(3) and (e) of Section 157.20 of such Regulations.

Before Commissioners: David S. Black, Acting Chairman; L. J. O'Connor, Jr. and Charles R. Ross.

FLORIDA GAS TRANSMISSION COMPANY, DOCKET NO. CP65-26

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued November 9, 1964)

On July 27, 1964, Florida Gas Transmission Company (Applicant) filed in Docket No. CP65-26 an application for a certificate of public convenience and necessity pursuant to Section 7(c) of the Natural Gas Act authorizing the construction and operation of certain facilities and the sale of natural gas to the City of Bonifay, Florida, and the City of Florala, Alabama, for resale for ultimate public consumption, all as more fully set forth in the application.

Applicant proposes to install and operate a line tap and meter station together with appurtenances near its existing city gate station at Chipley, Washington County, Florida, and by means thereof to sell and deliver natural gas to the City of Bonifay, Florida, for resale and distribution through a municipally-owned gas distribution system to customers in the City of Bonifay and its environs. The City of Bonifay proposes to transport the gas by means of approximately 6.25 miles of 6⅝-inch transmission pipe line owned by the City from the point of delivery by Applicant to the city gate of Bonifay.

Applicant further proposes to construct and operate a line tap and meter station together with appurtenances on its existing 24-inch main transmission pipe line on Okaloosa County Road 285, near the County Line between Okaloosa and Walton Counties, Florida, and by means thereof, to sell and deliver natural gas to the City of Florala, Alabama, for resale and distribution through a municipally-owned gas distribution system to customers in the City of Florala and its environs. The City of Florala proposes to transport the gas by means of approximately 15.13 miles of 6⅝-inch and .57 mile of 4½-inch transmission pipe line owned and operated by the City from the point of delivery by Applicant to the city gate of Florala.

Maximum daily deliveries through the proposed facilities in the third year of operations will be approximately 1,347 Mcf to Florala and 1,134 Mcf to Bonifay. Third year annual deliveries are estimated to be approximately 75,929 Mcf to Florala and 54,072 Mcf to Bonifay.

The total estimated cost to Applicant is $40,000 to be paid from cash on hand. The total estimated costs to the City of Bonifay and the City of Florala are $380,000 and $588,000, respectively, which it is proposed will be financed by revenue bonds bought by the Housing and Home Finance Agency.

After due notice no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on November 5, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization, and upon consideration of the record finds and orders as hereinafter stated.

The Commission finds:

(1) Applicant, Florida Gas Transmission Company, a Delaware corporation having its principal place of business in Winter Park, Florida, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order issued July 3, 1963, in Docket No. CP63-277 (30 FPC 27).

(2) The proposed construction and operation of facilities and sale of natural gas, as hereinbefore described and as more fully described in the application and exhibits in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed construction and operation of facilities and sale of natural gas are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to preform the service proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3), (c)(4) and (e) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity be and the same is hereby issued to Applicant, Florida Gas Transmission Company, authorizing the construction and operation of facilities and the sale of natural gas as more fully described in the application in this proceeding subject to the jurisdiction of the Commission, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are hereby conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3), (c)(4) and (e) of Section 157.20 of such Regulations.

(C) The facilities hereby authorized shall be completed and placed in actual operation and the transportation of natural gas authorized in paragraph (A) above shall commence, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within 12 months from the date on which this order issues.

Before Commissioners: David S. Black, Acting Chairman; L. J. O'Connor, Jr. and Charles R. Ross.

PHILADELPHIA ELECTRIC COMPANY, PROJECT NO. 2355

ORDER MODIFYING LICENSE ORDER AND OTHERWISE DENYING APPLICATION FOR REHEARING

(Issued November 9, 1964)

On October 12, 1964, Philadelphia Electric Company (Applicant) filed an application for rehearing, pursuant to Section 1.34 of the Commission's Rules of Practice and Procedure on the Commission's Memorandum Opinion No. 443, and accompanying order issued September 21, 1964, for Project No. 2355, 32 FPC 826, proposed to be located on the Susquehanna River and its tributary Muddy Run, in Lancaster and York Counties, Pennsylvania.

Applicant seeks (1) a license period of 50 years, (2) a modification of Article 42 to provide for the use of the Conowingo reservoir by Muddy Run for as long as it is licensed and (3) modification of Article 44 to provide for the payment of a lump sum of $2,700,000 within six months of the effective date of the license, in lieu of annual payments in the amount of $285,000 for the use of the Conowingo reservoir as provided in the opinion and order.

In the original joint application, Applicant's subsidiaries had requested a 50-year license period.[1] In an amended application filed January 29, 1964 by Philadelphia Electric Company (Applicant) a 40-year license was requested. However, the request for a 40-year license was based on the concurrent request for the Commission's approval of a 40-year contract for the sale of power by Licensees of Conowingo to the Applicant which was to have assured Applicant the continued availability of the Conowingo reservoir.

Applicant believes that the reasons for the 40-year period have been eliminated by the Commission's failure to approve the contract and therefore, there is no reason for the Commission to limit its project to a license period shorter than that normally granted by the Commission for unconstructed projects. We agree with Applicant that the license term should be 50 years and are so providing.

Applicant desires a revision of Article 42 to authorize Muddy Run the use of the Conowingo reservoir for as long as it is under license. Applicant suggests that in addition to covering the proposed 50-year license term the revised language would be applicable to any subsequent period for which an annual license

---

[1] Susquehanna Power Company and Philadelphia Electric Power Company filed a joint license application for the Muddy Run project on April 1, 1963.

might be issued. We have no reason to assume that any annual licenses will be necessary. However, if such is the case, they would be issued pursuant to Section 15 of the Act under the terms and conditions of the original license. We see no need to adopt the language proposed by Applicant. However, we shall change Article 42 to make it clear that licensee is authorized to utilize the Conowingo pool when operating under the license.

Applicant further requests a modification of Article 44 of the license to provide for the payment of the annual $285,000 charge which it is to pay after 1976 for the use of the Conowingo reservoir by means of a lump sum payment in the amount of $2,700,000. Applicant states that the sum of $2,700,000 represents the present worth at 5.4%, as of September 1, 1964, of $285,000 paid annually for 50 years beginning in 1976.

The reasons for the lump sum payment advanced by Applicant are that the payments of a lump sum rather than a series of annual payments would provide a more definite and orderly disposition of the charge and, furthermore, would avoid continual explanations in registration statements of the future liability now provided in Article 44.

Applicant has indicated that Licensees of Conowingo would reduce their net investment [1] by the amount of the lump sum payment. A reduction in the net investment of Conowingo by the amount of the lump sum payment would serve to pass on the benefit of the lump sum payment to the United States in the event of recapture or to a new licensee, in the event of relicensing. However, neither the United States nor the new licensee would derive any benefits from such a transaction until 1976.

While the reduction in the net investment of Conowingo by the amount of $2,700,000 would reduce Conowingo rate base, no benefits would necessarily flow to the public since Applicant purchases substantially all of Conowingo's output. Indeed Applicant would be the sole beneficiary.

With reference to Applicant's computation of the lump sum payment, as indicated above, there is no basis for assuming that the annual payments in the amount of $285,000 under the license would extend 50 years from 1976 since the license expires not later than 50 years from September 1, 1964.

It should be noted that the annual payments of $285,000 were assessed against Muddy Run on the basis of equitable principles as compensation to Conowingo for the joint use of the Conowingo reservoir and not as compensation for property rights which the licensee for Muddy Run may acquire from the present licensees of Conowingo. We, accordingly, believe that it would be in the public interest to reject Applicant's lump sum proposal.

The Commission finds:

(1) It is appropriate and consistent with the public interest that Opinion No. 443 and accompanying order in Project No. 2355 be modified as hereinafter provided.

(2) It is appropriate and in the public interest in administering Part I of the Federal Power Act (16 U.S.C. 791a–823r) that the Philadelphia Electric Company's application for rehearing, filed October 12, 1964, of Opinion No. 443, and accompanying order issued September 21, 1964, granting a license for Project No. 2355, to the extent that it seeks modification in addition to that provided herein be denied.

---

[1] Applicant has attached to the application herein a letter to the Commission from the Conowingo Licensees indicating that they would be agreeable to reducing the net investment of the Conowingo project in the amount of $2,700,000 if such a lump sum payment were approved by the Commission.

The Commission orders:

(A) Opinion No. 443 and accompanying order issued September 21, 1964, in Project No. 2355 is hereby modified as follows:

1. Paragraph (B) of the license order is modified to read as follows:

(B) This license is hereby issued to Philadelphia Electric Company (Licensee) of Philadelphia, Pennsylvania, under Section 4(e) of the Federal Power Act (Act) for a period of 50 years, effective as of September 1, 1964 for the construction, operation and maintenance of Project No. 2355 on the Susquehanna River, a navigable water of the United States, and its tributary Muddy Run, in Lancaster and York Counties, Pennsylvania, subject to the terms and conditions of the Act which is incorporated herein by reference as a part of this license, and subject to such rules and regulations as the Commission has issued or prescribed under the provisions of the Act.

2. Article 42 is modified to read as follows:

Article 42. The Licensee for Muddy Run project is authorized to utilize the Conowingo reservoir as a source of water and as a lower pool for the operation of the Muddy Run project when operating under this license.

(B) In all other respects the aforesaid application for rehearing in Project No. 2355 be and is hereby denied.

Before Commissioners: David S. Black, Acting Chairman; L. J. O'Connor, Jr. and Charles R. Ross.

SOUTHERN NATURAL GAS COMPANY, DOCKET NO. G-8472

FINDINGS AND ORDER AFTER STATUTORY HEARING PERMITTING AND APPROVING ABANDONMENT

(Issued November 9, 1964)

On December 8, 1961, Southern Natural Gas Company filed in Docket No. G-8472 an application [1] pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon certain natural gas facilities constructed and operated to provide service to the Marine Minerals, Inc. (Marine) a direct industrial customer, all as more fully set forth in the application.

Applicant states it has not made any sales of natural gas to Marine for approximately two years, and that the facilities consisting of a tap, meter and regulating facilities utilized in the rendering of service to Marine and the facilities are no longer used. The cost of the said facilities is fixed by Applicant at $9,000.00.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on November 5, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought, and upon consideration of the record, finds and orders as hereinafter stated.

The Commission finds:

(1) Applicant, Southern Natural Gas Company, a Delaware corporation having its principal place of business in Birmingham, Alabama, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order issued October 6, 1942, in Docket No. G-296 (3 FPC 822).

[1] The application filed on December 8, 1961, to withdraw an application for a certificate of public convenience and necessity filed on February 14, 1955, is treated herein as an application for permission to abandon the facilities constructed to provide service to Marine in accordance with temporary certificate issued by the Commission on May 19, 1955.

(2) The facilities as hereinbefore described, and as more fully described in the application herein, have been used in the transportation of natural gas in interstate commerce subject to the jurisdiction of the Commission, and said abandonment is subject to the requirements of Subsection (b) of Section 7 of the Natural Gas Act.

(3) The abandonment of the aforesaid facilities are permitted by the public convenience and necessity and approval thereof should be granted as hereinafter ordered.

The Commission orders:

(A) Permission for and approval of the abandonment of the facilities hereinbefore described, and as more fully described in the application in this proceeding, treated herein as an application to abandon facilities, are hereby granted to Applicant, Southern Natural Gas Company.

(B) Applicant shall advise the Commission of the date of abandonment of the facilities as authorized in paragraph (A) above.

Before Commissioners: David S. Black, Acting Chairman; L. J. O'Connor, Jr. and Charles R. Ross.

TENNESSEE GAS TRANSMISSION COMPANY, DOCKET NO. CP65-28

FINDINGS AND ORDER AFTER STATUTORY HEARING PERMITTING AND APPROVING ABANDONMENT OF FACILITIES

(Issued November 9, 1964)

On August 3, 1964, as supplemented on August 25, 1964, Tennessee Gas Transmission Company (Applicant) filed in Docket No. CP65-28 an application pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon a certain pipeline facility in Middlesex County, Massachusetts, all as more fully set forth in the application, as supplemented.

The facility, proposed to be abandoned by sale to the Lowell Gas Company (Lowell), is a lateral pipeline known as the Lowell Lateral, consisting of approximately 5.3 miles of 6-inch pipeline and approximately 0.3 mile of 8-inch pipeline. Purchase of the lateral by Lowell will permit tapping at any desirable point, thereby increasing the flexibility of Lowell's distribution system, and will make the duplication of the facilities by Lowell unnecessary. The line will be sold to Lowell for $186,281, its original depreciation cost.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on November 5, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application, supplement and exhibits, submitted in support of the permission and approval sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Tennessee Gas Transmission Company, a Delaware corporation having its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of July 12, 1947, in Docket No. G-910 (6 FPC 777).

(2) The facilities to be abandoned, as hereinbefore described, are subject to the jurisdiction of the Commission and abandonment of such facilities is subject to the requirements of Subsection (b) of Section 7 of the Natural Gas Act.

(3) Such abandonment by Applicant, as hereinbefore described, is permitted by the public convenience and necessity and an order permitting and approving same should be issued as hereinafter ordered.

(4) The permission for and approval of the abandonment by Applicant, as hereinafter granted, should be granted upon the condition that the sale of these facilities shall be recorded on the books of Applicant in accordance with the provisions of Gas Plant Instruction 5, and the text of Account 102, Gas Plant Purchased or Sold, of the Uniform System of Accounts Prescribed for Natural Gas Companies. Federal and State income taxes payable resulting from this transaction shall be charged to Account 426.5, Other Deductions, if not significant with respect to net income determination for the year, or to Account 435, Miscellaneous Debits to Surplus, also as provided in the Uniform System of Accounts.

The Commission orders:

(A) Permission for and approval of the abandonment by Applicant of the facilities hereinbefore described, all as more fully described in the application in this proceeding, be and the same are hereby granted.

(B) The permission and approval granted in paragraph (A) above, are granted on the condition that the sale of these facilities shall be recorded on the books of Applicant in accordance with the provisions of Gas Plant Instruction 5, and the text of Account 102, Gas Plant Purchased or Sold, of the Uniform System of Accounts Prescribed for Natural Gas Companies. Federal and state income taxes payable resulting from this transaction shall be charged to Account 426.5, Other Deductions, if not significant with respect to net income determination for the year, or to Account 435, Miscellaneous Debits to Surplus, also as provided in the Uniform System of Accounts.

(C) Applicant shall advise the Commission of the date of said abandonment within ten days thereof.

Before Commissioners: David S. Black, Acting Chairman; L. J. O'Connor, Jr. and Charles R. Ross.

UNITED GAS PIPE LINE COMPANY, DOCKET NO. CP65-78

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued November 9, 1964)

On September 21, 1964, United Gas Pipe Line Company (Applicant) filed in Docket No. CP65-78 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction during the 12-month period from November 1, 1964, to October 31, 1965, and the operation of facilities to render natural gas service to existing distributor customers at rates on file with the Commission for resale and distribution in existing market areas, and for certain prescribed direct sales, all as more fully set forth in the application.

Applicant states that the total cost of all facilities for which authorization is sought herein will not exceed a maximum of $300,000; that the maximum delivery to any one customer will not exceed 100,000 Mcf of natural gas annually; and that none of the gas so delivered will be used as boiler fuel.

Due notice of the subject application was published in the Federal Register on October 21, 1964, (29 F.R. 14450). No petition to intervene, notice of intervention or protest to the granting of the application has been received.

At a hearing held on November 5, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought, and upon consideration of the record,

The Commission finds:

(1) Applicant, United Gas Pipe Line Company, a Delaware corporation having its principal place of business in Shreveport, Louisiana, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of January 20, 1942, in Docket No. G–216 (3 FPC 3, 11).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are proposed to be used in the transportation and sale of natural gas in interstate commerce and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a) and (c) of Section 157.20 of said Regulations.

(6) The authorization hereinafter granted should be limited to construction during the 12-month period from November 1, 1964, to October 31, 1965, and the total expenditures for facilities to be constructed thereunder should be limited to a maximum of $300,000, with the total deliveries to any one customer not to exceed a maximum of 100,000 Mcf of natural gas per year.

(7) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that Applicant should submit within 60 days after the expiration of the authorization granted hereinafter, a statement in compliance with Section 157.7(c) (8) of the Commission's Regulations under the Natural Gas Act.

(8) The certificate issued hereinafter should be conditioned upon Applicant's compliance with the provisions of Section 157.7(c) (7) of the aforesaid Regulations.

The Commission orders:

(A) Upon the terms and conditions of this order, a certificate of public convenience and necessity be and the same is hereby issued authorizing Applicant, United Gas Pipe Line Company, to construct during the 12-month period from November 1, 1964, to October 31, 1965, the proposed facilities hereinbefore described, as more fully described in the application in this proceeding, and to operate such facilities to sell natural gas to direct customers and to distributors for resale as hereinafter provided.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a) and (c) of Section 157.20 of said Regulations.

(C) The authorization granted in paragraph (A) above is hereby limited to construction during the 12-month period from November 1, 1964, to October 31, 1965, and the total expenditures for facilities to be constructed thereunder are

hereby limited to a maximum of $300,000, with the total deliveries to any one customer limited to a maximum of 100,000 Mcf of natural gas per year.

(D) Applicant shall submit within 60 days after the expiration of the authorization granted by paragraph (A) above a statement in compliance with Section 157.7(c)(8) of the Commission's Regulations under the Natural Gas Act.

(E) The certificate issued by paragraph (A) above is expressly conditioned upon Applicant's compliance with the provisions of Section 157.7(c)(7) of the aforesaid Regulations and, further, shall not entitle any industrial customer to whom firm deliveries are authorized herein to any priorities or rights to additional gas for meeting any future increases in their requirements at the expense of firm resale customers desiring to acquire additional gas to meet any future increases in their requirements.

Before Commissioners: David S. Black, Acting Chairman; L. J. O'Connor, Jr. and Charles R. Ross.

CAROLINA PIPELINE COMPANY, COMPLAINANT v. SOUTHERN NATURAL GAS COMPANY, DEFENDANT, DOCKET NO. RP63-4

ORDER REOPENING PROCEEDING

(Issued November 10, 1964)

On March 30, 1964, 31 FPC 705, we issued herein our Opinion No. 423 and accompanying order dismissing the complaint of Carolina Pipeline Company (Carolina) naming Southern Natural Gas Company (Southern) defendant. Carolina had complained, in effect, that its supplier, Southern, improperly classified it as a limited service customer subject to a partial requirements rate schedule and under that classification unduly discriminated against Carolina by curtailing or by eliminating entirely deliveries of over-run gas while at the same time delivering over-run gas to its other customers. Carolina stated that as a result, its competitive position in the marketing area has been injured unlawfully.

After exhausting its administrative remedies, Carolina appealed to the United States Court of Appeals for the District of Columbia for review of the order issued March 30, 1964, said appeal being docketed by the Court as *Carolina Pipeline Company* v. *F.P.C.*, No. 18713.

While the foregoing appeal was pending the same court issued its decision in *Lynchburg Gas Company* v. *F.P.C.*, 336 F. 2d 942, setting aside our order in *Atlantic Seaboard Corporation, et al.*, Docket No. G-16401 (Opinion No. 368 and accompanying order issued November 27, 1962, 28 FPC 860) and remanded that case to the Commission for further proceedings. This case also involved the applicability of a partial requirements rate schedule to a pipeline customer having a second source of supply and presented the issue of the lawfulness of the classification of customers.

On August 25, 1964, we filed with the Court our motion for remand of the instant proceeding in order to re-examine it in the light of the *Lynchburg* case, *supra*. Therein we stated, among other things, that it is the Commission's intention to reopen the proceedings and invite the views of the parties with respect to the adequacy of the findings and of the record; that thereafter we will take such further action as appears indicated by further analysis including the study of such statements as may be submitted.

On October 2, 1964, the case was remanded to the Commission for further consideration.

The Commission orders:

(A) The proceeding herein is hereby reopened for the purposes set forth above.

(B) All parties of record herein may submit on or before December 2, 1964, a statement, not exceeding 30 pages, expressing their views regarding the adequacy of the findings and of the record herein with respect to any relevant criteria enunciated in the *Lynchburg* decision, *supra*.

Before Commissioners: David S. Black, Acting Chairman; L. J. O'Connor, Jr. and Charles R. Ross.

NATURAL GAS PIPELINE COMPANY OF AMERICA, CP64–150; OKLAHOMA NATURAL GAS COMPANY AND OKLAHOMA NATURAL GAS STORAGE COMPANY, CP64–273

ORDER WAIVING INTERMEDIATE DECISION PROCEDURE AND ADOPTING PRESIDING EXAMINER'S BRIEFING SCHEDULE

(Issued November 10, 1964)

On October 21, 1964, the presiding examiner in the above-entitled proceeding filed a "Report to the Commission of Oral Motion for Waiver and Omission of the Intermediate Decision Procedure" to which were attached copies of the portions of the transcript containing the oral motion made, on October 20, 1964, by counsel for Natural Gas Pipeline Company of America (Natural), together with the various responses of other counsel thereto.

The sole issue to be resolved is whether the proposed transaction will subject either Oklahoma Natural Gas Company (Oklahoma) or Oklahoma Natural Gas Storage Company (Gas Storage) to the jurisdiction of the Commission. The jurisdictional facts are not in dispute and, therefore, the nature of the question to be decided is purely legal.

Counsel for Oklahoma Natural Gas Company and Oklahoma Natural Gas Storage Company concurred in Natural's motion for omission of the intermediate decision procedure. Staff counsel did not object.

In view of the nature of the question to be resolved and the need for expediting the decision making process it appears that the intermediate decision procedure should be waived in this proceeding.

The presiding examiner also ordered, subject to the approval of this Commission, that Natural, Oklahoma and Gas Storage file initial briefs on November 20, 1964, and that the staff file its brief on December 11, 1964. Reply briefs are to be filed on or before January 4, 1965.

The Commission finds:

(1) The due and timely execution of the Commission's functions imperatively and unavoidably requires the omission of the intermediate decision procedure.

(2) Good cause has been shown for waiving and omitting the intermediate decision procedure.

The Commission orders:

(A) The intermediate decision procedure in the above-entitled proceeding be and it is hereby waived and omitted.

(B) The briefing schedule proposed by the presiding examiner is hereby adopted.

Before Commissioners: David S. Black, Acting Chairman; L. J. O'Connor, Jr. and Charles R. Ross.

CITY OF WETMORE, KANSAS, DOCKET NO. CP64-177

ORDER REMANDING PROCEEDING TO PRESIDING EXAMINER

(Issued November 10, 1964)

On September 22, 1964, the Presiding Examiner issued his initial decision herein, denying the application of the City of Wetmore, Kansas (Applicant), for an order of this Commission under Section 7(a) of the Natural Gas Act, directing Michigan Wisconsin Pipe Line Company (Michigan Wisconsin) to establish physical connection of its transportation facilities with the facilities proposed to be constructed by Applicant and to sell and deliver to Applicant its natural gas requirements for resale and distribution in the community of Wetmore, Kansas. It was found by the Examiner that the Applicant had failed to show that the proposal was economically feasible.

It was ordered by the Examiner that if the Applicant desired an opportunity to present further evidence in support of the economic and financial feasibility of the present application, it should, within 20 days from the date of said order, file a statement with the Commission making known such desire and stating fully the nature of the evidence it wished to present. Said order further provided for service upon the other participants not later than the time of filing and for the filing of answers to Applicant's statement within ten days of service.

Thereafter, on October 12, 1964, pursuant to the order of the Presiding Examiner, Applicant filed a statement reciting that it desires an opportunity to present further evidence in support of the economic and financial feasibility of its project and setting forth in detail the evidence which it proposes to present. Applicant requests a period of not less than 90 days from the issuance of such order within which to file or present the further evidence.

No exceptions have been filed to the Presiding Examiner's decision and no answer has been filed to the statement of Applicant.

The Commission finds:

It is necessary and appropriate in the administration of the Natural Gas Act to remand this proceeding to the Presiding Examiner for the purpose of fixing the time within which Applicant shall file or present further evidence and for such other appropriate action as he may deem proper.

The Commission orders:

This proceeding is hereby remanded to the Presiding Examiner for the purpose of fixing a time for filing or presenting further evidence by the Applicant and for such other appropriate action as the Presiding Examiner may deem proper.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

IDAHO POWER COMPANY, PROJECT NO. 1971

ORDER GRANTING REHEARING FOR THE PURPOSE OF FURTHER CONSIDERATION

(Issued November 12, 1964)

On October 14, 1964, the Secretary of the Interior filed an application for rehearing on the Commission's order issued September 15, 1964, 32 FPC 759, amending

Article 39 of the License of the Idaho Power Company for its project on the Snake River in Idaho and Oregon, Project No. 1971. The Secretary's petition also requested that the Commission make clear by a supplemental order that the Secretary is a party to this proceeding. On October 27, 1964, Idaho Power Company filed its motion "to strike or deny" the application for rehearing.

In the application for rehearing, the Secretary of the Interior states that on December 31, 1963, the Assistant Secretary of the Interior wrote to the Chairman of the Commission and requested an extension of time to March 13, 1964, "for presenting our recommendations." By letter dated January 24, 1964, the Chairman notified the Secretary of the Interior that the Commission had granted the requested extension for the submission of his Department's "views on this matter." On December 3, 1963, the Commission had given public notice of the application of the Idaho Power Company for an amendment of its license and January 13, 1964, had been set as the final date for the filing of protests or petitions to intervene. On March 13, 1964, the Department of Interior filed a document containing both the Department's comments and the petition of the Secretary of the Interior to intervene in this proceeding.

In our order of September 15, 1964, we stated in reference to the Secretary's submission of March 13, 1964, that "as comments, the document was timely filed; as a petition to intervene, it was not filed within the period prescribed." We did not thereby intend to recognize the Secretary as a party nor to grant his petition to intervene; but we did not formally dismiss his petition to intervene.

The Secretary's application for rehearing among other things maintains that his comments and petition to intervene, filed March 13, 1964, were, under the circumstances of this case, timely filed and that the Commission should recognize him as a party to this proceeding.

At the outset, we are faced with the question whether the Secretary has been or should be accorded the status as an intervenor and a party to this proceeding. If we resolve this issue in favor of the Secretary, we will be faced with the further question whether our order of September 15, 1964, amending Article 39 of the license should be modified or rescinded. Both of these questions require further consideration, and we shall accordingly grant rehearing of our order of September 15, 1964, for such purposes, it being understood that this action is not to be deemed a prejudgment of the jurisdictional question presented.

The Commission finds:

It is appropriate and in the public interest in administering Part I of the Federal Power Act that the Secretary of the Interior's aforesaid application for rehearing of our order of September 15, 1964, be granted for purposes of further consideration.

The Commission orders:

The Secretary of the Interior's aforesaid application for rehearing of our order of September 15, 1964, is hereby granted for purposes of further consideration of the questions presented thereby.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

UNION CARBIDE CORPORATION, PROJECT NO. 1856

ORDER ON REHEARING AND MOTIONS TO SUPPLEMENT THE RECORD AND FOR A STAY OF ORDER

(Issued November 12, 1964)

On October 14, 1964, the Union Carbide Corporation and the State of West Virginia filed applications for rehearing of our Opinion No. 442 issued September 15, 1964, 32 FPC 770. In addition, Union Carbide has filed motions to supplement the record in this proceeding and for a stay of our order accompanying Opinion 442. On October 26, 1964, the Commission staff filed an opposition to the motion to supplement the record.

In Opinion 442, we found that Union Carbide should apply for and secure a license for two hydroelectric developments owned by Union Carbide and located on the New and Kanawha Rivers in West Virginia. We found that these rivers were navigable within the meaning of the Federal Power Act and that in addition the developments were capable of affecting navigation on the New and Kanawha Rivers below the projects.[1]

In its application for rehearing Union Carbide argues against our findings of fact but sets forth nothing which was not considered by us before issuing Opinion No. 442. The accompanying motion to supplement the record is for the purpose of introducing evidence which allegedly would show that one logging operation referred to in the opinion may not in fact have been carried on over one stretch of the New River. Our finding of navigability was based on numerous grounds, including logging operations, all supported by the record before us. This particular bit of cumulative evidence could not affect our decision as to navigability or even as to logging operations. We will, therefore, deny the motion.

The State of West Virginia in its application for rehearing adopts the application of Union Carbide and in addition argues that the licensing of these projects might deprive the State of the right to take them over at their fair market value at some time in the future. Our duty under the Federal Power Act to license projects located on navigable waters of the United States is based on the jurisdictional facts in each case and cannot be affected by the provisions of state laws.

Union Carbide has moved that we stay our order directing it to apply for and secure a license for these projects until 90 days after the disposition of this application for rehearing. It does not appear that it would be unreasonable to grant this request.

The Commission finds:

The assignments of error and grounds for rehearing set forth in the applications for rehearing filed in this proceeding present no facts or legal principles which would warrant any change or modification in the Commission's Opinion No. 442 except as specified below.

The Commission orders:

(A) The applications for rehearing filed by Union Carbide Corporation and the State of West Virginia on October 14, 1964, in this proceeding are hereby denied.

---

[1] Because the power produced from these projects is used entirely for industrial operations we did not find it necessary to determine if there were other effects on interstate commerce as contemplated by Section 23 of the Federal Power Act.

(B) The motion of Union Carbide Corporation to supplement the record in this proceeding is hereby denied.

(C) Ordering paragraph (B) accompanying our Opinion No. 442 is hereby amended to provide that the application by Union Carbide for a license shall be filed within 90 days from the date of issuance of this order on rehearing.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

HOME GAS COMPANY, DOCKET NO. CP62-51

ORDER AMENDING ORDER PERMITTING AND APPROVING ABANDONMENT OF FACILITIES

(Issued November 16, 1964)

On July 14, 1964, as supplemented on September 11, 1964, Home Gas Company (Petitioner) filed in Docket No. CP62-51 a petition to amend the order of the Commission issued December 15, 1961, 26 FPC 880, which order permitted Petitioner to abandon 159.8 miles of four parallel 6-inch transmission lines, with 6.7 miles to be abandoned by sale to Columbia Gas of New York, Inc. (Columbia) and the remaining portion to be lifted and salvaged. In the subject petition, Petitioner requests authorization to sell an additional 1.6 mile section of the lines to Columbia for $3,989 in lieu of salvage.

Petitioner seeks further amendment of the order of December 15, 1961, by requesting authorization to abandon an additional 14.2 miles of four parallel 6-inch lines located immediately west of the facilities for which abandonment authorization was previously issued. The 14.2 miles of lines are no longer needed to provide service. The service can and will be provided through existing parallel 12-inch lines.

Due notice of the subject petition to amend has been given by publication in the Federal Register on October 21, 1964 (29 F.R. 14449). No protest, petition to intervene, or notice of intervention has been filed herein.

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued December 15, 1961, in Docket No. CP62-51 be amended as hereinafter ordered.

The Commission orders:

(A) The Commission's order issued December 15, 1961, in Docket No. CP62-51 be and the same is hereby amended by authorizing Home Gas Company to abandon by sale to Columbia Gas of New York, Inc. 1.6 miles of pipeline as hereinbefore described, as more fully described in the petition in this proceeding; and authorizing Home to abandon an additional 14.2 miles of pipeline, with 7.1 miles of such pipeline to be abandoned by sale to Columbia and the remainder to be abandoned in place, as hereinbefore described, all as more fully described in the petition in this proceeding.

(B) In all other respects said order shall remain in full force and effect.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

SUPERWELL DEVELOPMENT CORPORATION, DOCKET NO. RI65–138

ORDER DENYING MOTION FOR RECONSIDERATION

(Issued November 16, 1964)

Superwell Development Corporation (Superwell) on September 28, 1964 filed a motion for reconsideration of the Commission's order issued August 11, 1964, in the above-entitled proceeding suspending the proposed renegotiated increased rate of 14.6 cents per Mcf contained in Supplement No. 2 to its FPC Gas Rate Schedule No. 1 until January 16, 1965, and thereafter until made effective as prescribed by the Natural Gas Act. The proposed rate relates to the sale of gas to Transcontinental Gas Pipe Line Corporation from Stuart City Field, La Salle County, Texas (R.R. Dist. No. 1).[1] The proposed rate is in excess of the 14-cent increased rate ceiling for sales in this area as set forth in the Commission's Statement of General Policy No. 61–1, as amended.

In support of its motion for reconsideration, Superwell asserts that the subject rate filing is in accordance with the Seventh Amendment to the Statement of General Policy No. 61–1 issued November 27, 1963, 30 FPC 1370, which provides for a 14.6-cent-per-Mcf rate in this area if all price escalation clauses are eliminated from a rate schedule except for specified periodic escalation provisions. Superwell states that it amended its contract with the purchaser so as to come within the provisions of the Seventh Amendment. By the amendment Superwell reduced the present contract price, eliminated substantial existing tax reimbursement, and changed the periodic price escalations. Superwell further claims that the fact that it did not eliminate any indefinite pricing provisions from its basic contract (because it did not have any therein) is of no importance, and is not inconsistent with the language of the Seventh Amendment. The important point, Superwell says, is what pricing provisions are being retained. Here, periodic pricing provisions are being retained.

In *Sunray Mid-Continent Oil Company*, Docket No. RI62-196, order issued January 19, 1962, 27 FPC 94, we ruled that the Second Amendment to the policy statement was not applicable where no favored-nation or price redetermination provisions were eliminated from the contract and the producer did not propose to eliminate the periodic escalation clauses from its contract. At that time the Second Amendment issued December 20, 1960, 24 FPC 1107, provided in pertinent part:

> For rate schedules from which favored-nation and price redetermination provisions have been eliminated, * * *

By Order No. 264 issued March 27, 1963, 29 FPC 589, the Second Amendment was revised as follows:

> For rate schedules from which all price escalation clauses are being eliminated except for periodic escalation provisions as specified below * * *

The stated purpose of that order was to "express with a greater degree of clarity" several statements in the original Second Amendment. Language similar to that used in Order No. 264 was utilized in the Seventh Amendment.

Superwell asserts that the use of the words "all price escalation clauses are being eliminated except for periodic escalation provisions" means that it is unnecessary to eliminate either favored-nation or price redetermination clauses

---

[1] As Superwell correctly points out in its motion the Commission's suspension order on page 6 inadvertently refers to the instant sale as being in R.R. Dist. No. 2.

to come within the provisions of the Seventh Amendment. We do not agree. The purpose in enacting the Seventh Amendment was to extend to other areas the benefits of a settlement procedure previously limited under the Second Amendment to the policy statement to a few areas in Texas (R.R. Dist. Nos. 2, 3, 4, and 6). It was not intended, however, by the Seventh Amendment to otherwise broaden the provisions of the Second Amendment, as amended. Certainly, neither the order amending the Second Amendment nor the Seventh Amendment order evince any purpose to disavow our previous ruling in the *Sunray* case as to the necessity for *eliminating* indefinite pricing clauses. The purpose of the change in lanuage in Order No. 264, noted above, was merely to relate the Second Amendment provisions to the elimination of any indefinite pricing provision,[1] and to codify the then existing Commission practice of approving settlements under the Second Amendment when a producer eliminated the sole indefinite pricing provision from his contract (even though the language in the original Second Amendment provided for the elimination of favored-nation *and* price redetermination provisions). Since the language utilized in the Seventh Amendment is similar to that used in Order No. 264, it is clear that the situations in which higher rates were to be applicable were the same. We shall therefore adhere to our ruling in *Sunray* and shall deny Superwell's motion for reconsideration.

The Commission orders:

For the reasons set forth above, the motion for reconsideration of the suspension order issued August 11, 1964, in the above-entitled proceeding is hereby denied.

OPINION AND ORDER ISSUING CERTIFICATES OF PUBLIC CONVENIENCE AND NECESSITY AND PERMITTING AND APPROVING ABANDONMENTS OF SERVICE

(Issued November 17, 1964)*

Syllabus

1. Carving out separate sales or fields above guideline or in-line pricing should be strictly limited to situations of distinctly compelling nature; such is not the case here. P. 1306.
2. Evidence conclusively establishes that in-line price was 15 cents per Mcf for "Oklahoma-Other" area at time Gulf and Tidewater contracts were executed. PP. 1306, 1307.
3. Were allegations of greater depths and higher well-drilling costs accepted at full value, such circumstances would not constitute "very compelling showing" necessitating *ad hoc* change from general area standard. P. 1307.
4. Generally, in-line price is that applicable at point of delivery negotiated at arm's-length between parties; no extra allowance is in order for producer's services beyond wellhead necessary in effecting deliveries. P. 1307.
5. *Elk City* (Opinion No. 350) *distinguished* on basis of volume of gas and related extent of gathering operation. P. 1307.
6. There is no evidence whereby value of producers' specific service, if any, could even be estimated, let alone accurately measured—thus no basis for extra allowance here. P. 1307.
7. Commission *finds* in-line price for all sales is 15 cents per Mcf, inclusive of any tax reimbursement. P. 1307.
8. There is no necessity for moratorium condition in Gulf and Tidewater certificates since by time next contractual escalation will occur just and reasonable rates will probably have been determined for all sales herein. P. 1308.
9. Since neither Gulf nor Tidewater have commenced deliveries in interstate commerce from acreage involved, they are free to accept or reject tendered certificates—Commission decides here that interstate consumer does not need subject gas at initially certificated rate in excess of 15 cents. P. 1308.
10. Btu adjustment clauses made subject prospectively to decision in Docket No. R-200 rule-making proceeding. P. 1308.
11. Moratorium for other sales fixed at 17.9 cents, the point above which increases would prompt general escalation of area prices. P. 1308.
12. Producers having initial contract price of 20.495 cents allowed to file for increases up to 17.9 cents per Mcf, inclusive of tax reimbursement, until July 1, 1967, or issuance of final decision in Hugoton-Anadarko area rate proceeding, whichever is earlier. P. 1309.
13. In proceedings arising under Section 7 of the Natural Gas Act, Commission *issues* certificates of public convenience and necessity, *permits* and *approves* abandonments of service, *prescribes* initial in-line price and *provides* for refunds.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

Ross, *Commissioner:*

This case involves the remainder of an originally large number of pending applications for permanent certificates of public convenience and necessity under Section 7(c) of the Natural Gas Act for sales of gas from the Oklahoma "Other" pricing area, as that area is defined and established in the Commission's Statement of General Policy No. 61–1.[1] The matter is now before the Commission for decision on exceptions filed by Gulf Oil Corporation, which exceptions have been adopted by Tidewater Oil Company, to the presiding examiner's initial determination issued July 13, 1964 recommending the issuance of permanent certificates at a conditioned initial price of 15 cents per Mcf,[2] the applicable area guideline rate. Tidewater and Gulf request that the certificates in their dockets No. CI63–876 and CI63–417, respectively, be granted at the currently specified contract rate of 17.9 cents per Mcf. All other remaining applicants either have settled out, as hereinafter described, or, since no other exceptions have been filed, seemingly are willing to accept the conditions imposed in the initial decision. Abandonment of service and cancellation of the related rate schedules is sought without opposition in two dockets, Nos. CI61–153 and CI61–393, because of depletion of the underlying reserves.

For the reasons hereinafter expressed, we conclude that the public convenience and necessity requires that the certificates tendered to Gulf and Tidewater be conditioned to preclude a total initial price in excess of 15 cents per Mcf.

---

[1] Issued September 28, 1960, 24 FPC 818, 18 CFR 2.56.

[2] All prices herein are at 14.65 psia.

Background of Proceeding

The proceeding was initiated by Commission order dated December 12, 1963, which consolidated 82 pending producer applications for certificates, or applications to amend an outstanding certificate by the incorporation of additional acreage, for sales to seven pipelines from 15 counties [3] in the Oklahoma "Other" area at total initial contract prices ranging from 15.5 cents to 20.495 cents, plus some form of Btu price adjustment in most instances. The contract dates of execution for the sales originally in issue extended from July 1959 to April 1963. With the exception of the two dockets here contested, all of the sales had commenced prior to the consolidation order under temporary authorizations [4] which conditioned the proposed initial prices to 15 cents per Mcf (or 15.5 cents subject to refund to a floor of 15 cents) and the take-or-pay and Btu price adjustment provisions on the outcome of the rule-making proceedings in Docket Nos. R–199 and R–200. The temporary authorizations also provided that the producers could substitute prospectively any higher initial price which might become applicable in the event the boundary between the Oklahoma Panhandle and Oklahoma "Other" areas thereafter was adjusted.

Following the consolidation, but before the date set for the convening of a prehearing conference, numerous motions for severance were filed proposing settlement at the 15-cent per Mcf price level. On March 30, 1964, 31 FPC 730, an order was issued approving the proposed settlements and issuing certificates in 36 of the original dockets. With the subsequent settlement of six additional dockets, 38 sales are left for decision herein. The terms of the settlement in each instance provided for an initial price not in excess of 15 cents per Mcf, increase in the event of subsequent adjustment of the Policy Statement area boundaries, and prospective revision of the take-or-pay and Btu adjustment provisions, if any, on the basis of the decision in the applicable rule-making proceeding.

On April 1, 1964, the presiding examiner issued a notice calling upon those applicants who had not joined in the settlement to show cause why their requests for permanent certification at rates in excess of 15 cents per Mcf should not be denied.

Contested Dockets

The only producer-applicant to present evidence or file briefs was Gulf Oil Corporation in support of a proposed sale to Cities Service Gas Company from the Laverty Field, underlying the boundary between Grady and Caddo counties. The contract, which is dated August 21, 1962, provides an initial price of 16.8 cents per Mcf with an escalation to 17.9 cents per Mcf on July 1, 1963. Further price escalations are at the rate of 1.1 cents per Mcf each five years. There is no provision for price redetermination, tax reimbursement or Btu adjustment. Tidewater Oil Company, which also proposes a sale from the same field under a contract identical in major provisions with Gulf's,[5] joined in Gulf's evidentiary presentation and has adopted Gulf's briefs and exceptions to the initial decision. Applicants seek certification at the currently applicable contract rate of 17.9 cents per Mcf. The estimated first month's volumes as reported in the certificate applications are 150,000 Mcf for Gulf and 90,000 Mcf for Tidewater.

Applicants opposing the initial decision contend that the proposed Laverty

[3] Counties of Love, Major, Woods, Dewey, Bryan, Custer, Carter, Stephans, Alfalfa, Caddo, Grady, Beckam, Blaine, Kingfisher and Garfield.

[4] Another sale for which no temporary authorization had been requested, Tidewater Oil Company Docket No. CI63–1009, has been settled and severed from this proceeding.

[5] Gulf is the operator under both leasehold interests. The Tidewater contract bears date of December 7 1962.

Field sales are comparable with gas produced in the Carter-Knox and Oklahoma Panhandle areas, where the applicable initial guideline and certificated prices are 16.8 cents and 17 cents per Mcf, respectively, and that an initial price in excess of the 15-cent guideline rate for the Oklahoma "Other" area is justified by the provisions for dehydration, gathering to a central field point and compression of the gas before delivery, and by the great depth (16,400 feet) and high drilling and completing costs ($800,000 to $1,000,000 per well) encountered in Laverty Field. Applicants also argue that since no provision is made in the contracts for an upward Btu price adjustment, the 17.9-cent contract price would not exceed the Panhandle area guideline level because a proportionate adjustment from a 17-cent base price for 1,000 Btu gas would be equivalent to 18.105 cents per Mcf for 1,065 Btu Laverty Field gas.

In essence, Gulf and Tidewater request that the Commission carve out the Laverty Field from the existing Oklahoma "Other" area in a manner similar to the establishment in 1959 of Carter-Knox as a separate pricing area.[6] Noting that Carter-Knox is approximately 24 to 25 miles southeast of Laverty, applicants claim that the former is an "analogous" producing area with "fairly comparable" contracts within the meaning and intendment of *U.G.I.* v. *F.P.C.*, 283 F. 2d 817 (9th Cir. 1960, cert. denied 365 U.S. 879; 1961) and that the appropriate in-line price for these sales may properly be fixed by reference thereto. Applicants rely on that decision for the allowance of a higher price based on greater than normal depths of the producing formation and on the Commission's "Elk City" Opinion No. 350[7] granting an additional increment of 2.5 cents per Mcf above the 15-cent area wellhead price because of the gathering, dehydration and compression services performed by one of the producers in that case.[8]

Gulf and Tidewater, through their witnesses, contend that the entire Anadarko Basin area of north-central and central Oklahoma, including Carter-Knox and Laverty, should be consolidated into a single 17-cent pricing area together with the present Oklahoma Panhandle area. The applicants refer to the geographical proximity between the two fields, the close similarity to Carter-Knox in the depth of wells and drilling costs, and the fact that the sale is to be made at a field delivery point rather than at the wellhead to support certification at their higher than guideline price. Applicants also presented evidence comparing contract prices as well as certificated prices in various parts of Oklahoma in an effort to bear out their claim that the proposed sales should be compared for certificate pricing purposes with sales in the Oklahoma Panhandle and Oklahoma Anadarko areas, as these areas are defined in the pending Docket No. AR64–1 area rate proceeding for the Hugoton-Anadarko area, rather than the Oklahoma "Other" area as defined in the Policy Statement.

Staff presented evidence to establish that the in-line price in the Oklahoma "Other" area was and is 15 cents per Mcf for the period from January 1959 to December 1963 and that the quality and delivery requirements of the proposed Laverty Field sales are comparable to those of other sales previously certificated at a 15-cent initial price level in the Oklahoma "Other" area. Staff also contended that the Elk City and proposed Laverty Field sales are readily distinguishable from the standpoints of gathering system mileage and expenditures and in the volumes of gas involved.

[7] *Panhandle Eastern Pipe Line Co., et al.*, Docket No. CP60-103, *et al.*, Opinion and Order Issuing Certificates of Public Convenience and Necessity, 27 FPC 35.

[8] *Id., Shell Oil Company*, Docket No. CI60-660, 27 FPC at p. 44.

The examiner divided the case into two basic issues: (1) The appropriate pricing area for determining the in-line price for sales from Laverty Field, and (2) the justification, if any, for the issuance of certificates to Gulf and Tidewater at an initial price higher than the in-line price on the basis of the special services to be rendered prior to delivery of the gas to the pipeline-purchaser.

As to the first issue, the examiner found that the appropriate pricing area for determining the in-line price for the Laverty Field sales, and the sales properly to be looked to in comparison, is the Oklahoma "Other" area delineated in the Policy Statement, within which Laverty is situated. Regarding applicant's argument that Laverty is comparable to the higher priced Panhandle and Carter-Knox areas, he noted that a similar contention was rejected in the Elk City opinion where we indicated that the appropriate procedure for effecting changes in area prices is not through piecemeal determinations in individual certificate proceedings but rather in a rule-making or rate proceeding in which all relevant factors may be evaluated. The examiner observed that since Laverty Field is located in the Oklahoma Anadarko production area, the just and reasonable rates for these sales would be established in the area rate proceeding already underway.

On the second issue, the justification for an initial price higher than the area ceiling, the examiner found that the evidence did not warrant a separate increment. No evidence was submitted of a point-by-point comparison between Laverty Field and other fields in the Oklahoma "Other" area in respect to differences in costs, geology, gas quality and contract provisions. He also found, as argued by staff, that the alleged similarity between Laverty Field and Elk City Field was not sustained on closer examination, particularly on the matters of the mileage of gathering systems and volumes of gas to be delivered. Finally, he held that no evidence had been presented whereby the extra services claimed by Gulf could be objectively measured to provide a basis for a separate allowance.

Applicants advance in their exceptions many of the same arguments contained in their briefs. They contend that the examiner erred in refusing to consider prices outside the Oklahoma "Other" area in determining the price line, that he erred in finding an in-line price for Laverty Field of 15 cents per Mcf, and that he erred in refusing to grant compensation above the wellhead in-line price for the special services.

Applicants' claim that the Oklahoma Anadarko area is comparable to the Panhandle and Carter-Knox areas on the basis of production, geological conditions, marketing conditions, etc., and that the areas should be amalgamated into a single pricing area has some validity. In fact, in the Notice of Proposed Revision of Area Boundaries, Docket No. R–218, issued July 11, 1962, this joinder was suggested by the Commission and comments were invited and received from interested parties. Action on the revision has been suspended for the present pending the accumulation of additional information as to area costs and historical pricing patterns currently being developed in the area rate proceeding.[9] More recently, the Commission gave further recognition to the mutual identification between these areas in the scheduling and setting up of the Hugoton-Anadarko area rate proceeding in Docket No. AR64–1. Pending any further realignment in these areas, however, it is our opinion that any carving out of separate sales or fields for above guideline or in-line pricing, as has been sought here and in other cases, should be strictly limited to situations of a distinctly compelling nature. No such situation is presented in this case. The staff exhibit conclusively establishes

[9] Order Deferring Further Consideration of Proposed Changes in Pricing Area Boundaries Fixed Under Statement of General Policy No. 61–1, issued November 27, 1963, 30 FPC 1374.

that the in-line price for the Oklahoma "Other" area at the time Gulf and Tidewater executed their contracts was 15 cents per Mcf. With the exception of two sales certificated at 15.5 cents in Love County and the Shell Elk City sale, no permanent certificates were issued at prices over 15 cents during the entire 1959-1963 period. No detailed comparison between Laverty Field and other fields in the Anadarko Basin sector of the Oklahoma "Other" area was offered. Although the depth of the wells at Laverty is greater than at Elk City, and is even somewhat in excess of Carter-Knox, this fact standing alone cannot and does not serve to satisfy applicants' entire burden of proof in establishing their entitlement to an otherwise out-of-line price. Even accepting the allegations of greater depths and higher well drilling costs at full value, these circumstances do not constitute in our opinion the "very compelling showing" which would necessitate an *ad hoc* change from the general area standard.[10]

As a general rule the in-line price is the price applicable at the point of delivery negotiated at arm's-length between the parties and no extra allowance is in order for services performed by the producer beyond the wellhead necessary in effecting deliveries under the contract. Thus, the fact that a producer may be required to compress and dehydrate his gas or transport it in order to make a sale does not necessarily justify a higher price for the gas in an in-line proceeding.[11] As stated by the court in the *California* case,[12] there are "serious doubts" that costs of exploration and drilling or costs of delivery services rendered by a producer are requisite considerations in arriving at the in-line price in a certificate proceeding. While we recognize that the 15-cent price established in *Panhandle* was based on wellhead sales, and that an increment of 2.5 cents per Mcf was allowed Shell Oil Company in that proceeding for services performed beyond the wellhead, that sale is readily distinguishable on the basis of the volume of gas and the related extent of the gathering operation. The Shell contract at Docket No. CI60-660 involved deliveries of approximately 150,000 Mcf per *day*. As noted, Gulf's estimated deliveries in this proceeding are approximately 150,000 Mcf per *month*, while Tidewater's at 90,000 Mcf per month are even less. No substantial gathering is involved. Although we have stated that consideration will be given at the certification stage to additional features of a sale which are of "objectively measurable value",[13] the record contains no information whereby the value of the special service to be provided by these producers, if any, could be even estimated, let alone accurately measured. Thus, even if an exception to our general rule might otherwise be warranted, the evidence submitted affords no basis for an extra allowance herein.

On our consideration of the evidence submitted, the briefs, the examiner's decision and the exceptions thereto, it is our opinion, and we so find, that the in-line price for all the sales in this proceeding, including these proposed by Gulf and Tidewater, is 15 cents per Mcf, inclusive of any tax reimbursement, and that certification of prices above this rate is not in the public interest and would not serve the public convenience and necessity. Accordingly, we shall condition the certificates issued herein upon the charging of this rate as the initial price.

Under the examiner's decision, Gulf and Tidewater, after acceptance of certificates at the 15-cent conditioned price, could file immediately for an increase

up to the 17.9-cent contract rate and collect such rate, after expiration of the suspension period, subject to refund under Section 4 of the Act. Since a number of Carter-Knox sales have already escalated to 17.9 cents and are themselves being collected subject to refund, allowance of the increased rate in Laverty Field would have no triggering effect and would not establish a new price plateau in the general area. As the next contractually authorized escalation will not occur until July 1, 1968, by which time just and reasonable rates will probably have been determined for all sales in this proceeding, there is no necessity for the imposition in the certificates issued in these dockets of a moratorium condition on the filing of price increases. The duration of the suspension period will be determined when and as such rate increase applications are filed, at which time suitable consideration can be given to a reduction in the maxmium period.

Since neither Gulf nor Tidewater have made application for temporary authorizations and thus never have commenced deliveries in interstate commerce from the acreage involved, they are, of course, free to accept or reject the certificates tendered. As reported in the certificate applications, only one-half of the gas to be produced from Laverty has been contracted to Cities Service for interstate sale and transportation, the remainder being under contract for intrastate sale to Oklahoma Natural Gas Company. The terms of the sale allegedly are identical in regard to price to the contracts in this proceeding. Applicants have stated that the Oklahoma Natural contracts contain a provision that if no "acceptable" certificate is issued herein the entire quantity of gas will be sold and purchased for intrastate use. Whether applicants elect to accept the certificates offered them is, of course, their decision and their decision alone. What we have decided is that the interstate consumer, whom we are obligated to protect against excessive charges, does not need this gas at an initially certificated rate in excess of 15 cents per Mcf.

The examiner's decision would allow all remaining applicants to substitute any new rate resulting from revision of the Policy Statement area boundaries and conditions the take-or-pay requirements to the ultimate disposition of Docket No. R-199. Both provisions are in accord with similar conditions in the dockets previously settled and severed from this proceeding and these allowances will be continued in the order appended to this decision. The Btu price adjustment provisions,[14] which are allowed without restriction for the present but are made subject prospectively to the decision in Docket No. R-200, is likewise in accordance with the previous settlements, including downward adjustment for gas of less than 1,000 Btu's per cubic foot, and with our decisions in Opinions No. 350 and 353. This condition also will be continued unchanged from the initial decision.

A review of the various rate schedules reveals that in eleven of the dockets the total initial price provided in the contracts is 20.495 cents per Mcf. In the absence of a moratorium on the filing of price increases, these producers would be able to file for this rate immediately on permanent certification. Consistent with previous decisions [15] we conclude that a moratorium should be applied at the rate of 17.9 cents, which we consider to be the point above which increases would prompt a general escalation of prices in the area. For the period of the

[14] Although Gulf and Tidewater have no Btu adjustment in their contracts a number of the other dockets do contain this provision.

[15] *Placid Oil Co., et al.*, Opinion No. 398, 30 FPC 283; *Hassie Hunt Trust, Operator, et al.*, Docket No. G-19115, et al., orders issued February 24, 1964, 31 FPC 447, April 17, 1964, 31 FPC 946, September 29, 1964, 32 FPC 874; *Union Texas Petroleum, et al.*, Docket No. G-13221, *et al.*, Opinion No. 436-A, 32 FPC 952, at p. 956; *Sun Oil Co., et al.*, Docket No. G-8892, *et al.*, Opinion No. 445, 32 FPC 1183, at p. 1188.

moratorium, we believe that it would be inconsistent with the public convenience and necessity to certificate sales authorizing higher rates.

It is true that certain sales in the area are not subject to such a moratorium provision, a situation also present in previous cases where moratorium conditions were imposed. If the absence of prior moratoria were a bar, a new rule could never be imposed where experience indicated it was necessary.[16] Here, no sale in the area has escalated above 17.9 cents per Mcf. Moreover, there is no guarantee that any party without a moratorium will ever collect a rate in excess of 17.9 cents per Mcf during the moratorium period. As we have done in similar situations, we would immediately institute a 4(e) proceeding with respect to any filing above that level.

Consequently, those producers having an initial contract price of 20.495 cents will be allowed to file for increases only up to 17.9 cents per Mcf, inclusive of tax reimbursement, until July 1, 1967, or the issuance of the final decision in the Docket No. AR64–1 area rate proceeding, whichever is earlier.[17]

In all other respects the examiner's decision will be adopted and, together with this decision, shall constitute the decision of the Commission.

are, have been, or upon commencement of the operations applied for will be engaged in the sale of natural gas in interstate commerce for ultimate public consumption and each is, therefore, a "natural-gas company" within the meaning of the Natural Gas Act.

(2) The sales of natural gas hereinbefore described, as more fully described in the applications, are or upon commencement of the sale will be made in interstate commerce, subject to the jurisdiction of the Commission, and such sales, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, are subject to the requirements of subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Subject to the requirements of our order herein and conditions attached to the certificates herein issued, the applicants referred to in paragraph (1) are able and willing properly to do the acts and to perform the services proposed, and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The sales of natural gas by the independent producers referred to in the above paragraph (1), together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, are and have been required by the public convenience and necessity, and certificates therefor should be issued as hereinafter ordered and conditioned.

(5) The conditions attached to the certificates herein issued are required by the public convenience and necessity.

(6) The sales sought to be abandoned by Robert A. Hefner, Jr., *et al.*, in Docket No. CI61–393, and by Edwin L. Cox in Docket No. CI63–153, are subject to the jurisdiction of the Commission and abandonment of such sales is subject to the requirements of subsection (b) of Section 7 of the Natural Gas Act.

(7) Such abandonment by the two applicants as heretofore described is permitted by the public convenience and necessity, and an order authorizing and approving same should be issued as hereinafter ordered.

(8) The motions for settlement filed by the applicants specified in Appendix A attached to the initial decision should be granted upon the conditions set forth in the Commission's order in March 30, 1964, in this proceeding and the further condition set forth in paragraph (H) of the order herein.

(9) Except as herein granted, the exceptions to the examiner's decision should be denied.

The Commission orders:

(A) Certificates of public convenience and necessity are hereby issued to the applicants named in paragraph (1) above for the sale of gas in interstate commerce for resale as proposed in their applications, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, upon the terms and conditions of this order.

(B) Each certificate issued severally as provided in paragraph (A) above is hereby conditioned to prohibit any total initial price, including tax reimbursement, greater than 15 cents per Mcf at 14.65 psia, plus Btu adjustment where applicable, from the date of initial delivery and until such price may be lawfully changed in the manner provided by the Natural Gas Act.

(C) Within 30 days from the date of issuance of this order each of the applicants receiving certificates in paragraph (A) above shall file supplements to their presently filed rate schedules reflecting the conditioned price as the initial price in lieu of the initial price provided in the contract; provided that the notice provisions of Section 154.94(b) and the detailed submittal provisions of Section 154.94 (f) of the Commission's Regulations Under the Natural Gas Act are waived insofar as they apply to the reductions in rates hereby ordered.

(D) The certificates herein issued to Gulf Oil Corporation (Operator), *et al.*, in Docket No. CI63–417 and Tidewater Oil Company in Docket No. CI63–876 are conditioned upon their being accepted in writing and under oath by the applicants within 30 days of the issuance of this order; and the facilities authorized by said certificates shall be constructed and placed in actual operation within six months from the date of issuance of this order.

(E) In the event the Commission, by amendment of Policy Statement No. 61–1, adjusts the boundary between the Panhandle area and the "Other" Oklahoma area so as to increase the initial wellhead price level for new gas in the area of the sales herein certificated, the producer applicants accepting the certificates herein issued may thereupon substitute new rates reflecting the amount of such increase, and thereafter collect these new rates prospectively in lieu of the initial rates herein required.

(F) The certificates herein issued are granted upon the further express condition that the allowance of the take-or-pay for provisions in the applicants' contracts is subject to our ultimate disposition with respect to such provisions in the rule-making proceeding in Docket No. R–199. Upon the establishment, by regulation or policy statement, of a general policy governing such provisions in producer contracts, the applicants shall within 30 days file amended rate schedules in conformity therewith, acceptable to the Commission. The producers shall not be required to file take-or-pay provisions for less than 80 percent of the annual contract quantities. Any changes or modifications to be made in accordance with this paragraph shall be prospective only.

(G) The certificates herein issued are granted upon the further express condition that the allowance for any Btu adjustment provision in the related rate schedule is subject to the ultimate disposition with respect to such provision in the rule-making proceeding in Docket No. R–200; provided, however, as a further condition of the issuance of the certificates herein, that the rate schedules filed by the producer-applicants in Docket Nos. CI62–90, CI63–96, CI63–265, CI63–381, CI63–392, CI63–393, CI63–787, CI63–797, CI63–936, CI64–109, and CI64–121, shall also make provision for a full percentage downward adjustment in price for gas containing less than 1000 Btu's per cubic foot. The precedent processing agreements, where applicable, shall be similarly modified to provide reimbursement to Michigan Wisconsin on the same basis for Btu's below 1000 removed by the producers in processing the gas.

(H) Each certificate issued in paragraph (A) above is further conditioned to provide for a moratorium on the filing of all price increases in excess of a base price of 17.9 cents per Mcf, inclusive of tax reimbursement, pending the issuance of a final decision in the area rate proceeding in Docket No. AR64–1 or until July 1, 1967, whichever is earlier.

(I) The certificates herein issued are not transferable and shall be effective only so long as each of the applicants continues the acts and operations hereby authorized in accordance with the provisions of the Natural Gas Act and the applicable rules, regulations and orders of the Commission.

(J) The grant of the certificates herein shall not be construed as a waiver of the requirements of Section 4 of the Natural Gas Act, or of Part 154 of the Regulations thereunder. Such grant is without prejudice to any findings or order which have been or may hereafter be made by the Commission in any proceeding now pending or hereafter instituted by or against the applicants. Further, the action in this proceeding shall not foreclose nor prejudice any further proceedings or objections by the Commission relating to the operation of any price or related provision in the gas purchase contracts here involved.

(K) As a further condition to the issuance of permanent certificates in Docket Nos. CI62–1392, CI62–1500, and CI63–690, the respective applicants shall refund to Cimarron Transmission Company all amounts collected in excess of 15 cents per Mcf, plus interest at seven percent per annum, from the date of initial delivery until the date of issuance of this order.

(L) Permission for and approval of the abandonment of sales by Robert A. Hefner, Jr., *et al.*, in Docket No. CI61–393 and Edwin L. Cox in CI61–153, as and for the reasons described in their motions, is hereby granted; the certificates issued to these applicants are hereby terminated.

(M) The offers of settlement described in Appendix A to the initial decision in this proceeding are granted upon the same conditions specified in the Commission's order dated March 30, 1964, and the further condition set forth in paragraph (H) above.

(N) Except as herein granted, the exceptions to the examiner's decision are hereby denied.

(O) The examiner's decision is hereby adopted as part of this Opinion and Order.

Commissioners O'Connor and Black *dissenting in part.*

O'Connor, *Commissioner, dissenting in part:*

The imposition of moratoria in certificates is a practical method of meeting the Commission's statutory obligations with a measure of fairness to both the producers and the purchasers. However, by embarking upon a new course, the majority does not stay within this purpose, and I respectfully dissent from their failure to do so.

It must be conceded that the majority's moratorium price level of 17.9 cents will not prevent a triggering of price increases. Instead, it appears that most contractually authorized increases under price redetermination and most-favored-nation clauses have already occurred, and that there will be no further triggering until late in 1967. The majority selects the 17.9-cent level solely because it is the highest increased rate that has been permitted to be filed in the Oklahoma "Other" area. This solution, novel in its failure to consider the total pricing structure, is basically unsound.

In the first place, the 17.9-cent level is ineffective. Only eleven sales will be precluded from filing for their periodic escalations. On the other hand at least sixty contracts under permanent certificates can be escalated above the majority's

moratorium level. Certainly the majority's illusory effort cannot be considered as preventing an adverse impact on the pricing structure. Second, the 17.9-cent level is discriminatory. The majority has focused restraint on a few, isolated producers in the context of a great number of unconditioned certificates. This approach is devoid of fairness.

We have previously declared that the moratorium level is to be the maximum rate allowed by the public convenience and necessity. It must be a rate that allows a certain degree of flexibility to pricing developments in a particular area. A survey of the area pricing structure reveals that, of the contracts which can be escalated prior to July 1, 1967, three can escalate above 23.0 cents, thirty allow for increases up to 22.6 cents, twenty can go to 22.4 cents, and seven to 18.0 cents. Thus, considering these possible escalations, a moratorium level of 22.6 cents for the contracts consolidated in this docket is more reasonable than the majority's 17.9-cent level. However, none of the instant contracts can escalate above 20.5 cents during the precluded period. Consequently, I conclude that no useful purpose is served by the imposition of any moratorium, and I dissent from the majority's insistence on an appearance of restraint.

BLACK, *Commissioner, dissenting in part:*

For the reasons set forth in my dissent to the Commission's order approving the settlement offers of certain of the original parties to this proceeding, (Pan American Petroleum Corporation, *et al.*, Docket No. G–19417, *et al.*, issued March 30, 1964, 31 FPC 730 at 735), I dissent to that portion of the opinion which makes the Btu adjustment clauses subject only prospectively to our conclusions in the pending rulemaking proceeding in Docket No. R–200.

INITIAL DECISION

OF THE PRESIDING EXAMINER UPON APPLICATIONS FOR CERTIFICATES OF PUBLIC CONVENIENCE AND NECESSITY UNDER SECTION 7 OF THE NATURAL GAS ACT INVOLVING PRODUCERS INITIAL PRICES

(Issued July 13, 1964)

LEVY, *Presiding Examiner:* This proceeding[1] is based upon an order issued by the Commission on December 12, 1963, consolidating approximately 82 applications for certificates of public convenience and necessity seeking authorization for sales to various pipelines under Section 7 of the Natural Gas Act, from numerous fields in the "Other" Oklahoma pricing area as defined in the Commission's Statement of General Policy No. 61–1, at initial prices in excess of the 15¢ price level for the "Other" Oklahoma area.

A prehearing conference was held on January 22, 1964, and a schedule adopted for the filing of prepared testimony and exhibits, prior to the cross-examination of witnesses to commence on April 21, 1964. In the interim, numerous motions for settlement and severance were filed by major producer applicants at the 15¢ per Mcf price level. On March 30, 1964, 31 FPC 730, the Commission issued an order severing proceedings, approving the proposed settlements, and issuing certificates of public convenience and necessity to approximately 37 of the original dockets which had been consolidated for hearing, including the original lead docket (No. G–19417, Pan American Petroleum Corp., *et al.*).

On April 1, 1964, the Presiding Examiner issued a Notice of Intention to Dispose of the Remaining Dockets, and called upon applicants who had not filed proposed testimony in support of higher than guideline contract prices and who did not

[1] Originally entitled "Pan American Petroleum Corp., *et al.*", Docket No. G–19417, *et al.*

join in the proposed settlement to show cause why their applications for permanent authorizations at contract prices in excess of the 15¢ price level for the "Other" Oklahoma area should not be denied. Hearing was held on April 21, 1964, and briefs have been filed by Gulf, Tidewater, and Staff.

The Application of Gulf Oil Corporation (Gulf)

The only applicant to present testimony in support of a higher than ceiling price was Gulf (joined by Tidewater Oil Corporation which also adopted Gulf's briefs).[2] The application filed by Gulf on October 1, 1962, in Docket No. CI63-417, requests authority to sell natural gas from the Laverty Field, Grady and Caddo Counties, Oklahoma to Cities Service Gas Corporation (Cities) at an initial price of 16.8¢ per Mcf with escalation to 17.9¢ on July 1, 1963. This escalation has already occurred, and the contract provides for further price escalation of 1.1¢ per Mcf for each five years, with no provision for price negotiation, price redetermination, or tax reimbursement. Gulf has declined temporary authorization to commence sales at the ceiling price and no deliveries are being made from Laverty Field. The discovery well was completed on March 19, 1961. Gulf is required to construct, operate, and maintain the gathering system, to dehydrate the gas, and to deliver it to Cities at a central field delivery point.

The Evidence

Gulf[3] presented the testimony of witnesses D. R. Johnson and Celia Star Gody in support of the unconditional certification of its proposed sale to Cities at the initial price of 17.9¢ per Mcf.

D. R. Johnson testified that the Oklahoma-Anadarko Basin area, in which Laverty Field is located, should be included in a single 17¢ pricing area along with the present Oklahoma-Panhandle area.

> If one were to assume that in general the Federal Power Commission's Policy Statement prices are to be applied in certificate cases, it seems logical and reasonable to me that the Oklahoma Anadarko Basin Area should be included in a single pricing area along with the present Oklahoma Panhandle Area. The Commission itself has this matter under consideration in the proposed revision of pricing areas. If the boundary was changed as mentioned, this would mean the initial price level for the Laverty Field sale, Caddo and Grady Counties, as well as sales from other surrounding counties would be 17¢ per Mcf, plus Btu adjustment. Over and above this, however, there are other factors which distinguish the Laverty Field sale from the other sales. These include the history of the negotiations surrounding the proposed sale, the depth of the wells, the cost of drilling and completing wells in the field, and a comparison of this sale with certificated sales from the Carter Knox and Elk City Fields. (Tr. p. 22)

He described Laverty Field and the factors that allegedly justify a price higher than the "Other" Oklahoma 15¢ level as follows:

> The Laverty Field is about 4 to 5 miles North Northwest of the Carter Knox Field. The wells in Laverty are similar to the Knox Field wells in that they are extremely deep, very expensive to drill, and require unusually high pressure surface equipment. Actually, the producing depth of the Laverty wells is about 400 to 450 feet deeper than the Knox wells, the completion depth of the Laverty wells being around 16,400 feet. Too, the cost of drilling and completing the wells in the Laverty and Knox Fields is com-

---

[2] Gulf is the operator of the properties involved in Tidewater's application.

[3] Tidewater, applicant in Docket No. CI63-876, joined Gulf in the evidentiary presentation and adopted Gulf's position.

parable, such cost being approximately $800,000 to $1,000,000 per well. This can be compared to the Elk City Field wells which have an average depth of around 10,000 feet and cost approximately $226,000 each to drill and complete. Too, the Laverty wells are much deeper and more expensive to drill than the wells from which Gulf is making sales under conditioned temporary authorizations in its other dockets herein. In addition, and as distinguished from its other sales, Gulf is obligated to gather the gas in the Laverty Field, dehydrate the gas and deliver it to the purchasers at a central point rather than at the wellhead. These operations are comparable to those for the Knox and Elk City Field sales. At Docket No. G–18004 the Commission permanently certificated sales from the Carter Knox Field at an initial price of 16.8¢ per Mcf at 14.65 psia and the contract price has now escalated to 17.9¢. At Docket No. CI60–660 the Commission permanently certificated a sale by Shell Oil Company to Panhandle Eastern Pipe Line Company from the Elk City Field at 17.5¢ per Mcf plus a Btu adjustment. These prices are comparable to the initial price for Gulf's proposed Laverty Field sale, and all factors considered Gulf should be issued a permanent Certificate at the contract price of 17.9¢ per Mcf. (Tr. 25–26)

He concluded by observing that Gulf has a contract with Oklahoma Natural Gas Co. for the non-jurisdictional intrastate sale of the gas in the event an acceptable certificate is not issued to Gulf and the Cities' contract is canceled.

Mrs. Gody compared market prices for natural gas in the various parts of Oklahoma. She concluded that the proposed Laverty Field sales should be compared for pricing purposes with sales in the Oklahoma-Panhandle area, and Oklahoma-Anadarko area, as those areas are defined in the pending area rate proceeding for the Hugoton-Anadarko area (Docket No. AR64–1, *et al.*) rather than Oklahoma "Other" as defined in 61–1. Her analysis (Exhibit 1, Chart 1) shows Laverty Field in the higher priced Oklahoma-Anadarko area rather than the Oklahoma "Other" area. After comparing the quality specifications for the proposed sales with other recent Oklahoma contracts as to Btu content of the gas, sulphur content, dehydration, and delivery pressure, she concludes that the proposed contract prices are will within the dominant range of current market prices for the Panhandle-Anadarko area.

> The prices provided by the subject contracts are generally in accord with those under other contemporaneous comparable Oklahoma contracts. The contracts in this proceeding with but one exception are all dated 1960–1963, and the initial base prices range from 16.80 to 19.50 cents in the Anadarko Area and from 15.50 to 17.00 cents per Mcf in the "All Other Oklahoma" Area. During the 1960–1963 period, excluding the subject sales, 73 per cent of the volume in the Panhandle-Anadarko Area was at an initial base price of 17 cents or higher, and 24 per cent was at an initial base price of 18 cents or above. With respect to the "All Other Oklahoma" Area, 81 per cent of the volume (excluding the subject sales) is at an initial base price of 15 cents or higher and 28 per cent at an initial base price of 16.80 cents or above. (Tr. p. 78).

Staff witness Gerhardt testified that the "in-line" price in the Oklahoma "Other" area is 15¢ for the period from January 1, 1959, to December 15, 1963, and that the quality and delivery requirements of the proposed Laverty Field sales are comparable to those of certificated sales at the 15¢ initial price level in the Oklahoma "Other" area.

On motion by Staff Counsel, and after a full discussion, the Presiding Examiner struck the testimony of Mr. Johnson in its entirety on the ground that "* * * in

substance he is asking that a different pricing area be carved out of what is presently the 'other Oklahoma area' " as defined by the Commission in 61-1, and that the proposed change in the present boundaries of the Commission's pricing area in the State of Oklahoma is pending before the Commission in Docket No. R-218, a rule-making proceeding in which the Commission proposed to revise the areas set out in Statement of General Policy No. 61-1 by combining the Oklahoma-Panhandle and Carter-Knox areas with the northwestern Oklahoma counties into a single priced area (Tr. 34-36), and that the only issue in this Section 7 certificate proceeding is whether or not the contract price is in excess of the in-line price. Portions of Mrs. Gody's testimony dealing with geographic areas other than the "Other" Oklahoma area as specified in the Commission's Statement of General Policy No. 61-1, were struck for the same reason (Tr. 85).

Gulf's brief requests that the Examiner reconsider his ruling striking the testimony of Mr. Johnson and portions of the testimony of Mrs. Gody on the ground that this testimony was introduced not to change the area boundaries but rather to show the similarity between the Laverty Field and the Oklahoma-Panhandle area and the Carter-Knox Field in accordance with the language of the Court in *United Gas Improvement Company* v. *F.P.C.* 283 F. 2d 817 (9th Cir. 1960, cert. denied, 365 U.S. 879, (1961)), where the Court stated:

> Existing producer prices are relevant for comparative purposes only if they pertain to gas production in the same or an analogous area and if other principal features of the contracts are fairly comparable. Thus the contracts should be comparable from the standpoint of gas reserves and future potentials. The significance of any disparties existing as to these conditions should be explained by Commission findings based upon substantial evidence. Substantial variation in the quality of gas sold should be similarly treated * * *. (p. 823)

Since an analysis of Gulf's position requires consideration of the stricken testimony of Mr. Johnson and Mrs. Gody, and since the Commission should have before it the evidentiary support for the position of Gulf and Tidewater, the Examiner has reconsidered his ruling and, upon further reflection, the testimony of Mr. Johnson and Mrs. Gody is admitted in its entirety, and given full weight and consideration in this initial decision.

Discussion

The Commission's Statement of General Policy No. 61-1 issued September 28, 1960, 24 FPC 818, divides the State of Oklahoma into three geographic pricing areas: Panhandle area 17¢, "Other" Oklahoma area, 15¢, Carter-Knox area 16.8¢. Caddo and Grady Counties, in which Laverty Field is located, lie within the 15¢ "Other" Oklahoma initial price level area. Gulf contends that the proposed Laverty Field sales are similar to and comparable with gas produced and sold in the Oklahoma-Panhandle and Carter-Knox Fields rather than the "Other" Oklahoma area. Consequently, the proposed initial contract price[4] for Laverty Field is in line with prices in the same or analogous areas.

> The purpose of the testimony of Witness D. R. Johnson and Witness Mrs. Gody is *not* to change the area boundaries as defined in the Commission's Policy Statement. It is the position of Gulf Oil Corporation that these boundaries should be changed and that other portions of Oklahoma should be included within the Oklahoma Panhandle Area, but Gulf recognizes

[4] Gulf contends that the 17.9¢ per Mcf initial price for Laverty gas does not exceed the Panhandle area price because upward adjustment for Btu content from a 17¢ base price for 1000 Btu gas is equivalent to 18.105¢ for 1065 Btu Laverty gas (Tr. 25).

that there is a pending proceeding in which the Commission is considering changing area boundaries and that such evidence is appropriate to that proceeding and not to an application for certificate. Accordingly, Gulf has not introduced any evidence for the purpose of changing area boundaries. Gulf has introduced evidence of prices "in the same or analogous area" as authorized by the 9th Circuit in *United Gas Improvement Company* v. *Federal Power Commission*, 283 F. 2d 817 (9th Cir. 1960), cert. denied 365 U.S. 879 (1961). The testimony of Gulf's witnesses shows the similarity between the Laverty Field and the Oklahoma Panhandle Area and the Carter Knox Field. This is the purpose of such testimony. (Gulf's reply brief pp. 2, 3).

Gulf also contends that an initial price in excess of the 15 guideline price for the "Other" Oklahoma area is justified because of certain premium features of the contracts and the proposed sale. These include dehydration, gathering and compressing, and the depth and cost of drilling the Laverty Field wells. In this connection Gulf relies on the Commission's decisions in the Elk City and Carter Knox Field cases.

Staff argues that Gulf is essentially asking the Examiner and the Commission to redefine the present boundaries of the Commission's Oklahoma pricing area so as to include the Laverty Field in the higher priced Oklahoma-Panhandle or Carter-Knox area rather than the Oklahoma "Other" area, and that this certificate proceeding is not the appropriate vehicle for changing the boundaries of existing pricing areas. Gulf and Tidewater will be protected by the inclusion in any certificate of the proviso which appears in the Commission's order of March 30, 1964, to the effect that applicants may substitute any rates consistent with their contracts in the event the Commission amends its Policy Statement by adjusting the area pricing boundaries so as to increase the initial wellhead price. The Staff maintains that comparative sales support an in-line price of 15¢ per Mcf for the proposed sales from Laverty Field because the only appropriate and relevant pricing area is the "Other" Oklahoma, as presently delineated in Policy Statement No. 61–1, rather than the Oklahoma-Panhandle area or the Oklahoma-Anadarko area. The Elk City and Carter-Knox decisions are distinguished on their facts and are not comparable. Staff concludes that no premium above the base price is justified by the evidence presented.

Two basic issues are presented: the appropriate pricing area for determining the in-line price for sales from Laverty Field, and the justification, if any, for the certification of an initial contract price in excess of the current 15¢ area price level.

The appropriate pricing area for determining the in-line price for sales from Laverty Field in this proceeding is the "Other" Oklahoma area, as defined in the Commission's Statement of General Policy No. 61–1, the geographic area in which, concededly, Laverty Field is presently located. Applicants argue that Laverty Field is comparable to the Carter-Knox and Oklahoma-Panhandle pricing area; consequently these areas, rather than Oklahoma "Other" should be used for comparative pricing purposes to determine the in-line price for Laverty Field. A similar contention was rejected by the Commission in the Elk City decision cited by applicants, Opinion No. 350 issued January 15, 1962. Applicants submitted evidence to show that, from the point of view of geology, geography, marketing, and operating, the gas producing fields in the Anadarko Basin section of the "Other" Oklahoma area are similar to fields in the Panhandle area, and consequently that an in-line price of 17¢ rather than 15¢ is justified. The Commission indicated that the appropriate procedure for effecting changes in either area boundaries or prices is not through piecemeal determinations in individual

certificate proceedings but rather in a rule-making or area rate proceeding in which all relevant factors and interest could be evaluated.

The area price levels, as set forth in the Policy Statement and its amendments, are "for the purpose of guidance and initial action by the Commission," and do not constitute determinations of just and reasonable prices. The Policy Statement contemplates changes in both area boundaries and area price levels from time to time as such facts as come before us compel such adjustments.*

The Policy Statement, however, should not be construed as suggesting that changes in either area boundaries or prices will readily be made in individual proceedings. It would defeat our purpose of simplifying and clarifying producer regulation, if every individual proceeding were to become a forum for attacking the area standards and we were to begin varying those standards from case to case. Adjustments in the area price structure can best be made upon a general review of all relevant factors. At the least, it would take a very compelling showing to warrant any change on an *ad hoc* basis

In the present proceeding, the producers have adduced evidence attempting to show that from the point of view of geology, geography, marketing, and operating, the gas producing fields in the "Other" Oklahoma counties here involved are similar to fields in the Panhandle area where we have fixed an initial wellhead price of 17 cents per Mcf. The evidence however, does not show that there is not a like similarity with other fields in the "Other" Oklahoma area which lie to the east and which are also in the Anadarko Basin. It is possible as producers contend, that the present division of Oklahoma counties into the Panhandle and "Other" areas is inequitable and should be changed; but the present record does not permit us to so find, and there is insufficient evidence to show that any boundary other than the present one is proper.

There is no evidence in the record now before us which compels the conclusion that a wellhead price of 17 cents per Mcf for the proposed sales in the "Other" Oklahoma area is required in the public interest. The applicants rely on comparative evidence to show that the conditions of developing, producing and marketing gas in the fields here involved are similar to conditions in the Laverne and other fields in the Panhandle area where the Commission has certificated wellhead sales at 17 cents. This evidence is not sufficient to justify a wellhead price for the proposed sales in excess of the "Other" Oklahoma ceiling level. The record shows that the highest certificated price for gas now being sold in that part of the "Other" Oklahoma area which is located within the Anadarko Basin is 15 cents per Mcf.* Eight sales at this price level are being made for gas from the West Cement field in Caddo County and the South Rainey field in Washita County just to the east of Elk City.* In Beckham County, where Elk City is located, and in Woods and Alfalfa Counties, where some of the en route gas is located, the record shows initial prices certificated at 12 cents per Mcf. Elsewhere in "Other" Oklahoma, and within the Anadarko Basin, the record shows sales certificated at 11 and 12 cents per Mcf in Grant and Garfield Counties. This pattern of presently certificated sales in the area establishes the line for the proposed sales and shows a reasonable relationship between the Policy Statement area ceiling and existing sales. There is no compelling evidence in this proceeding to justify an initial wellhead price in excess of

*Footnote omitted.

the area ceiling. We shall, therefore, condition the certificates for sales in "Other" Oklahoma at an initial wellhead price of 15 cents per Mcf. *

This approach was reaffirmed by the Commission in Opinion No. 353, issued March 7, 1962, 27 FPC 449, in which the applicant producers again sought a higher initial service rate level for gas produced in the "Other" Oklahoma area. The Commission stated:

Our Opinion No. 350, 27 FPC 35, in the *Panhandle* case is controlling with respect to our determination of the price and area questions in this proceeding. * * *.

Although the parties have gone to great lengths to justify the proposed initial price on the basis of comparative cost evidence and evidence to show the geological, operating and marketing characteristics of the Woodward area in relation to the Laverne area,* this evidence is not of such compelling nature as to convince us that we should depart from the pricing pattern established in the Policy Statement by ordering either an adjustment in price or in area boundaries on the basis of the record in this individual certificate proceeding. The existing area ceilings in the Panhandle and "Other" Oklahoma areas are based upon and are reasonably related to prevailing prices for wellhead sales as heretofore certificated by this Commission. Until such time as the Woodward area has developed to the extent that an area hearing can be fruitfully utilized to determine area prices, or unless evidence of the necessity of an *ad hoc* adjustment more compelling than that contained in the present record is presented, we shall adhere to the ceiling levels set forth in the Policy Statement. We shall therefore condition the certificates herein issued at an initial wellhead price of 17 cents per Mcf for sales in the Panhandle area, and at 15 cents per Mcf for sales in the "Other" Oklahoma area. Inasmuch as the ceilings in these areas are prices which include tax reimbursement, if any, the prices so allowed shall include all taxes, and no additional amounts for tax reimbursement shall be allowed.

Gulf's brief refers to the pending proceeding (R–218) [1] in which the Commission proposed changing area boundaries, and agrees that evidence relating to boundary changes is appropriate to that proceeding and not to individual certificate application (Gulf reply brief p. 2). Laverty Field is included in the Oklahoma-Anadarko production area in Docket No. AR64–1, *et al.*, the pending Hugoton-Anadarko area rate proceeding instituted by the Commission on November 27, 1963, 30 FPC 1354, in which proceeding just and reasonable natural-gas rates will be fixed for Laverty Field as well as the larger pricing area in which it is included.

Laverty Field represents a new gas supply in the "Other" Oklahoma pricing area not yet dedicated to the interstate market. "This Commission, under the doctrine of the *CATCO* case, has an obligation to scrutinize with great care the initial cost of a new gas supply before permitting it to be attached to an interstate pipeline for transportation and sale under the Act." (*Tennessee Gas Transmission Co.*, Opinion No. 413 issued December 12, 1963, 30 FPC 1477 at 1480 (footnotes omitted)). The record in this proceeding does not support a determination that Laverty Field's gas is entitled to a higher initial price than gas in the "Other" Oklahoma pricing area, because it is more comparable to the Oklahoma-Panhandle area and the Carter-Knox Field. The record is barren of any comparison between the Laverty Field and other fields in the Anadarko Basin of the "Other" Oklahoma

*Footnotes omitted.

[1] The Commission subsequently issued on November 11, 1963, an order deferring further consideration of the proposed changes in pricing areas (28 F.R. 2945).

area in respect of area costs, depth of wells, costs of drilling, geology, gas quality, and contract provisions. Moreover, the alleged similarity between Laverty Field and the Elk City Field is not sustained upon closer examination. In the *Panhandle* case (27 FPC 35) the Commission allowed the Elk City Field producer, Shell Oil Co., 2.5¢ above the ceiling price for gathering, compression, and dehydration of the gas before delivery to Panhandle. For a number of years prior to the sale of this gas-well gas the producer had operated a gathering system, extracted the liquid hydrocarbons from the gas, and reinjected the residue gas into the reservoir to procure additional liquid hydrocarbons. The 2.5¢ premium over the 15¢ wellhead price was allowed for the additional services furnished by Shell in delivering "an unusually desirable supply of gas" needed to support the feasibility of Panhandle's proposed lateral. Staff witness Gerhardt testified that taking into account the mileage of gathering system involved, the expenditures for such a gathering system, and the volumes of gas involved, the Elk City sale is not comparable to the proposed sale by Gulf in this proceeding. The contrary conclusion of Gulf witness Johnson is not supported by any detailed analysis of the Elk City operation.

The pending Hugoton-Anadarko area rate proceeding is a more appropriate vehicle for determining comparative costs, geology, and gas quality than an *ad hoc* certificate proceeding in which many parties vitally interested in the price determinations for adjacent fields and areas are not represented. Further, as noted by the Court in *California Oil Co.* v. *F.P.C.*, 315 F. 2d 652 (CA10–1963), the in-line price is determined by comparing the proposed price with existing producer prices in the area and not by examining relative exploration and drilling costs.

> We do not think that the Commission was required in this case to consider the exploration and drilling costs or the cost of delivery services in arriving at the "in line" price in a certification proceeding. The consideration of these matters may properly be left to a Section 4 proceeding. (p. 660)

The Carter-Knox Field certificate was issued September 18, 1959, 22 FPC 528, prior to the development of the present concept of initial price regulation following the Supreme Court's *Catco* decision (360 U.S. 378 (1959)). It was not based on comparing the proposed price (16.8¢ per Mcf) with other authorized sales and should not be used as a precedent for determining the in-line price for the "Other" Oklahoma pricing area, whose boundaries and price level were established by the Commission subsequent to the issuance of the Carter-Knox certificate.

If the appropriate pricing area is "Other" Oklahoma as defined in Statement of General Policy No. 61–1, 15¢ is clearly the in-line price (Exhibit 1, chart 9; Exhibit 3, p. 2). Nor has Gulf established that it is entitled to a premium above the wellhead price for extra services rendered by it in dehydrating and gathering the gas. Field deliveries to Cities Service by Gulf and other producers without additional compensation above the initial base price are not uncommon in the "Other" Oklahoma area (Exhibit 3, sheets 9–12). Moreover, under the Laverty Field gas purchase contract (Item A, Exhibit B), Gulf reserves the right to use the gas for repressuring or cycling operations and to process the gas for the recovery of liquid hydrocarbons. Under these provisions, gathering and delivery to a central point in the field would be equally beneficial to the seller's reinjection or extraction operations. The Commission recently noted that . . . "Compression of the gas where necessary to enable its entry into the pipeline and dehydration for removal of excess water content are normal requirements imposed on producers and cannot be considered a premium feature of exceptional benefit to either the pipeline or the consumer." (Op. No. 422–A, *Amerada Petroleum Corp., et al*, 31 FPC 1315 at 1318). In the *Panhandle* case, the recycling

process was scheduled to stop at the end of 1963, or sooner should Panhandle takes so require.

Moreover, no evidence has been presented by which Gulf's so-called extra services may be objectively measured. The fact that an increment of 2.5¢ was allowed in the *Elk City* case does not support a similar allowance here where the difference between the fields and operations are substantial. (See Op. No. 350, 27 FPC 35 at 40–42.)

The record is also silent as to the purchaser's need for the gas, an important element in the *Panhandle* decision.

Finally, Gulf insists that the public interest requires that its initial contract price be certified now. The public interest requires more than an *ad hoc* consideration of Gulf's 17.9¢ initial sales price. Unconditional certification now would have repercussions far beyond Laverty Field and could trigger a general price rise in the entire "Other" Oklahoma pricing area. Acceptance by Gulf now of a conditioned certificate does not prevent it from filing a rate increase up to the applicable contract price, and collecting such price after the expiration of the statutory five months' suspension period under Section 4 of the Act until a final rate decision in the Oklahoma-Anadarko area rate proceeding or a change in area boundaries. Any loss to Gulf in revenue during the suspension period must be balanced against the loss to the public which may result from the collection of excess charges pending final determination of Laverty Field rates. To cast this interim risk on the public rather than the producer is not in the public interest, and is not consistent with the Supreme Court's admonition in *Catco* that the Natural Gas Act "was so framed as to afford customers a complete, permanent and effective bond of protection from excessive rates and charges." (*Atlantic Refining Co.* v. *P.S.C.*, 360 U.S. 378–388 (1959)).

PENDING MOTIONS FOR SEVERANCE, ABANDONMENT, OR SETTLEMENT

On April 2, 1964, Edwin L. Cox filed a motion for severance of Docket Nos. CI61–1308, CI62–471, and CI63–1574. In Docket No. CI61–153, Edwin L. Cox states that sales of gas from the unit involved have ceased, the property has been abandoned because the reserves have been depleted, and Applicant requests that the Commission authorize abandonment of service and cancellation of Applicant's related FPC Gas Rate Schedule No. 31. Staff does not oppose the motion. With respect to Docket Nos. CI61–1308, CI62–471, and CI63–1574, the Applicant agrees to accept permanent certificates at an initial price of 15¢ per Mcf subject to the same conditions contained in subparagraphs (b), (c), and (d) of paragraph (E) of the Commission's order of March 30, 1964.

In Docket No. CI61–393 Robert A. Hefner, Jr., *et al.*, and in Docket No. CI62–1500, The Hefner Company, filed motions for severance on April 1, 1964. Robert A. Hefner, Jr., *et al.*, request permission to abandon their sale under Docket No. CI61–393. The Hefner Company requests that a permanent certificate be issued in Docket No. CI62–1500. The Hefner Company indicates that it is willing to accept a permanent certificate in Docket No. CI62–1500 at an initial price not to exceed 15¢ per Mcf plus adjustment upward or downward for Btu content as provided in the applicable rate schedule. The Hefner Company in CI62–1500 also agrees to refund to Cimarron the difference between 15¢ and 15½¢ on amounts collected for deliveries from the date of initial delivery, with interest at 7% per annum. It should be noted that the temporary certificate issued to The Hefner Company requires the refund of all amounts over 15¢ including any amounts derived from upward Btu adjustment. Staff does not oppose the request for abandonment of service.

Staff has no objection to the granting of motions for severance and settlement filed since March 30, 1964. A list of such motions is attached to the proposed findings and conclusions as Appendix A.

ADDITIONAL FINDINGS AND CONCLUSIONS

Upon consideration of the entire record in this proceeding including the pleadings, the evidence adduced, and the briefs filed, it has been found and concluded, in addition to the findings and conclusions heretofore stated, that:

(1) Each Applicant is a "natural-gas company" within the meaning of the Natural Gas Act and is engaged in the sale and delivery of natural gas in interstate commerce for resale for ultimate public consumption subject to the jurisdiction of the Commission.

(2) The proposed sales of natural gas are subject to the jurisdiction of the Commission, and such sales, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicants are able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, Rules, and Regulations of the Commission thereunder.

(4) The conditions attached to the certificates herein issued are required by the public convenience and necessity.

(5) The sales sought to be abandoned by Robert A. Hefner, Jr., *et al.*, in Docket No. CI61-393, and by Edwin L. Cox in Docket No. CI63-153, are subject to the jurisdiction of the Commission and abandonment of such sales is subject to the requirements of Subsection (b) of Section 7 of the Natural Gas Act.

(6) Such abandonment by the two Applicants as heretofore described is permitted by the public convenience and necessity, and an order authorizing and approving same should be issued as hereinafter ordered.

(7) The motions for severance and proposed settlement filed by the Applicants identified in Appendix A attached hereto are in the public interest and are granted upon the same uniform conditions as specified in the Commission's order of March 30, 1964.

ORDER

WHEREFORE, *It is ordered*, subject to review by the Commission on appeal or upon its own motion, as provided by its Rules of Practice and Procedure, that:

(A) The certificates of public convenience and necessity are hereby issued to the above-named Applicants, on the conditions set forth herein, authorizing the sale of natural gas in interstate commerce for resale for ultimate public consumption, and for the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, all as more fully described in the applications and settlement proposals herein.

(B) The certificates granted in paragraph (A) above are not transferable and shall be effective only so long as Applicants continue the acts and operations hereby authorized in accordance with the provisions of the Natural Gas Act and the applicable Rules, Regulations, and orders of the Commission.

(C) The grant of the certificates issued in paragraph (B) above shall not be construed as a waiver of the requirements of Section 4 of the Natural Gas Act or of Part 154 or Part 157 of the Commission's Regulations thereunder, and is without prejudice to any findings or orders which have been or may hereafter be made by the Commission in any proceeding now pending or hereafter instituted by or against Applicant. Further, our action in this proceeding shall not

foreclose nor prejudice any future proceedings or objections relating to the operation of any price or related provisions in the gas purchase contracts herein involved. Nor shall the grant of the certificates aforesaid for service to the particular customer involved imply approval of all of the terms of the contract, particularly as to the cessation of service upon termination of said contracts, as provided by Section 7(b) of the Natural Gas Act. Nor shall the grant of the certificates aforesaid be construed to preclude the imposition of any sanctions pursuant to the provisions of the Natural Gas Act for the unauthorized commencement of any sales of natural gas subject to said certificates.

(D) The authorizations issued herein are subject to the following conditions:

(a) The initial price, including tax reimbursement, shall not exceed 15¢ per Mcf at 14.65 psia.

(b) In the event that the Commission amends its Policy Statement No. 61-1 by adjusting the boundary between the Panhandle area and the "Other" Oklahoma area so as to increase the initial wellhead price for new gas in the areas involved herein, Applicants thereupon may substitute the new rates consistent with their contracts reflecting the amount of such increase, and thereafter collect these new rates prospectively in lieu of the initial rates herein required.

(c) The allowances for take-or-pay provisions in the related rate schedules are subject to the ultimate disposition with respect to such provisions in the rule-making proceeding in Docket No. R-199; however, Applicants will not be required to file take-or-pay provisions for less than 80% of the annual quantity.

(d) The allowance for any Btu adjustment provision in the related rate schedule is subject to the ultimate disposition with respect to such provision in the rule-making proceeding in Docket No. R-200; provided, however, as a further condition of the issuance of the certificates herein, that the rate schedules filed by the producer-applicants in Docket Nos. CI63-265, CI64-121, CI62-90, CI63-96, CI64-109, CI63-381, CI63-392, CI63-393, CI63-787, CI63-797, CI63-936, CI63-797, CI64-361, CI64-10, CI63-96, CI64-121, CI61-1308, CI62-471, CI63-1574, CI61-1024, CI61-1244, CI61-1281, and CI63-615, shall also make provision for a full percentage downward adjustment in price for gas containing less than 1000 Btu's per cubic foot. The precedent processing agreements, where applicable shall be similarly modified to provide reimbursement to Michigan Wisconsin on the same basis for Btu's below 1000 removed by the producers in processing the gas.

(E) As a further condition to the issuance of permanent certificates in Docket Nos. CI62-1392, CI62-1500, and CI63-690, J. I. Goins, *et al.*, The Hefner Company, and C. L. McMahon, Jr., shall refund, respectively to Cimarron Transmission Company any amounts collected (plus interest at 7% per annum) in excess of 15¢ per Mcf from the date of first delivery up to the date of issuance of the order herein.

(F) Permission for, and approval of, the abandonment of sales by Robert A. Hefner, Jr., *et al.*, and Edwin L. Cox as hereinbefore described, all as more fully described in their motions, be and the same are hereby granted.

WILLIAM C. LEVY,
Presiding Examiner.

APPENDIX A

Mar. 30, 1964	Socony Mobil, Docket Nos. CI61–1024, CI61–1244, CI61–1281, CI63–615 in its overall rate proceeding, Docket No. G–12401.	Offer of settlement.
Apr. 2, 1964	Edwin L. Cox, Docket Nos. CI61–1308, CI62–471, and CI63–1574.	Motion for severance.
Apr. 14, 1964	Robert P. Lammerts, Docket No. CI64–28.	Motion for severance and offer of settlement.
Apr. 15, 1964	Petroleum Inc. (Operator), *et al.*, Docket Nos. CI63–797 and CI64–361.	Motion for severance and for issuance of certificates under abridged hearing procedure.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

NORTHERN UTILITIES, INC., DOCKET NO. CP64–313; KANSAS-NEBRASKA NATURAL GAS COMPANY, INC., DOCKET NO. CP64–315

FINDINGS AND ORDER AFTER STATUTORY HEARING PERMITTING AND APPROVING ABANDONMENT AND ISSUING CERTIFICATES OF PUBLIC CONVENIENCE AND NECESSITY

(Issued November 17, 1964)

Northern Utilities, Inc. (Northern) filed in Docket No. CP64–313 an application on June 30, 1964, and supplements thereto on August 19 and August 20, 1964, pursuant to Sections 7(b) and 7(c) of the Natural Gas Act for, (a) permission to abandon certain natural gas facilities, (b) authorization to install,

construct and operate certain other natural gas facilities subject to the jurisdiction of the Commission to increase the capacity of its interstate transmission line and (c) authorization to transport for and redeliver to Kansas-Nebraska Natural Gas Company, Inc. (Kansas-Nebraska) at the inlet side of Kansas-Nebraska's Casper Compressor Station a maximum volume of 51,000 Mcf daily of natural gas, all as more fully set forth in the application and supplements.

Kansas-Nebraska Natural Gas Company, Inc. (Kansas-Nebraska) filed in Docket No. CP64–315 on June 30, 1964, as amended on August 14, 1964, an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of facilities and the transportation of natural gas in interstate commerce, all as more fully set forth in the application and amendment thereto. The proposed facilities will enable Kansas-Nebraska tc receive increased volumes of natural gas from Northern Utilities, Inc., in central Wyoming.

Northern proposes in Docket No. CP64–313 to, (1) abandon by transfer from its interstate operations to intrastate operations approximately 44.9 miles of 10-inch pipeline and 52.62 miles of 12-inch pipeline between mileposts 0.0 and 97.5, (2) operate a 20-mile segment and a 14.4 mile segment of 16-inch existing pipeline between mileposts 0.0 and 20.0 and 55.0 and 69.4, respectively, by transferring the said pipeline segments from intrastate to said interstate service, (3) construct and operate 20 miles of 16-inch pipeline between mileposts 35.0 and 55.0, 5 miles of 16-inch pipeline between mileposts 69 and 74, and 15 miles of 20-inch pipeline between mileposts 84 and 99 and (4) install and operate a 500 Hp field compressor station.

The proposed transfers by Northern of pipeline from interstate to intrastate use, from intrastate to interstate use, and the construction and operation of pipeline as described above will provide Northern with a pipeline consisting of a 16-inch line from milepost 0 to 84, a 20-inch line from milepost 84 to 98, and a 12-inch line from milepost 98 to 106.5 for use as an interstate pipeline providing service for Kansas-Nebraska; and will in addition thereto provide Northern with two separate lines for intrastate service from San Draw to Casper.

The certificated volumes of gas to be transported for Kansas-Nebraska will be increased from 9,000,000 to 14,000,000 Mcf annually and from 26,000 to 51,000 Mcf for peak day service. The rate to be charged by Northern for the transportation service will be the currently effective rate of 7¢ per Mcf for the first 6,000,000 Mcf in each yearly period and 4.5¢ per Mcf for all volumes in excess thereof.

The estimated cost of facilities to be constructed and transferred by Northern is $1,494,047, which will be defrayed out of cash on hand or from that generated by operations.

Kansas-Nebraska proposes in Docket No. CP64–315 (1) to install and operate a 2,000 Hp compressor addition to its Casper, Wyoming, station and a 1,000 Hp compressor addition to its Northport, Nebraska, station and (2) to construct and operate approximately 66 miles of 16-inch pipeline between Douglas and Lingle, Wyoming, as a replacement of 41.5 miles of 12-inch and 24.5 miles of 10-inch Dresser coupled pipeline.

The estimated cost of facilities to be constructed by Kansas-Nebraska is $2,352,000, which will be financed from current working funds and interim bank loans.

The Commission issued temporary certificates for the proposed facilities to Kansas-Nebraska and Northern on August 21 and September 3, 1964, respectively.

After due notice, no petition to intervene, notice of intervention or protest to the granting of either of the applications, as supplemented and amended, has been filed.

At a hearing held on November 10, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the applications, supplements and amendment submitted in support of the authorizations sought herein, and upon consideration of the record finds and orders as hereinafter stated.

The Commission finds:

(1) Applicant, Northern Utilities, Inc., a Wyoming corporation having its principal place of business in Casper, Wyoming, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of December 20, 1962, in Docket No. CP63-74 (28 FPC 1082).

(2) Applicant, Kansas-Nebraska Natural Gas Company, Inc., a Kansas corporation having its principal place of business in Phillipsburg, Kansas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of April 6, 1943, in Docket No. G-259 (3 FPC 966).

(3) The facilities proposed to be abandoned by Northern, as hereinbefore described and as more fully described in the application and supplements filed in Docket No. CP64-313 are used in the transportation and sale of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and such abandonment is subject to the requirements of Subsection (b) of Section 7 of the Natural Gas Act.

(4) The proposed abandonment of the aforesaid facilities by Northern is permitted by the public convenience and necessity and permission and approval therefor should be granted as hereinafter ordered.

(5) The proposed construction and operation of facilities, and the transportation of natural gas in interstate commerce by Northern and Kansas-Nebraska as hereinbefore described and as more fully described in the applications, supplements and amendment thereto filed in Docket Nos. CP64-313 and CP64-315 are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(6) The aforesaid proposed construction and operation of facilities, and the transportation of natural gas in interstate commerce are required by the public convenience and necessity and certificates therefor should be issued as hereinafter ordered and conditioned.

(7) Northern and Kansas-Nebraska are able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder.

(8) Public convenience and necessity require that the certificates issued hereinafter and the rights granted thereunder be conditioned upon Northern's and Kansas-Nebraska's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3), (c)(4) and (e) of Section 157.20 of such Regulations.

The Commission orders:

(A) Permission for and approval of the abandonment by Northern of the facilities hereinbefore described, as more fully described in the application and supplements in Docket No. CP64-313 are hereby granted.

(B) Certificates of public convenience and necessity be and the same are hereby issued (1) to Northern in Docket No. CP64-313 authorizing the construction and operation of facilities and the transportation of natural gas for Kansas-Nebraska Natural Gas Company, Inc., as hereinbefore described, all as more

fully described in the application and supplements thereto filed in said Docket No. CP64-313, and (2) to Kansas-Nebraska Natural Gas Company, Inc., in Docket No. CP64-315 authorizing the construction and operation of facilities and the transportation of natural gas, all as more fully described in the application and amendment thereto filed in said Docket No. CP64-315.

(C) The certificates issued by paragraph (B) above and the rights granted thereunder are hereby conditioned upon Northern's and Kansas-Nebraska's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3), (c)(4) and (e) of Section 157.20 of such Regulations.

(D) Northern shall advise the Commission of the date of abandonment of the facilities as authorized in paragraph (A) above within ten days of such abandonment.

(E) The facilities hereby authorized in Docket Nos. CP64-313 and CP64-315 shall be completed and placed in actual operation, and the transportation of gas authorized in paragraph (B) above shall commence, as provided in paragraph (b) of Section 157.20 of the aforesaid Regulations within 12 months of the date on which this order issues.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

CITY OF TACOMA, WASHINGTON, PROJECT NO. 2016

ORDER FURTHER AMENDING LICENSE (MAJOR)

(Issued November 17, 1964)

Application was filed on April 13, 1964, under Section 6 of the Federal Power Act (Act) by City of Tacoma, Washington, for further amendment of its license for major Project No. 2016 situated on the Cowlitz River in Lewis County, Washington, and affecting lands of the United States within the Gifford Pinchot National Forest and other lands of the United States.

The Licensee seeks the amendment to authorize the following specifically-described changes and in additions to the project works of the unconstructed Mossyrock Development of the project as shown on certain revised exhibits filed as part of the application, the approval of which is also sought:

(1) an increase in the maximum normal elevation for Mossyrock Reservoir (Ira S. Davidson Lake) from elevation 750 to elevation 770 feet; (2) provision for the operation of Mossyrock Reservoir between elevation 770 and elevation 600 feet to permit a maximum drawdown of 170 feet for power purposes in lieu of the previously authorized operation between elevations 750 and 650 feet; (3) an increase in the presently authorized capacity of the Mossyrock power plant from an ultimate of four units having a total capacity of 412,000 horsepower to an initial installation of two units having a total of 412,000 horsepower, with provision for a future unit of 206,000 horsepower; (4) revision of Article 34 of the license to conform to the reservoir operation at the higher elevations; (5) approval of the changed project structures and layout in accordance with the revised Exhibit J and L filed with the application; (6) approval of revised Exhibits H, I, M and N filed with the application insofar as they pertain to the Mossyrock project; and (7) provision for a delay in the filing of Exhibit R, a recreational use plan, until one year after completion of the project.

According to the application, the changes sought are necessary and desirable for the following reasons: (1) further economic studies indicate that an increase in the maximum Mossyrock reservoir elevation from 750 to 770 feet and operations with a maximum 170 foot drawdown will result in obtaining the maximum annual benefits available at the project site; (2) the installation of two 150 MW generators instead of four 75 MW generators will result in lower costs for powerhouse facilities, switching, bus, relaying and control facilities, and lower costs per kva of installed capacity; and (3) the installation in the future of a third 150 MW generator will provide a source of relatively low cost power.

Commission staff studies and analyses of the proposed changes to the Mossyrock project show that the annual net benefits resulting from raising the pool as proposed is about $177,000.

The Department of the Army and the Chief of Engineers have reported that the proposed revision of Article 34 of the license, as sought in the application, is satisfactory, provided it is understood that the intention of the revised article is that the specified surcharge storage will be used without reservation whenever flood regulation requires its use.

The Department of Health, Education, and Welfare, in reporting on the application, advises of its concurrence in the comment made by the Washington State Pollution Control Commission which the Department quotes as follows: "The proposed amendment to increase the reservoir storage capacity will tend to improve the efficiency of river flow regulation and corresponding benefits to water quality will occur downstream". However, the Department adds that there is some possibility that the proposed modification may result in man-made habitats favorable for the production of mosquitoes, of public health importance.

The Department of the Interior, in reporting on the application, recommended for inclusion in any amendment of the license, certain conditions in the interests of fish and wildlife resources, recreation, public free access to project lands and waters, of minimizing soil erosion, and archeological surveys and salvage operations.

The Department of Agriculture, in reporting on the application, recommended for inclusion in any amendment of the license, certain conditions in the interests of the harvesting and preservation of forest products on national forest land within the project area and recreation. According to the Department, the Forest Service wishes to be included as a party to the studies affecting fish facilities and devices contemplated under Article 30 of the license. However, the studies were completed prior to the stated interest of the Forest Service.

As recited above, the application for amendment requests a delay of one year in filing a recreational use plan designated as Exhibit R. Where such an exhibit has not been filed with an application for license, we usually require in the license the filing of such within one year from the issuance date of the license. Completion of the Mossyrock project is currently scheduled for December 31, 1968. In view of the possibility of changes in recreational requirements during this period of time, we are herein requiring that a recreational use plan be filed no later than November 1, 1965.

The Commission finds:

(1) Public notice of the application has been given. No formal protests or petitions to intervene have been received.

(2) The authorized installed capacity of the project under this amendment is 560,000 horsepower, and the increased annual charges for reimbursing the United States for the costs of administration of Part I of the Act, based on such capacity, as hereinafter provided is reasonable.

(3) The following-described revised exhibits filed as part of the application or as supplement thereof, conform to the Commission's rules and regulations and should be approved as part of the license as amended:

Exhibit J: (FPC No. 2016–78 and –79);

Exhibit L: (FPC No. 2016–80, –81, and –84 through –89); and

Exhibit M: filed with the Commission on April 8, 1964.

(4) The following-described exhibits now part of the license and which have been superseded should be eliminated from the license:

Exhibit J: (FPC No. 2016–1 and –4);

Exhibit L: (FPC No. 2016–13 through –18); and

Exhibit M: filed June 20, 1949, insofar as it relates to the Mossyrock project.

The Commission orders:

(A) The revised exhibits described in finding (3) above are hereby approved as part of the license for Project No. 2016, and the exhibits described in finding (4) above are hereby eliminated from the license for the project.

(B) The license for Project No. 2016 is hereby further amended, effective as of November 1, 1964: (1) to authorize and include thereunder the changes to the Mossyrock project specifically described in the second paragraph of this order; (2) to include in the license the following revised subparagraphs (a), (d) and (e) of finding (63) of the license issued November 28, 1951, 10 FPC 432, for Project No. 2016; and (3) to include in the license the following revised and/or additional articles and to exclude from the license certain superseded articles; all of which are set forth as follows:

PARAGRAPH I. Subparagraphs (a), (d) and (e) of finding (63) of the license to read as follows:

(a) The Mossyrock Development will be located on the Cowlitz River at river mile 66 at the head of the Mayfield Reservoir, and will consist of a double curvature concrete arch dam founded on basalt bedrock with concrete thrust blocks near the top of each end; maximum dam height to the crest elevation of 785 feet MSL, (approximately 585 feet above bedrocks) has a crest length of 1,300 feet; spillway with sill elevation at 728.5 feet is surmounted by four 42.5 x 50 foot tainter gates. Normal reservoir water surface will be at elevation 770 feet providing a usable storage capacity of 1,297,000 acre-feet with a drawdown of 170 feet. A conventional indoor-type powerhouse located at toe of dam containing two 150,000 kilowatts generating units (412,000 horsepower); a third blocked-out unit monolith, provides for the addition of a third 150,000 KW unit; short penstocks from intakes on upstream face of dam to powerhouse; transformer station; switchyard designed for two initial and one future 230 KV circuits; single 230 KV transmission line 11.65 miles long to Mayfield and a 50.45 mile 230 KV line to Tacoma.

(d) All lands constituting the project area and enclosed by the project boundary or the limits of which are otherwise defined, and/or interest in such lands necessary or appropriate for the purposes of the project, whether such lands or interest therein are owned or held by the Licensee or by the United States; such project area and project boundary being more specifically shown and described by certain exhibits which formed part of the application for license or amendment thereof, and which are designated and described as follows:

Exhibit J: Drawings in two sheets, signed by Al A. Bradley, Chairman, Public Utilities Board, April 8, 1964, and approved by C. A. Erdahl, Director of Public Utilities, and comprising:

Sheet 1 (FPC No. 2016–78) "Location Map," and

Sheet 2 (FPC No. 2016–79) "General Project Map."

(e) The principal structures referred to above, the location, nature and character of which are more specifically shown by the exhibits hereinbefore cited and and by certain other exhibits which also formed part of the application for license and which are designated and described as follows:

Exhibit L	FPC Number	Title
Sheet 1	(2016-2)	Mayfield Dam, General Plan.
Sheet 3	(2016-76)	Arch and Thrust Blocks—Plan and Sections.
Sheet 4	(2016-77)	Cross Sections Thru Spillway.
Sheet 5	(2016-7)	Mayfield Powerhouse, Plans and Sections.
Sheet 6	(2016-8)	Mayfield Powerhouse and Intake, Typical Sections.
Sheet 7	(2016-9)	Mayfield. One Line Diagram.
Sheet 8	(2016-10)	Mayfield Switchyard, General Plan.
Sheet 15	(2016-71)	Mayfield Fish Facilities, General Plan—Functional Layout.
Sheet 16	(2016-72)	Mayfield Fish Facilities—Upstream Migrant System—Functional Layout.
Sheet 17	(2016-73)	Mayfield Fish Facilities-Upstream Migrant System-Functional Layout.
Sheet 18	(2016-74)	Mayfield Fish Facilities-Upstream Migrant System-Functional Layout.
Sheet 19	(2016-75)	Mayfield Fish Facilities-Downstream Migrant System-Functional Layout.
Sheet 1	(2016-80)	Mossyrock Dam, General Plan.
Sheet 2	(2016-81)	Mossyrock Dam, General Sections.
Sheet 5	(2016-84)	Mossyrock Powerhouse Plan Elevation 400.00.
Sheet 6	(2016-85)	Mossyrock Powerhouse Plan Elevation 433.00.
Sheet 7	(2016-86)	Mossyrock Powerhouse Plan Elevation 451.00.
Sheet 8	(2016-87)	Mossyrock Powerhouse Plan Elevation 470.00.
Sheet 9	(2016-88)	Mossyrock Powerhouse Transverse Section.
Sheet 10	(2016-89)	Mossyrock Powerhouse Longitudinal Section.

Exhibit M: A statement in four sheets entitled "General Description and General Specifications of Proposed Mechanical, Electrical and Transmission Equipment for the Project" and filed June 20, 1944 only insofar as it pertains to the Mayfield Development.

Exhibit M: A statement in three sheets entitled "General Description of Mechanical, Electrical and Transmission Equipment" dated April 8, 1964, and signed by C. A. Erdahl, Director, Department of Public Utilities, superseding Exhibit M filed June 20, 1949, insofar as it pertains to the Mossyrock Development.

PARAGRAPH II. Articles 4, 7, 13 and 14 of the license are hereby eliminated from the license.

PARAGRAPH III. Articles 32 and 34 of the license are hereby revised to read as follows:

Article 32. The Licensee shall pay to the United States the following annual charges:

(i) For the purpose of reimbursing the United States for the costs of administration of Part I of the Act, a reasonable annual charge in accordance with the provisions of Part II of the Commission's regulations as in effect from time to time. The authorized installed capacity, for such purpose is 560,000 horsepower.

(ii) The Licensee shall also pay to the United States such charges as may be specified hereafter for the purpose of recompensing the United States for the use, occupancy and enjoyment of its lands, including transmission line right-of-way.

Article 34. Licensee shall reserve adequate storage space in Mossyrock Reservoir for regulating Cowlitz River floods equal to or less than the magnitude of that of the 1933 flood to 70,000 cfs or less at Castle Rock, Washington. This storage space will be provided between elevation 778.5 and elevation 745.5. Storage space between elevation 778.5 and elevation 770 (normal full pool) amounting to 100,000 acre-feet, will be available the year round for flood regulation and will be used exclusively for that purpose and will be used without reservation whenever flood regulation requires its use. Below elevation 770 an additional 260,000 acre-feet of storage space will be reserved for flood regulation as follows:

(1) Beginning on October 17 the Mossyrock pool will be lowered from elevation 770 on a gradual uniform drawdown to elevation 745.5 on or before December 1;

(2) The maximum flood control storage reservation below elevation 770, 260,000 acre-feet will be held until February 1, except as use of storage space may be required for flood regulation; and

(3) After February 1 the reservoir may be gradually filled to elevation 770 on April 1.

Surcharge and/or flood control storage provided at Mayfield Reservoir, a storage project below Mossyrock Reservoir, may be substituted for an equal amount of storage at Mossyrock Reservoir so long as the two projects are coordinated to regulate floods at Castle Rock to 70,000 cfs or less.

Water stored in surcharge storage will be evacuated as fast as downstream channel conditions permit, preferably not to exceed a regulated flow of 50,000 cfs at Castle Rock. Should a 50,000 cfs flow at Castle Rock jeopardize the evacuation of the surcharge storage space, the Castle Rock regulated flow may be increased to the maximum of 70,000 cfs. When there is at least 100,000 acre-feet of storage space available for flood regulation which is the amount to be reserved as surcharge storage, further evacuation can be limited to releases through the power units so long as maximum use is made of this means of drawing the reservoirs down to their scheduled storage reservations as of that date for control of floods.

PARAGRAPH IV. The following articles, some of which are in lieu of the eliminated articles mentioned in PARAGRAPH II above and some of which are additional articles, are hereby included in the license for the project.

Article 37. The Licensee shall, for the conservation, and development of fish and wildlife resources, construct, maintain, and operate, or arrange for the construction, maintenance and operation of such facilities and comply with such reasonable modifications of the project structures and operation as may be ordered by the Commission upon its own motion or upon the recommendation of the Secretary of the Interior or the fish and wildlife agency or agencies of any State in which the project or a part thereof is located, after notice and opportunity for hearing and upon findings based on substantial evidence that such facilities and modifications are necessary and desirable, reasonably consistent with the primary purpose of the project, and consistent with the provisions of the Act.

Article 38. Whenever the United States shall desire, in connection with the project, to construct fish and wildlife facilities or to improve the existing fish and wildlife facilities at its own expense, the Licensee shall permit the United States or its designated agency to use, free of cost, such of Licensee's lands and interest in lands, reservoirs, waterways and project works as may be reasonably required to complete such facilities or such improvements thereof. In addition, after notice and opportunity for hearing, the Licensee shall modify the project operation

as may be prescribed by the Commission, reasonably consistent with the primary purpose of the project, in order to permit the maintenance and operation of the fish and wildlife facilities constructed or improved by the United States under the provisions of this article. This article shall not be interpreted to place any obligation on the United States to construct or improve fish and wildlife facilities or to relieve the Licensee of any obligation under this license.

Article 39. The Licensee shall construct, maintain and operate or shall arrange for the construction, maintenance and operation of such recreational facilities including modifications thereto, such as access roads, wharves, launching ramps, beaches, picnic and camping areas, sanitary facilities and utilities, as may be prescribed hereafter by the Commission during the term of this license upon its own motion or upon the recommendation of the Secretary of the Interior or other interested Federal and State agencies, after notice and opportunity for hearing and upon findings based upon substantial evidence that such facilities are necessary and desirable, and reasonably consistent with the primary purpose of the project.

Article 40. So far as is consistent with proper operation of the project, the Licensee shall allow the public free access, to a reasonable extent, to project waters and adjacent project lands owned by the Licensee for the purpose of full public utilization of such lands and waters for navigation and recreational purposes, including fish and hunting, and shall allow to a reasonable extent for such purposes the construction of access roads, wharves, landings, and other facilities on its lands the occupancy of which may in appropriate circumstances be subject to payment of rent to the Licensee in a reasonable amount: *Provided*, that the Licensee may reserve from public access, such portions of the project waters, adjacent lands, and project facilities as may be necessary for the protection of life, health, and property; and *Provided further*, that the Licensee's consent to the construction of access roads, wharves, landings, and other facilities shall not, without its express agreement, place upon the Licensee any obligation to construct or maintain such facilities. These facilities are in addition to the facilities that the Licensee may construct and maintain as required by the license.

Article 41. The Licensee shall be responsible for and shall minimize soil erosion and siltation on lands adjacent to the stream resulting from construction and operation of the project. The Commission upon request, or upon its own motion, may order the Licensee to construct and maintain such preventive works to accomplish this purpose and to revegetate exposed soil surface as the Commission may find to be necessary after notice and opportunity for, hearing.

Article 42. The Licensee shall notify the Department of Anthropology, University of Washington, of the construction which will inundate the land beneath Mossyrock Reservoir (Ira S. Davidson Lake), in order that the University may negotiate with the Licensee for the purpose of undertaking archeological surveys and salvage excavations to be financed by the Licensee in an amount not to exceed $10,000.

Article 43. In the interest of recreation, the Licensee shall maintain the Mossyrock Reservoir at such operating levels during the period June 1 to September 30 each year as the Commission may prescribe, after notice and opportunity for hearing, reasonably consistent with the primary purpose of the project. The Licensee's proposal with respect to operating levels of the Mossyrock Reservoir during such recreational season shall be submitted by the Licensee with its recreational use plan required by *Article 51* herein.

Article 44. The Licensee shall consult with the United States Army, Corps of Engineers District Office, within which district the project is located, for the purpose of complying with Federal regulations for transmission and other lines crossing navigable waters of the United States or for bridges, breakwaters,

causeways and other obstructions affecting navigation and shall submit to the Commission for approval, plans for all such crossings and obstructions affecting navigation and recreational use of project waters. These plans will show data pertinent to engineering features which are of public interest, including location and elevations of all such obstructions, and the length of span, minimum vertical clearance in feet and voltage, if applicable, of transmission or other lines.

Article 45. The Licensee shall, after consulting with the Department of Health, Education, and Welfare and the Washington State Department of Health to determine measures that may be necessary for the control of mosquito production, take such reasonable protective measures as may be required.

Article 46. The Licensee shall employ a board of consultants to review and report on the designs and specifications of the dam, suitability and treatment of rock foundation and abutments, treatment of reservoir to minimize leakage, design of a suitable spillway and associated means for preventing foundation and abutment erosion, and the design of the powerhouse structure and associated works.

Article 47. The Licensee shall submit a report based on model studies and analysis, demonstrating the suitability of the overflow spillway of the Mossyrock dam to spill 276,000 cfs without endangering the dam abutments or foundation, or the powerhouse, and to spill flows below 50,000 cfs with a minimum adverse effect on the operation of the powerhouse.

Article 48. The Licensee shall submit with its revised Exhibit L drawings, and prior to commencing construction of the Mossyrock dam, a report approved by its Board of Consultants for the Mossyrock Project covering the following items:

(1) Final criteria used in the design of the arch dam;

(2) Final stress analysis for the dam assuming: (a) maximum flood water conditions, and (b) normal water surface and maximum earthquake load conditions;

(3) The result of testing of the structural model of the dam;

(4) A review of the suitability of the rock abutments to carry the resulting loads imposed on them by the dam and thrust blocks employing rock mechanics and giving consideration to any faults or fractures found in the abutments; and

(5) A review of the proposed treatment of the reservoir in order to minimize leakage.

Article 49. The Licensee shall submit in accordance with the Commission's rules and regulations revised Exhibit L showing final designs of the project works and the Licensee shall not begin construction of the project structures until the Commission has approved such exhibits.

Article 50. The project, including its operation and maintenance and any work incident to additions or alterations authorized by the Commission whether or not conducted upon lands of the United States, shall be subject to the inspection and supervision of the Regional Engineer, Federal Power Commission, in the region wherein the project is located, or of such other officer or agent as the Commission may designate, who shall be the authorized representative of the Commission for such purposes. The Licensee shall cooperate fully with said representative and shall furnish him such information as he may require concerning the operation and maintenance of the project, and of any such alteration thereof, and shall notify him of the date upon which work with respect to any alteration will begin, and as far in advance thereof as said representative may reasonably specify, and shall notify him promptly in writing of any suspension of work for a period of more than one week, and of its resumption and completion. Licensee shall submit to said representative a detailed program of inspection by

the Licensee that will provide for an adequate and qualified inspection force for construction of any such alterations to the project. Construction of said alterations or any feature thereof shall not be initiated until the program of inspection for the alterations or any feature thereof has been approved by said representative. The Licensee shall allow said representative and other officers or employees of the United States, showing proper credentials, free and unrestricted access to, through, and across the project lands and project works in the performance of their official duties.

Article 51. The Licensee shall, no later than November 1, 1965, file with the Commission for approval its proposed recreational use plan for the project. The plan shall be prepared after consultation with appropriate Federal, State and local agencies, and shall include recreational improvements which may be provided by others in addition to the improvements the Licensee plans to provide.

Article 52. The Licensee shall pay for timber on lands of the United States cut, used and destroyed in the construction and maintenance of the project works, or in the clearing of said lands, and the resulting slash and debris disposed of in accordance with the requirement of the agency of the United States having jurisdiction over said lands. Payment for merchantable timber will be at current stumpage rates, and payment for young growth timber below merchantable size will be at current damage appraisal value. However, the agency of the United States having jurisdiction may sell or dispose of the merchantable timber to others than the licensee, with the provision that timber so sold or disposed of will be cut and removed from the area prior to or without interference with clearing operations of the licensee and in coordination with the project construction schedules. Such sale or disposal to others will not relieve the licensee of the responsibility for the clearing and disposing of all slash and debris from project lands.

Article 53. The Licensee shall do everything reasonably within its power and shall require its employees, contractors, and employees of contractors to do everything reasonably within their power, both independently and upon the request of officers of the agency concerned to prevent, make advance preparations for suppression, and suppress fires on the lands to be occupied or used under the license. The licensee shall be liable for and pay the costs incurred by the United States in suppressing fires caused from the construction, operation, or maintenance of the project works or of the work appurtenant or accessory thereto under the license.

Article 54. The Licensee shall, after notice and opportunity for hearing, coordinate the operation of the project, electrically and hydraulically, with such other power systems and in such manner as the Commission may direct in the interest of power navigation, flood control, recreation and other beneficial public uses of water resources, and on such conditions concerning the equitable sharing of benefits by the Licensee as the Commission may order.

(C) This amendment in the manner set out above shall not operate to alter or amend the license in any other respect, and shall not in any way constitute a waiver of any other part, provision or condition of the license.

(D) This order shall become final 30 days from the date of its issuance unless application for rehearing shall be filed as provided in Section 313 (a) of the Act, and failure to file such an application shall constitute acceptance of this license amendment. In acknowledgment of the acceptance of this license amendment, it shall be signed for the licensee and returned to the Commission within 60 days from the date of issuance of this order.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

GULF OIL CORPORATION, ET AL., DOCKET NO. CI64-25, ET AL.; GRAHAM B. MORRISON AND GLEN W. PRYOR, TRUSTEES, DOCKET NO. G-18884

ORDER DENYING MOTION FOR SEVERANCE AND REJECTING OFFER OF SETTLEMENT

(Issued November 18, 1964)*

On June 29, 1959, Mountain States Drilling Company (Mountain States) filed in Docket No. G-18884 an application for a certificate of public convenience and necessity pursuant to Section 7 of the Natural Gas Act, for authority to sell and deliver natural gas to Pacific Northwest Pipeline Corporation (now El Paso Natural Gas Company) and to construct any facilities necessary therefor, from acreage located in Sublette County, Wyoming at a proposed initial price of 18.5¢ per Mcf at 15.025 psia.

Temporary authorization to commence this sale was granted to Mountain States by letter dated August 12, 1959, containing a condition, among others, that Mountain States should refund any amount in excess of the amount resulting from the rate finally determined to be proper in Docket No. G-18884.

Two assignments of the property were executed by Mountain States to Graham B. Morrison and Glen W. Pryor, Trustees for Richard Stoll Shannon III, *et al.* (applicants) and the transfer became effective on January 1, 1964.

Accordingly, on February 19, 1964, applicants amended the application by filing a motion to be substituted for the predecessor, Mountain States.

Temporary authority to continue the sale was granted to applicants by letter dated April 24, 1964, containing the same refund condition. By letter dated April 24, 1964, the Commission advised Mountain States of their responsibility for any refunds for sales prior to the date of transfer of the property.

By order issued July 29, 1964, the above-docketed proceedings were consolidated and a hearing thereon was held on October 5, 1964, terminating on October 8, 1964.

In the interim, on September 29, 1964, applicants filed a motion for severance of Docket No. G-18884 from Docket No. CI64-25, *et al.*, and an offer of settlement. The applicants agreed therein to accept a certificate of public convenience and necessity containing a condition that the initial rate should not exceed 15.384¢ per Mcf at 15.025 psia. The offer further stated that applicants agreed to accept this condition assuming that refunds would be required to be made for any amounts collected in excess of 15.384¢ per Mcf during the period subsequent to December 1, 1962.

Applicants' determination of the period for which refunds should be made is predicated on a refund period found proper in the disposition of a proceeding involving Section 4(e) of the Act (Docket No. G-16710), whereas we are here concerned with an application for a certificate of public convenience and necessity filed pursuant to Section 7(c) of the Act, and a refund-conditioned temporary authorization.

Acceptance of the offer of settlement as proposed would leave unresolved not only the matter of refunds prior to December 1, 1962, but also the question of refunds prior to the date of acquisition. The applicants have not indicated that they are assuming the refund obligation of Mountain States for the period

*Reconsideration denied by order issued January 26, 1965, 33 FPC 106.

of December 1, 1962, to January 1, 1964, nor do they state that their predecessor in interest is willing to make such refunds.

The Commission finds:

The public interest would not be served by acceptance of the offer of settlement as proposed.

The Commission orders:

The motion for severance filed by applicants in Docket No. G–18884 is hereby denied and the offer of settlement filed therewith is hereby rejected.

Before Commissioners: David S. Black, Acting Chairman; L. J. O'Connor, Jr. and Charles R. Ross.

UNION OIL COMPANY OF CALIFORNIA, DOCKET NOS. G–16602, G–17673, G–17682, G–17705, G–19609, G–20287, RI61–80, RI62–43, RI63–117 AND RI64–238

ORDER CONDITIONALLY APPROVING OFFER OF SETTLEMENT, SEVERING AND TERMINATING PROCEEDINGS, AND PRESCRIBING REFUNDS

(Issued November 18, 1964)

On September 23, 1964, Union Oil Company of California (Union) submitted an offer of settlement[1] in the above-captioned proceedings seeking to resolve the dispute with its pipeline purchaser[2] as to the amount of Louisiana gas severance tax reimbursement contractually authorized for the jurisdictional sale involved. Each of the suspension proceedings involve the question of the amount of tax reimbursement to which Union is entitled under its contracts. In the offer of settlement, Union proposes to refund the amount of money collected in excess of the amount considered contractually authorized by the purchaser, together with interest at the rate of 6 percent per annum.

The pertinent aspects of Union's offers of settlement are as follows:

Docket No.	Rate Sch.	Supp. No.	Questionable Tax Reimb.	Settlement Tax Reimb.	Settlement Refund Per.	Approx. Refund Excl. of Int.
			Cents	*Cents*		
G–17673	7	5	1.75	1.5	1/30/59 to 4/1/63	$6,850
G–17682 *et al*	12	4	1.75	1.5	12/1/58 to date [3]	30,600
G–17705 [4]	13	4	1.875	1.75	12/1/58 to date [3]	166,550
G–20287	40	1	2.05	1.8	12/29/59 to date [3]	72,400

[1] The offer of settlement is contained in separate motions in Docket Nos. G–17673, G–17682, G–17705 and G–20287 seeking approval of refunds, termination of the proceeding and other relief, together with an agreement with the purchaser setting the proper amount of tax reimbursement.

[2] The purchasers are as follows: Tennessee Gas Transmission Company in Docket No. G–17673; United Fuel Gas Company in Docket No. G–17682; Texas Gas Transmission Corporation in Docket No. G–17705; and Trunkline Gas Company in Docket No. G–20287.

[3] Date of issuance of this order.

[4] Docket No. G–17705 has been consolidated in the South Louisiana Area Rate Proceeding, Docket No. AR61–2, *et al.*

Under its FPC Gas Rate Schedule No. 12, Union has also filed for increased rates which reflect increases in the base rate and include the questionable 1.75 cents per Mcf tax reimbursement. These rates have been placed in effect subject to refund in Docket Nos. G–16602, G–19609, RI61–80, RI62–43, RI63–117 and RI64–238. Union is now proposing to reduce only the tax reimbursement component of these increased rates. Accordingly, we desire to make it clear that our approval of the instant settlement and the refunds relating thereto is without prejudice to the Commission's determination of the justness and reasonableness of the increased rates involved in these proceedings, together with any refund obligations relating thereto.

By order of the Commission issued December 23, 1959 in Docket No. G–20287, Union's FPC Gas Rate Schedule No. 40 and Supplement No. 1 thereto were conditionally accepted for filing subject to rejection thereof if it were determined after hearing that the tax reimbursement component was inconsistent with the contract tax reimbursement provisions. In view of our approval of the settlement proposal, we shall terminate the condition to the acceptance of Supplement No. 1 to Union's FPC Gas Rate Schedule No. 40 imposed in Docket No. G–20287.

In accordance with our action in the recent Humble Oil & Refining Company settlement[5] proceedings we shall require Union to retain the amounts of refund ordered herein until further order directing the nature of their disposition and also to submit within 45 days of this order to the Commission and each customer a detailed report setting out, by purchasers the amount of refund related to each rate schedule, the volume of gas sold thereunder and the period covered. We shall also by separate action direct each of the pipeline purchasers within ten days from the receipt of such report to submit a report of their own setting forth whether they intend to pass on all or part of such refund amounts to their customers and the names of such customers and amounts of refund each would receive, or, if they claim the right to retain any portion of the refunds, a brief statement as to the legal or equitable basis for such claim. In the event such reports indicate that the refunds will flow through to ultimate consumers or distribution companies not subject to the Commission's jurisdiction, the Commission will authorize the release of such refund sums by Union, (unless a state regulatory authority after notification of the sum to be made available to a company subject to its regulatory jurisdiction asks us to defer releasing the funds until it can determine their ultimate disposition). In the event a pipeline purchaser from Union (or a pipeline customer of such a pipeline) indicates that it is asserting a claim to retain substantial refund sums the Commission will by further order prescribe the procedure for determining the relative rights to such funds of such pipeline or its customers.

Union may elect at its option to either use these funds in its business and pay 6 percent interest thereon or to deposit such funds in a special escrow account.

Our action herein should not be construed as constituting approval of any future rate increases that may be filed under the subject rate schedules, and is without prejudice to any findings or order of the Commission in any future proceedings, including area rate or other similar proceedings, involving Union's rates and rate schedules.

The Commission finds:

The proposed settlement of the above-captioned proceedings on the basis described herein, as more fully set forth in the offer of settlement filed with the Commission by Union on September 23, 1964, is in the public interest and ap-

[5] Order issued July 8, 1964 in Docket No. G–9287, *et al.*, 32 FPC 49.

propriate to carry out the provisions of the Natural Gas Act and should be approved and made effective as hereinafter ordered.

The Commission orders:

(A) The settlement of these proceedings on the basis of the settlement proposal as herein conditioned filed by Union on September 23, 1964, is approved and made effective subject to the terms and conditions herein.

(B) Union shall file within 30 days of the issuance of this order a notice of change in rate to its Rate Schedule No. 7 reflecting a tax reimbursement rate of 1.5 cents per Mcf for the period from January 30, 1959 to April 1, 1963.

(C) Union shall file within 30 days of the issuance of this order a notice of change in rate to its Rate Schedule No. 12 reflecting a tax reimbursement rate of 1.5 cents per Mcf. Such notice of change shall be effective as of the date of this order, subject to further refund in Docket No. RI64–238.

(D) Union shall file notices of change in rates to its Rate Schedule Nos. 13 and 40 reflecting tax reimbursement rates of 1.75 cents per Mcf and 1.8 cents per Mcf, respectively, to be effective as of the date of this order.

(E) Union shall compute the difference between the rates collected subject to refund in the above entitled proceedings and the related settlement rates in the above-entitled proceedings, together with interest at 6 percent per annum. Union shall within 45 days from the date of this order submit a report to the Commission, and serve a copy on each of the purchasers involved, setting out by purchasers the amount of refunds related to each rate schedule (showing separately the principal and applicable interest), and the bases used for such determination and the periods covered.

(F) Union shall retain the amounts shown in the report required under paragraph (E) above, subject to further order of the Commission directing the disposition of those amounts.

(G) If Union elects to commingle these retained refunds with its general assets and use them for its corporate purposes, it shall pay interest thereon at the rate of 6% per annum on all funds thus available from the date of this order, to the date on which they are paid over to the person ultimately determined to be entitled thereto in a final order of the Commission.

(H) If Union elects to deposit the retained refunds in a special escrow account, Union shall tender for filing within 45 days from the date of issuance of this order, an executed Escrow Agreement, conditioned as set out below accompanied by certificate showing service of a copy thereof upon each of its jurisdictional customers involved. Unless notified to the contrary by the Secretary within 30 days from the date of filing thereof, the Escrow Agreement shall be deemed to be satisfactory and to have been accepted for filing. The Escrow Agreement shall be entered into between Union and any bank or trust company used as a depositor for funds of the United States Government and the agreement shall be conditioned as follows:

(1) Union, the bank or trust company, and the successors and assigns of each, shall be held and formally bound unto the Federal Power Commission for the use and benefit of those entitled thereto, with respect to all amounts and the interest thereon deposited in a special escrow account, subject to such Agreement, and such bank or trust company shall be bound to pay over to such person or persons as may be identified and designated by final order of the Commission and in such manner as may be therein specified, all or any portion of such deposits and the interest thereon.

(2) The bank or trust company may invest and reinvest such deposits in any short-term indebtedness of the United States or any agency thereof or in any

form of obligation guaranteed by the United States which is, respectively, payable within 120 days as the said bank or trust company in the exercise of its sound discretion may select.

(3) Such bank or trust company shall be liable only for such interest as the invested funds described in Paragraph (2) above will earn and no other interest may be collected from it.

(4) Such bank or trust company shall be entitled to such compensation as is fair, reasonable and customary for its services as such, which compensation shall be paid out of the escrow account to such bank or trust company. Said bank or trust company shall likewise be entitled to reimbursement for its reasonable expenses necessarily incurred in the administration of this escrow account, which reimbursement shall be made out of the escrow account.

(5) Such bank or trust company shall report to the Secretary quarterly, certifying the amount deposited in the trust account for the quarterly period.

(I) Upon full compliance by Union with all the terms and provisions of this order, the proceeding in Docket No. G–17705 shall be severed from the consolidated proceedings in Docket No. AR61–2, *et al.*, and the proceedings in Docket Nos. G–17673, G–17682, G–17705 and G–20287 shall terminate.

(J) The acceptance by the Commission of Union's offer of settlement is without prejudice to any findings or determinations that may be made in any proceeding now pending, or hereafter instituted by or against Union, including area rate or other similar proceedings. The Commission's action herein is also without prejudice to the determination of the justness and reasonableness of the increased rates involved in Docket Nos. G–16602, G–19609, RI61–80, RI62–43, RI63–117, and RI64–238 and any further refund obligations relating thereto.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

DORCHESTER GAS PRODUCING COMPANY, DOCKET NOS. RI64–749, G–18671 AND RI60–11

ORDER DENYING REQUEST FOR INVESTIGATION UNDER SECTION 5(a) OF THE NATURAL GAS ACT

(Issued November 19, 1964)*

Dorchester Gas Producing Company (Dorchester) on May 20, 1964, filed a petition requesting the Commission to issue on its own motion pursuant to Section 5(a) of the Natural Gas Act an order instituting an investigation to determine the justness and reasonableness of all of Dorchester's jurisdictional rates, including those involved in suspension proceedings in Docket Nos. G–18671 and RI60–11.

Dorchester sells approximately 28 million Mcf annually under seven rate schedules on file with this Commission. Of these seven rate schedules, Dorchester's sales under its Rate Schedule Nos. 1 (RR. Dist. No. 10) and 2 (Oklahoma Panhandle) to Northern Natural and Natural Gas Pipeline, respectively, are the most important. Dorchester sells approximately 12 million Mcf of gas annually under each of these two rate schedules. A 17.598¢ per Mcf rate under Rate Schedule No. 1 is in effect subject to refund in Docket No. G–18671. The underlying rate in that docket is 8¢. The rate increase involves about $1 mil-

---

*Order issued January 19, 1965 denying reconsideration, 33 FPC 88. Affirmed, *Dorchester Gas Producing Co. v F.P.C.*, 353 F. 2d 162 (1965); cert denied, 383 U.S. 969 (1966).

lion per year. The sale under Rate Schedule No. 2 is being made at the contract rate of 7.1463¢ per Mcf, the rate provided for the remaining term of the contract, which is for the life of the field. All of Dorchester's rate schedules are involved in area rate proceedings with the exception of Rate Schedule No. 5. Rate Schedule Nos. 1, 2, 4, 6 and 7 are in Docket No. AR64–1, the Hugoton-Anadarko proceeding. Rate Schedule No. 3 is in Docket No. AR61–1, the Permian proceeding.

In support of its petition, Dorchester states that its average unit revenues for all of its jurisdictional sales in 1963 was 12.3113¢ per Mcf, inclusive of revenues collected subject to refund in Docket Nos. G–18671 and RI60–11. Dorchester claims that its cost of service for all of its jurisdictional sales approximated 18¢ per Mcf, including 10 percent return, utilizing cost principles announced by the Commission in decided producer cases.

The principal fact contributing to the alleged deficiency in revenues, according to Dorchester, is the claimed unreasonably low contract rate of 7.1463¢ per Mcf which is presently in effect for Dorchester's sale to Natural Gas Pipeline Company of America (Natural) under its FPC Gas Rate Schedule No. 2. Dorchester indicates that the pipeline purchaser under the above contract has declined to increase the contract price, and that under the *Mobile* decision[1] Dorchester is barred from unilaterally filing for a rate increase.

Dorchester further states that it is able to continue operation of the properties relating to its FPC Gas Rate Schedule Nos. 1, 2 and 3 only because of the forebearance of the holders of its mortgage debt on such properties. The leases relating to gas production from these rate schedules were acquired in 1954, subject to a retained production payment of $35 million payable from 96.5% of the production from such properties. The mortgage debt is in arrears as of January 1, 1964, as to principal payments in the aggregate amount of $12,116,668.30 and as to interest in the aggregate amount of $521,170.99.

In addition to the claimed unreasonably low rate of 7.1463¢ per Mcf for the sale to Natural Gas Pipeline, Dorchester blames its financial difficulties on the fact that it cannot use those amounts collected subject to refund in Docket Nos. G–18671 and RI60–11 because it is required to place those amounts in a trust fund pursuant to Commission order. As of May 1, 1964, the amount in trust totals $5,130,470.01 in Docket No. G–18671 and $163,044.20 in Docket No. RI60–11. Dorchester also states that its financial burden is becoming more acute because of increasing costs related to their need to fracture wells in certain areas, the necessity for heavy capital expenditures for field compression starting not later than mid-1966, and maintenance of their existing gathering system.

In summary, Dorchester claims it is essential for it to obtain promptly a determination from this Commission concerning the justness and reasonableness of the rates under its FPC Gas Rate Schedule Nos. 1, 2 and 3. Dorchester cites the U.S. Supreme Court decision in *F.P.C.* v. *Sierra Pacific Power Co.*, 350 U.S. 348 in support of its position that the Commission has the necessary power under Section 5(a) of the Act to grant it relief. Dorchester asserts that it cannot wait for a determination of the justness and reasonableness of its rates in an area proceeding.

We do not reach the question posed here by Dorchester as to whether or not Dorchester comes within the test laid down by the Court in *Sierra* for relief under Section 5(a) for the reasons set forth below.

As previously indicated, the suspension proceedings in Docket Nos. G–18671 and RI60–11 are involved in the Hugoton-Anadarko area proceeding in Docket

[1] *United Gas Pipe Line Company* v. *Mobile Gas Service Corporation*, 350 U.S. 332.

No. AR64–1. Similarly, Dorchester's Rate Schedule No. 2 is also involved in the Section 5(a) aspects of that area proceeding. Dorchester's two important sales (Rate Schedule Nos. 1 and 2) are thus involved in Docket No. AR64–1. Even if the Commission were to institute a separate investigation under Section 5(a) into Dorchester's sale to Natural, Dorchester would not receive any relief until the Section 5(a) investigation was completed and a Commission order issued. Moreover, any action taken by the Commission under Section 5(a) in a separate investigation would be applicable only until such time as the Commission renders a decision in Docket No. AR64–1.

We think, however, that because of the peculiar facts of this case we should attempt to give Dorchester some relief in connection with its suspension proceedings. One of Dorchester's problems with respect to its suspended rates is that it needs the use of the substantial sums now held in trust. Since the mortgage companies will be the primary beneficiaries if the monies now held in trust are released, we would be willing to accept an agreement and undertaking from the mortgage companies (two New York insurance companies) assuring the refund of any excess charges in these proceedings in lieu of the presently required trust agreement.

In the alternative, we shall permit Dorchester to file an agreement and undertaking to assure refund of excess charges in place of the present trust arrangement for those amounts collected in Docket No. G–18671 between 8¢ and 11¢ per Mcf, for sales under its Rate Schedule No. 1. The effect of this would be that the undertaking would cover for both the past period and the future those amounts collected from 8¢ to 11¢ per Mcf, but Dorchester would continue to use the trust arrangement for those amounts collected from 11¢ to 17.598¢ per Mcf. In this way, Dorchester would be permitted to remove some $1.5 million from the present trust fund, and in the future would be able to use in its business an additional $360,000 per year.

The Commission orders:

For the reasons set forth above, Dorchester's petition for an investigation under Section 5(a) of the Act is hereby denied.

[LETTER REJECTING APPLICATION FOR CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY AND RELATED RATE SCHEDULE]

NOVEMBER 19, 1964.*

Docket No. CI65–427
Sun Oil Company

SUN OIL COMPANY
1608 Walnut St., Philadelphia, Penn., 19103.

Attention: C. E. Webber, Director of Natural Gas Administration

GENTLEMEN: Your filing of an application for certificate of public convenience and necessity in the above-captioned docket, together with the proposed related rate schedule, is hereby rejected in accordance with Sections 154.93, 154.100 and 157.25 of the Commission's regulations, because the contract dated April 30, 1964, between Magna Management Company and Lone Star Gas Company ratified by your company contains pricing provisions in conflict with Section 154.93 of the

*Rehearing denied by order issued January 18, 1965, 33 FPC 84. Affirmed, *Sun Oil Co. v F.P.C.*, 353 F. 2d 86 (1965).

regulations. More specifically, the provisions of Article XVIII of the contract are in conflict with subsection 154.93(c) of said regulations. One copy of the submittal is returned herewith. The other copies are being retained in the Commission's files for informational purposes.

This rejection is without prejudice to the submittal, in conformity with the Commission's rules and regulations, of three copies of a proposed rate schedule which does not contain the prohibited pricing provisions and an original and seven copies of a related certificate applications.

Very truly yours,

Secretary.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

AREA RATE PROCEEDING, DOCKET NO. AR61-1; CLAUDE E. AIKMAN, ET AL., DOCKET NO. G-18466, ET AL.; NORTH CENTRAL OIL CORPORATION (OPERATOR), ET AL., DOCKET NO. CI60-435, ET AL.

ORDER DENYING APPLICATION FOR REHEARING AND MOTION FOR RECONSIDERATION

(Issued November 20, 1964)

The initial decision and proposed order of the presiding examiner in this proceeding was issued September 17, 1964. By order issued September 25, 1964, the Commission on its own motion extended to November 23, 1964, the time for filing exceptions to said initial decision and proposed order, extended to December 24, 1964, the time for filing replies to exceptions, and set the opening date for oral argument at January 12, 1965. By order issued October 20, 1964, 32 FPC 1143, the Commission on motion by a number of producers further extended the time for filing replies to exceptions to January 15, 1965, and delayed oral argument until February 8,1965. By order issued October 26, 1964, 32 FPC 1181, the Commission denied motions by a number of producers that the presiding examiner be directed to clarify his initial decision, and that further proceedings before the Commission be deferred until after this had been done.

On November 6, 1964, ten producers filed an application for rehearing and motion for reconsideration of our October 26 order. On November 9, four more producers joined the application and motion. Their request is threefold. First, they urge us to declare effective the errata and clarification notices issued *sua sponte* by the presiding examiner on October 23, 26, and 29. The errata and clarification notices are obviously lawful. Second, petitioners repeat the requests of October 13 and 14 that we direct the presiding examiner to clarify his opinion. Applicants' request was fully considered prior to our order of October 26. For this reason, plus the additional one that the *sua sponte* orders have clarified several of the asserted ambiguities, their request is denied. Third, applicants urge that we extend the due date for the filing of briefs on exceptions to thirty days after the issuance of either an examiner's clarification order or the instant order. No good cause has been shown for granting this request, and, accordingly, it will be denied.

The Commission finds:

No new facts or principles of law have been presented by applicants in their application for rehearing and motion for reconsideration which either were not

fully considered by the Commission prior to its order issued October 26, 1964, or, having now been considered, warrant further hearing, modification, reconsideration or revocation of said order except as hereinafter stated.

The Commission orders:

The application for rehearing and motion for reconsideration, and for additional relief, filed herein by Humble Oil & Refining Company, Continental Oil Company, Gulf Oil Corporation, Warren Petroleum Company, Pan American Petroleum Corporation, Phillips Petroleum Company, The Pure Oil Company, Shell Oil Company, Socony Mobil Oil Company, Inc., and Texaco Inc. November 6, 1964, and joined in by The Atlantic Refining Company, The British-American Oil Producing Company, Southland Royalty Company and Westates Petroleum Company November 9, 1964, be, and the same hereby is denied.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

CITY OF CRAWFORDVILLE, GEORGIA, DOCKET NO. CP65-44

FINDINGS AND ORDER DIRECTING PHYSICAL CONNECTION OF FACILITIES AND SALE OF NATURAL GAS

(Issued November 20, 1964)

On August 11, 1964, the City of Crawfordville, Georgia (Applicant) filed in Docket No. CP65-44 an application pursuant to Section 7(a) of the Natural Gas Act for an order of the Commission directing Transcontinental Gas Pipe Line Corporation (Transco) to sell and deliver to the Applicant up to 356 Mcf of natural gas per day, on peak days and 28,752 Mcf on an annual basis during and after the third year of service. Delivery of the natural gas by Transco is to be made through the existing interconnection of its facilities with those of Union Point and Greensboro, Georgia, at a point north of Colbert, Georgia, Union Point and Greensboro will transport such gas for the account of Applicant from the above interconnection southward approximately 36 miles through their existing facilities and deliver said gas to Applicant at its proposed point of receipt just north of Union Point.

Applicant proposes to construct and operate approximately 12 miles of 2.5-inch pipeline extending from the point of connection with the Union Point-Greensboro lateral to Crawfordville and to construct a gas distribution system in the City of Crawfordville at an estimated cost of $170,000, which is to be financed by the sale of 30 year revenue bonds. A qualified purchaser has expressed a willingness to purchase said bonds.

Applicant states that it has made legal arrangements with the owners of the transmission lateral line for a stated annual consideration to receive the natural gas from Transco for Applicant's account and to transport it to the point of connection of their respective facilities near Union Point.

On September 17, 1964, Transco filed its answer to the application herein stating that it has no objection to the order requested for the rendition of service to Applicant.

Due notice of the filing of the application and opportunity for hearing thereon has been given by publication in the Federal Register on October 30, 1964, (29 F.R. 14804). No protest or petition to intervene in opposition to the granting of the application has been filed in this proceeding.

The Commission finds:

(1) Transcontinental Gas Pipe Line Corporation, a Delaware corporation with its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of November 23, 1948, in Docket No. G–1143 (7 FPC 145).

(2) Applicant, City of Crawfordville, is a municipality organized under the laws of the State of Georgia and authorized to construct and to operate the distribution system proposed.

(3) It is necessary and desirable in the public interest to direct Transcontinental Gas Pipe Line Corporation to sell and deliver natural gas through the facilities of the Cities of Greensboro and Union Point, as hereinbefore described, to the Applicant to supply its daily and annual requirements as hereinbefore set forth and as hereinafter ordered and conditioned.

(4) This order should be conditioned upon Applicant's being prepared to receive gas from Transco, as proposed, within one year from the date of this order.

(5) The requirement that Transco serve the Applicant, as proposed, will not place any undue burden upon Transco nor impair its ability to render adequate service to its existing customers.

The Commission orders:

(A) Transcontinental Gas Pipe Line Corporation be and hereby is directed to use the established physical connection of its transmission facilities with the facilities of the Cities of Union Point and Greensboro, Georgia, for sale and delivery of natural gas to the Applicant for resale to consumers by Applicant through facilities proposed to be constructed and operated as hereinbefore described. The volume of gas to be sold and delivered as aforesaid not to exceed the daily and annual amount heretofore stated.

(B) Applicant shall execute a service agreement with Transco in accordance with the rules and regulations of the Commission and Applicant shall also be prepared to receive natural gas from Transco within one year from the date of this order.

(C) Transco shall report to the Commission in writing the date of commencement of service to Applicant within ten days thereof.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

ROY M. HUFFINGTON, INC., ET AL., DOCKET NO. RI63–478

ORDER DENYING OFFER OF SETTLEMENT, AND DENYING MOTION TO TERMINATE PROCEEDINGS

(Issued November 20, 1964)

On September 28, 1964, Roy M. Huffington, Inc., *et al.* (Huffington) filed an offer of settlement and motion to terminate the above-docketed proceeding. The offer and motion relates to a proposed increased rate of 22.8¢ per Mcf for natural gas sold to United Gas Pipe Line Company (United) from the Hayes Field, Calcasieu Parish, Louisiana, which was suspended in Docket No. RI63-478 and thereafter placed in effect subject to refund as of December 26, 1963. Huffington proposes to amend its contract with United to provide for a rate of 20.625¢ per Mcf for the period ending on July 1, 1967, or the date of the conclusion of the South Louisiana Area Rate Proceeding, AR61–2, whichever is earlier. For the first five years after such period, Huffington proposes to charge whatever

applicable rate may be determined to be proper by the Commission in said Area Rate Proceeding. Thereafter, the proposed amendment would provide for 1¢ per Mcf escalation at five year intervals for the remaining term of its contract with United. Additionally, Huffington proposes to amend its contract to eliminate a price redetermination clause effective as of January 1, 1968.

Oppositions to Huffington's proposal were timely filed by United, Long Island Lighting Company and the Philadelphia Gas Works.

We recognize that we have approved producer settlements at the same rate Huffington proposes herein prior to the issuance of our Opinion No. 436,[1] when such settlements were proposed by other parties to those consolidated proceedings. However, in Opinion No. 436[1] we granted Huffington a certificate at an initial rate of 18.8¢ per Mcf, the contractually authorized initial rate. In no instance have we approved a settlement rate of 20.625¢ per Mcf proposed by any producer in the *Union Texas* proceedings where the proposed initial rate did not exceed that amount. Moreover, we have never approved a proposed settlement rate in excess of the initial rate or the applicable increased rate ceiling except under special or unusual circumstances surrounding the particular sale. No such circumstances are set forth by Huffington herein. Consequently, we cannot approve the instant proposal.

The Commission finds:

It is necessary and proper in carrying out the provisions of the Natural Gas Act and the Regulations thereunder to deny the offer of settlement and to deny the motion to terminate filed by Huffington with the Commission on September 28, 1964.

The Commission orders:

The offer of settlement and the motion to terminate filed by Huffington in this proceeding on September 28, 1964, are hereby denied.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

NORTHERN NATURAL GAS COMPANY, DOCKET NO. CP65-17

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY AND PERMITTING AND APPROVING ABANDONMENT OF FACILITIES

(Issued November 20, 1964)

On July 15, 1964, as supplemented on August 3, 1964, Northern Natural Gas Company (Applicant) filed in Docket No. CP65-17 an application pursuant to Sections 7(b) and 7(c) of the Natural Gas Act for permission and approval to abandon certain facilities and for a certificate of public convenience and necessity authorizing the construction and operation of certain facilities, all in Cherokee County, Iowa, as more fully set forth in the application, as supplemented.

Specifically, Applicant seeks permission and approval to abandon two separate sections of its 8-inch Storm Lake, Iowa, line totaling approximately 0.3 mile. A total of 80 feet of the abandoned line will be removed for tie-in purposes; the remainder will be abandoned in place.

---

[1] Opinion and Order issued July 23, 1964, in *Union Texas Petroleum, et al.*, Docket No. G-13221, *et al.*, 32 FPC 254.

Applicant further seeks authorization to construct and operate two separate sections of 8-inch pipeline totaling approximately 0.54 mile, replacing the portions removed. The abandonment and replacement are required by the location of a sewage treatment plant over and across portions of the Storm Lake line.

Applicant further seeks authorization to construct and operate a measuring and regulating station for the establishment of a new delivery point in Cherokee County, Iowa, for Iowa Electric Light & Power Company (Iowa Electric) to deliver firm and interruptible volumes of gas to Iowa Electric for resale to Wilson and Company, Inc. (Wilson) for their proposed hog and beef slaughter plant. Applicant proposes to deliver 50 Mcf per day on a firm basis, and 360,000 Mcf annually on an interruptible basis. The interruptible gas is subject to curtailment in accordance with the provisions of Applicant's Rate Schedule R–2 of its FPC Gas Tariff Revised Volume No. 1.

The City of Cherokee, Iowa (Cherokee) and Applicant have entered into an agreement, dated July 29, 1964, whereby Cherokee will reimburse Applicant for the entire cost of abandonment and relocation, which cost is estimated to be $18,570.

Iowa Electric will reimburse Applicant the entire cost of installing the measuring and regulating station and appurtenances, which cost is estimated to be $17,850.

A temporary certificate was issued to Applicant by Commission letter dated September 15, 1964, authorizing relocation of the portions of the 8-inch Storm Lake, Iowa, line hereinbefore described.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on November 19, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits submitted in support thereof, and upon consideration of the record,

The Commission finds:

(1) Applicant, Northern Natural Gas Company, a Delaware corporation having its principal place of business in Omaha, Nebraska, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of April 6, 1943, in Docket No. G–280 (3 FPC 967).

(2) The facilities proposed to be constructed as hereinbefore described, as more fully described in the application in this proceeding, are to be used in the transportation and delivery of natural gas in interstate commerce for resale, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity, and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3), (c)(4) and (e) of Section 157.20 of such Regulations.

(6) Firm deliveries of natural gas by Applicant made through Iowa Electric Light & Power Company for resale to Wilson and Company, Inc. should be allowed up to 50 Mcf per day.

(7) The facilities proposed to be abandoned, as hereinbefore described and as more fully described in the application in this proceeding, are subject to the jurisdiction of the Commission and the abandonment thereof by Applicant is subject to the provisions of Subsection (b) of Section 7 of the Natural Gas Act.

(8) The proposed abandonment by Applicant is permitted by the public convenience and necessity and should be approved as hereinafter ordered.

The Commission orders:

(A) A certificate of public convenience and necessity be and the same is hereby issued authorizing Applicant, Northern Natural Gas Company, to construct and operate facilities and to deliver natural gas in interstate commerce as hereinbefore described, all as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(4) and (e) of Section 157.20 of such Regulations.

(C) The facilities hereby authorized shall be completed and placed in actual operation as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within 4 months from the date on which this order issues.

(D) Firm deliveries of natural gas by Applicant made through Iowa Electric Light & Power Company for resale to Wilson and Company, Inc. shall be allowed up to 50 Mcf per day.

(E) Permission for and approval of the abandonment by Applicant, Northern Natural Gas Company, of the facilities hereinbefore described be and the same are hereby granted.

(F) Applicant shall advise the Commission of the date of abandonment of said facilities within 10 days thereof.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

ST. JOSEPH LIGHT & POWER COMPANY, DOCKET NO. CP65-50

FINDINGS AND ORDER DIRECTING PHYSICAL CONNECTION OF FACILITIES AND SALE OF NATURAL GAS

(Issued November 20, 1964)

On August 19, 1964, as supplemented on October 12, 1964, St. Joseph Light & Power Company (Applicant) filed in Docket No. CP65-50 an application pursuant to Section 7(a) of the Natural Gas Act for an order of the Commission directing Michigan Wisconsin Pipe Line Company (Michigan Wisconsin) to establish physical connection of its natural gas transmission facilities with the facilities proposed to be constructed by Applicant, and to sell and deliver natural gas to Applicant for distribution and resale in the City of Graham, Missouri, all as more fully set forth in the application.

Applicant proposes to construct and operate a natural gas distribution system in the City of Graham, Missouri, and approximately .29 miles of 3-inch transmission pipeline extending from the proposed interconnection with the facilities of Michigan Wisconsin to the corporate limits of the city. The estimated cost of the project is $47,100, and is to be financed with internal funds.

The application shows the estimated annual and peak day requirements of natural gas in Mcf to Applicant are as follows:

	First year	Second year	Third year
Annual (Mcf)	9,300	14,100	15,300
Peak day (Mcf)	124	155	162

On September 10, 1964, Michigan Wisconsin answered the application stating it had no objection to the entry of an order granting St. Joseph's application.

Due notice of the filing of the application and opportunity for hearing thereon have been given by publication in the Federal Register on October 29, 1964 (29 F.R. 14763). No protest or petition to intervene in opposition to the granting of the application has been filed.

The Commission finds:

(1) Michigan Wisconsin Pipe Line Company, a Delaware couporation having its principal place of business in Detroit, Michigan, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of July 14, 1950, in Docket No. G-1302 (9 FPC 167).

(2) Applicant, St. Joseph Light & Power company, a Missouri corporation having its principal place of business in St. Joseph, Missouri, is a corporation legally authorized to engage in the local distribution of natural gas to the public within the meaning of Section 7(a) of the Natural Gas Act.

(3) It is necessary and desirable in the public interest that Michigan Wisconsin Pipe Line Company be directed to establish physical connection of its natural gas transmission facilities with the facilities proposed by the Applicant and to sell and deliver through such connecting facility the required volume of natural gas to Applicant, as set forth in the application and as hereinafter ordered.

(4) The requirement that Michigan Wisconsin serve Applicant, as proposed, will not place any undue burden upon Michigan Wisconsin nor impair its ability to render adequate service to its existing customers.

The Commission orders:

(A) Michigan Wisconsin Pipe Line Company be and is hereby directed to establish physical connection of its natural gas transmission system with the proposed facilities of Applicant, St. Joseph Light & Power Company, and to sell and deliver up to 162 Mcf of natural gas per day to Applicant, all as hereinbefore described and as more fully set forth in the application in this proceeding.

(B) Applicant shall be prepared to receive natural gas from Michigan Wisconsin within 6 months from the date of issuance of this order.

(C) Michigan Wisconsin shall report to the Commission in writing the date of commencement of service to Applicant within ten days thereof.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

UNITED FUEL GAS COMPANY AND KENTUCKY GAS TRANSMISSION CORPORATION, DOCKET NO. CP64-16

ORDER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued November 20, 1964)

On September 21, 1964, United Fuel Gas Company (United) and Kentucky Gas Transmission Corporation (Kentucky), referred to herein as Applicants, filed in Docket No. CP64-16, separate applications to amend a joint order of the Commission issued January 21, 1964, 31 FPC 157, in Docket No. CP64-16, authorizing among other things the installation and operation of additional compressor capacity by United, and the construction and operation of transmission facilities by Kentucky.

United requests that the ordering Paragraph (C) of the Commission's said order of January 21, 1964, be modified so as to extend the time for completion of the additional compressor capacity at its Ceredo and Lanham Compressor Station to not later than April 21, 1965, and Kentucky requests (1) modification, of Paragraph (C) to extend the time for completion of 16 miles of 30-inch loop pipeline to a date not later than October 21, 1965 and (2) it be permitted to withdraw a request for cancellation of the certificate of public convenience and necessity authorizing the construction and operation of the said 16 miles of 30-inch pipeline, all as more fully set forth in the applications to amend.

United states it began construction at its Ceredo Station on September 8, 1964, proposed to begin construction at its Lanham Station about September 21, 1964, and therefore requests an additional six months in which to complete construction previously delayed.

The application of Kentucky seeks (1) the withdrawal of its request made on August 6, 1964[1], to delete from the certificate issued January 21, 1964, authorization covering the construction and operation of approximately 16 miles of 30-inch loop pipeline in Montgomery County, Kentucky (13 miles extending north from its Means Compressor Station and 3 miles extending south from said Station) and (2) additional time for the completion of its proposed facilities to allow desired flexibility in its construction schedule and, if possible to obtain a lower bid therefor. Kentucky now needs the proposed facilities to meet the combined requirements of Cincinnati and Union Light, thus necessitating withdrawal of the request referred to above.

Due notice of the subject application to amend and opportunity for hearing has been given by publication in the Federal Register on October 27, 1964, (29 F.R. 14353). No protest, petition to intervene or request for hearing has been filed concerning this amendment.

---

[1] Notice of application to amend filed by Kentucky to delete authorized facilities published in Federal Register on September 24, 1964, (29 F.R. 13287).

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act, and the public convenience and necessity require (1) that the Commission's order issued January 21, 1964, in Docket No. CP64–16, granting authorization for among other things the installation and operation of additional compressor capacity by United, and the construction and operation of transmission facilities by Kentucky, be amended as hereinafter ordered, and (2) Kentucky be permitted to withdraw its application to amend filed on August 6, 1964, in this proceeding as requested.

The Commission orders:

(A) The Commission's order issued January 21, 1964, in Docket No. CP64–16 be and the same is hereby amended by modifying Paragraph (C) thereof so as to extend the time for completion of the additional compressor facilities at United's Cerdo and Lanham Compressor Stations to not later than April 21, 1965, and to extend the time for completion by Kentucky of 16 miles of 30-inch loop pipeline to a date not later than October 21, 1965, all as hereinbefore described in the applications to amend of United and Kentucky filed herein.

(B) Kentucky be permitted to withdraw its application to amend the Commission's order issued January 21, 1964, filed herein on August 6, 1964, requesting deletion of Commission authorized facilities (16 miles of 30-inch loop pipeline in Montgomery County, Kentucky).

(C) In all other respects said order shall remain in full force and effect.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

WHEELER GAS COMPANY, DOCKET NO. CP65–42

FINDINGS AND ORDER DIRECTING SALE AND DELIVERY OF NATURAL GAS

(Issued November 20, 1964)

On August 10, 1964, Wheeler Gas Company (Applicant) filed in Docket No. CP65–42 an application pursuant to Section 7(a) of the Natural Gas Act for an order of the Commission directing Natural Gas Pipeline Company of America (Natural) to sell and deliver up to 1,500 Mcf of natural gas daily to Applicant for distribution and resale in the towns of Briscoe and Allison, Texas, and Reydon, Oklahoma, all as more fully set forth in the application.

Applicant owns and operates distribution systems in the said towns under franchises granted to Applicant, and has been providing natural gas to customers in the said communities from its production in nearby gas areas.

Applicant was unable to meet the peak day demands of its customers during the winter of 1963–64, and estimates it will need 636 Mcf from Natural and 560 Mcf from its own production on a 1964–65 peak day. Customer requirements are being met in a part from a supply obtained from Natural under temporary authorizations granted Natural in Docket Nos. CP64–140 and CP64–191.

On August 28, 1964, Natural filed an answer to Applicant's request stating it is willing to enter into a new service agreement providing for service to Applicant and to sell natural gas to Applicant on the condition that the provisions of Paragraph 6.1 of the General Terms and Conditions of Natural's tariff be waived since Wheeler now owns adequate measuring and regulating facilities at the proposed delivery point. Facilities needed by Natural to effectuate the proposed

service have been constructed by Natural at a cost of $854 from funds on hand pursuant to the above-described temporary authorizations.

Due notice of the filing of the application and opportunity for hearing thereon has been given by publication in the Federal Register on October 14, 1964 (29 F.R. 14133). No protest, petition to intervene or request for hearing has been filed in this proceeding.

The Commission finds:

(1) Natural Gas Pipeline Company of America, a Delaware corporation having its principal place of business in Chicago, Illinois, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of November 7, 1958, in Docket No. G–9966 (20 FPC 694).

(2) Applicant, Wheeler Gas Company, a partnership existing under the laws of Texas, having its principal place of business in Wheeler, Texas, is legally authorized to engage in the local distribution of natural gas to the public within the meaning of Section 7(a) of the Natural Gas Act, and has received the necessary local franchises to render the service proposed.

(3) It is necessary and desirable in the public interest to direct Natural to sell and deliver natural gas to Applicant through existing facilities up to 1,500 Mcf per day for ultimate distribution and sale by Applicant in Briscoe and Allison, Texas, and Reydon, Oklahoma, under its appropriate rate schedule and a service agreement to be executed by Applicant with Natural Gas Pipeline Company of America in accordance with the Commission's Regulations.

(4) The requirement that Natural serve Applicant, as hereinafter ordered, will not (a) place an undue burden upon Natural, (b) require Natural to enlarge its transportation facilities or (c) impair Natural's ability to render adequate service to its existing customers.

(5) Applicant should be prepared to receive the requested volumes of natural gas from Natural for distribution in Briscoe and Allison, Texas, and Reydon, Oklahoma, within 6 months from the date of the issuance of this order.

(6) Good cause has been shown for waiving the requirements of Paragraph 6.1 of the General Terms and Conditions of Natural's rate schedule applicable to Wheeler Gas Company in this proceeding and permitting Natural to make an exception with respect thereto.

The Commission orders:

(A) Natural Gas Pipeline Co. of America be and is hereby directed to sell and deliver up to 1,500 Mcf of natural gas daily to Applicant under a service agreement to be executed by Applicant with Natural in accordance with the Commission's Regulations, for the transportation, distribution and resale as hereinbefore described. Such service shall be rendered pursuant to Natural's presently filed appropriate rate schedule with the exception that compliance with paragraph 6.1 of the General Terms and Conditions thereof may be waived.

(B) Natural shall report to the Commission the date of commencement of the requested service within 15 days after such service begins.

(C) Applicant shall be prepared to receive the requested service from Natural as directed herein within 6 months from the date of issuance of this order.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

EASTERN SHORE NATURAL GAS COMPANY, DOCKET NO. CP65-64; TRANSCONTINENTAL GAS PIPE LINE CORPORATION, DOCKET NO. CP64-96

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY, AND AMENDING AN ORDER ISSUING A CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued November 23, 1964)

Eastern Shore Natural Gas Company (Eastern Shore), filed in Docket No. CP65-64 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity on September 4, 1964, and amendments and first and second supplements on September 18 and November 3, 1964, respectively, authorizing (1) the construction and operation of a total of 30.25 miles of 4 and 6-inch pipeline from Bridgeville, Delaware, to Cambridge, Maryland, and the sale and delivery of 550 Mcf of natural gas daily on a firm basis to the Cambridge Gas Company for resale in Cambridge and (2) the construction and operation of a total of 2.89 miles of 3 and 4-inch pipeline laterals from the proposed transmission line in (1) above to (a) the Continental Can Company, Inc., Hurlock, Maryland, (b) Eastern Shore Rendering Company, East New Market, Maryland and (c) Carolina Poultry Farms, Inc., Federalsburg, Maryland, all as more fully set forth in the application.

On September 29, 1964, Transcontinental Gas Pipe Line Corporation (Transco), 3100 Travis Street, Houston, Texas, filed in Docket No. CP64-96, an application to amend an order of the Commission issued April 17, 1964, 31 FPC 957, in Docket No. CP64-96, authorizing among other things the sale and delivery of natural gas to Eastern Shore. The application to amend requests authorization to increase Transco's deliveries to Eastern Shore from 14,225 Mcf daily to 14,695 Mcf daily, an increase of 470 Mcf daily, all as more fully set forth in the application to amend.

Eastern Shore proposes to sell and deliver (1) on a firm basis, 20 Mcf daily of natural gas to Continental Can, and, on an interruptible basis, 150,000 Mcf annually to Eastern Shore Rendering and 70,000 Mcf annually to Carolina Poultry Farms and (2) 550 Mcf daily, on a firm basis, to Cambridge Gas Company. To render the proposed new services Eastern Shore proposes to increase its present contract demand with Transco by 470 Mcf.

Eastern Shore estimates the total cost of the proposed facilities will be $568,000, which will be financed by the issuance of First Mortgage Pipeline Bonds.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on November 19, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application, amendments and supplements in Docket No. CP65-64 and application to amend in Docket No. CP64-96 submitted in support of the authorizations sought, and upon consideration of the record finds and orders as hereinafter stated.

The Commission finds:

(1) Applicant, Eastern Shore Natural Gas Company, a Delaware corporation having its principal place of business in Salisbury, Maryland, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found

by the Commission in its order of November 29, 1957, in Docket No. G–12059, *et al.* (18 FPC 710).

(2) Applicant, Transcontinental Gas Pipe Line Corporation, a Delaware corporation with its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of April 28, 1950, in Docket No. G–1277 (9 FPC 32).

(3) The proposed construction and operation of facilities, the transportation of natural gas and sale thereof by Applicant in Docket No. CP65–64 as hereinbefore described, and as more fully described in the application, amendments and supplements thereto in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(4) The aforesaid construction and operation of facilities, the transportation of natural gas and sale thereof are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued April 17, 1964, in Docket No. CP64–96 be amended as hereinafter ordered.

(6) Applicant, Eastern Shore is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(7) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder in Docket No. CP65–64 to Eastern Shore be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3), (c)(4) and (e) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity be and the same is hereby issued to Applicant in Docket No. CP65–64, authorizing the construction and operation of facilities, the transportation of natural gas and the sale thereof, as more fully described in the application, amendments and supplements filed in the proceeding, subject to the jurisdiction of the Commission, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are hereby conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3), (c)(4) and (e) of Section 157.20 of such Regulations.

(C) The facilities hereby authorized in Docket No. CP65–64 shall be completed and placed in actual operation, as provided by paragraph (b) of Section 157.20 of the aforesaid Regulations within 12 months of the date on which this order issues.

(D) The certificate issued hereby shall not entitle Continental Can, the industrial customer to whom firm deliveries are authorized herein, to any priorities or rights to additional gas for meeting any future increases in its requirements at the expense of resale customers desiring to acquire additional gas to meet any future increases in their requirements.

(E) The facilities authorized by the certificate issued by paragraph (A) above shall not be utilized to transport natural gas on an interruptible basis in excess

of 150,000 Mcf annually to Eastern Shore Rendering Company and 70,000 Mcf annually to Carolina Poultry Farms, Inc.

(F) The certificate issued hereby is granted on the express condition that the interruptible service authorized herein shall be subject to any curtailment or interruption required to meet existing or future contracted maximum delivery obligations of Eastern Shore Natural Gas Company for firm service to its customers.

(G) The Commission's order issued April 17, 1964, in Docket No. CP64-96 be and the same is hereby amended so as to grant authorization to Transco to increase the sale and deliveries of natural gas to Eastern Shore from 14,225 Mcf daily to 14,695 Mcf daily.

(H) Transco and Eastern Shore shall execute a superseding service agreement in accordance with the Commission's Regulations reflecting the increase in Eastern Shore's contract demand and file the same with the Commission within 30 days after the issuance of this order

(I) Eastern Shore shall file within 30 days after the issuance of this order its service agreement executed in accordance with the Commission's Regulations reflecting the terms and conditions of the sale and delivery of 550 Mcf of natural gas on a firm basis to Cambridge Gas Company.

(J) In all other respects the order of the Commission amended by paragraph (G) hereof shall remain in full force and effect.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

NATURAL GAS PIPELINE COMPANY OF AMERICA, DOCKET NO. CP61-96

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued November 23, 1964)

On September 30, 1960, as amended on October 7 and 17, 1960, Natural Gas Pipeline Company of America (Applicant) filed in Docket No. CP61-96 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of 50 miles of 20-inch and 4.5 miles of 6-inch lateral supply line extending from the terminus of Applicant's existing 26-inch transmission pipeline in Jim Wells County, Texas, to the Thompsonville and Taquachie Creek Areas in Zapata, Jim Hogg and Webb Counties, Texas, together with two meter stations at centrally located points in the above-mentioned areas, all as more fully set forth in the application and supplements.

These facilities are used to enable Applicant to take natural gas purchased from various producers thereof in the subject area. The estimated total cost of the proposed facilities is $3,233,000, which is financed from funds on hand. Temporary authorization to construct and operate the subject facilities was issued to Applicant on November 25, 1960, and, according to required filing subsequently made on April 10, 1961, said facilities were completed and placed in operation on March 30, 1961.

This application was originally noticed and consolidated with six producer applications for hearing. A number of petitions to intervene in the consolidated proceeding were filed. Subsequently, by order issued May 28, 1964, in Docket

No. G–17960, *et al.*, the aforesaid producer applications were severed from subject Docket No. CP61–96.

Notice of this application was reissued on October 5, 1964, and was published in the Federal Register on October 22, 1964, (29 F.R. 14511). On October 21, 1964, counsel for Blanco Oil Co. and Killam & Hurd filed a letter termed an "informal protest", stating that the protestants did not desire a formal hearing or oppose the granting of the requested authority but merely desired to preserve the protestants' rights. No other protest, petition to intervene or notice of intervention has been received.

At a hearing held on November 19, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and amendments, submitted in support of the authorization sought, and upon consideration of the record,

The Commission finds:

(1) Applicant, Natural Gas Pipeline Company of America, a Delaware corporation having its principal place of business in Chicago, Illinois, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of October 13, 1942, in Docket No. G–235 (3 FPC 830).

(2) The facilities hereinbefore described, as more fully described in the application and amendments in this proceeding, are used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services involved and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the subject facilities are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate hereinafter issued to Applicant and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a) and (e) of Section 157.20 of said Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity be and the same is hereby issued to Natural Gas Pipeline Company of America authorizing the construction and operation of facilities to take natural gas purchased from producers thereof as hereinbefore described and as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are hereby conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a) and (e) of Section 157.20 of said Regulations.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

PAN AMERICAN PETROLEUM CORPORATION, DOCKET NO. RI65-123

ORDER DENYING MOTION FOR RECONSIDERATION

(Issued November 23, 1964)

On October 19, 1964, Pan American Petroleum Corporation (Pan American) filed a motion for reconsideration of the Commission's order issued August 5, 1964, in the above-designated proceeding, which suspended for one day a proposed increase in rate from 12.2309¢ per Mcf at 15.025 psia to 13.0¢ per Mcf, designated as Supplement No. 5 to Pan American's FPC Gas Rate Schedule No. 93, involving the jurisdictional sale of natural gas to El Paso Natural Gas Company (El Paso) from the Blanco Mesa Verde Field, San Juan and Rio Arriba Counties, New Mexico (San Juan Basin Area). By its motion, Pan American requests that the Commission reconsider and vacate its order of August 5, 1964, and terminate the proceeding in Docket No. RI65-123.

The proposed favored-nation increase is exclusive of tax reimbursement. Pan American, however, retains the right to file at a later date for the tax reimbursement permitted under the contract. The proposed rate, being lower than the contractually authorized rate, is considered to be a "fractured" rate increase, and was suspended for one day, even though not in excess of the applicable area rate ceiling set forth in the Commission's Statement of General Policy No. 61-1, as amended [18 CFR, Chapter I, Part 2, Section 2.56], because Pan American did not waive the right to file for tax reimbursement prior to its next contractually authorized rate filing.

In support of its motion, Pan American contends, *inter alia*, that the rights of Pan American under the Mobile case [1] have been abrogated in that Pan American has been denied the right to file for only a part of its contractually-authorized rate. Such contention is without merit. The *Mobile* case held that contract rates may be made in the first instance by the parties to the contract, subject to review by the Commission. Pan American is free to file for a part of its contractually-authorized rate, as it has done in the instant case; when it does, however, the Commission has discretionary power under Section 4(e) to suspend the proposed increase.

Pan American further argues that the Commission's action is contrary to the "filed rate" doctrine enunciated in the *Montana-Dakota* case.[2] In the *Montana-Dakota* case the court held that the regulated company had no right to claim a rate other than the filed rate. That case is inapposite here where the only question involved is the Commission's suspension powers under Section 4(e).

Pan American also contends that the action of the Commission in suspending its proposed increased rate is "arbitrary and discriminatory." Pan American cites one instance in which an increased rate similar to the one involved here was accepted.[3] It has been our policy for some time to suspend fractured rates even though such rates might not be in excess of the applicable increased rate ceiling if the contractually authorized rate is in excess of the ceiling. The acceptance of

---

[1] *United Gas Pipe Line Co.* v. *Mobile Gas Service Corp.*, 350 U.S. 332.

[2] *Montana-Dakota Utilities Co.* v. *Northwestern Public Service Co.*, 341 U.S. 246.

[3] The other cited by Pan American is not in point here. Supplement No. 1 to Featherstone's Rate Schedule No. 1, providing for a periodic increase from 12¢ to 13¢ per Mcf, did not constitute a "fractured rate" because Featherstone at the time of filing (November 24, 1961) was not entitled to any tax reimbursement under the contract.

the rate increase proposed to Bert Fields' Estate Rate Schedule No. 1 referred to by Pan American did not represent a change in policy but was merely the result of inadvertence.

The Commission orders:

In view of the foregoing, the motion for reconsideration of the Commission's order of August 5, 1964, is denied.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

TENNESSEE GAS TRANSMISSION COMPANY, DOCKET NO. CP65-29

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued November 23, 1964)

On August 4, 1964, as supplemented on August 10, September 14 and October 12, 1964, Tennessee Gas Transmission Company (Applicant) filed in Docket No. CP65-29 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain facilities, replacing certain existing facilities, all as more fully set forth in the application, as supplemented.

The Sabine River Authorities of the States of Texas and Louisiana (Authorities) are in the process of constructing the Toledo Bend Dam and Reservoir on the Sabine River. Such construction is pursuant to a license issued by this Commission in Project No. 2305. Applicant states that it maintains and operates two 30-inch and one 24-inch transmission lines in the area to be inundated by the Reservoir and, in addition, has two 24-inch lines crossing the Sabine River by means of an aerial suspension bridge and one 30-inch submerged river crossing. Following conferences between Applicant and Authorities, it was determined that a total of approximately 108,744 feet of Applicant's pipeline facilities must have certain alterations in order to protect such facilities and to insure continuity of service to Applicant's customers.

Applicant requests authority to remove those segments of pipe which will be inundated by the Reservoir and to replace the same with pipe of a greater wall thickness and properly weighted with concrete. The aerial suspension bridge must be removed since it is deemed to be a navigational hazard. The two lines on the bridge will be removed and replaced with two 30-inch submerged river crossings.

The estimated cost of the proposed project is $4,155,500. Applicant will receive from Authorities a sum of $3,894,252. The salvage value of the pipe removed is approximately $246,048. Therefore, the total direct cost to Applicant will be approximately $15,200.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application, as supplemented, has been filed.

At a hearing held on November 19, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application, supplements and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Tennessee Gas Transmission Company, a Delaware corporation having its principal place of business in Houston, Texas, is a "natural-gas com-

pany" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of July 12, 1947, in Docket No. G-910 (6 FPC 777).

(2) The facilities hereinbefore described, as more fully described in the application, as supplemented, in this proceeding, are to be used in the transportation and delivery of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4) and (e) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity be and the same is hereby issued authorizing Applicant, Tennessee Gas Transmission Company, to construct and operate the proposed facilities as hereinbefore described, all as more fully described in the application, as supplemented, in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4) and (e) of Section 157.20 of such Regulations.

(C) The facilities hereby authorized shall be completed and placed in actual operation, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within 12 months from the date on which this order issues.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

UNION TEXAS PETROLEUM, ET AL., DOCKET NO. G-13221, ET AL.

ORDER DENYING APPLICATIONS FOR REHEARING

(Issued November 23, 1964)

On July 23, 1964, the Commission issued Opinion No. 436, 32 FPC 254, in the above-entitled proceeding. Thereafter, rehearing was granted by order issued August 27, 1964, 32 FPC 666, for the purpose of reconsideration, and on October 8, 1964, the Commission issued Opinion No. 436-A, 32 FPC 952, with accompanying order modifying Opinion No. 436 and granting certain stays. Applications for rehearing with respect to Opinion No. 436-A and the accompanying order were filed on November 5, 1964, by Placid Oil Company (Docket Nos. G-18021, G-18076, G-18502, CI61-511, CI61-1362 and CI63-305), Hassie Hunt Trust (Docket Nos. G-18897, G-19249 and CI61-645), H. L. Hunt (Docket No. G-19460) and Hunt Oil Company (Docket No. G-18596); on November 6, 1964, by

Pan American Petroleum Corporation (Docket No. G–16946); and November 9, 1964, by John W. Mecom (Docket No. CI61–236), E. Cockrell, Jr. (Docket No. CI62–400), E. Cockrell, Jr. (Operator), *et al.* (Docket No. CI63–326), Freeport Oil Company (Operator), *et al.* (Docket No. CI62–720) and U.S. Oil of Louisiana Inc. (Operator), *et al.* (Docket Nos. CI60–607, CI61–144 and CI61–173).

The applications for rehearing present no new argument or citation of authority beyond that which was presented, and carefully considered by the Commission in its deliberations which culminated in Opinion Nos. 436 and 436–A and the accompanying orders. Upon full reconsideration we believe the aforesaid Opinion No. 436–A and accompanying order were correct, and should be adhered to.

The Commission finds:

No new facts or principles of law have been presented by the applicants in their applications for rehearing which either were not fully considered by the Commission prior to the order as to which rehearing is sought, or, having now been considered, warrant further hearing, modification or revocation of said order.

The Commission orders:

The applications for rehearing filed herein by Placid Oil Company, Hassie Hunt Trust, H. L. Hunt, Hunt Oil Company, Pan American Petroleum Corporation, John W. Mecom, E. Cockrell, Jr., E. Cockrell, Jr. (Operator), *et al.*, Freeport Oil Company (Operator), *et al.*, and U.S. Oil of Louisiana Inc. (Operator), *et al.*, be and the same hereby are denied.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

UNION TEXAS PETROLEUM, ET AL., DOCKET NO. G–13221, ET AL.

ORDER AMENDING OPINION NO. 436

(Issued November 23, 1964)

Commission Opinion No. 436 was issued July 23, 1964, 32 FPC 254, in the above-entitled proceeding.[1] Pursuant to this opinion, Docket No. CI61–1280, General Crude Oil Company (Operator), *et al.* (General Crude) was remanded to the presiding examiner for determination of whether part of certain gas-producing acreage was previously dedicated to interstate commerce. General Crude had contended in its exceptions to the initial decision of the presiding examiner that no previous dedication had occurred. By letter of October 29, 1964 to the Secretary of the Commission, counsel for General Crude stated that its contention that the acreage in question had never been dedicated to interstate commerce was in error, and added:

> The facts are that the lease acreage covered by the General Crude contract filed in connection with its application for certificate of public convenience and necessity in Docket No. CI61–1280 had previously been included under the contract filed with the Federal Power Commission by Pan American Petroleum Corporation in its Docket No. G–3216.

[1] With respect to the matter with which we are here concerned, Opinion No. 436 was left unchanged by Opinion No. 436–A, issued October 8, 1964, 32 FPC 952, which modified other portions of Opinion No. 436 and its accompanying order.

In view of the foregoing and the application of Pan American Petroleum Corporation to amend its certificate of public convenience and necessity in Docket No. G–3216 and Docket No. CI61–1280 dated October 22, 1964 and the Exhibits attached to said application, it is suggested that the issues raised by the General Crude contentions have been rendered moot and there is no necessity of remanding these contentions to the presiding examiner. * * *

We agree with counsel for General Crude that, as no factual issue remains, there is nothing for the presiding examiner to determine. Accordingly, a final order should now issue in accordance with the views expressed at pages 267 and 268 of Opinion No. 436.

The Commission finds:

No factual issue remains for determination in Docket No. CI61–1280.

The Commission orders:

(A) Appendix C to the order accompanying Opinion No. 436 is hereby amended by the addition of the following:

CI61–1280	General Crude Oil Company (Operator), *et al.*	20.4¢	18.0¢[1]	9

(B) Paragraph (E) of the order accompanying Opinion No. 436 is hereby amended to read as follows:

The permanent certificate issued in Docket No. CI61–1280 to General Crude Oil Company (Operator), *et al.*, pursuant to Paragraph (A) hereof, shall contain a condition that General Crude Oil Company (Operator), *et al.*, shall be responsible for, and agree to make, refund of the difference between the rates collected by General Crude Oil Company (Operator), *et al.*, for the period prior to January 1, 1962, under the applicable temporary certificate, and the applicable rate or rates ultimately fixed by final order no longer subject to judicial review in the Area Rate Proceeding, Docket No. AR61–2, *et al.*, or such applicable proceeding in lieu thereof as the Commission may order.

(C) The proceedings before the presiding examiner as a result of the remand ordered by Paragraph (E) of the order accompanying Opinion No. 436 shall be, and the same hereby are, terminated.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

UNITED FUEL GAS COMPANY, DOCKET NO. G–20270; ATLANTIC SEABOARD CORPORATION, DOCKET NO. G–20272

ORDER DENYING REHEARING AND MOTION

(Issued November 23, 1964)

On October 29, 1964, Washington Gas Light Company (Washington Gas) filed an application for rehearing of our Opinion No. 430–A and accompanying order issued October 14, 1964, 32 FPC 1106. Opinion No. 430–A was issued upon rehearing of Opinion No. 430, issued June 2, 1964, 31 FPC 1342, and modified Opinion No. 430 in a manner described hereinbelow.

United Fuel Gas Company and Atlantic Seaboard Corporation (respondents) filed a motion on November 6, 1964, requesting that Washington Gas' said application be rejected for filing on the grounds, *inter alia*, that rehearing of an order

issued on rehearing is without warrant in the Natural Gas Act and our Regulations, and that Washington Gas has been fully heard on all the matters and issues it now seeks to argue.

Respondents are correct that the basic arguments advanced by Washington Gas in its present application were fully considered and disposed of by Opinion No. 430–A. However, since that Opinion did modify Opinion No. 430, we shall permit the filing of Washington Gas' application and shall consider the arguments it makes with respect to the modification.

Washington Gas contends that Opinion No. 430–A errs in modifying Opinion No. 430 to provide that supplier rate reductions and refunds shall be reflected in the demand and commodity charges of respondents' rates on the same basis, in the distribution between demand and commodity, as received from the suppliers. Opinion No. 430 had provided that such rate reductions and refunds should be reflected all in the demand charges of respondents' rates.

Washington Gas says that the basic reason given in Opinion No. 430–A for changing to the "as received" method of reflecting supplier rate reductions and refunds, was that such rate reductions and refunds are considerably larger and would have a considerably greater impact in reducing respondents' demand charges, than appeared when Opinion No. 430 was issued. However, Washington Gas argues that we should have known of their size and impact when Opinion No. 430 was issued. It further argues that regardless of size and impact, our logic in following the "all in demand" method was based upon fixing commodity charges that would permit industrial sales, and then adhering to such charges by reflecting supplier rate reductions and refunds exclusively in the demand charges. And it says that this logic is still sound and should still be followed.

In our view, these arguments of Washington Gas are fully disposed of by Opinion Nos. 430 and 430–A. As we there stated, data respecting the bulk of the supplier rate reductions and refunds simply were not available until after the hearing in this case was closed. Of necessity, therefore, Opinion No. 430 could not and did not approve any specific rates for respondents, but required respondents "to file rates satisfactory to the Commission" (pp. 1359, 1361) for the period prior to the date of issuance of the opinion, reflecting the "all in demand" treatment of supplier rate reductions and refunds. Correspondingly, Opinion No. 430 found merely that the "all in demand" procedure was not subject to any material objection on the basis of what appeared to be the "resulting *indicated* rates" (p. 1359, emphasis supplied). However, when the actual rates thus required to be filed revealed the full magnitude of the supplier rate reductions and refunds and the heavy impact of the "all in demand" approach, it became clear to us that that approach was seriously objectionable and that the "indicated" rates based thereon were not "satisfactory," as required by Opinion No. 430.

Washington Gas is not on sound ground in arguing that we are bound by the "logic" of Opinion No. 430 to adhere to the commodity charges there stated. As we make clear in that opinion, those were but the "indicated" commodity charges of respondents' demand-commodity rates, to be adhered to "to the extent practicable" (p. 1358), and were, moreover, subject to the requirement of that opinion that the actual filed rates must be satisfactory to us. Additionally, Opinion No. 430 contemplated that the indicated commodity charges would be accompanied by demand charges that, while "relatively low" in the language of Opinion No. 430 would still be sufficiently high to recognize and encourage the operation and development of storage and peak shaving facilities, particularly on United Fuel's system (pp. 1349, 1350). However, it became evident when respondents computed their actual rates that the "all to demand" treatment of

supplier rate reductions and refunds would excessively depress respondents' demand charges in relation to their commodity charges, and thus run counter to the objectives of Opinion No. 430.

Clearly, therefore, it was necessary that in the exercise of our judgment, we consider what would be satisfactory rates for respondents, on the basis of the rate design principles discussed at length in Opinion No. 430, and make the modification prescribed by Opinion No. 430–A.

The other arguments advanced by Washington Gas are sufficiently answered by the foregoing, or by Opinion Nos. 430 and 430–A.

The design of rates is, of course, a matter of judgment involving a weighing of the numerous factors and oftentimes conflicting considerations presented in the record relative to the operations and needs of the pipeline and its several customers. *Cf., American Louisiana Pipe Line Company,* 29 FPC 932, 954. Judgments will frequently differ respecting the relative weight of the factors and considerations presented. This is attested by the fact that Washington Gas recommends relatively low demand and high commodity rates, while respondents and most of their other customers recommend the opposite, with no party, it may be added, recommending the rates we consider most satisfactory. However, the responsibility for decision is ours, and after a full consideration of this case, we are convinced that rates for respondent reflecting the modification prescribed by Opinion No. 430–A will meet the rate design objectives of this case and satisfy the competing interests here involved better than any other rates. Contrary to Washington Gas' contention, these rates do consider the equities of the low load factor customers. As we said in Opinion No. 430–A (p. 1110), "* * * such rates will effect as fair an accommodation of the competing interests of respondents and of their high and low load factor customers as is reasonably practicable under the circumstances."

The Commission further finds:

The assignments of error and grounds for rehearing set forth in Washington Gas' application present no new facts or principles of law which were not considered by Opinion No. 430–A and accompanying order issued October 14, 1964, or which having now been considered, warrant any change or modification of the said opinion and order.

The Commission orders:

(A) The application for rehearing filed herein by Washington Gas on October 29, 1964, is hereby denied.

(B) Respondents' motion filed herein on November 6, 1964, is hereby denied.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

FIRST TRANSPORTATION GAS CORPORATION, INC., DOCKET NO. CI61–985

ORDER DENYING MOTION REQUESTING ISSUANCE OF PERMANENT CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued November 24, 1964)

The First Transportation Corporation, Inc. (First Transportation) on October 15, 1964, filed a motion requesting the issuance of a permanent certificate of public convenience and necessity in Docket No. CI61–985 authorizing the

sale of natural gas to Transwestern Pipeline Company (Transwestern) from certain leases in Lipscomb and Ochiltree Counties, Texas, and Beaver, Harper, Ellis and Woodward Counties, Oklahoma. By letter dated February 2, 1961, the Commission granted a conditioned temporary authorization to First Transportation, which was accepted, to make the requested sale at a price of 17.0¢ per Mcf at 14.65 psia. On October 26, 1964, Transwestern filed a reply in opposition to the motion of First Transportation.

In essence, First Transportation contends that it has satisfied the conditions imposed and should be granted a permanent certificate. However, most of the Transwestern facilities which receive and transport the First Transportation gas are pending permanent certification in the consolidated proceedings in Docket No. G–20464, *et al.* As pointed out in E. E. Fogelson, 31 FPC 476, Docket No. G–19013, *et al.*, Order of March 4, 1964, p. 478, to grant the producers permanent certificates before the pipeline facilities are permanently certificated would be prejudging the proceedings in Docket No. G–20464, *et al.* First Transportation can continue to make the sale as temporarily authorized but any action on the permanent certificate must await the outcome in Docket No. G–20464, *et al.*

The Commission orders:

For the foregoing reasons the request of First Transportation for the immediate issuance of a permanent certificate of public convenience and necessity is hereby denied.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

NATURAL GAS PIPELINE COMPANY OF AMERICA, DOCKET NO. CP65–60

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued November 24, 1964)

On September 1, 1964, Natural Gas Pipeline Company of America (Applicant) filed in Docket No. CP65–60 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale and delivery of an additional daily contract quantity of 15,000 Mcf of natural gas to Northern Illinois Gas Company (Northern), an existing customer of Applicant, all as more fully set forth in the application.

Applicant states that Northern has requested an additional daily contract quantity of 15,000 Mcf in order to meet larger than previously anticipated increases in firm service demands for the 1964–65 winter season. No additional facilities will be required for the proposed service since the additional volumes of gas will be delivered at the existing Joliet or Eola Road meter station.

Applicant has 22,557 Mcf per day of unallocated capacity from which to render the proposed additional service.

After due notice no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on November 19, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Natural Gas Pipeline Company of America, a Delaware corporation having its principal place of business in Chicago, Illinois, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of October 13, 1942, in Docket No. G–235 (3 FPC 830).

(2) The proposed transportation and sale of natural gas by Applicant hereinbefore described, as more fully described in the application in this proceeding, will be in interstate commerce, subject to the jurisdiction of the Commission, and such proposed transportation and sale are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The proposed transportation and sale of natural gas by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3) and (e) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity be and the same is hereby issued authorizing Applicant, Natural Gas Pipeline Company of America, to sell and deliver natural gas as hereinbefore described, all as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3) and (e) of Section 157.20 of such Regulations.

(C) The sale of natural gas authorized in paragraph (A) above shall commence, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within 3 months from the date on which this order issues.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

NIAGARA MOHAWK POWER CORPORATION, DOCKET NOS. IT–6078 AND IT–6079

ORDER AUTHORIZING TRANSMISSION OF INCREASED AMOUNT OF ELECTRIC ENERGY TO CANADA AND AMENDING PRESIDENTIAL PERMIT FOR FACILITIES AT INTERNATIONAL BOUNDARY

(Issued November 24, 1964)

On October 2, 1964, Niagara Mohawk Power Corporation (Applicant), filed its supplemental application for (1) authority pursuant to Section 202(e) of the Federal Power Act to increase the amount of electric energy and rate of trans-

mission now authorized to be transmitted to Shawinigan Water and Power Company for use in resale to the St. Regis Indian Reservation and surrounding area in the Province of Quebec, Dominion of Canada, from 500,000 kwh per annum at a rate not in excess of 150 kw by order issued May 8, 1952, 11 FPC 981, in Docket No. IT–6078, to 750,000 kwh per annum at a rate not to exceed 200 kw and (2) an amendment of the Presidential Permit issued in Docket No. IT–6079 to provide for the conversion of the existing line at the United States-Canadian Boundary from single-phase operation at 2300 volts to three-phase operation at 4800 volts.

Applicant states that the consumers of electric energy in the St. Regis Indian Reservation area have increased their consumption substantially beyond expectation. During the 12 month period ending September 17, 1964, exports of electric energy amounted to 490,624 kwh at a maximum rate of 144 kw, and further that the Canadian Department of Indian Affairs has requested 20 horsepower of three-phase power from the Shawinigan Water Power Company to operate a new water pumping station. Applicant is of the opinion that the requested increase in the amount of electric energy to be exported to 750,000 kwh per year at a rate not in excess of 200 kw will be sufficient for it to continue to serve the Shawinigan system without exceeding the authorized amount.

Notice of the filing of the application was given to the interested State officials and was also published October 16, 1964 in the Federal Register (29 F.R. 14246), stating that any person desiring to be heard or to make any protest with reference to the supplemental application should file a petition or protest on or before October 26, 1964. No protest or petition or request to be heard in opposition to the granting of said application has been received.

The Commission finds:

(1) The transmission of electric energy from the United States to Canada as herein limited and as hereinafter authorized will not impair the sufficiency of supply of electric energy within the United States and will not impede or tend to impede the coordination in the public interest of facilities subject to the jurisdiction of the Commission.

(2) Amendment of the Presidential Permit, referred to above, to reflect the proposed change in facilities at the International Boundary will not be inconsistent with the terms of the Permit.

(3) The period of public notice given in this matter is reasonable.

The Commission orders:

(A) Applicant be and it hereby is authorized to transmit electric energy from the United States to Canada in accordance with the terms and conditions and for the purpose specified in the supplemental application filed October 2, 1964, and subject to the provisions of this order.

(B) The electric energy which Applicant is hereby authorized to transmit from the United States to Canada shall be in an amount not in excess of 750,000 kilowatt-hours per annum at a rate not to exceed 200 kilowatts.

(C) The authorization herein granted may be modified from time to time or terminated upon further order of the Commission, but in no event shall such authorization extend beyond the date of termination or expiration of the Presidential Permit signed by the President of the United States on January 31, 1948, and referred to above.

(D) Applicant shall conduct all operations pursuant to the authorization herein granted in accordance with the provisions of the Federal Power Act and pertinent rules, regulations or orders issued by the Commission.

262–497—67——89

(E) Applicant shall install and maintain adequate metering equipment to measure the flow of all electric energy transmitted from the United States to Canada pursuant to the authority herein granted; shall make, keep and preserve full and complete records with respect to the movement of such energy; and shall furnish to the Commission with respect to such transmission of energy, on or before February 15 of each year, reports in triplicate showing the kilowatthours delivered at each of the points herein authorized, the maximum kilowatts of transmission, and the consideration received therefor during each month of the preceding calendar year.

(F) This authorization to transmit electric energy from the United States to Canada shall not be transferable or assignable, but shall continue in effect temporarily for a reasonable time thereafter, in the event of the involuntary transfer of facilities used thereunder by operation of law (including such transfers to receivers, trustees, or purchasers under foreclosure or judicial sale) pending the making of an application for permanent authorization and decision thereon, provided notice is promptly given in writing to the Commission accompanied by a statement that the physical facts relating to sufficiency of supply, rates, and nature of use remain substantially the same as before the transfer.

(G) This authorization shall be without prejudice to the authority of any State, or State regulatory commission for the exercise of the lawful authority vested in the State, or State regulatory commission over Applicant.

(H) This authorization is without prejudice to the authority of this Commission or any other regulatory body, with respect to rates, service, accounts, valuation, estimate or determination of cost, or any other matter whatsoever now pending or which may come before this Commission, or other regulatory body, and nothing herein shall be construed as an acquiescence by this Commission in any property claimed or asserted.

(I) This order shall supersede the order issued May 8, 1952 in Docket No. IT-6078.

(J) The Presidential Permit signed by the President of the United States on January 31, 1948 in Docket No. IT-6079 and subsequently amended shall be further amended to modify Article 2 of the Permit by changing the description of the facilities to read as follows:

> One three-phase line operating nominally at 4,800 volts, located at the International Boundary between the United States and Canada, at or near Hogansburg, New York, and within the boundaries of the St. Regis Indian Reservation.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black

TENNESSEE GAS TRANSMISSION COMPANY, DOCKET NO. CP65-49

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued November 24, 1964)

On August 17, 1964, Tennessee Gas Transmission Company (Applicant) filed in Docket No. CP65-49 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing Applicant to sell and deliver an additional 6,557 Mcf of natural gas per day to seven existing General Service Customers and 4,080 Mcf per day to two existing Contract Demand Customers and, further, to construct and operate a meter station

near Institute, West Virginia, in order to sell and deliver the proposed additional volumes of gas to one of its Contract Demand Customers, the Cabot Corporation, all as more fully set forth in the application in this proceeding.

The additional natural gas service proposed herein by Applicant is:

Type of service	Proposed additional service (Mcf at 14.73 psia)
General service customers:	
Dickson, Tennessee (Town of)	861
Longhorn Gas, Inc.	72
Lowell Gas Co.	1,326
Pennsylvania and Southern Gas Co.	2,936
Ripley, Mississippi (City of)	608
Robeline, Louisiana (Village of)	88
Springfield, Tennessee (Town of)	666
Contract demand customers:	
Cabot Corporation	2,040
Inland Gas Corporation	2,040
Total proposed service	10,637

The proposed meter station for Cabot Corporation will be constructed on Applicant's Southerly 20-inch line at an estimated cost of $22,860.

Applicant states that the proposed additional service is required to enable Applicant's customers to meet their estimated natural gas requirements commencing with the 1964-65 heating season. Further, Applicant states that previously authorized unallocated capacity will be utilized to render the subject service.

By letter dated October 2, 1964, Applicant was issued a temporary certificate authorizing the subject proposal.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on November 19, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Tennessee Gas Transmission Company, a Delaware corporation having its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of July 12, 1947, in Docket No. G-910 (6 FPC 777).

(2) The facilities herein before described, as more fully described in the application in this proceeding, are to be used in the transportation and sale of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof and the proposed transportation and sales of natural gas by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities and the proposed transportation and sales of natural gas by Applicant are required by the public

convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (b), (c) (3), (c) (4) and (e) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity be and the same is hereby issued authorizing Applicant, Tennessee Gas Transmission Company, to construct and operate the proposed facilities and to sell and deliver natural gas as hereinbefore described, all as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (b), (c) (3), (c) (4) and (e) of Section 157.20 of such Regulations.

(C) The facilities hereby authorized shall be constructed and placed in actual operation and the sales and delivery of natural gas authorized in paragraph (A) above shall commence, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within 2 months from the date on which this order issues.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

GEORGIA POWER COMPANY, DOCKET NOS. E–7099 AND E–7193

ORDER ACCEPTING RATE SCHEDULES FOR FILING AND PROVIDING FOR HEARING, SUSPENSION OF OTHER RATE SCHEDULES AND CONSOLIDATION OF PROCEEDINGS

(Issued November 25, 1964)

By this order the Commission accepts for filing four rate schedule submittals of Georgia Power Company (Georgia), suspends for one day two other rate schedule submittals of Georgia, orders a hearing on the lawfulness of the suspended rate schedules, and consolidates with that docket, for hearing purposes, an earlier rate investigation which the Commission initiated by its order to show cause issued May 27, 1963, 29 FPC 1049, Docket No. E–7099. That order requires Georgia to justify certain dual rates and other restrictive service provisions in the Company's wholesale power contracts with municipally or cooperatively owned electric distribution systems which contracts are embodied in rate schedules of Georgia, on file with this Commission pursuant to Section 205 of the Federal Power Act.

The rate schedule provisions herein suspended and set for hearing embody dual rate and restrictive service provisions similar to those questioned in the Commission's earlier order. Our purpose there and here is to determine the lawfulness of dual rates and restrictive service provisions which may inhibit Georgia's wholesale electric customers in the development of their respective electric utility operations. We do not question whether Georgia's schedules of filed rates and charges for service to municipal and cooperatively owned electric systems are unjust, unreasonable and unlawful for reasons for rate level.

The proffered rate schedule submitted here before the Commission were tendered for filing by Georgia on October 28, 1964, pursuant to Section 205 of the Federal Power Act, and comprise a primary service agreement and supplements thereto for wholesale electric service to the City of Cairo, Georgia at two delivery points. The agreement and supplements are identified in the files of the Commission as follows:*

Georgia Power Company Rate Schedule F.P.C. No. 671.
Supplement No. 1 to Rate Schedule F.P.C. No. 671.
Supplement No. 2 to Rate Schedule F.P.C. No. 671.
Supplement No. 3 to Rate Schedule F.P.C. No. 671.
Supplement No. 1 to Supplement No. 3 to Rate Schedule F.P.C. No. 671.
Supplement No. 2 to Supplement No. 3 to Rate Schedule F.P.C. No. 671.

Supplement Nos. 1 and 2 to Rate Schedule F.P.C. No. 671 and Supplement Nos. 1 and 2 to Supplement No. 3 to Rate Schedule F.P.C. No. 671 consist of contracts and amendments thereto whereby Georgia agrees to supplement the energy the City of Cairo receives from the Southeastern Power Administration (SEPA) and to supply to the City of Cairo energy to make up any deficiency in the energy the City of Cairo is entitled to receive as a preference customer from SEPA in the event SEPA is unable to supply the specified amount.

Under the proposed Rate Schedule F.P.C. No. 671 and Supplement No. 3, Georgia would substitute rates and charges reflected in its WR–4 rates for those set forth in the company's M–4 rate. The latter rate, an inherited rate from a predecessor corporation, Georgia Power & Light Company, was applied by Georgia at one of its delivery points to the City of Cairo prior to March 1, 1960. Data submitted in connection with the subject rate schedule filings indicate that Georgia commenced billing to Cairo at that point on and after March 1, 1960 at Rate W–4 although having on file with this Commission its Rate M–4. Under the proposed rate filings, Rate WR–4 would be applied to the second delivery point also. Available data indicates that Georgia Power commenced service at the additional delivery point effective during July 1962, without completing a rate schedule filing prior thereto.

Georgia's Rate M–4 is a straight net energy charge of 7.75 mills per kilowatt hour. The Company's Rate WR–4 is a blocked energy rate ranging from 15 mills per kilowatt hour for the first 150 kwh per kw of demand per month to 5 mills per kilowatt hour for all kwh in excess of 30,000 per month. A blocked resale credit ranging from 5 mills to 1 mill per kilowatt hour is made applicable to service rendered by the customer to utility customers purchasing small amounts of electric service. As applied to the City of Cairo, the application of Rate WR–4 instead of M–4 would result in a rate reduction of approximately $14,000 for the 12 month period ending December 31, 1963, at the two delivery points.

Included in the proffered filings is the following provision:

> And provided further, as to future extension of the limits of the City of Cairo, any new industrial customer who uses in excess of 100 kilowatts demand located in said extended city limits shall make the decision as to whether or not the City of Cairo or Georgia Power Company shall serve it electrical energy. All other customers located in said extended city limits shall be served by the City of Cairo unless Georgia Power Company is specifically requested by the City of Cairo to serve said customer; however, in the event of a new industrial customer, as defined above, which was caused to

* The various supplemental rate schedule designations to Georgia's Rate Schedule FPC No. 671 are for identification purposes only and do not assume prior effectiveness of Rate Schedule FPC No. 671 as a condition of operability of any supplements.

be located in said extended city limits by the efforts of Georgia Power Company, then Georgia Power Company shall have the right to serve said new industrial customer. An industrial customer is defined as any customer who is engaged in the manufacture of a finished product, the extraction, fabrication or processing of a raw material, or the transportation or preservation of a raw material, or a finished product, for use as motive power, or for other legitimate power requirements in the operation of his industrial plant. Incidental lighting necessary for proper operation of plant machinery or for office use on same premises may be included. No service may be resold, nor transmitted to other premises nor used in related commercial enterprise.

As indicated above, the Commission by order issued May 27, 1963, Docket No. E–7099, directed Georgia to justify the retention of certain restrictive provisions in its filed rate schedules for service to municipally-owned and cooperatively-owned utility systems. Among other things, that order questions the just and reasonableness of Georgia's Rate WR–4 and directs the Company to justify its restrictive provisions determining the type of loads which the Company's municipal and cooperatively-owned resale purchasers might undertake to serve, chiefly larger loads. To date, several settlement conferences have been convened in Docket No. E–7099 at the initiative of the Commission's staff as contemplated in our order of May 27, 1963, but no hearings have been held.

During those conferences, representatives of Georgia, the American Public Power Association, the Power Section of the Georgia Municipal Association and various municipal and cooperatively-owned wholesale customers of the Company stated their views and comments concerning dual rates and restrictive provisions. Their views have been reported to the Commission.

Although Georgia has proposed, informally, certain compromise arrangements for the dual rate and restrictive provisions challenged by our earlier order, agreement has not been reached among the Company and all of its affected customers. Georgia has stated its willingness to enlarge in some measure the areas within which it will afford unrestricted service to municipal and cooperatively owned customers.

A considerable number of its customers have indicated a willingness to agree to the new terms tentatively offered by way of settlement. However a substantial number of the municipal customers, together with a somewhat lesser number of the cooperatives have not agreed to these offers either because they believe that there should be no such dual rate or restrictive service agreements required as a condition of service (there are no service conditions in some of the municipal contracts) or because they believe the proposed increased ceilings are still too restrictive under the circumstances prevailing.

Under the circumstances, the Commission believes an opportunity for hearing on the questions raised by its order to show cause issued May 27, 1963, will facilitate a clarification of currently unresolved matters in Docket No. E–7099. This order consolidates for hearing purposes that docket with the order for hearing and suspension respecting Georgia's subject rate schedule submittals for service to the City of Cairo, Georgia.

The Commission further finds:

(1) It is necessary and appropriate for the purposes of the Federal Power Act, particularly Section 205, that the following rate schedules of Georgia be accepted for filing as that Company's rate schedules effective November 28, 1964 without hearing and suspension:

Supplement No. 1 to Rate Schedule F.P.C. No. 671.

Supplement No. 2 to Rate Schedule F.P.C. No. 671.
Supplement No. 1 to Supplement No. 3 to Rate Schedule F.P.C. No. 671.
Supplement No. 2 to Supplement No. 3 to Rate Schedule F.P.C. No. 671.

(2) As applied to Georgia's total rates or charges for service to the City of Cairo, Georgia, the resale credit provisions of Rate WR–4 and the above quoted restrictive service provisions may have the effect of restricting municipally-owned wholesale customers of Georgia from reselling to certain classes of customers power purchased from Georgia under rate schedules filed pursuant to the Federal Power Act. They constitute rates, charges or classifications, rules, regulations, practices or contracts affecting rates, charges, classifications and services subject to the jurisdiction of this Commission within the meaning of Sections 205 and 206 of the Federal Power Act which may be unjust, unreasonable, unduly discriminatory, preferential or otherwise unlawful.

(3) In view of the foregoing it is necessary and appropriate for the purpose of the Federal Power Act that the Commission pursuant to the authority of that Act, particularly Sections 205, 206, 308 and 309 thereof, enter upon a hearing concerning the lawfulness of Georgia's rate schedule FPC No. 671 and Supplement No. 3 thereto, and that the operation of that rate schedule and supplement be suspended and the use thereof be deferred as hereinafter provided. Unless suspended by order of the Commission, Georgia's Rate Schedule F.P.C. No. 671 and Supplement No. 3 thereto will become effective as a rate schedule pursuant to the provisions of the Federal Power Act on November 28, 1964.

(4) Consolidation of the hearing ordered herein in Docket No. E–7193 and the hearing in Docket No. E–7099 for hearing purposes is necessary and appropriate for the purposes of the Federal Power Act, particularly Sections 205, 206, 308 and 309 thereof.

The Commission orders:

(A) Georgia's Rate Schedules as referred to in finding (1) above are hereby accepted for filing to become effective November 28, 1964: *Provided, however:* Acceptance for filing does not constitute approval of any service, rate, charge, classification, or any rule, regulation, contract, or practice affecting such rate or service provided for in the Rate Schedules; nor shall acceptance be deemed as recognition of any claimed contractual right or obligation affecting or relating to such rate or service; and such acceptance is without prejudice to any findings or orders which have been or may hereafter be made by the Commission in any proceeding now pending or hereinafter instituted by or against Georgia Power Company.

(B) A public hearing shall be held concerning the lawfulness of Georgia's Rate Schedules FPC No. 671 and Supplement No. 3 thereto, and the rate schedule provisions cited by the Commission's order to show cause issued May 27, 1963; that hearing to be convened on February 15, 1965 at 10:00 a.m. (EST) in a hearing room of the Federal Power Commission, 441 G Street, N.W., Washington D.C. 20426.

(C) For purposes of the hearing ordered in paragraph (B) above, Docket Nos. E–7099 and E–7193 are hereby consolidated.

(D) Pursuant to the provisions of Section 205 of the Federal Power Act, the operation of Georgia's proposed Rate Schedule FPC No. 671 and Supplement No. 3 thereto are hereby suspended and the use thereof deferred until November 29, 1964. On that date the proposed rate schedules shall go into effect in the manner prescribed by Section 205 of the Federal Power Act, subject to further order of the Commission.

(E) During the period of suspension Georgia's currently filed Rate Schedule for service to the City of Cairo, Georgia shall remain and continue in effect.

(F) Unless otherwise ordered by the Commission, Georgia shall not change the terms or provisions of its proposed Rate Schedule FPC No. 671 and Supplement No. 3 thereto, or its currently filed rate schedules to be superseded thereby until this proceeding has been disposed of or until the period of suspension has expired.

(G) Notice of intervention or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C. 20426, in accordance with the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.37) on or before December 31, 1964.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

NATURAL GAS PIPELINE COMPANY OF AMERICA, DOCKET NO. CP65-97

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued November 25, 1964)

On October 12, 1964, Natural Gas Pipeline Company of America (Applicant) filed in Docket No. CP65-97 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale and delivery of an additional daily contract quantity of 2000 Mcf of natural gas to Interstate Power Company (Interstate), an existing customer of Applicant, all as more fully set forth in the application.

Interstate has requested an additional daily contract quantity of 2000 Mcf of gas commencing as soon as possible for resale by Interstate to Hawkeye Chemical Company, Interstate's largest firm industrial customer. Hawkeye now uses natural gas and will use the increased quantity as a raw material in the manufacture of agricultural fertilizers.

Applicant has unallocated system capacity sufficient to furnish the additional quantity of gas required.

No additional facilities will be required to make the proposed additional delivery.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on November 24, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Natural Gas Pipeline Company of America, a Delaware corporation having its principal place of business in Chicago, Illinois, is a "natural-gas company within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of October 13, 1942, in Docket No. G-235 (3 FPC 830).

(2) The proposed sale and delivery of natural gas by Applicant to Interstate Power Company, as hereinbefore described, and as more fully described in the application in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed sale and delivery of natural gas are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a) and (e) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity be and the same is hereby issued to Applicant, Natural Gas Pipeline Company of America, authorizing the sale and delivery of natural gas to Interstate Power Company, as hereinbefore described and as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are hereby conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a) and (e) of Section 157.20 of such Regulations.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

AREA RATE PROCEEDING, ET AL. (HUGOTON-ANADARKO AREA), DOCKET NO. AR64-1, ET AL.; AREA RATE PROCEEDING, ET AL. (TEXAS GULF COAST AREA), DOCKET NO. AR64-2, ET AL.

ORDER PRESCRIBING PROCEDURE

(Issued November 27, 1964)*

With the issuance of the presiding examiner's report on September 18, 1964, of the prehearing conference held July 28, 1964, in Docket No. AR64-1, *et al.* (Hugoton-Anadarko Area), and Docket No. AR64-2, *et al.* (Texas Gulf Coast Area), we have before us the question of the next steps that should be appropriately taken in these proceedings and of the method of conducting the two proceedings so as to avoid the needless repetition of the same evidence presented in Docket Nos. AR61-1 (Permian Basin Area) and AR61-2 (Southern Louisiana Area).

In his report the examiner stated that the producers generally took the position that further action in the present dockets should be deferred until the Commission had issued a decision in AR61-1 or AR61-2, that none indicated clearly a willingness to participate in group presentations, and that they were opposed to any consolidation whatsoever of the two proceedings. Nevertheless, the examiner was of the opinion that the Commission should proceed with these cases and provide for the compilation concurrently of separate records in such a way as to avoid the necessity to duplicate cross-examination or rebuttal.

---

*Reconsideration denied by order issued January 22, 1965, 33 FPC 99.

In addition, the examiner would have the Commission authorize the Chief Hearing Examiner and the hearing examiner designated in each of the two proceedings to coordinate and expedite the procedures. He contemplated that the hearing sessions in the two proceedings would be held separately, but where the evidence was identical in each proceeding, the separate hearings should be convened concurrently for the receipt of this evidence.

The examiner also recommended that each order setting these matters for hearing provide for the distribution and service in advance of the evidence to be presented and fix a date before which requests for data collection should be filed. The examiner noted that The Superior Oil Company requested that the staff undertake the collection of data on a broad survey basis from pipeline purchasers and gas distribution companies, but that the staff opposed this request.

The examiner added that his report was purely advisory and did not constitute a ruling or order within the purview of Section 1.18(d) of the Commission's rules.

A vigorous protest to the examiner's report was filed on October 5, 1964, by Continental Oil Company, Humble Oil & Refining Company, and Texaco Inc. They contend that the report does come within Section 1.18(d) of the rules and should have been circulated in advance. They argue at some length that, in view of the lengthy records already compiled in AR61–1 and AR61–2, it would be wasteful to proceed with the present proceedings until the earlier proceedings are determined. In any case, scheduling of steps in the present proceedings should not be carried out without further conference with counsel for the various parties. Placid Oil Company joins in this protest, emphasizing the burdens placed on small producers by several area proceedings progressing at the same time.

In our opinion, the examiner's report of the prehearing conference was not required by Section 1.18(d) of our rules to be submitted to the other parties. The examiner did not order the participants to do anything. He described what had taken place at the conference and made certain procedural recommendations. There was no requirement in our rules for submission of such a memorandum to the parties in advance.

We do not agree with the protesting parties that these proceedings should be halted until after we issue our decision in AR61–1 (Permian). The fact that the Commission expects shortly to decide the first of the area proceedings is a good reason for moving forward with the remaining proceedings. To proceed with the area proceedings on a seriatim basis would insure the additional delay that we are all trying to avoid. It is unrealistic and contrary to the public interest to delay these proceedings on the basis of an illusion that somehow a proceeding can be expedited by delaying the hearing. Our experience has been that postponements of hearings rarely dispose of cases and that the only sure road to progress is to proceed with the decision-making process. This we are determined to do.

The examiner's recommendations would be advantageous in eliminating duplicative presentations in these two proceedings, and some of his recommendations can be given effect. Moreover, we think it reasonable to go further and to try to avoid, to the extent possible, the *de novo* presentation of evidence that has already been presented in AR61–1 and AR61–2.

In the first two pending area rate proceedings, comprehensive evidentiary presentations were made on matters of nationwide significance. The presentations included voluminous case-in-chief and rebuttal testimony and exhibits and lengthy cross-examination of numerous witnesses. The character of the presentations was such that in many instances it is unlikely that their quality

and effectiveness could be improved upon in any substantial way by a retrial of such matters in the new area proceedings, which are presently being scheduled for hearing. In addition, the Commission expects to make any necessary findings on such matters in its final decisions in AR61–1 and AR61–2 on the basis of the comprehensive records developed.

Under the circumstances, it would be completely contrary to the efficient administration of the Natural Gas Act and to the concept of area proceedings, as designed, among other things, to save time and money, if the parties were to present the same evidence *de novo* in each proceeding, even with small additions and improvements, and to repeat the cross-examination. Accordingly, by this order we are instructing the hearing examiners appointed in the present proceedings to hold joint prehearing conferences before the presentation of evidence and to use every effort at those conferences and at other times to induce the parties to stipulate to evidence or to incorporate evidence by reference from the record in AR61–2 (or from AR61–1, if necessary). Of particular importance in this connection would be matters of nationwide significance relating to the natural-gas industry and not related to the operating characteristics of any particular geographical area. Some examples, listed here by way of illustration, include the following: (1) economic trend data on a nationwide basis (*i.e.*, the national supply picture, the national demand picture, the trend toward deeper drilling, the contention that deeper drilling is more costly, and the like); (2) the controversy whether there is effective competition in the natural-gas production industry; (3) industry institutional practices and characteristics; (4) rate of return studies applicable to the industry on a nationwide basis.

The Commission is reluctant at this stage to take action which will force incorporation by reference. It is our hope that this will not be necessary, but that the parties will develop procedures for using the material from the previous records where it is feasible to do so. We are instructing the examiners in the proceedings to report back to us if they do not obtain the cooperation of the parties in this respect.

In those cases where there is evidence, particularly of a nationwide character, which is not incorporated by reference from AR61–1 or AR61–2, but is to be presented in both AR64–1 and AR64–2, techniques should be employed as suggested by the July 28, 1964, conference examiner in order to avoid duplicative trials of such matters in each of the two proceedings. Thus, while we shall appoint a separate examiner in each proceeding and provide for the compilation of separate records, we shall instruct the examiners to consider the problem of duplicative presentations at the joint prehearing conferences and to hold joint hearing sessions where this is appropriate. At such initial or at succeeding conferences, the examiners should determine which evidence proposed to be presented is susceptible of presentation in joint hearing sessions and should schedule such sessions for this purpose.

Except where convened jointly, the hearing sessions in the two proceedings should be held separately with the examiner assuming his normal role. Where hearings are convened jointly, the two examiners would rule upon the evidence offered with respect to each proceeding. The records in AR64–1 and AR64–2, however, would be separate records but would each contain the identical transcript of the joint sessions and the exhibits received jointly. These provisions should in no way prevent the examiners in each proceeding from scheduling other separate conferences, where needed, to delineate the issues, to consider the order of presenting the evidence, to provide for group presentations, and to do everything necessary to complete the proceedings as expeditiously as possible.

With respect to The Superior Oil Company's request that the staff undertake the collection of data from pipeline purchasers and gas distributors, we shall leave this matter for rulings by the examiner in each of the proceedings as to relevance and practicality.

Coming to the matter of scheduling the actual hearings, we are met with the difficulty that the cost evidence derived from questionnaires circulated to the producers will probably not be ready before June of 1965. This is true because the collection of the data must be completed; it must be compiled on computer tape; and finally, after appraisal of its significance, it must be presented as exhibits ready for inclusion in the record. The presentation of appropriate rate design evidence would accompany the completion of the parties' direct case. However, all other evidence should be ready at an earlier date. We shall therefore require that proposed evidence on all matters other than cost evidence based on the Commission's questionnaire and rate design evidence in both AR64–1 and AR64–2 be submitted to the examiners and served on the parties by May 15, 1965, and rebuttal evidence by August 2, 1965, and that the first session in each hearing be held on September 14, 1965, with the parties ready to go forward with cross-examination. Whether the first session or any following sessions will be held jointly in the two proceedings shall be directed by the examiners.

With respect to cost evidence derived from the questionnaires and rate design evidence constituting the second phase of these hearings, we shall leave scheduling of prehearing conferences, submittals, and hearing sessions to the examiners.

The Commission orders:

(A) Mr. Max L. Kane and Mr. Dyer J. Taylor duly qualified and appointed hearing examiners, or their successors legally qualified, appointed and designated, are designated to preside at the hearings in Docket Nos. AR64–1 and AR64–2, respectively, including prehearing conferences, and are authorized and directed, in so doing, to exercise all of the functions and authority prescribed by the Adminstrative Procedure Act and this Commission's Rules of Practice and Procedure.

(B) The hearing examiners appointed in (A) above are instructed to use every effort to induce the parties to stipulate to evidence or to incorporate evidence by reference, including direct evidence, rebuttal and cross-examination, from the records in AR61–1 and AR61–2 instead of making a *de novo* presentation of the same or similar evidence. On their part, the parties are expected to cooperate in this objective. If they do not do so and progress is not made in incorporating such evidence where it is otherwise feasible, the examiners are directed to report this situation to the Commission with their recommendations.

(C) Separate records shall be compiled in AR64–1 and AR64–2, but in connection with matters not incorporated by reference but proposed for presentation in both AR64–1 and AR64–2, the examiners in both proceedings shall work out procedures under which there will be avoided, to the extent possible, the separate and duplicative trial in both such proceedings of substantially identical evidentiary presentations on such matters. In order to accomplish this objective, the examiners in AR64–1 and AR64–2 may direct under such circumstances that one set of witnesses and one set of testimony and exhibits should be used for such a presentation in both hearings, and that the cross-examination of such witnesses shall take place at some appropriate stage in a joint hearing session involving all parties in both cases, held before the two examiners sitting *en banc*, who shall rule on any questions that may arise. The record thus made in any such joint hearing session shall become a part of the record in each of the two separate proceedings.

(D) The examiners in each proceeding shall call joint prehearing conferences at an appropriate time before the presentation of evidence to consider the incor-

poration of evidence by reference as provided in (B) above, and the holding of joint hearing sessions as provided in (C) above. The examiners in each proceeding are authorized to hold such other conferences as they deem desirable and shall consider and rule upon proposals for the required submission of additional data and questionnaires, proposals for the utilization in evidence of published data, and such other matters as will simplify the issues, will expedite the proceedings, and carry out the objectives of Section 1.18(b) of our Rules.

(E) Proposed evidence, other than cost evidence derived from the questionnaires circulated to the producers, and rate design evidence shall be submitted to the examiners in AR64–1 and AR64–2 on or before May 15, 1965, and rebuttal evidence by August 2, 1965. The first session in each hearing shall be held on September 14, 1965, and the parties at that time should be ready to go forward with cross-examination.

(F) The examiners in each proceeding are instructed to determine dates for the receipt of evidence derived from the cost questionnaires and evidence on rate design, for the submission of rebuttal evidence on these matters, and for the convening of hearing conferences and hearing sessions.

(G) In all respects other than those set forth herein the examiner in each proceeding shall have complete control of the conduct of the proceedings, the scheduling of hearing conferences and hearing sessions separate or concurrent, and the presentation of evidence.

Commissioner Ross *dissenting.*

Ross, *Commissioner, dissenting:*

Almost a year ago to the day, the majority instituted these proceedings.[1] At that time, based on the Commission's "experience in the pending area rate proceedings", the Commission felt such institution "propitious", despite arguments to the contrary, because "the advance planning" resulting therefrom would be "of immeasurable value in disposing of attendant procedural questions arising in connection with proceedings of this scope". The very difficulties experienced herein thus far demonstrate the undesirability of insisting on the submission of evidence by May 15, 1965. One of the causes might well be the industry's lack of enthusiasm to help the Commission solve the problem. This, under the circumstances, is understandable though regrettable. However, we should not let this lack of cooperation, if such is the case, obscure the principal reason for the lack of progress. The real basic problem is the lack of standards, a matter which the courts and F.P.C. practitioners have emphasized.[2] This lack of standards makes group presentations extremely difficult if not impossible. In addition, incorporating *Southern Louisiana* data by reference which the majority envisions would be precluded in large measure because much of the evidence in that case will not have been cross-examined in time for incorporation here. Moreover, many of the parties—staff, producers and intervenors—are common to one or more area proceedings. The Commission has properly determined to expedite *Permian*. Its order here however, will detract from the ability of these parties to devote their attention to the remaining procedural steps in both the *Permian* and *Southern Louisiana* cases.

A relatively short postponement of the procedural steps would obviate these problems. With every likelihood of a Commission decision in *Permian* in the near future, all interested parties for the first time will know what their job is.

---

[1] See order issued November 27, 1963 and my dissent thereto, 30 FPC 1354 at 1358.

[2] *Margaret Hunt Hill* v. *F.P.C.*, 335 F. 2d 355.

They will know the basis upon which the Commission made its decision and will be in a position to introduce appropriate evidence in support of or in opposition to the various aspects of that decision. They will be spared futile months of compiling statistics and argument respecting what is relevant and what is not.

If the Commission adopts the nationwide approach employed by the Examiner in *Permian*, the Commission might then be willing to extend this proceeding to include all remaining producing areas, at least respecting nationwide issues. By this action however, the majority seems intent on freezing itself into an endless and frustrating duplication of area proceedings which, in principal part, are nationwide in scope.

For these reasons, a postponement of the procedural steps should have been granted. Actually, in my opinion, the majority is mistaken if it thinks this order will produce any expedition because these dates will in all probability be extended when the Permian decision is issued, if not before.

A sensible relaxation of the procedural dates in these cases is no confession of error by this Commission that producer regulation is unworkable. Rather, it would be characteristic of a quasi judicial agency that is realistic, determined to be administratively and procedurally fair to all parties, and cognizant of its principal most important task, *i.e.*, of establishing the standards needed to make progress in producer regulation.

The majority say, "the only sure road to progress is to proceed with the decision making process". Where have I heard that refrain before?[1] This attempt by the majority to make a show of progress without a true appreciation of the facts of life, in my opinion, tends to destroy the public's confidence, already weakened by earlier miscalculations, that we are making headway (which we are in *Permian* and *Southern Louisiana*) in producer regulation.

TRANSCONTINENTAL GAS PIPE LINE CORPORATION, COLUMBIA GULF TRANSMISSION COMPANY, UNITED FUEL GAS COMPANY, DOCKET NO. CP65-76

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued November 27, 1964)

On September 17, 1964, Transcontinental Gas Pipe Line Corporation (Transco), Columbia Gulf Transmission Company (Columbia Gulf) and United Fuel Gas Company (United Fuel), hereinafter referred to as Applicants, filed in Docket No. CP65-76, a joint application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of an emergency interconnection at the crossing of Transco's 30-inch main line and the westernmost part of Columbia Gulf's two 30-inch lines in Section 15, T-5-S, R-2-E, in Evangeline Parish, Louisiana, all as more fully set forth in the joint application.

The proposed emergency interconnection and the proposed emergency exchange of gas (contract dated August 14, 1964) provides for utilization of the proposed interconnection when either Transco or Columbia Gulf is confronted with an

---

[1] See *Hill* v. *F.P.C.*, *supra*, where in its eagerness to make haste without appropriate standards, the Commission "peedalled" backward.

emergency which can be alleviated by deliveries of natural gas from the other, repayment in kind to be made within 60 days unless a longer period is agreed upon. All receipts and deliveries by Columbia Gulf will be made for the account of United Fuel.

The estimated total cost of required facilities is $38,800, which will be defrayed from current funds of Transco and Columbia Gulf. The joint cost of interchange facilities is $27,000. United Fuel will not construct any facilities.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on November 24, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits submitted in support of the authorization sought, and upon consideration of the record finds and orders as hereinafter stated.

The Commission finds:

(1) Applicant, Transcontinental Gas Pipe Line Corporation, a Delaware corporation having its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of May 29, 1948, in Docket No. G–704 (7 FPC 24).

(2) Applicant, Columbia Gulf Transmission Company, a Delaware corporation having its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of November 5, 1958, in Docket No. G–15524 (20 FPC 681).

(3) Applicant, United Fuel Gas Company, a West Virginia corporation having its principal place of business in Charleston, West Virginia, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of September 9, 1958, in Docket No. G–13372 (20 FPC 347).

(4) The proposed emergency exchange of natural gas between the Applicants, and the construction and operation of the proposed facilities for the transportation and sale of natural gas in interstate commerce, as hereinbefore described and as more fully described in the joint application and exhibits in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(5) The aforesaid proposed exchange and delivery of natural gas on an emergency basis, and the construction and operation of facilities are required by the public convenience and necessity, and a certificate therefor should be issued as hereinafter ordered and conditioned.

(6) Applicants are able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder.

(7) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that Transco, Columbia Gulf and United Fuel, shall file their letter agreement dated August 14, 1964, covering the proposed emergency interconnection and service as a special rate schedule to their respective FPC Gas Tariffs' within 30 days after the date of issuance of this order.

(8) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicants' compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3), (c)(4) and (e) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity be and the same is hereby issued to the Applicants in this proceeding, jointly, authorizing the exchange and delivery of natural gas as hereinbefore described, and the construction and operation of facilities for the transporation and sale of natural gas in interstate commerce, as more fully described in the joint application and exhibits in this proceeding, subject to the jurisdiction of the Commission, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are hereby conditioned upon Applicants' compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3), (c)(4) and (e) of Section 157.20 of such Regulations.

(C) The facilities hereby authorized shall be completed and in actual operation, as provided by paragraph (b) of Section 157.20 of the aforesaid Regulations within 3 months of the date on which this order issues.

(D) Transco, Columbia Gulf and United Fuel shall file within 30 days after the issuance of this order their letter agreement dated August 14, 1964, as a special rate schedule to their respective FPC Gas Tariffs'.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

UNITED GAS PIPE LINE COMPANY, DOCKET NO. CP65-73

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued November 27, 1964)

On September 15, 1964, United Gas Pipe Line Company (Applicant) filed in Docket No. CP65-73 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction during the calendar year 1965 and the operation of routine field facilities to enable Applicant to take into its certificated main pipeline system natural gas which will be purchased from producers thereof, all as more fully set forth in the application.

The purpose of this "budget-type" application is to augment Applicant's ability to act with reasonable dispatch in contracting for and connecting to its pipeline system new supplies of natural gas in various producing areas generally coextensive with said system.

The total cost of the facilities covered by this application will not exceed a maximum of $2,000,000, with no single project to exceed a cost of $500,000, which costs are proposed to be financed from current working funds.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on November 24, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, United Gas Pipe Line Company, a Delaware corporation having its principal place of business in Shreveport, Louisiana, is a "natural-gas company"

within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of January 20, 1942, in Docket No. G–216 (3 FPC 3).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that Applicant should submit within 60 days after the expiration of the authorization granted hereinafter, a statement in compliance with Section 157.7(b) (3) of the Commission's Regulations under the Natural Gas Act.

(6) Public convenience and necessity require that the certificate hereinafter issued and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a) and (e) of Section 157.20 of said Regulations.

(7) The authorization hereinafter granted should be limited to construction during the calendar year 1965 and the total expenditures for facilities to be constructed thereunder should be limited to a maximum of $2,000,000, with no single project to exceed a cost of $500,000.

The Commission orders:

(A) Upon the terms and conditions of this order, a certificate of public convenience and necessity be and the same is hereby issued authorizing Applicant, United Gas Pipe Line Company, to construct during the calendar year 1965, the proposed facilities hereinbefore described, as more fully described in the application in this proceeding, and to operate such facilities only to take natural gas supplies from producers who have received authorization from the Commission to sell natural gas to said Applicant.

(B) Applicant shall submit within 60 days after the expiration of the authorization granted by paragraph (A) above a statement in compliance with Section 157.7(b) (3) of the Commission's Regulations under the Natural Gas Act.

(C) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a) and (e) of Section 157.20 of said Regulations.

(D) The authorization granted in paragraph (A) above is hereby limited to construction during the calendar year 1965, and the total expenditures for facilities to be constructed thereunder are hereby limited to a maximum of $2,000,000, with no single project to exceed a cost of $500,000.

AREA RATE PROCEEDING, DOCKET NO. AR61-1; CLAUDE E. AIKMAN, ET AL., DOCKET NO. G-18466, ET AL.; NORTH CENTRAL OIL CORPORATION (OPERATOR), ET AL., DOCKET NO. CI60-435, ET AL.

ORDER DENYING RECONSIDERATION OF DENIAL OF INTERVENTION AND GRANTING LEAVE TO FILE BRIEFS

(Issued December 1, 1964)

On November 19, 1964, Oklahoma Independent Petroleum Association (OIPA), stating that it represents approximately one thousand small producers of oil and gas in Oklahoma and Texas, and specifically in the Permian Basin, filed a motion for reconsideration of the denial by the Commission in 1961 of OIPA's petition for leave to intervene in this proceeding. In the alternative, OIPA moved for leave to file a brief on exceptions as amicus curiae. On November 23, 1964, motions were filed by Philadelphia Electric Company and by Associated Gas Distributors, a group of seventy public utilities distributing natural gas in some fifteen States, for leave to file briefs on exceptions as amici curiae. The movants urge that the precedents to be established in this leading case, if applied in other area rate proceedings to which the movants are parties, will affect them (or those whom they represent) both economically and in their legal rights.

Nothing has been advanced by OIPA in support of its motion for reconsideration which would cause us to grant its petition for leave to intervene at this late stage. We think, however, in view of the far-reaching effects of the precedents which may be established in this proceeding, that all the movants should be permitted to present their views as amici curiae, and the motions in this respect will be granted.

The Commission finds:

(1) The grounds for reconsideration set forth in the motion by Oklahoma Independent Petroleum Association for reconsideration of the denial of its petition for leave to intervene in this proceeding present no facts which would warrant any change or modification of our prior determination.

(2) Good cause exists for granting the motions for leave to file briefs on exceptions as amici curiae.

The Commission orders:

(A) Leave is hereby granted to Oklahoma Independent Petroleum Association to file a brief on exceptions as amicus curiae in this proceeding, and the brief attached to the motion filed November 19, 1964, is hereby accepted for filing.

(B) In all other respects the motion filed by Oklahoma Independent Petroleum Association on November 19, 1964, is hereby denied.

(C) Leave is hereby granted to Associated Gas Distributors and Philadelphia Electric Company to file briefs on exceptions as amici curiae in this proceeding, and the briefs attached by them to their motions of November 23, 1964, are hereby accepted for filing.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

CITY OF ALBANY, GEORGIA, DOCKET NO. CP65-59

FINDINGS AND ORDER DIRECTING PHYSICAL CONNECTION OF FACILITIES

(Issued December 2, 1964)

On August 31, 1964, the City of Albany, Georgia (Applicant) filed in Docket No. CP65-59 an application pursuant to Section 7(a) of the Natural Gas Act for an order of the Commission directing South Georgia Natural Gas Company (South Georgia) to establish a second physical connection of its transmission facilities on the side of the City of Albany. There is now a physical connection between the Applicant's distribution system at a point on the southeast side of the city and South Georgia's transmission system. The sale of Applicant's gas requirements is being made under an existing sales agreement; no additional gas is being sought by Applicant. Due to the growth of the city in the direction away from the present connection of facilities and the proximity of the growing section of the city to South Georgia's 12¾-inch high pressure gas line, the new connection will enable Applicant to better serve its customers with gas. This warrants construction of the connection herein sought.

The estimated cost of the facilities to South Georgia is $25,000. The estimated cost of the proposed connecting line of Applicant is $22,000.

On October 5, 1964, South Georgia filed an answer to Applicant's application wherein no objection to the requested order is raised. Applicant agrees to make the connection requested due to the factual situation existing in the area at the present time.

Due notice of the filing of the application and opportunity for hearing thereon has been published in the Federal Register on November 5, 1964 (29 F.R. 15001). No protest, petition to intervene or notice of intervention in opposition to the granting of the application has been filed.

The Commission finds:

(1) South Georgia Natural Gas Company, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of September 2, 1954, in docket No. G-1915.

(2) Applicant, City of Albany, is a municipality organized and existing under the laws of the State of Georgia and is authorized to sell and distribute natural gas to the inhabitants of said city. Applicant is now engaged in the business of buying natural gas from South Georgia and reselling it to the customers in that city.

(3) It is necessary and desirable in the public interest that South Georgia Natural Gas Company, construct and establish the physical connection of its facilities with the facilities of the Applicant at the point requested.

(4) The establishment of a second connection of facilities of South Georgia with the distribution system of Applicant will not place an additional burden upon it nor will it impair its ability to render adequate service to its existing customers.

The Commission orders:

The South Georgia Natural Gas Company be and is hereby directed to establish and maintain the physical connection of its natural gas transmission system with the Applicant's distribution system at the point described in the application, and to deliver a portion of the Applicant's gas requirements through said new connection to the Applicant.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

NATURAL GAS PIPELINE COMPANY OF AMERICA, DOCKET NO. CP65-96

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 2, 1964)

On October 12, 1964, Natural Gas Pipeline Company of America (Applicant), filed in Docket No. CP65-96, an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale and delivery of an additional Daily Contract Quantity of 1,000 Mcf of natural gas to Iowa Electric Light & Power Company (Iowa Electric) for resale to Monsanto Company, an existing industrial customer of Iowa Electric, all as more fully set forth in the application.

Applicant proposes to sell and deliver the additional contract demand quantity of 1,000 Mcf on a firm and non-interruptible basis to Iowa Electric with a presently effective daily contract quantity of 31,776 Mcf under Applicant's Rate Schedule CD-1. Iowa Electric will supply the gas to Monsanto for use as a raw material in the manufacture of agricultural fertilizers. No additional facilities are required.

After due notice no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on November 30, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought, and upon consideration of the record finds and orders as hereinafter stated.

The Commission finds:

(1) Applicant, Natural Gas Pipeline Company of America, a Delaware corporation having its principal place of business in Chicago, Illinois, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of November 7, 1958, in Docket No. G-9066 (20 FPC 694).

(2) The proposed sale and delivery of natural gas by Applicant to Iowa Electric Light & Power Company as hereinbefore described, and as more fully described in the application, in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed sale and delivery of natural gas is required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a) and (e) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity be and the same is hereby issued to Applicant, Natural Gas Pipeline Company of America, authorizing the sale and delivery of natural gas to Iowa Electric Light & Power Company, as

hereinbefore described and as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are hereby conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a) and (e) of Section 157.20 of such Regulations.

(C) Applicant and Iowa Electric Light & Power Company shall execute a superseding service agreement in accordance with the Commission's Regulations reflecting the increase in Iowa Electric's daily contract quantity of 1,000 Mcf, and file the same with the Commission within 30 days after the issuance of this order.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

NEVADA POWER COMPANY, DOCKET NO. E-7180

ORDER AUTHORIZING SALE OF FACILITIES

(Issued December 2, 1964)

Nevada Power Company (Applicant), incorporated under the laws of the State of Nevada and doing business in the State of Nevada, with its principal office at Las Vegas, Nevada, filed an application on August 31, 1964, for an order pursuant to Section 203 of the Federal Power Act, requesting authorization to sell certain facilities to Amargosa Valley Cooperative, Inc. (Amargosa) of Nye County, Nevada.

Applicant is an electric public utility corporation engaged in the generation, transmission and distribution of electric energy in Clark and Elko Counties, State of Nevada and in the transmission and distribution of electric energy in Nye County, State of Nevada. The territory served by Applicant centers around Las Vegas in southern Nevada and Elko in northeastern Nevada. The two systems are not interconnected.

During 1962, Applicant extended its lines to serve the Lathrop Wells-Amargosa Valley area in Nye County, about 90 miles northwest of Las Vegas. Subsequently, Amargosa Valley Cooperative, Inc., a Rural Electrification Administration financed cooperative, which at that time claimed not to be subject to the jurisdiction of the Public Service Commission of Nevada, constructed lines in the same area and also contracted for the transmission over its lines of a portion of the Atomic Energy Commission's power requirements to Jackass Flats at the Nevada Test Site. The Nevada State Legislature at its 1963 session passed an act which expressly placed electric cooperatives under the jurisdiction of the Public Service Commission.

On September 18, 1963, an Agreement was executed between Applicant and Amargosa, which provides for the sale of certain facilities and rights-of-way of Applicant in the Lathrop Wells-Amargosa Valley area to the Cooperative and a definition of service areas. The Agreement has been approved by the Public Service Commission of Nevada and the Rural Electrification Administration.

The facilities to be disposed of by Applicant in the Amargosa Valley-Lathrop Wells, Nevada area consist of approximately 53 miles of 34.5 kv three-phase distribution lines, line transformers, services, meters, metering equipment and rights-of-way to serve electrical energy to, as of June 30, 1964, 38 customers, and to deliver energy to Southern California Edison Company at the California state line. The main feeder line extends from the Rock Valley substation, located

on Applicant's 138 kv transmission line between Mercury and Jackass Flats to the community of Lathrop Wells, Nevada and south along State Highway 29 to the California border. Taps from the main feeder line supply electric energy to customers in Lathrop Wells, and ranches in the Amargosa Valley area. The feeder line connects with Southern California Edison Company facilities at the Nevada–California state line.

The application recites that the consideration will be $350,000 to be paid in cash. The consideration of $350,000 will be $32,893.42 less than original cost depreciated of $382,893.42. Therefore, the Applicant will have a loss of $32,893.42 on the sale of the facilities. The Applicant proposes to eliminate the loss of $32,893.42 by debits of $32,200 to Account 253, Other Deferred Credits, and of $693.42 to Account 426, Other Income Deductions.

After the proposed disposition, Amargosa intends to continue the use of the facilities for the same purposes as now used. The present Nevada Power Company-Southern California Edison Company contract dated July 26, 1962 for power supply at the California-Nevada state line is to remain in force and effect with no change in rates under the proposed sale of facilities.

In support of the application, Applicant states that since the Lathrop Wells-Amargosa Valley area is sparsely settled and within the foreseeable future its growth possibilities appear quite limited, it believes that on an economic basis the serving and development of the area cannot be supported or undertaken by more than one electric utility organization. Furthermore, Applicant believes that the Public Service Commission of Nevada in the exercise of its jurisdiction over both electric utility companies and electric cooperatives will not permit the duplication of facilities in the future such as occurred in the Lathrop Wells-Amargosa Valley area.

Written notice of the application has been given to the State of Nevada Public Service Commission and to the Governor of that State. Notice was also published in the Federal Register on September 17, 1964 (29 F.R. 13055), stating that any person desiring to be heard or to make any protest with reference to said application, should on or before October 5, 1964, file petitions or protests with the Federal Power Commission, Washington, D.C., 20426. No petition or protest or request to be heard in opposition to the granting of the application has been received.

The Commission finds:

(1) Applicant, a corporation, is a public utility within the meaning of Section 203 of the Federal Power Act subject to the jurisdiction of the Commission as heretofore described and set forth in the Commission's order issued December 29, 1960, *Southern Nevada Power Co.; Elko Lamoille Power Company*, Docket No. E–6966 (24 FPC 1211) (Nevada Power Company was then operating under the name of Southern Nevada Power Company).

(2) By the proposed sale of facilities, Applicant will dispose of part of its facilities subject to the jurisdiction of the Commission within the meaning and subject to the requirements of Section 203 of the Federal Power Act.

(3) The proposed sale of facilities of Applicant, as described above upon the terms and conditions set forth in the application and subject to the provisions of this order will be consistent with the public interest as expressed in Section 203 of the Federal Power Act.

The Commission orders:

(A) The proposed sale by Applicant of the aforementioned transmission line facilities and related rights-of-way all as described above, are authorized and approved upon the terms and conditions and for the purposes set forth in the application, subject to the provisions of this order.

(B) Applicant shall record the proposed transaction herein authorized and the facilities and properties referred to above as provided in the Commission's Uniform System of Accounts Prescribed for Public Utilities and Licensees.

(C) This authorization shall expire unless the transaction herein authorized and approved is consummated within 90 days from the date of issuance of this order.

(D) This authorization is without prejudice to the authority of this Commission or any other regulatory body with respect to rates, services, accounts, evaluation, estimates or determinations of cost, or any other matter whatsoever now pending or which may come before this Commission or any other regulatory body, and nothing herein shall be construed as an acquiescence by this Commission in any estimate or determination of cost or any valuation of property claimed or asserted by this Commission.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

SINCLAIR OIL & GAS COMPANY, ET AL., DOCKET NO. G–16760, ET AL.; HAWKINS & HAWKINS, ET AL., G–18077, ET AL.; TURNBULL & ZOCH DRILLING COMPANY, ET AL., G–17960, ET AL.

ORDER DENYING APPLICATIONS FOR REHEARING

(Issued December 2, 1964)

Applications for Rehearing and Reconsideration were filed in the above-styled proceedings by H. D. Bruns (Operator), *et al.*, (Bruns) and the Public Service Commission of the State of New York (New York Commission),[1] on October 26, 1964, and November 3, 1964, respectively. Both applications refer to the Order Granting and Denying in Part Motions and Petitions, issued October 5, 1964, 32 FPC 914, particularly Paragraph (A) thereof wherein the Commission deferred consideration of whether or not to require refunds from applicants whose certificates contain no express refund conditions. Bruns correctly infers from the order that refunds will be required as a matter of law from applicants whose authorizations do contain express conditions, and as such an applicant Bruns contends that the order is discriminatory and violative of procedural and substantive due process. Separately, and in addition, Bruns contends that our order is contrary to the decision of the Court of Appeals in *Callery Properties, Inc.* v. *F.P.C.*, 335 F. 2d 1004 (5th Cir., decided August 14, 1964, as Case No. 20872).

We do not believe that our action in denying Bruns and similar holders of conditioned certificates a hearing on the refund equities in any manner constitutes discrimination or denial of due process. The order issuing a conditioned temporary certificate is an appealable order,[2] and an applicant's acceptance thereof without appeal generates an absolute obligation to refund in accordance with the order; Bruns cannot now be heard to question for the first time on equitable grounds the binding character of a condition which has been thus imposed and accepted.

---

[1] The application filed by the New York Commission was styled to include the in-line price proceedings for Texas Railroad Districts 2, 3 and 4: Sinclair Oil & Gas Company, *et al.*, Docket No. G–16760, *et al.*; Hawkins & Hawkins, *et al.*, Docket No. G–18077, *et al.*; Turnbull & Zoch Drilling Co., *et al.*, Docket No. G–17960, *et al.* Bruns application was filed only in the Sinclair, *et al.*, proceeding.

[2] *Texaco Inc.* v. *F.P.C.*, 290 F. 2d 149, (5th Cir., 1961).

The decision of the court in the *Callery* case has been stayed in order to permit the Commission to seek review by the United States Supreme Court. In the meantime, Callery does not constrain us to disregard the conflicting decision of the Court of Appeals for the District of Columbia in *P.S.C.* v. *F.P.C.*, 329 F. 2d 242 (D.C. Cir. 1964). Union Texas Petroleum, *et al.*, Opinion No. 436–A, issued October 8, 1964, 32 FPC 952 at 955; Sun Oil Company, *et al.*, Opinion No. 445, issued October 26, 1964, 32 FPC 1183 at 1185.

The application for rehearing by the New York Commission urges that we vacate our order issued October 5, 1964, in Docket No. G–16760, *et al.*, and G–17960, *et al.*, and our order issued October 13, 1964, in Docket No. G–18077, *et al.*, which similarly deferred the refund question in the in-line price proceeding for Texas Railroad District No. 3.[2] The New York Commission contends that any delay resulting from deferral of the refund issue redounds to the disadvantage of the consumer and is inconsistant with the position taken by the Commission in *F.P.C.* v. *Tennessee Gas Transmission Company*, 371 U.S. 145 (1962). It is argued, moreover, that deferral of the refund issue has misled certain applicants selling gas under conditioned certificates, such as Bruns, to believe that they may contest the equity of refund obligations as imposed upon them.

We believe that a two-stage hearing and decision will expedite the decision on the initial rate for these sales and out weigh the disadvantage of a conceivable delay in resolving the refund issue. This is particularly true since the hearing on the initial rate question has already been completed and is pending before the examiner for decision. The New York Commission's discussion of the *Tennessee Case*, moreover, is inapposite to the present situation. There the Commission was fixing just and reasonable rates for the future and was faced with the likelihood of protracted hearings on a complex of issues arising under Section 4(e) of the Act. As in the present proceedings, other than the Hawkins & Hawkins, *et al.*, proceeding, the issues were heard separately in order to expedite the case as a whole. Here our decision, by severing the refund issue, will enable us to decide the appropriate initial rate for these sales much more promptly. The refund issue covers a past period and does not determine future rates to consumers. The procedure we have adopted is thus analogous to the procedure in the *Tennessee Case* rather than in conflict with it.

Finally, our denial herein of Bruns' application for rehearing should serve to dispel any doubt that refund obligations extend to applicants selling gas under expressly-conditioned temporary certificates.

The Commission orders:

The Applications for Rehearing and Reconsideration filed by H. D. Bruns and the Public Service Commission of the State of New York on October 26, 1964, and November 3, 1964, respectively, are hereby denied.

Commissioner Ross *concurring in part* and *dissenting in part.*

[2] *H. L. Hawkins & H. L. Hawkins, Jr., (Operator), et al.*, Docket No. G–18077, *et al.*, 32 FPC 991.

Ross, *Commissioner, concurring in part and dissenting in part:*

On January 23, 1964, the D.C. Circuit Court of Appeals held that the absence of a specific refund provision in a temporary certificate constituted an insufficient basis upon which to refuse to order any refunds.[1] The Supreme Court denied certiorari and the Commission thereafter provided for the filing of briefs and reply briefs on May 7, and May 18, 1964, respectively.[2] Over six months have elapsed since the filing of those briefs and we seem to be little closer to a decision.

[1] *P.S.C. of N.Y.* v. *F.P.C.*, 329 F. 2d 292 (D.C. Cir.)

[2] Amerada Petroleum Corporation, *et al.*, Docket No. CI62–1544, *et al.*, Commission's order issued April 30, 1964, 31 FPC 1041.

In these circumstances I dissent to the instant order as it relates to the *Hawkins & Hawkins* proceeding. There, the evidence has been submitted, the hearing has ended, briefs have been submitted and the case is ripe for decision by the presiding examiner. A decision on this issue by an independent hearing examiner might well be all that's needed to break the current logjam.

In addition, while it is true that the refund issue covers a past period, by this action we are extending the past into the future. As a result, the equities become more and more vested and difficult to disintangle. Moreover, the present consumers who have paid the price are interested in securing the sums due, if any, now and not in the indefinite future; see *F.P.C.* v. *Tennessee Gas Transmission Co.*, 371 U.S. 145 (1962).

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

TURNBULL & ZOCH DRILLING CO. (OPERATOR), ET AL., DOCKET NO. G-17960, ET AL.

ORDER GRANTING MOTIONS FOR CLARIFICATION

(Issued December 2, 1964)

On October 22, 1964, Clark Fuel Producing Company (Operator), *et al.*, Austral Oil Company Incorporated, K. D. Owen, *et al.*, and Appell Petroleum Corporation filed a joint motion for clarification of the following Commission orders in the above-entitled consolidated proceedings:

(1) "Order Severing Proceedings, Consolidating Proceedings, Cancelling Docket Numbers, Fixing Date for Prehearing Conference and Notice of Applications," issued May 28, 1964 [Unreported]; and

(2) "Order Granting and Denying in Part Motions and Petitions", issued October 5, 1964, 32 FPC 914.

On October 23, 1964, Continental Oil Company filed a telegram with the Secretary, joining the above-described joint motion. On November 3, 1964, Bright & Schiff filed a motion for clarification of the same orders, substantially adopting the arguments of the above-named movants, and, in addition, for clarification of our "Order Denying Alternative Motions for Rehearing of Order Consolidating Proceedings for Hearing or for Severance", issued September 11, 1964 [Unreported]. All of the above-named applicants will be referred to collectively as movants.

Movants state that originally they understood that the May 28, 1964, order instituting this consolidated proceeding was a procedural order consolidating the various applications for administrative convenience and that such consolidation was without substantive significance insofar as the decision to be rendered in each docket was concerned. They state, however, that the following language contained in our order of October 5, 1964, *supra*, leads them to question whether their original interpretation of the May 28, order was correct:

> These consolidations for hearing of virtually all pending producer applications relating to Railroad Districts 2 and 4 were in keeping with our policy of utilizing area approach to producer regulation in both certificate and Sections 4 and 5 rate matters. (p. 914).

Movants state that they assume this use of an "area approach" in certificate matters is merely a reference to our policy of consolidating various certificate applications proposing sales from a particular area for the purposes of hearing and the issuance of a single decision covering the individual applications, but movants fear that this "area approach" may have a substantive effect on the

decision to be rendered. They fear that the order of consolidation might in some way limit the presiding examiner's consideration of the evidence presented on the price issues. They refer to the presiding examiner's comment upon sales comparisons that he is bound by the order of consolidation (Tr. 1606–1608). They do, however, recognize his further comments that the question of comparability of sales is a matter to be argued in briefs. (Tr. 1616–1617).

Movants original interpretation of our May 28, order, *supra*, is correct. It is a procedural order and was not intended to effect the substantive issues including comparability of sales. It appears that the presiding examiner so interpreted this order at Transcript 1616–1617 when he stated that the matter was open to argument in the briefs filed. The questions of comparability of sales in Section 7(c) producer certificate cases should be decided upon the evidence presented in the proceeding.

Since the primary relief sought is granted herein, the alternative motions for severance are deemed moot.

The Commission orders:

The motion for clarification or alternatively motion for severance filed on October 22, 1964, by Clark Fuel Producing Company (Operator), *et al.*, Austral Oil Company, Incorporated, K. D. Owen, *et al.*, and Appell Petroleum Corporation (Operator), *et al.*, adopted by Continental Oil Company on October 23, 1964, and the motion for clarification or alternatively motion for severance filed by Bright & Schiff on November 3, 1964, are hereby granted to the extent set forth herein.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

W. H. DENNIS AND SON NATURAL GAS COMPANY, DOCKET NO. CP65-67

FINDINGS AND ORDER DIRECTING PHYSICAL CONNECTION OF FACILITIES AND SALE OF NATURAL GAS

(Issued December 2, 1964)

On September 11, 1964, W. H. Dennis and Son Natural Gas Company, a public utility company, (Applicant) filed in Docket No. CP65-67 an application pursuant to Section 7(a) of the Natural Gas Act for an order of the Commission directing The Ohio Fuel Gas Company to establish a physical connection of its natural gas transportation facilities with the proposed facilities of the Applicant at a point in Wood County, Ohio, and to sell and deliver natural gas to Applicant for resale in the Village of West Millgrove, Ohio, and to customers along the 3-inch and 2-inch pipeline leading from the point of connection to the said village distribution system.

Applicant states that it is now engaged in selling and distributing gas to the inhabitants of West Millgrove from local production but that the supply from this source is not adequate to meet its present and future requirements, and that there is a need for additional volumes up to 164 Mcf per day on peak days and 12,000 Mcf in the third year and thereafter.

Applicant states that the estimated cost of its proposed facilities is $29,045, which will be financed from current funds.

On October 5, 1964, The Ohio Fuel Gas Company filed its answer to the application herein advising that it had no objection to the issuance of the order requested by the Applicant.

Due notice of the filing of the application and opportunity for hearing thereon has been given by publication in the Federal Register on November 5, 1964 (29 F.R. 15001). No protest, petition to intervene or notice of intervention in opposition to the granting of the application has been filed.

The Commission finds:

(1) The Ohio Fuel Gas Company is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of August 21, 1945, in Docket No. G–371 (4 FPC 1033).

(2) Applicant is a public utility company in the State of Ohio and is authorized to construct and operate the facilities proposed and to distribute and sell natural gas to the inhabitants of the Village of West Millgrove and to customers along its pipeline leading to West Millgrove.

(3) It is necessary and desirable in the public interest that The Ohio Fuel Gas Company be directed to establish a physical connection of its transportation facilities with the facilities proposed by Applicant and to sell and deliver natural gas to the Applicant its daily and annual requirements, as set forth in the application and as hereinafter ordered and conditioned.

(4) The requirement that The Ohio Fuel Gas Company serve the Applicant as requested will not place an undue burden upon it nor impair its ability to render adequate service to its existing customers.

The Commission orders:

(A) The Ohio Fuel Gas Company be and is hereby directed to establish physical connection of its natural gas transmission system with the proposed facilities of the Applicant and to sell and deliver up to 164 Mcf of natural gas per day to Applicant, all as hereinbefore stated and as more fully described in the application.

(B) Applicant shall be prepared to receive natural gas from The Ohio Fuel Gas Company within one year from the date of this order.

(C) Applicant shall execute a service agreement with The Ohio Fuel Gas Company in accordance with the Commission's Regulations.

(D) The Ohio Fuel Gas Company shall report to the Commission in writing the date of commencement of service to Applicant within ten days thereof.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

MERCED IRRIGATION DISTRICT, PROJECT NO. 2179

ORDER AMENDING LICENSE (MAJOR) AND APPROVING REVISED EXHIBITS

(Issued December 3, 1964)

Application was filed on May 27, 1964, and supplemented on June 18 and July 27, 1964, by Merced Irrigation District (Applicant), licensee for proposed Project No. 2179, for amendment of its license for the project to authorize by approval of revised exhibits pursuant to Article 36 of the license, certain changes in the project works. The project is to be located on Merced River, County of Mariposa, California, and affects public lands of the United States.

The amendment and proposed changes thereunder would make the following changes to the project works: (1) the Exchequer reservoir pool would be increased from elevation 865 to 867 feet; (2) the spillway would be changed by the deletion of two of eight gates and the addition of an emergency uncontrolled

spillway section about 1080 feet long with crest at elevation 868 feet; (3) the generators at the Exchequer power plant would be changed from two units at 40,000 kilowatts each (80,000 kilowatts total capacity) to one unit at 80,100 kilowatts; (4) the McSwain (formerly referred to as the afterbay) development would be changed from a concrete gravity gated spillway and power intake sections with rock-fill abutment sections to a rock-fill structure with impervious core, a concrete power conduit extending through the dam and an uncontrolled spillway on the left abutment; and (5) the generator at the McSwain power plant would be increased from 7,000 to 9,000 kilowatts.

The change in the reservoir elevation at Exchequer reservoir was made to satisfy requests of the U.S. Corps of Engineers and the California Department of Water Resources relating to spillway capacity. The increase in storage capacity of 16,000 acre-feet will have some value for irrigation supply and power generation. The changes in the design at the McSwain dam were required as the result of extensive foundation explorations made at the site. Other structural and design changes were the result of detailed studies and analysis to provide the most economical project to satisfy design criteria. The changes in design of the project structures of both the enlarged Exchequer and McSwain developments result in a savings of about $700,000. The stability analyses submitted by Applicant was reviewed by our staff and the project structures for the Exchequer and McSwain developments of Project No. 2179 have been found to be safe and adequate for the development of the head in the reach of the river involved.

The Department of the Interior, in commenting on the application, stated that the proposed structural change of the McSwain afterbay dam from a concrete gravity to a rock-fill or earth-fill type, and the raising of the elevation of Exchequer dam, could result in significant losses to downstream fish resources through excessive siltation and debris deposition induced by construction activities, particularly if rock-washing techniques are employed. The Department recommended that Commission approval of the amendment be contingent upon the development and implementation of adequate water pollution prevention measures by Applicant, acceptable to the California Department of Fish and Game and the Department's Bureau of Sport Fisheries and Wildlife.

The California Department of Fish and Game, by telegram received in the Commission on November 14, 1964, recommends that Applicant comply with seven stated conditions to protect salmon spawning areas in the Merced River downstream from Pacific Gas & Electric Company's licensed Merced Falls Project No. 1335. The conditions relate to inspection, reporting, and standards pertaining to turbidity and settleable solids as measured immediately below the Merced Falls dam and Crocker-Huffman diversion dam during project construction, together with provisions for debris disposal. Compliance with these conditions is imposed by Article 50, as hereinafter provided.

Discussions between representatives of the Department of the Interior and Commission staff have disclosed that the Department had participated with Applicant and the California Department of Fish and Game concerning the fish problem and the Department is in agreement with the conditions recommended by the California Department of Fish and Game, and that Interior's Bureau of Sport Fisheries and Wildlife desires to participate in the inspection and reporting of the program.

Article 48 of the license for Project No. 2179 requires Applicant to cooperate with the Central California Archeological Foundation in the possible archeological survey and salvage and to compensate for expenses incurred but not to exceed

$6,000. In this connection, the Department of the Interior advises that the raising of Exchequer dam will flood the site of Bagby, California, a point of importance in California's mining history, and Interior recommends that $500 of the $6,000 for archeological survey and salvage should be provided for a survey of the historical values in the Bagby site area to be flooded.

The Corps of Engineers has approved the revised plans and specifications of the project structures insofar as they affect the functional flood control features.

The installed generating capacity of the Exchequer and McSwain developments will be increased, as shown on revised Exhibit M, from the presently authorized capacity of 116,000 to 119,000 horsepower.

The Commission finds:

(1) Public notice of the application has been given. No protests or petitions to intervene have been received.

(2) The following-described revised exhibits filed June 18, 1964, conform to the Commission's rules and regulations and should be approved as part of the license for the project:

Exhibit	FPC No.	Showing
J	2179-42	General plan.
		New Exchequer Dam
L-1	2179-43	Reservoir map.
L-2	-44	General plan.

L-29	-71	Powerhouse—single line diagram.
M	Comprised of two typewritten sheets, signed June 16, 1964, and filed June 18, 1964.	

(3) The following-described exhibits now part of the license and which have been superseded should be eliminated from the license for the project:

Exhibit	FPC No.	Showing
J	2179-24	General map.
L	-31	General plan, exchequer development.
	-32	Typical details, exchequer development.
	-33	General plan, Afterbay Dam.
	-34	Typical details, Afterbay Dam.
	-37	Dike and spillway exchequer development.
M	Comprised of two typewritten pages, signed January 29, 1963.	

The Commission orders:

(A) The license for Project No. 2179 is hereby amended, effective as of December 1, 1964, as follows:

Article 49 of the license is amended to read as follows:

Article 49. The Licensee shall pay to the United States the following annual charges:

(i) For the purpose of reimbursing the United States for the costs of administration of Part I of the Act, a reasonable annual charge in accordance with the provisions of Part II of the Commission's regulations, in effect from time to time. The authorized installed capacity for such purposes is 119,000 horsepower.

(ii) For the purpose of recompensing the United States for the use, occupancy and enjoyment of its lands, an amount to be determined hereafter by the Commission.

(B) Of the sum of $6,000 specified in Article 48 of the license, a sum not exceeding $500 shall be made available by the Licensee under Article 48 for a survey of the historical values of the Bagby site area to be flooded.

(C) The following additional article is hereby added to the license:

Article 50. Until further order of the Commission, the Licensee shall during the construction of the project works comply substantially with the conditions set forth in telegram received by the Commission on November 14, 1964, from the California Department of Fish and Game, which is on file with the Commission, and a copy of which has been furnished to the Licensee, pertaining to inspection, reporting and standards relating to turbidity and settleable solids in the Merced River as measured immediately below Merced Falls dam and Crocker-Huffman dam, together with provisions for debris disposal.

(D) The revised exhibits described in finding (2) above are hereby approved as part of the license for the project.

(E) The superseded exhibits described in finding (3) above are hereby eliminated from the license for the project.

(F) This amendment in the manner set out above shall not operate to alter or amend the license in any other respect, and shall not in any way constitute a waiver of any other part, provision or condition of the license.

(G) This order shall become final 30 days from the date of its issuance unless application for rehearing shall be filed as provided in Section 313(a) of the Act, and failure to file such an application shall constitute acceptance of this license amendment. In acknowledgement of the acceptance of this license amendment, it shall be signed for the licensee and returned to the Commission within 60 days from the date of issuance of this order.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

PAN AMERICAN PETROLEUM CORPORATION, ET AL., DOCKET NO. RI63-481, ET AL.[1]

ORDER DENYING MOTION FOR RECONSIDERATION

(Issued December 3, 1964)

El Paso Gas Company on November 3, 1964, filed a motion for reconsideration[2] of our order of October 9, 1964, 32 FPC 966, herein deferring action on the

[1] Additional proceedings involved in this order are printed, *supra*, p. 968.

Footnotes *continued* on following page.

legality of certain increased rate filings pending final determination of the complaint filed by Pan American Petroleum Corporation (Pan American) in the District Court of Lea County, State of New Mexico. That complaint requested a declaratory order which would determine and establish the contractual right of Pan American to tax reimbursement based on the 2.55% tax paid under the April 1, 1963, Tax Act as a new tax or an increase in tax. El Paso in answer to Pan American's complaint claims, *inter alia*, that the proper contractual tax reimbursement is based on a 0.55% tax calculation.

A determination of the question of the contractual basis for the tax reimbursement increases filed by these producers involves an interpretation of state statutes which is now pending in a New Mexico state court. For this reason we deferred Commission action pending state court ruling on the question of statutory interpretation.

El Paso states, *inter alia*, in its motion for reconsideration that (1) the Commission does not have discretionary power to defer action here after having decided to suspend these rates but is required under Section 4(e) to decide these questions as speedily as possible citing *Minneapolis Gas Company* v. *F.P.C.*, 294 F. 2d 212; (2) the procedure followed here will permit the producers to collect the increased rates involved here indefinitely; and (3) the October 9 order ignores the fact that Pan American by requesting the New Mexico Court to enter judgment against El Paso for the contractual amounts determined to be due it is seeking relief far beyond an interpretation of state statutes and involves an obvious attempt to circumvent the Commission's jurisdiction.

In the Minneapolis case the Court ruled that the Commission had no power to terminate a suspension proceeding after the case had gone to hearing and an examiner's decision had been issued without determining the justness and reasonableness of the increased rates involved. That case is inapposite here where we are simply deferring action pending resolution of the question of statutory interpretation of a state law question by a state court.

We do not agree with El Paso's claim that the procedure followed here will cause any delay in the ultimate resolution of this question. On the contrary, this question has been fully briefed in a state court proceeding which, as El Paso indicates, is already *sub judice*.

As we pointed out in the October 9 order, the ultimate determination of the justness and reasonableness of the subject rates is within the exclusive jurisdiction of this Commission. No relief may be properly granted by the New Mexico court which would invade such jurisdiction, but this does not mean that the state court cannot or will not decide the threshold state law question which has been presented to it. Of course, should the state court action be terminated for any reason without such determination or should it be unduly delayed, we shall decide our future course of action in the light of the circumstances then prevailing.

The Commission orders:

For the reasons set forth above, the motion for reconsideration filed by El Paso on November 3, 1964, is hereby denied.

Footnotes—*Continued.*

[2] El Paso termed its motion as an "Application For Reconsideration Or, In The Alternative, For Rehearing". An application for rehearing of an interlocutory order, such as involved here, may not properly be filed. [Section 1.30(e) of the Rules of Practice and Procedure (18 CFR 1.30(e)]. The instant tender has been considered as a motion for reconsideration pursuant to Section 1.12 of the Commission's Rules of Practice and Procedure.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

PUBLIC SERVICE COMPANY OF OKLAHOMA, DOCKET NOS. E-7179 AND E-7196

ORDER ACCEPTING RATE SCHEDULE FOR FILING, EFFECTING RATE REDUCTION, INITIATING RATE INVESTIGATION, PROVIDING FOR HEARING AND CONSOLIDATING PROCEEDINGS

(Issued December 3, 1964)

By this order, the Commission accepts for filing a proposed rate schedule submittal of Public Service Company of Oklahoma (Public Service) effecting a rate reduction of approximately $2350 annually to the City of Duncan, Oklahoma; initiates a rate investigation as to the lawfulness of Public Service's contractual arrangements for terminating wholesale electric service to Duncan, as well as to Altus, Oklahoma, another wholesale electric customer of the Company; and consolidates, for hearing purposes, that proceeding with a rate suspension proceeding involving a similar contractual provision of the Company relative to the City of New Cordell, Oklahoma, *Public Service Company of Oklahoma*, Order issued August 26, 1964, Providing for Hearing and Suspension of Proposed Rate Schedule Change, Docket No. E-7179 [Unreported].

The reduced rates and charges embodied in the proffered rate schedule for service to Duncan reflect a revision of Public Service's fuel adjustment clause. That clause will be changed to reflect the current over-all system heat rate of 12,000 BTU/kwh (formerly 20,000 BTU/kwh), adjusted for losses and the base price of current fuel costs. The need for such revision was previously called to the Company's attention by this Commission.

Public Service submitted its rate schedule reducing its rates to Duncan on November 5, 1964, with the request that the proffered schedule be permitted to take effect as a filed rate schedule of the Company pursuant to Section 205 of the Federal Power Act on October 26, 1964, or if that be denied, 30 days after filing, December 6, 1964. The proposed schedule is identified in the files of the Commission as Supplement No. 3 to Public Service's Rate Schedule FPC No. 126.

In granting the requested effective date of October 26, 1964, and in ordering the rate investigation and hearing hereinafter provided, the Commission will give full effect to the Company's intent to pass along the benefits of the reduced rates and charges to Duncan, commencing with the billing period October 26, 1964, and still permit full and effective Commission consideration of the lawfulness of contractual provisions set forth in Supplement No. 3 to Public Service's Rate Schedule No. 126, providing for termination of Public Service's contractual undertaking to serve Duncan in the event of Commission ordered rate decreases to the City.

The questioned contractual provisions included within the terms of Supplement No. 3 are as follows:

> In the event any regulatory body having jurisdiction thereof should lawfully establish an increase in the rate set forth in Exhibit "A", attached hereto, to the damage of City, the City shall have the option at any time thereafter to terminate and cancel this supplemental contract, the original contract of October 1, 1951, and the supplemental contract of March 25, 1958, by giving 30 days notice in writing to Company at Tulsa, Oklahoma, of its intention so to terminate same. Likewise, in the event any regulatory body having jurisdiction thereof should lawfully decrease the rate chargeable to the City, as set out in Exhibit "A", to the damage of Company, Company shall have the option at any time thereafter to terminate and cancel this

supplemental contract, the original contract of October 1, 1951, and the supplemental contract of March 25, 1958, upon 30 days notice in writing to City of its intention so to terminate same.

A similar contractual provision appears as a part of the Company's currently filed rate schedule for service to the City of Altus, Oklahoma, Public Service's Rate Schedule FPC No. 23, Supplement No. 5 thereto. And as noted above, by order issued August 26, 1964, the Commission suspended and set for hearing a contractual provision of this type included within Public Service's Rate Schedule FPC No. 159, Supplement No. 2, for service to the City of New Cordell, Oklahoma.* To date, no hearing has been held in Docket No. E–7179.

The Commission further finds:

It is necessary and appropriate for the purposes of the Federal Power Act (particularly Sections 205, 206, 308 and 309 thereof) and the Commission's Regulations thereunder that:

(a) Supplement No. 3 to Public Service's Rate Schedule FPC No. 126 be accepted for filing and allowed to take effect as that Company's rate schedule effective October 26, 1964, good cause having been shown that the 30-day notice period provided in Section 205(d) of the Federal Power Act be waived with respect thereto;

(b) the Commission enter upon a hearing concerning the lawfulness of Public Service's Rate Schedule FPC No. 23, Supplement No. 5 thereto, and FPC No. 126, Supplement No. 3 thereto, inasmuch as the afore-mentioned contractual provisions set forth therein may have the effect of unduly restricting this Commission in carrying out its regulatory duties under the provisions of the Federal Power Act and may be unjust, unreasonable or discriminatory and, therefore, unlawful; and

(c) the investigation and hearing ordered with respect to the lawfulness of Public Service's Rate Schedule FPC No. 23, Supplement No. 5 thereto, and FPC No. 126, Supplement No. 3 thereto (Docket No. E–7196), be consolidated for hearing purposes with the hearing as to the lawfulness of Public Service's Rate Schedule FPC No. 159, Supplement No. 2 thereto (Docket No. E–7179).

The Commission orders:

(A) The 30-day notice period provided in Section 205(d) of the Federal Power Act is hereby waived with respect to Public Service's Rate Schedule FPC No. 126, Supplement No. 3 thereto, and that supplemental rate schedule is hereby allowed to take effect as of October 26, 1964; *Provided, however:* nothing contained herein shall be construed as a waiver in any other respect of the requirements of Section 205(d) of the Federal Power Act and this acceptance for filing does not constitute approval of any service, rate, charge, classification, or any rule, regulation, contract or practice affecting such rate or service provided for in that rate schedule, nor shall acceptance be deemed as recognition of any claimed contractual right or obligation affecting or relating to such rate or service, and such acceptance is without prejudice to any findings herein or which the Commission may make hereafter in Docket Nos. E–7179 and E–7196 or any other proceeding now pending or hereafter instituted by or against Public Service.

---

*That order provides in part as follows:

The clause set out above may have the effect of unduly restricting this Commission in carrying out its regulatory duties under the provisions of the Federal Power Act. Such clause constitutes a contract affecting rates, charges or classifications within the meaning of Section 205 of the Federal Power Act and may be unjust, unreasonable, or discriminatory and, therefore, unlawful.

(B) The issuance of this order shall constitute full notice of the filing and publication of the afore-mentioned supplemental rate schedule insofar as its effective date is concerned.

(C) A public hearing shall be held concerning the lawfulness of Public Service's Rate Schedule FPC No. 23, Supplement No. 5 thereto, and FPC No. 126, Supplement No. 3 thereto, at a time and place to be fixed by further order of the Commission, Docket No. E–7196.

(D) For purposes of the hearing ordered in Docket No. E–7196 and the hearing previously directed by order of the Commission issued August 26, 1964, in Docket No. E–7179, those dockets are hereby consolidated, the time and place of the consolidated hearing to be fixed by further order of the Commission.

(E) Notices of intervention or petitions to intervene in Docket No. E–7196, may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.37) on or before December 31, 1964.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

COLUMBIA GULF TRANSMISSION COMPANY, DOCKET NO. CP65–32

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 4, 1964)

On August 5, 1964, Columbia Gulf Transmission Company (Applicant), filed in Docket No. CP65–32 an application for a certificate of public convenience and necessity pursuant to Section 7(c) of the Natural Gas Act authorizing the construction and operation of approximately 4.8 miles of 16-inch pipeline extending southerly from a point of connection of Applicant's East Lateral System with a point located on Grand Isle, Jefferson Parish, Louisiana, together with a measuring station in connection therewith in said Parish, and the transportation of natural gas, all as more fully set forth in the application.

Applicant proposes to transport for the account of United Fuel Gas Company natural gas produced by Humble Oil & Refining Company from the West Delta and Grand Isle areas, offshore Louisiana. Deliveries commencing with 25,000 Mcf daily in 1964, will increase to approximately 100,000 Mcf daily in 1970.

The proposal of Applicant is in implementation of the program initiated in Docket No. CP64–1 [1] to increase its pipeline system capacity by 114,000 Mcf daily, and enable it to transport for its sole customer, the United Fuel Gas Company, a total of 972,500 Mcf daily commencing with the 1964–65 winter season. United Fuel on June 28, 1963, entered into long-term purchase agreements with Humble Oil & Refining Company (Humble) and Isaac Arnold, *et al.*, providing for the delivery into Applicant's system in southern Louisiana of approximately 6.2 trillion cubic feet of natural gas at daily volumes ranging from an initial level of 235,000 Mcf to a maximum of 765,000 Mcf on November 1, 1969, and thereafter. Humble in order to insure availability of gas required under the contract agreed to use its best-efforts commencing on November 1,

[1] Sale certificated by Commission order issued November 15, 1963, in Docket No. CP64–1. 30 FPC 1297.

1968, to discover new reserves of gas in the area of named fields in Parishes within the vicinity of the pipeline system of Applicant in Louisiana and adjacent offshore areas between the Pecan Island Field on the west and the Venice Field in Plaquemines Parish, Louisiana, on the east. In conformity with the agreement of June 28, 1963, Humble by amendment dated July 22, 1964, committed to United Fuel reserves estimated to consist of 500,000 MMcf at 15.025 psia. To attach these additional reserves, Applicant seeks authorization herein for the proposed facilities.

The estimated cost of the proposed facilities is $837,600 and will be defrayed from Applicant's current funds.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on November 30, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits submitted in support of the authorization sought, and upon consideration of the record finds and orders as hereinafter stated.

The Commission finds:

(1) Applicant, Columbia Gulf Transmission Company, a Delaware corporation having its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of November 5, 1958, in Docket No. G–15524 (20 FPC 681).

(2) The proposed construction and operation of facilities and transportation of natural gas by Applicant as hereinbefore described, and as more fully described in the application and exhibits in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid construction and operation of facilities and transportation of natural gas are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3), (c)(4) and (e) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity be and the same is hereby issued to Columbia Gulf Transmission Company in this proceeding, authorizing the construction and operation of facilities and the transportation of natural gas as more fully described in the application and exhibits in this proceeding, subject to the jurisdiction of the Commission, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are hereby conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3), (c)(4) and (e) of Section 157.20 of such Regulations.

(C) The facilities hereby authorized shall be completed and placed in actual operation, as provided by paragraph (b) of Section 157.20 of the aforesaid Regulations within 12 months of the date on which this order issues.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

KANSAS-NEBRASKA NATURAL GAS COMPANY, INC., DOCKET NO. CP65-80

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 4, 1964)

On September 21, 1964, Kansas-Nebraska Natural Gas Company, Inc. (Applicant) filed in Docket No. CP65-80 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction during the calendar year 1965 and the operation of routine field facilities to enable Applicant to take into its certificated main pipeline system natural gas which will be purchased from producers thereof, all as more fully set forth in the application.

The purpose of this "budget-type" application is to augment Applicant's ability to act with reasonable dispatch in contracting for and connecting to its pipeline system new supplies of natural gas in various producing areas generally coextensive with said system.

The total cost of the facilities covered by this application will not exceed a maximum of $1,550,000, with no single project to exceed a cost of $385,000, which costs are proposed to be financed from current working funds.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on November 30, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Kansas-Nebraska Natural Gas Company, Inc., a Kansas corporation having its principal place of business in Phillipsburg, Phillips County, Kansas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of April 6, 1943, in Docket No. G-259 (3 FPC 966).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that Applicant should submit within 60 days after the expiration of the authorization granted hereinafter, a statement in compliance with Section 157.7(b)(3) of the Commission's Regulations under the Natural Gas Act.

(6) Public convenience and necessity require that the certificate hereinafter issued and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a) and (e) of Section 157.20 of said Regulations.

(7) The authorization hereinafter granted should be limited to construction during the calendar year 1965 and the total expenditures for facilities to be constructed thereunder should be limited to a maximum of $1,550,000, with no single project to exceed a cost of $385,000.

The Commission orders:

(A) Upon the terms and conditions of this order, a certificate of public convenience and necessity be and the same is hereby issued authorizing Applicant, Kansas-Nebraska Natural Gas Company, Inc., to construct during the calendar year 1965, the proposed facilities hereinbefore described, as more fully described in the application in this proceeding, and to operate such facilities only to take natural gas supplies from producers who have received authorization from the Commission to sell natural gas to said Applicant.

(B) Applicant shall submit within 60 days after the expiration of the authorization granted by paragraph (A) above a statement in compliance with Section 157.7(b)(3) of the Commission's Regulations under the Natural Gas Act.

(C) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a) and (e) of Section 157.20 of said Regulations.

(D) The authorization granted in paragraph (A) above is hereby limited to construction during the calendar year 1965, and the total expenditures for facilities to be constructed thereunder are hereby limited to a maximum of $1,550,000, with no single project to exceed a cost of $385,000.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

NORTHERN NATURAL GAS COMPANY, DOCKET NO. CP65-72

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 4, 1964)

On September 14, 1964, Northern Natural Gas Company (Applicant), filed in Docket No. CP65-72, an application pursuant to Section 7(c) of the Natural Gas Act, for a certificate of public convenience and necessity authorizing the construction and operation of a measuring and regulating station and appurtenances to establish a new delivery point for Western Power and Gas Company (Western) for the sale and delivery thereto of natural gas for the Bruning Manufacturing Company's (Bruning) new plant located near Lincoln, Nebraska, all as more fully set forth in the application.

The estimated annual sales to Western for resale to Bruning are 253 Mcf of firm gas and 14,192 Mcf of interruptible gas. The proposed sale will not require an increase in Western's contract demand with Northern and will be made under Northern's Zone 2 Rate Schedule.

The estimated cost of required facilities is $3,200, and will be paid by Western.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on November 30, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits submitted in support of the authorization, and upon consideration of the record finds and orders as hereinafter stated.

The Commission finds:

(1) Applicant, Northern Natural Gas Company, a Delaware corporation having its principal place of business in Omaha, Nebraska, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of April 6, 1943, in Docket No. G–280 (3 FPC 967).

(2) The proposed construction and operation of facilities and sale and delivery of natural gas by Applicant to Western Power and Gas Company as hereinbefore described, and as more fully described in the application and exhibits in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed construction and operation of facilities and sale and delivery of natural gas are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3), (c)(4) and (e) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity be and the same is hereby issued to the Applicant in this proceeding, authorizing the construction and operation of facilities and the sale and delivery of natural gas to Western Power and Gas Company as more fully described in the application and exhibits in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are hereby conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3), (c)(4) and (e) of Section 157.20 of such Regulations.

(C) The facilities hereby authorized shall be completed and placed in actual operation, as provided by paragraph (b) of Section 157.20 of the aforesaid Regulations within 60 days of the date on which this order issues.

(D) Northern shall file pursuant to Part 154 of the Commission's Regulations an acceptable superseding service agreement reflecting the additional delivery point to Applicant.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

TRANSWESTERN PIPELINE COMPANY, DOCKET NO. CP64-34

ORDER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 4, 1964)

On September 18, 1964, Transwestern Pipeline Company (Applicant) filed in Docket No. CP64-34 a petition to amend the Commission's order of December 16, 1963, 30 FPC 1520, in said docket authorizing it to sell and deliver to Pacific Lighting Gas Supply Company (Pacific Lighting) up to 410,000 Mcf of natural gas per day on an average annual basis for a period ending November 1, 1965, or until the commencement of a new service sought to be initiated in a proceeding now pending before the Commission in Docket No. CP63-204, *et al.*, whichever date comes first.

Applicant requests herein that the volume of gas heretofore authorized be increased to 430,000 Mcf per day on an average annual basis and the date of expiration of the authorization be extended from November 1 to December 31, 1965.

Applicant shows that it has the capacity in its facilities as they are now installed to deliver substantially more gas during days of cold weather months than it is now authorized to deliver. During the year 1964 to date Applicant has experienced a three-day peak average delivery of 440,000 Mcf per day to Pacific Lighting, and during the first six months of 1964 Applicant has averaged deliveries of close to 420,000 Mcf per day.

Due notice of the filing of the application to amend and opportunity for hearing thereon has been given by publication in the Federal Register on November 3, 1964 (29 F.R. 14904). No protest, petition to intervene or request for hearing has been filed in this proceeding.

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued December 16, 1963, in Docket No. CP64-34 be amended as hereinafter ordered.

The Commission orders:

(A) The Commission's order issued December 16, 1963, in Docket No. CP64-34 be and the same is hereby amended by increasing the volume of natural gas which may be sold and delivered by Applicant to Pacific Lighting Gas Supply Company from 410,000 Mcf per day to 430,000 Mcf per day on an average annual basis and by extending the term of the certificate through December 31, 1965, instead of November 1, 1965, or until the commencement of new service, if any, which may be authorized as a result of a proceeding now pending before the Commission in Docket No. CP63-204, *et al.*; provided however, this order shall not be construed as prejudicing the determinations to be made in the proceeding pending in Docket No. CP63-204, *et al.*

(B) In all other respects said order shall remain in full force and effect.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

NIAGARA MOHAWK POWER CORPORATION, PROJECT NO. 2424

ORDER ISSUING LICENSE (MAJOR)

(Issued December 9, 1964)*

Application was filed on November 8, 1963, by Niagara Mohawk Power Corporation (Applicant) of Syracuse, New York, for a license under Section 4(e) of the Federal Power Act (Act) for constructed Project No. 2424, known as the Hydraulic Race Project, located on the Erie Canal which is a part of the New York State Barge Canal System in the City of Lockport, Niagara County, New York.

According to the application, the project was constructed in its present form in 1941 by a predecessor of Applicant. The latter acquired the project in 1950 through merger with the immediate predecessor-owner of the project works.

The Erie Canal, now called the New York State Barge Canal, is one of the Nation's earliest and greatest improvements for internal navigation. Though developed by the State of New York and lying wholly within its borders, it has supported, from its inception, important traffic in interstate and foreign commerce through the port of New York. Under well established principles of navigability, the Erie Canal, as long ago as 1903, was declared by the Supreme Court to be a navigable water of the United States.[1] "When once found to be navigable, a waterway remains so."[2]

The Secretary of the Army and the Chief of Engineers have approved the plans of the project structures affecting navigation pursuant to Section 4(e) of the Act.

The Department of the Interior, in reporting on the application, advised that wildlife resources are not involved and the fishery resources of the project area are not significant. No conditions in the interest of the Department were recommended for inclusion in any license for the project.

The Department of Health, Education and Welfare has advised that the project has no significant effects on water supply quality, or vector control in the area, and none is expected.

In accordance with the criteria set forth in our April 25, 1962 Opinion No. 357 (27 FPC 830), the license herein granted shall have an effective date of July 1, 1941 and a termination date of June 30, 1991.

The Commission finds:

(1) The project affects navigable waters of the United States.

(2) Applicant is a corporation organized under the laws of the State of New York, and has submitted satisfactory evidence of compliance with the requirements of all applicable State laws insofar as necessary to effectuate the purposes of a license for the project.

(3) Public notice of the filing of the application has been given. No protests or petitions to intervene have been received. No conflicting application is before the Commission.

(4) The project does not affect a Government dam, nor will the issuance of a license therefor, as hereinafter provided, affect the development of any water resources for public purposes which should be undertaken by the United States.

---

*Order issued January 29, 1965 granting rehearing for further consideration. See Opinion No. 481, issued November 15, 1965, 34 FPC 1298. Affirmed, *Niagara Mohawk Power Corp. v. F.P.C.*, — F. 2d — (CADC–1967).

[1] See, Robert W. Parsons, 191 U.S. 17, 27 (1903).

[2] *United States v. Appalachian Electric Power Company*, 311 U.S. 377, 408 (1940).

(5) Subject to the terms and conditions hereinafter imposed, the project will be best adapted to a comprehensive plan for improving or developing a waterway or waterways for the use or benefit of interstate or foreign commerce, for the improvement and utilization of water-power development, and for other beneficial public uses including recreational purposes.

(6) The installed horsepower capacity of the project hereinafter authorized for the purpose of computing the capacity component of the administrative annual charge is 6,250 horsepower, and the amount of annual charges, based on such capacity, to be paid under the license for a project, for the costs of administration of Part I of the Act is reasonable.

(7) The exhibits designated and described in paragraph (B) below conform to the Commission's rules and regulations and should be approved as part of the license for the project.

The Commission orders:

(A) This license is hereby issued to Niagara Mohawk Power Corporation (Licensee) of Syracuse, New York, under Section 4(e) of the Federal Power (Act), for a period of 50 years, effective as of July 1, 1941 and terminating June 30, 1991, for the continued operation and maintenance of the Hydraulic Race Project No. 2424, located on the Erie Canal, a part of the New York State Barge Canal, a navigable water of the United States, subject to the terms and conditions of the Act, which is incorporated herein by reference as a part of this license, and subject to such rules and regulations as the Commission has issued or prescribed under the provisions of the Act.

(B) Project No. 2424 consists of:

(i) All lands constituting the project area and enclosed by the project boundary or the limits of which are otherwise defined, and/or interest in such lands necessary or appropriate for the purposes of the project, whether such lands or interest therein are owned or held by the Licensee or by the United States; such project area and project boundary being more specifically shown and described by the following exhibits which formed a part of the application for license.

Exhibit J: (FPC No. 2424–1) General Location Map

Exhibit K: (FPC No. 2424–2) Detail Map

(ii) A regulator tunnel owned by the State of New York takes water through a gate structure in the south canal wall above Lock No. 35, at Lockport. Applicant's 12.5-foot diameter tunnel connects with the State tunnel and conveys the water 140 feet to a steel penstock 13 feet in diameter and 99 feet long. The water passes through the single unit powerhouse, through a short tailrace, and back into the canal below Lock No. 34. The powerhouse contains one vertical type generating unit—a Kaplan turbine with adjustable blades directly connected to a generator rated at 4,687 kilowatts—and other mechanical and electrical appurtenances, the location, nature, and character of which are more specifically shown and described by the exhibits hereinbefore cited and by certain other exhibits which also formed part of the application for license and which are designated and described as follows:

Exhibit L: General Design Drawings

Sheet 1 (FPC No. 2424–3) General Plan and Sections—Tunnel, Penstock and Tailrace

Sheet 2 (FPC No. 2424–4) Plan and Sections—Powerhouse.

Exhibit M: Consisting of 2 pages entitled "Hydraulic Race Project, General Descriptions and General Specifications of Mechanical, and Transmission Equipment and their Appurtenances" filed in the Commission November 8, 1963.

(iii) All other structures, fixtures, equipment or facilities used or useful in the maintenance and operation of the project and located on the project area, including such portable property as may be used or useful in connection with the project or any part thereof, whether located on or off the project area, if and to the extent that the inclusion of such property as part of the project is approved or acquiesced in by the Commission; also, all riparian or other rights, the use or possession of which is necessary or appropriate in the maintenance or operation of the project.

(C) This license is also subject to the terms and conditions set forth in Form L–3 (Revised August 1, 1964), entitled "Terms and Conditions of License for Constructed Project Affecting Navigable Waters of the United States", (32 FPC 1114), which terms and conditions, designated as Articles 1 through 29, are attached hereto and made a part hereof, except for Articles 15, 16 and 25 thereof; and subject to the following special conditions set forth herein as additional articles:

Article 30. The Licensee shall pay to the United States the following annual charge, effective as of July 1, 1941:

For the purpose of reimbursing the United States for the costs of administration of Part I of the Act, a reasonable annual charge as determined by the Commission in accordance with the provisions of its regulations, in effect from time to time. The authorized installed capacity for such purpose is 6,250 horsepower.

Article 31. The Commission reserves the right to determine at a later date what transmission facilities, if any, shall be included in this license.

(D) The exhibits designated and described in paragraph (B) above are hereby approved as part of this license.

(E) This order shall become final 30 days from the date of its issuance unless application for rehearing shall be filed as provided in Section 313 (a) of the Act, and failure to file such an application shall constitute acceptance of this license. In acknowledgment of the acceptance of this license, it shall be signed for the licensee and returned to the Commission within 60 days from the date of issuance of this order.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

MIDWESTERN GAS TRANSMISSION COMPANY, DOCKET NOS. RP61–19, RP62–7; NATURAL GAS PIPELINE COMPANY OF AMERICA, DOCKET NO. RP63–6

ORDER GRANTING REHEARING FOR PURPOSES OF ADEQUATE CONSIDERATION

(Issued December 11, 1964)

Midwestern Gas Transmission Company (Midwestern), filed on November 12, 1964 an application for rehearing of our Opinion No. 444 and accompanying order issued October 13, 1964, 32 FPC 993. In the interest of avoiding further litigation, Midwestern proposes therein a settlement under which it would accept our original order with respect to the cost-of-service issues in this docket, subject to certain changes. Midwestern also filed, concurrently with its application for rehearing, a separate motion requesting an extension of the time presently prescribed by the ordering clauses of Opinion No. 444 for the submission of revised tariff sheets embodying the lower rates prescribed by the Commission. In a

notice issued November 20, 1964, we granted this motion and extended the date for the filing of such tariffs to December 28, 1964. (This of course did not affect the effective date of such action.)

Comments concerning the settlement proposals advanced in Midwestern's application for rehearing have been filed by the following parties: The Peoples Gas Light and Coke Company and The Northern Illinois Gas Company on November 23, 1964; Michigan Wisconsin Pipe Line Company on November 30, 1964; The City of Chicago on December 5, 1964 and Northern Indiana Public Service Company on December 7, 1964.

Under Section 1.34 of our Rules, an answer to an application for rehearing may be filed when rehearing is granted. Since we are here granting the application only to permit more orderly and more adequate consideration and have not yet determined the specific areas, if any, to which we wish to give further consideration, we do not believe answers will be helpful at this time. We shall, of course, by further order provide all parties an opportunity to respond to the application on those matters which we conclude warrant our further consideration.

The Commission orders:

The application for rehearing filed herein by Midwestern on November 12, 1964, is hereby granted for purposes of more orderly and more adequate consideration.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

MINNESOTA POWER & LIGHT COMPANY, PROJECT NO. 2360

ORDER ISSUING LICENSE (MAJOR) AND DENYING REQUEST FOR DISCLAIMER OF JURISDICTION

(Issued December 11, 1964)*

Application was filed on April 25, 1963, and later supplemented, by Minnesota Power & Light Company (Applicant), of Duluth, Minnesota, for a license under Section 4(e) of the Federal Power Act (Act) for constructed Project No. 2360, known as the St. Louis River Project, located on the St. Louis, Cloquet, Whiteface, Skunk, Beaver, and Otter Rivers, in Carlton and St. Louis Counties, Minnesota.

According to the application, the project consists of four hydroelectric developments on the St. Louis River having a total installed capacity of 83,350 kilowatts, and which are known as: (1) Knife Falls Development at river mile 34.3; (2) Scanlon Development at river mile 32.0; (3) Thomson Development at river mile 24.8; and (4) Fond du Lac Development at river mile 22.5. In addition, the project embraces five storage reservoirs having a total storage capacity of 337,870 acre-feet which are located on upstream tributaries of the St. Louis River and which are known as: (1) Whiteface Dam and Reservoir on Skunk and Whiteface Rivers, 126.0 miles above the mouth of the St. Louis River; (2) Boulder Lake Dam and Reservoir on Otter River, 81.5 miles above the mouth of the St. Louis; (3) Rice Lake Dam and Reservoir on Beaver River,

*Rehearing granted by order issued February 5, 1965.

79.2 miles above the mouth of the St. Louis; (4) Island Lake Dam and Reservoir on Cloquet River, 74.0 miles above the mouth of the St. Louis; and (5) Fish Lake Dam and Reservoir on Beaver River, 7.0 miles above the mouth of the St. Louis.

Also according to the application, the project was constructed by predecessor companies of Applicant over a period of years from 1907 through 1927. Applicant acquired the Scanlon and Knife Falls Developments in 1923, the Fond du Lac Development in 1924, and the Thomson Falls Development in 1927. There have been few major constructural changes in the four hydroelectric developments since 1935. The earliest and most important of which were with respect to the Thomson Development and consisted of the installation of a 12,000 kilowatt generator in 1949 and the raising of the reservoir five feet in 1950–1951.

According to available records, the St. Louis River has been extensively used since early days for substantial log driving and the floating of canoes by fur traders from its mouth in Lake Superior at least to a point above the Knife Falls Development at river mile 34.3, notwithstanding the rapids between Fond du Lac and Thomson reservoirs. Applicant's storage reservoirs have caused fluctuations in the St. Louis River. For example, in December of 1959, their storage releases increased the St. Louis River elevation at the Scanlon gage at river mile 31.4 on the average of about 1½ feet. On the basis of these facts, we are herein denying the alternative request in the application for license that we disclaim jurisdiction over the St. Louis River Project.

In accordance with the criteria set forth in our April 25, 1962 Opinion No. 357 (27 FPC 830), the license herein granted shall have an effective date of January 1, 1950 and a termination date of December 31, 1993.

The Secretary of the Army and the Chief of Engineers have advised that the plans of the project structures affecting navigation have been approved pursuant to Section 4(e) of the Act.

The Department of the Interior, in reporting on the application, recommended for inclusion in any license for the project certain conditions in the interests of fish and wildlife resources.

The Department of Health, Education and Welfare recommended that Commission action on the application be held in abeyance until Applicant and State agencies have had an opportunity to complete the preliminary review of water control quality, since the project affects the water quality in the river system involved to a substantial degree. However, rather than to unduly delay the issuance of this license for the project, we are including herein a special condition to provide for modification of the project operations as may be reasonably necessary to alleviate adverse water quality upon completion of the current studies by Applicant and participating agencies.

The Commission finds:

(1) The project is located on navigable waters of the United States and affects downstream navigable capacity.

(2) Applicant is a corporation organized under the laws of the State of Minnesota, and has submitted satisfactory evidence of compliance with the requirements of all applicable State laws insofar as necessary to effectuate the purposes of a license for the project.

(3) Public notice of the filing of the application has been given. No protests or petitions to intervene have been received. No conflicting application is before the Commission.

(4) The project does not affect a Government dam, nor will the issuance of a license therefor, as hereinafter provided, affect the development of any water resources for public purposes which should be undertaken by the United States.

(5) Subject to the terms and conditions hereinafter imposed, the project will be best adapted to a comprehensive plan for improving or developing a waterway or waterways for the use or benefit of interstate or foreign commerce, for the improvement and utilization of water-power development, and for other beneficial public uses, including recreational purposes.

(6) The installed horsepower capacity of the project hereinafter authorized for the purpose of computing the capacity component of the administrative annual charge is 111,000 horsepower, and the amount of annual charges, based on such capacity, to be paid under the license for the project, for the costs of administration of Part I of the Act is reasonable as hereinafter fixed and specified.

(7) The exhibits designated and described in paragraph (B) below conform to the Commission's rules and regulations and should be approved as part of this license.

The Commission orders:

(A) This license is hereby issued to Minnesota Power & Light Company (Licensee) of Duluth, Minnesota, under Section 4(e) of the Federal Power Act (Act) for a period effective as of January 1, 1950 and terminating December 31, 1993, for the continued operation and maintenance of constructed Project No. 2360, located on the St. Louis River, a navigable water of the United States, and the Beaver, Cloquet, Otter, Whiteface and Skunk Rivers, subject to the terms and conditions of the Act which is incorporated herein by reference as a part of this license, and subject to such rules and regulations as the Commission has issued or prescribed under the provisions of the Act.

(B) The St. Louis River Project consists of:

(i) all lands constituting the project area and enclosed by the project boundary or the limits of which are otherwise defined, and/or interests in such lands necessary or appropriate for the purpose of the project, whether such lands or interests therein are owned or held by the Licensee or by the United States; such project area and project boundary being more generally shown and described by certain exhibits which formed part of the application for license and which are designated and described as follows:

Exhibit J: (FPC No. 2360-1) General Map of Project Area; (FPC No. 2360-2) Fond du Lac Hydro-electric Station; (FPC No. 2360-3) Thomson Hydroelectric Station; (FPC No. 2360-4) Scanlon Hydroelectric Station; (FPC No. 2360-5) Knife Falls Hydroelectric Station; (FPC No. 2360-6) Fish Lake and Rice Lake Reservoirs; (FPC No. 2360-7) Boulder Lake and Island Lake Reservoirs; (FPC No. 2360-8) Whiteface Reservoir.

Exhibit K: (FPC No. 2360-9) Key Map;

Sheets 1, 2 and 3, of 32 (FPC Nos. 2360-10, -11 and -12) showing the Fond du Lac, Thomson, Scanlon and Knife Falls Hydroelectric Developments;

Sheets 8 to 17, inclusive, of 32 (FPC Nos. 2360-17 to -26, inclusive) showing the Fish Lake, Rice Lake, Island Lake and Boulder Lake Reservoirs; and

Sheets 30, 31 and 32 of 32 (FPC Nos. 2360-39, -40 and -41) showing the Whiteface Reservoir.

(ii) project works comprising:

Fond du Lac Development—Located on the St. Louis River 22.5 miles upstream from the mouth of the river at the western end of Lake Superior, consisting of

a concrete gated spillway section and an earthfill dam; an intake structure with two 18-foot diameter penstocks (only one of which is in use) a reservoir having a capacity of 1,280 acre-feet at a normal pool elevation of 681.42 feet; a powerhouse containing one 15,000-hp turbine connected to one 12,000-kw generator; a substation; and other appurtenant transmission and electrical facilities;

Thomson Development—Located 2.3 miles above the Fond du Lac Development, consisting of a concrete main dam containing two spillway sections and a sluice gate structure; seventeen small rock or earthfill or concrete structures that span depressions in the natural rock ridge; a reservoir with a full pool elevation of 1,070.66 feet; a canal 10,750 feet long connecting the Upper and Lower headgate houses; two surge tanks, one 230 feet high and one 240 feet high; a powerhouse containing six turbines with a capacity of 89,000 hp connected to six generators having a capacity of 67,350-kw; step-up transformers; a switchyard; and other appurtenant transmission and electrical facilities;

Scanlon Development—Located 7.2 miles above the Thomson development consisting of two gated concrete gravity type dam sections connected by a mid stream island; a reservoir with a normal pool elevation of 1,120.8 feet; a concrete powerhouse containing four 615-hp turbines each connected to a 400-kw generator; a substation; and other appurtenant transmission and electrical facilities;

Knife Falls Development—Located 2.3 miles above the Scanlon development consisting of one major and two minor structures, the major structure consisting of three separate gate sections, a powerhouse section, a spillway section, and several non-overflow sections; a powerhouse containing three 1,100-hp turbines each connected to a 800-kw generator; the minor structures containing tainter and sluice gate sections; a reservoir with a normal pool elevation of 1,179.64 feet; and other appurtenant transmission and electrical facilities;

Fish Lake Dam and Reservoir—Located on the Beaver River near its confluence with the Cloquet River, 15 air miles north of Duluth, consisting of an earth-fill and concrete dam, a reservoir containing about 39,650 acre-feet at a full pool elevation of 1,359 feet, and other appurtenant facilities;

Rice Lake Dam and Reservoir—Located on Beaver River 12 air miles north of Duluth, and discharging into Fish Lake, consisting of an earth-fill and concrete dam, a reservoir with a capacity of 15,360 acre-feet at maximum pool elevation of 1,377 feet, and other appurtenant facilities;

Island Lake Dam and Reservoir—Located on Cloquet River 15 air miles about Duluth, consisting of an earth-fill and concrete dam, a reservoir with a capacity of 171,500 acre-feet with a maximum pool elevation of 1,370 feet, and other appurtenant facilities;

Boulder Lake Dam and Reservoir—Located on Otter River 18 air miles north of Duluth, consisting of a concrete arch and earth-fill dam, a reservoir with a capacity of 29,400 acre-feet at a maximum pool elevation of 1,391 feet, and other appurtenant facilities; and

Whiteface Dam and Reservoir—Located on the Skunk and Whiteface Rivers 40 air miles north of Duluth, consisting of an earth-fill and concrete dam, a reservoir with a capacity of 81,920 acre-feet at a maximum pool elevation of 1,462 feet, and other appurtenant facilities; the location, nature and character of which are more specifically shown and described by the exhibits hereinbefore cited and by certain other exhibits which also formed part of the application for license and which are designated and described as follows:

Exhibit M: Ten typewritten sheets entitled, "General Descriptions and Specifications of Equipment", filed in the Commission on April 25, 1963.

(iii) All other structures, fixtures, equipment or facilities used or useful in the maintenance and operation of the project and located on the project area, including such portable property as may be used or useful in connection with the project or any part thereof, whether located on or off the project area, if and to the extent that the inclusion of any such property as part of the project is approved or acquiesced in by the Commission; also, all riparian or other rights, the use or possession of which is necessary or appropriate in the maintenance or operation of the project.

(C) This license is also subject to the terms and conditions set forth in Form L-3 (Revised August 1, 1964) entitled, "Terms and Conditions of License for Constructed Project Affecting Navigable Waters of the United States" (32 FPC 1114), which terms and conditions, designated as Articles 1 through 29, are attached hereto and made a part hereof, and subject to the following special conditions set forth herein as additional articles:

Article 30. The Licensee shall pay to the United States the following annual charge, effective as of January 1, 1950:

For the purpose of reimbursing the United States for the costs of administration of Part I of the Act, a reasonable annual charge as determined by the Commission in accordance with the provisions of its regulations, in effect from time to time. The authorized installed capacity for such purpose is 111,000 horsepower.

Article 31. The Licensee shall submit for Commission approval Exhibits F and K showing project lands and project boundary prepared in accordance with the Commission's rules and regulations, within one year from the date of issuance of this license.

Article 32. The Licensee shall submit for Commission approval additional Exhibit L drawings for the Whiteface River main dam, Rice Lake dam, Fish Lake

dam, and South dike at Island Lake reservoir within one year from the date of issuance of this license.

Article 33. The Licensee shall, following completion and review of the current cooperative water quality studies being conducted at the project, install such facilities as may be reasonably necessary and/or modify project operations as may be reasonably necessary in the interest of improving the water quality of the St. Louis River, as may be ordered by the Commission upon its own motion or upon the recommendations of the Minnesota State Departments of Health and Conservation or the Secretary of Health, Education, and Welfare, to the extent that such modifications are consistent with the primary purpose of the project and in the public interest to do so, after notice and opportunity for hearing.

Article 34. The Commission reserves the right to determine at a later date what additional transmission facilities, if any, shall be included in this license as part of the project works.

(D) The exhibits designated and described in paragraph (B) above are hereby approved as part of this license.

(E) Applicant's afore-mentioned request that we disclaim Commission jurisdiction over the St. Louis River Project is hereby denied.

(F) This order shall become final 30 days from the date of its issuance unless application for rehearing shall be filed as provided in Section 313(a) of the Act, and failure to file such an application shall constitute acceptance of this license. In acknowledgement of the acceptance of this license, it shall be signed for the licensee and returned to the Commission within 60 days from the date of issuance of this order.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

THE NORTHWEST PAPER COMPANY, PROJECT NO. 2363

ORDER ISSUING LICENSE (MAJOR) AND DENYING REQUEST FOR DISCLAIMER OF JURISDICTION

(Issued December 11, 1964)*

Application was filed on April 25, 1963 by The Northwest Paper Company (Applicant) of Cloquet, Minnesota, for a license under Section 4(e) of the Federal Power Act (Act) for constructed Project No. 2363, known as the Cloquet Project, located on the St. Louis River, in the City of Cloquet, Carlton County, Minnesota.

According to the application, the original timber crib dam and powerhouse were constructed in 1898 and 1899 by a predecessor of Applicant and included seven turbines having a total capacity of 6,240 horsepower driving various paper mill machinery and one 96 horsepower turbine connected to a 110 V. generator. Applicant was organized in 1910 and acquired all the properties of its predecessor. Beginning in 1914 power generation was installed to replace abandoned wood grinders. In 1948–1949, the timber crib dam was replaced by a concrete structure including modern flood control gates.

According to available records, the St. Louis River has been extensively used since early days for substantial log driving and the floating of canoes by fur traders from its mouth in Lake Superior at least to a point above Minnesota Power & Light Company's Knife Falls Development at river mile 34.3. The

*Rehearing granted by order issued February 5, 1965.

Cloquet Project is located downstream from the Knife Falls Development. On the basis of these facts, we are herein denying the alternative request in the application for license that we disclaim jurisdiction over the Cloquet Project.

In accordance with the criteria set forth in our April 25, 1962, Opinion No. 357 (27 FPC 830), the license herein granted shall have an effective date of July 1, 1948 and a termination date of December 31, 1993.

The Secretary of the Army and the Chief of Engineers have reported that the plans of the project structures affecting navigation are satisfactory.

The Department of the Interior, in reporting on the application, recommended for inclusion in any license for the project certain conditions in the interests of fish and wildlife.

The Department of Health, Education, and Welfare has reported that the project is not known to have created any water quality or vector control problems and none is expected, as apparently no changes in operation are proposed.

Since Exhibits J, K and L filed as part of the application do not conform to the Commission's rules and regulations, we are herein requiring Applicant to file revised exhibits prepared in accordance with the Commission's rules and regulations.

The Commission finds:

(1) The project is located on navigable waters of the United States.

(2) Applicant is a corporation organized under the laws of the State of Minnesota, and has submitted satisfactory evidence of compliance with the requirements of all applicable State laws insofar as necessary to effectuate the purposes of a license for the project.

(3) Public notice of the filing of the application has been given. No protests or petitions to intervene have been received. No conflicting application is before the Commission.

(4) The project does not affect a Government dam, nor will the issuance of a license therefor, as hereinafter provided, affect the development of any water resources for public purposes which should be undertaken by the United States.

(5) Subject to the terms and conditions hereinafter imposed, the project will be best adapted to a comprehensive plan for improving or developing a waterway or waterways for the use or benefit of interstate or foreign commerce, for the improvement and utilization of water-power development, and for other beneficial public uses, including recreational purposes.

(6) The installed horsepower capacity of the project hereinafter authorized for the purpose of computing the capacity component of the administrative annual charge is 7,300 horsepower, and the amount of annual charges, based on such capacity, to be paid under the license for the project, for the costs of administration of Part I of the Act is reasonable.

(7) Exhibit M filed as part of the application and described in paragraph (B) below conforms to the Commission's rules and regulations and should be approved as part of this license.

The Commission orders:

(A) This license is hereby issued to The Northwest Paper Company (Licensee) of Cloquet, Minnesota, under Section 4(e) of the Federal Power Act (Act) for a period effective as of July 1, 1948 and terminating December 31, 1993, for the continued operation and maintenance of constructed Project No. 2363, located on the St. Louis River, a navigable water of the United States, subject to the terms and conditions of the Act which is incorporated herein by reference as a

part of this license, and subject to such rules and regulations as the Commission has issued or prescribed under the provisions of the Act.

(B) Cloquet Project No. 2363 consists of:

(i) all lands constituting the project area and enclosed by the project boundary or the limits of which are otherwise defined, and/or interest in such lands necessary or appropriate for the purposes of the project, whether such lands or interest therein are owned or held by the Licensee or by the United States;

(ii) project works consisting of: (a) a concrete gravity dam about 47 feet high and 369 feet long including a non-overflow section about 152.5 feet long, a gated spillway section about 185.5 feet long (with 7 tainter gates, each 15 feet high by 20 feet long) and a non-overflow section about 31 feet long; (b) a reservoir with negligible storage capacity (normal elevation 1161.29 feet M.S.L.); (c) a powerhouse integral with the dam, adjacent to the right bank, containing a 2,500 hp turbine connected to a 2,250 kva generator, two 1,250 hp turbines connected to two 1,100 kva generators, a 600 hp turbine connected to a 500 kva generator, an 880 hp turbine connected to an 800 kva generator, and a 1,210 hp turbine connected to an 1,100 kva generator; and (d) appurtenant facilities; the general description of which is shown on Exhibit M: Two typewritten pages, "General Description of Project", filed in the Commission April 25, 1963.

(iii) all other structures, fixtures, equipment or facilities used or useful in the maintenance and operation of the project and located on the project area, including such portable property as may be used or useful in connection with the project or any part thereof, whether located on or off the project area, if and to the extent that the inclusion of such property as part of the project is approved or acquiesced in by the Commission; also, all riparian or other rights, the use or possession of which is necessary or appropriate in the maintenance or operation of the project.

(C) This license is also subject to the terms and conditions set forth in Form L-3 (Revised August 1, 1964) entitled "Terms and Conditions of License for Constructed Project Affecting Navigable Waters of the United States" (32 FPC 1114), which terms and conditions, designated as Articles 1 through 29, are attached hereto and made a part hereof, and subject to the following special conditions set forth herein as additional articles:

Article 30. The Licensee shall pay to the United States the following annual charge, effective as of July 1, 1948:

For the purpose of reimbursing the United States for the costs of administration of Part I of the Act, a reasonable annual charge as determined by the Commission in accordance with the provisions of its regulations, in effect from time to time. The authorized installed capacity for such purpose is 7,300 horsepower.

Article 31. The Commission reserves the right to determine at a later date what additional transmission facilities, if any, should be included in this license as part of the project works.

Article 32. The Licensee shall, within six months from the date of issuance of this license, submit for Commission approval revised Exhibits "J", "K" and "L" prepared in accordance with the Commission's rules and regulations.

(D) Exhibit M designated and described in paragraph (B) above is hereby approved as part of this license.

(E) Applicant's afore-mentioned request that we disclaim Commission jurisdiction over the Cloquet Project No. 2363 is hereby denied.

(F) This order shall become final 30 days from the date of its issuance unless application for rehearing shall be filed as provided in Section 313(a) of the Act,

and failure to file such an application shall constitute acceptance of this license. In acknowledgment of the acceptance of this license, it shall be signed for the licensee and returned to the Commission within 60 days from the date of issuance of this order.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

SABINE RIVER AUTHORITY OF TEXAS AND SABINE RIVER AUTHORITY OF LOUISIANA, PROJECT NO. 2305

ORDER APPROVING REVISED EXHIBIT L DRAWING

(Issued December 11, 1964)

On July 23, 1964, Sabine River Authority of Texas and Sabine River Authority of Louisiana, joint licensees for Project No. 2305, filed for Commission approval a revised Exhibit L drawing showing a change in the upstream slope protection for the earth embankment.

The licensee's initial proposal called for rock riprap as slope protection for the upstream face of the earth embankment of the Toledo Bend Dam. Inasmuch as stone for riprap is not available locally, the licensees in their construction plans and specifications called for alternate bids on soil-cement as well as rock riprap for protection of the upstream slope of the dam. A bid providing for soil-cement protection is nearly $600,000 less than the cost of rock riprap.

Soil-cement on the upstream face of a dam consists of soil or earth, portland cement and water properly mixed and placed in layers for compaction. When soil suitable for a durable soil-cement mixture is available, a soil-cement facing can be constructed that is competitive in performance and cost with rock riprap in some areas where the latter is not available locally. Our staff analysis of the licensees' specification shows that the materials and method of construction proposed are adequate for the proposed soil-cement protective facing.

The Commission finds:

The following described revised exhibit conforms to the Commission's rules and regulations and should be approved as part of the license for the project, and Exhibit L, Sheet 5 (FPC No. 2305–23), now part of the license and which has been superseded, should be eliminated from the license.

Exhibit L, Sheet 5 (FPC No. 2305–36) showing Embankment-Typical Sections.

The Commission orders:

The revised exhibit described in the above finding is hereby approved as part of the license for Project No. 2305 and the superseded exhibit described in the same finding is hereby eliminated from the license for the project.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

ARIZONA PUBLIC SERVICE COMPANY, DOCKET NO. E-7182

ORDER AUTHORIZING SALE OF FACILITIES

(Issued December 14, 1964)

Arizona Public Service Company (Applicant), incorporated under the laws of the State of Arizona and doing business in the States of Arizona and New

Mexico, filed an application on September 15, 1964, for an order pursuant to Section 203 of the Federal Power Act, requesting authorization to sell a 230 kv oil circuit breaker, less relaying equipment, and a 230 kv disconnect switch and associated metering equipment to the Bureau of Reclamation of the Department of the Interior of the United States. Applicant is engaged in rendering electric and gas utility services in Arizona. Electric service is rendered in the Counties of Maricopa, Yuma, Navajo, Apache, Yavapai, Pinal, Gila, Cochise, Coconino, and Pima, and gas service is rendered in the Counties of Gila, Graham, Maricopa, Cochise, Pima, Pinal, and Yuma.

The facilities to be sold to the Bureau of Reclamation are located at the Prescott Substation of the Parker Davis Project of the United States and comprise part of the interconnected transmission system and terminal facilities at the substation.

The facilities are to be sold by the Applicant at an amount based on the installed cost of the facilities as determined by certified cost data provided by the Applicant, less depreciation at the rate of 3% per year. The consideration as of June 30, 1964 would have been $153,137. The consideration of $153.137 is $2,509 more than original cost depreciated of $150,628. Therefore, the Applicant will have a gain of $2,509 on the sale of the facilities. The Applicant proposes to credit this gain to Account 434, Miscellaneous Credits to Surplus.

Under a "Contract for Interconnections and Transmission Service" between the Bureau and the Applicant, dated September 3, 1964, the two parties have agreed that in order to achieve a fair division of transmission line facilities for purposes set forth in the contract and to avoid insofar as practicable the facilities of one party being located in the substation of the other party, the Applicant will sell and the Bureau will purchase "A 230 kv oil circuit breaker, less relaying equipment, a 230 kv disconnect switch and associated metering equipment presently in place at the Prescott Substation of the Parker Davis Project of the United States."

In connection with the Interconnection Agreement, the Applicant represents that it was necessary to decide on ownership of a number of oil circuit breakers, and it was felt preferable to have the breakers owned by the party owning the substation. Hence, it was deemed consistent with this policy to have this breaker owned by the United States rather than by Applicant.

According to the application, the proposed disposition to the Bureau of Reclamation will have no effect upon any contract of the Applicant for purchase, sale or interchange of electric energy and that there will be no change in the location, use or operation of facilities after the transfer since facilities will continue in use and remain in place despite change of ownership.

Written notice of this application has been given to the Arizona Corporation Commission and to the Governor of the State of Arkansas. Notice was also published in the Federal Register on October 1, 1964 (29 F.R. 13549), stating that any person desiring to be heard or to make any protest with reference to said application should on or before October 12, 1964, file with the Federal Power Commission, Washington, D.C. 20426, petitions or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). No protest or petition or request to be heard in opposition to the granting of the application has been received.

The Commission finds:

(1) Applicant, a corporation, is a public utility within the meaning of Section 203 of the Federal Power Act subject to the jurisdiction of the Commission as heretofore described and set forth in the Commission's order issued July 6, 1961, in *Arizona Public Service Company*, Docket No. E-6981 (26 FPC 36).

(2) By the proposed sale of facilities, Applicant will dispose of part of its facilities subject to the jurisdiction of the Commission within the meaning and subject to the requirements of Section 203 of the Federal Power Act.

(3) The proposed sale of facilities of Applicant, as described above upon the terms and conditions set forth in the application and subject to the provisions of this order will be consistent with the public interest as expressed in Section 203 of the Federal Power Act.

(4) The period of public notice given in this matter is reasonable.

The Commission orders:

(A) The proposed sale by Applicant of the aforementioned transmission line facilities all as described above, are authorized and approved upon the terms and conditions and for the purposes set forth in the application, subject to the provisions of this order.

(B) Applicant shall record the proposed transaction herein authorized and the facilities and properties referred to above as provided in the Commission's Uniform System of Accounts Prescribed for Public Utilities and Licensees.

(C) This authorization shall expire unless the transaction herein authorized and approved is consummated within 90 days from the date of issuance of this order.

(D) This authorization is without prejudice to the authority of this Commission or any other regulatory body with respect to rates, services, accounts, evaluation, estimates or determinations of cost, or any other matter whatsoever now pending or which may come before this Commission or any other regulatory body, and nothing herein shall be construed as an acquiescence by this Commission in any estimate or determination of cost or any valuation of property claimed or asserted by the Commission.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

TEX-STAR OIL & GAS CORP., DOCKET NO. CI65-418

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY AND ACCEPTING FPC GAS RATE SCHEDULE FOR FILING

(Issued December 14, 1964)

On November 2, 1964, Tex-Star Oil & Gas Corp. (Applicant) filed in Docket No. CI65-418 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce to Cities Service Gas Company from the South Bishop Field, Ellis County, Oklahoma, all as more fully set forth in the application.

Concurrently with the subject application Applicant submitted a copy of the related contract which will hereinafter be accepted for filing as Applicant's FPC gas rate schedule.

After due notice, no petition or notice to intervene or protest to the granting of the application has been received.

At a hearing held on December 11, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including

the application and exhibits thereto, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission.

(2) The sale of natural gas hereinbefore described, as more fully described in the application herein, will be made in interstate commerce, subject to the jurisdiction of the Commission, and such sale by Applicant, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, is subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The sale of natural gas by Applicant, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, is required by the public convenience and necessity, and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(5) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that the related contract submitted by Applicant should be accepted for filing and designated as Applicant's FPC gas rate schedule.

The Commission orders:

(A) A certificate of public convenience and necessity be and the same is hereby issued, upon the terms and conditions of this order, authorizing the sale by Applicant of natural gas in interstate commerce for resale, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary for such sale, all as hereinbefore described and as more fully described in the application and exhibits in this proceeding.

(B) The certificate granted in paragraph (A) above is not transferable and shall be effective only so long as Applicant continues the acts or operations hereby authorized in accordance with the provisions of the Natural Gas Act and the applicable rules, regulations and orders of the Commission.

(C) The grant of the certificate issued in paragraph (A) above shall not be construed as a waiver of the requirements of Section 4 of the Natural Gas Act or of Part 154 or Part 157 of the Commission's Regulations thereunder, and is without prejudice to any findings or orders which have been or may hereafter be made by the Commission in any proceeding now pending or hereafter instituted by or against Applicant. Further, our action in this proceeding shall not foreclose nor prejudice any future proceedings or objections relating to the operation of any price or related provisions in the gas purchase contract herein involved. Nor shall the grant of the certificate aforesaid for service to the particular customer involved imply approval of all of the terms of the contract, particularly as to the cessation of service upon termination of said contract, as provided by Section 7(b) of the Natural Gas Act. Nor shall the grant of the certificate aforesaid be construed to preclude the imposition of any sanctions pursuant to the provisions of the Natural Gas Act for the unauthorized commencement of any sale of natural gas subject to said certificate.

(D) The related contract dated October 29, 1964, submitted by Applicant is accepted for filing and designated as Tex-Star Oil & Gas Corp., FPC Gas Rate Schedule No. 39 to be effective on the date of initial delivery.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

TRANSCONTINENTAL GAS PIPE LINE CORPORATION, DOCKET NO. CP65-70

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 14, 1964)

On September 14, 1964, Transcontinental Gas Pipe Line Corporation (Applicant) filed in Docket No. CP65-70 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale of an annual volume of 2,000,000 Mcf of natural gas to Carolina Pipeline Company (Carolina), an existing customer, all as more fully set forth in the application.

The subject sale would be made pursuant to Applicant's proposed FPC Gas Rate Schedule ACQ-2 (annual contract quantity—Zone 2). Such sale will be made in addition to the existing sales to Carolina made under Applicant's FPC Gas Rate Schedules CD-2 and E-2 and by means of existing facilities. Further, the proposed sale will be on an off-peak basis when capacity is available in Zone 2.

The application indicates that Carolina has need for ACQ service in Zone 2 similar to that rendered by Applicant in Zone 3. Further, it appears that the proposed service will enable Carolina to serve its market area with a greater degree of effectiveness since volumes of excess gas available to Carolina under Applicant's Rate Schedule E-2 have not proved sufficient to meet the requirements of Carolina's system.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on December 11, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Transcontinental Gas Pipe Line Corporation, a Delaware Corporation having its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of November 18, 1948, in Docket No. G-1143 (7 FPC 145).

(2) The proposed transportation and sale of natural gas by Applicant hereinbefore described, as more fully described in the application in this proceeding, will be in interstate commerce, subject to the jurisdiction of the Commission, and such proposed transportation and sale are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The proposed transportation and sale of natural gas by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas

Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c) (3) and (e) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity be and the same is hereby issued authorizing Applicant, Transcontinental Gas Pipe Line Corporation, to sell and deliver natural gas as hereinbefore described, all as more fully described in the application herein, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a) (b), (c) (3) and (e) of Section 157.20 of such Regulations.

(C) The sale of natural gas authorized in paragraph (A) above shall commence, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within 3 months from the date on which this order issues.

Before Commissioners: Joseph C. Swidler, Chairman: L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

AMERICAN LOUISIANA PIPE LINE COMPANY, DOCKET NO. CP65-69

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 15, 1964)

On September 14, 1964, American Louisiana Pipe Line Company (Applicant) filed in Docket No. CP65-69 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of approximately 1.9 miles of 30-inch pipeline crossing the Cumberland River at a point located in Trigg and Lyon Counties, Kentucky, all as more fully set forth in the application. This line, a second river crossing, will parallel the existing line crossing the River.

Applicant states that the second line is required to assure the continuity of service which might be interrupted due to the construction of a dam on the Cumberland below the present river crossing of its pipeline. The existing line will be submerged by the reservoir which will be created thus rendering maintenance of the line difficult and expensive.

The estimated cost of the proposed facilities is $498,000, which will be financed from funds on hand.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on December 11, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, American Louisiana Pipe Line Company, a Delaware corporation having its principal place of business in Detroit, Michigan, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order accompanying Opinion No. 276 in Docket No. G-2306, *et al.*, issued October 1, 1954 (13 FPC 380).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof and the transportation of natural gas are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity, and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3), (c)(4) and (e) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity be and the same is hereby issued authorizing Applicant, American Louisiana Pipe Line Company, to construct and operate the proposed facilities as hereinbefore described, all as more fully described in the application, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3), (c)(4) and (e) of Section 157.20 of such Regulations.

(C) The facilities hereby authorized shall be constructed and placed in actual operation, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within 12 months from the date on which this order issues.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

CITIES SERVICE GAS COMPANY, DOCKET NO. CP65-77

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 15, 1964)

On September 18, 1964, Cities Service Gas Company (Applicant) filed in Docket No. CP65-77 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation during the balance of the calendar year 1964 of facilities consisting of taps and service lines, meters and regulating equipment for the purpose of making direct industrial sales and deliveries of natural gas to interruptible customers, all as more fully set forth in the application.

The purpose of this "budget-type" application is to enable Applicant to act with dispatch in establishing new delivery points for direct sales which will not exceed 100,000 Mcf annually and will not be used in consumers boilers for fuel purposes.

The estimated cost of the proposed facilities to be constructed hereunder is $64,000, which costs will be financed from funds on hand.

Deliveries of natural gas through the proposed facilities will be a minimum of 25¢ per Mcf for direct industrial sales, while the jurisdictional interruptible rates for Zones I and II are 21.3 and 23.2¢ per Mcf respectively.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on December 11, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Cities Service Gas Company, a Delaware corporation having its principal place of business in Oklahoma City, Oklahoma, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of December 28, 1943, in Docket No. G-298 (4 FPC 471).

(2) The facilities hereinbefore described, as more fully described in the application and exhibits in this proceeding, are to be used in the transportation and delivery of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities and the proposed transportation and delivery of natural gas by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(2), (c)(3), (c)(4), and (e) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity be and the same is hereby issued authorizing Applicant to construct and operate the kind and number of facilities proposed by it in the application and to transport and sell natural gas to interruptible customers during the remainder of the calendar year 1964.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable regulations under the Natural Gas Act and particularly the terms and conditions set forth in Section 157.7(c) thereof.

(C) Applicant shall submit within 60 days after the expiration of the authorization herein granted, a statement showing by projects: (a) a description of each project or projects constructed, (b) the location, (c) the actual cost, (d) name and address of customer served, (e) estimated peak day deliveries and (f) nature of use to which the gas purchased is to be put.

(D) The certificate issued hereby is granted on the express condition that the interruptible service authorized herein shall be subject to any curtailment or interruption required to meet existing or future contracted maximum delivery obligations of Cities Service Gas Company for firm service to its customers.

(E) The authorization granted is hereby limited to construction during the period between the date of this order and December 31, 1964.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

EL PASO NATURAL GAS COMPANY, DOCKET NO. CP64-99

FINDINGS AND ORDER FURTHER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 15, 1964)

On August 18, 1964, El Paso Natural Gas Company (Applicant) filed in Docket No. CP64-99 an application to amend further the Commission's order issued February 18, 1964, 31 FPC 422, in said docket, as amended, by authorizing Applicant to continue to participate, as to its one-third interest, in certain additional testing activities of the Jackson Prairie Storage Unit, including an increase in the volumetric limitation on the inventory of gas in said storage reservoir from 600,000 Mcf to 1,400,000 Mcf, for a period continuing through June 30, 1965, or until divestiture of Applicant's Northwest Division System, whichever first occurs, all as more fully set forth in the application to amend in this proceeding.

The order of February 18, 1964, as amended, authorized Applicant to construct and operate certain facilities; to sell and deliver natural gas to Washington Natural Gas Company (Washington Natural) and Washington Water Power Company (Water Power) and, with respect to Applicant's interest therein, to share in the cost of facilities to be constructed and operated by Water Power, all solely for the purpose of testing the Jackson Prairie Storage Unit. The total estimated cost, which is to be shared equally by the three participants, of the project was $1,019,400. The order, as amended, also limited the gas inventory in the storage reservoir to 600,000 Mcf (14.73 psia) and terminated the authorization on December 31, 1964.

In addition to the request for extension of authorization through June 30, 1965, or until divestiture of Applicant's Northwest Division System, whichever first occurs, it is proposed to increase the volumetric limitation of the inventory gas from 600,000 Mcf (14.73 psia) to 1,400,000 Mcf (14.73 psia), inclusive of the 232,900 Mcf injected through August 1, 1964. Further, Applicants, Washington Natural and Water Power, the latter continuing as Storage Unit Operator, have agreed to increase their individual commitments from $350,000 to $700,000 to finance the proposed expanded testing program which includes the installation of water removal facilities, the drilling of two stratigraphic test wells, four withdrawal wells and one water disposal well. The total estimated cost of continuing the testing program, as proposed, will increase from $1,019,400 to $2,100,000, inclusive of the amount of $1,004,980 expended through August 1, 1964.

The application indicates that the herein proposed project is required to verify the to-date testing conclusion that gas injected into Zone No. 2 is not migrating to Zone No. 1 and to evaluate fully the potential of the underground storage reservoir.

By letter dated September 25, 1964, Applicant was issued a temporary certificate authorizing the subject proposals.

Due notice of the filing of the application to amend and opportunity for hearing thereon has been given by publication in the Federal Register on November 18, 1964 (29 F.R. 15460). No protest or petition to intervene has been filed in this proceeding.

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued February 18, 1964, in Docket No. CP64–99, as amended, be further amended as hereinafter ordered.

The Commission orders:

(A) The Commission's order issued February 18, 1964, in Docket No. CP64–99, as amended, be and the same is hereby further amended by authorizing:

(1) With respect to Applicant as an undivided one-third interest participant, the extension of the period for joint testing of the Jackson Prairie Storage structure to continue through June 30, 1965, or until divestiture of Applicant's Northwest Division System, whichever first occurs;

(2) The increase in the volumetric limitation on gas inventory in the storage reservoir from 600,000 Mcf (at 14.73 psia) to 1,400,000 Mcf (at 14.73 psia), inclusive of the 232,900 Mcf injected through August 1, 1964, and

(3) The expansion of the testing facilities and activities of the Jackson Prairie Storage Reservoir as proposed at an estimated total cost of up to $2,100,000, inclusive of the amount of $1,004,980 expended through August 1, 1964, with Applicant increasing its one-third commitment to $700,000.

(B) In all other respects said order, as amended, shall remain in full force and effect.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

EL PASO NATURAL GAS COMPANY, DOCKET NO. CP65–61

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 15, 1964)

On September 1, 1964, El Paso Natural Gas Company (Applicant) filed in Docket No. CP65–61 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain facilities and the sale and delivery of natural gas by means thereof and the sale and delivery of natural gas by means of certain of Applicant's existing facilities and certain facilities to be constructed and operated by Pacific Gas Transmission Company (Pacific Gas), all as more fully set forth in the application in this proceeding.

Specifically, Applicant proposes the following:

(a) To sell and deliver natural gas to Intermountain Gas Company (Intermountain) for resale in the community of Aberdeen, Idaho, and surrounding irrigation areas. Applicant will utilize its existing Lamb-Weston Meter Station to make said sale. Intermountain will construct and operate distribution and connecting facilities at an estimated cost of $494,175.

(b) To construct and operate a measuring and regulating station adjacent to its existing 10¾-inch O.D. Northwest Division Eugene lateral pipeline and to sell and deliver natural gas to Northwest Natural Gas Company (Northwest) for resale to the Coburg Veneer Company, near Coburg, Oregon. Northwest Natural will construct and operate connecting facilities at an estimated cost of $5,000.

(c) To construct and operate mainline taps on its 20-inch O.D. San Juan-Maricopa pipeline and on its 5-inch O.D. Yuma lateral pipeline and to sell and deliver natural gas to Arizona Public Service Company (Public Service) for resale to Lone Butte Ranch, near Phoenix, Arizona, for irrigation use and to American Concrete and Pipe Company, Yuma County, Arizona, for industrial use. Public Service will construct and operate connecting facilities at an estimated cost of $36,154.

(d) To sell natural gas to California-Pacific Utilities Company (California-Pacific) for resale to Winema Lumber Company, near Beaver Marsh, Oregon. Deliveries will be made out of gas transported by Pacific Gas for the account of Applicant. Applicant will pay for and Pacific Gas will construct, operate and own a measuring and regulating station necessary for the deliveries.* California-Pacific will construct and operate connecting facilities at an estimated cost of $19,960.

The total third year estimated annual and maximum daily requirements for the herein proposed service are 515,705 Mcf and 2,635 Mcf, respectively.

The total estimated cost of Applicant's proposed facilities, including the facilities to be constructed by Pacific Gas, is $17,400, which cost will be financed out of current working funds.

Applicant was issued a temporary certificate on November 23, 1964, authorizing the proposed sale to California-Pacific for resale to Winema Lumber Company.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on December 11, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, El Paso Natural Gas Company, a Delaware corporation having its principal place of business in El Paso, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of January 11, 1944, in Docket No. G–288 (4 FPC 486).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are to be used in the transportation and sale of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof and the proposed transportation and sales of natural gas by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

---

*By authorization issued in Docket No. G–17350, Pacific Gas transports for the account of Applicant and delivers natural gas at specified delivery points along Pacific Gas' system in Idaho, Washington and Oregon. Said gas is purchased by Applicant from Westcoast Transmission Company at Kingsgate, British Columbia. In Docket No. CP62–50 Pacific Gas was authorized to construct and operate the facilities necessary to make deliveries of said gas transported for Applicant.

(4) The construction and operation of the proposed facilities and the proposed transportation and sales of natural gas by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c) (3), (c) (4) and (e) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity be and the same is hereby issued authorizing Applicant, El Paso Natural Gas Company, to construct and operate the proposed facilities and to sell and deliver natural gas as hereinbefore described, all as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c) (3), (c) (4) and (e) of Section 157.20 of such Regulations.

(C) The facilities hereby authorized shall be constructed and placed in actual operation and the sales and delivery of natural gas authorized in paragraph (A) above shall commence, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within six months from the date on which this order issues.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

KANSAS-NEBRASKA NATURAL GAS COMPANY, INC., DOCKET NO. CP65-79

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 15, 1964)

On September 21, 1964, as amended on October 1, 1964, Kansas-Nebraska Natural Gas Company, Inc. (Applicant) filed in Docket No. CP65-79 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction during the calendar year 1965 and the operation of natural gas facilities for the sale of natural gas to direct customers and existing distributors for resale and for miscellaneous rearrangements not resulting in any change of service rendered by means of the facilities involved, all as more fully set forth in the application, as amended, on file with the Commission and open to public inspection.

Applicant proposes to construct a maximum of 12 lateral lines of up to 6⅝-inch diameter pipe with the maximum length being 10 miles and a maximum of 12 taps and meters in order to transport and sell natural gas previously authorized under certificates for transportation or sale to existing distributors at rates on file with the Commission, for resale in existing market areas, and in order to deliver natural gas to direct consumers who will use the gas solely for road building, irrigation, agriculture, general use in schools and hospitals

located in areas outside of local distributors' franchise areas, and seasonal industrial purposes. Applicant also proposes to construct facilities necessary for a maximum of 4 miscellaneous rearrangements which affect direct sales to ultimate consumers.

The total cost of facilities proposed under this application will not exceed a maximum of $300,000 and the total deliveries to any one consumer will not exceed a maximum of 100,000 Mcf of natural gas per year.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on December 11, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application, amendment and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Kansas-Nebraska Natural Gas Company, Inc., a Kansas corporation having its principal place of business in Phillipsburg, Phillips County, Kansas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of April 6, 1943, in Docket No. G–259 (3 FPC 966).

(2) The facilities hereinbefore described, as more fully described in the application, as amended, in this proceeding, are proposed to be used in the transportation and/or sale of natural gas in interstate commerce and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a) and (e) of Section 157.20 of said Regulations.

(6) The authorization hereinafter granted should be limited to construction during the calendar year 1965 and the total expenditures for facilities to be constructed thereunder should be limited to a maximum of $300,000, with the total deliveries to any one customer not to exceed a maximum of 100,000 Mcf of natural gas per year.

(7) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that Applicant should submit within 60 days after the expiration of the authorization granted hereinafter, a statement in compliance with Section 157.7(c)(8) of the Commission's Regulations under the Natural Gas Act.

(8) The certificate issued hereinafter should be conditioned upon Applicant's compliance with the provisions of Section 157.7(c)(7) of the aforesaid Regulations.

The Commission orders:

(A) Upon the terms and conditions of this order, a certificate of public convenience and necessity be and the same is hereby issued authorizing Applicant, Kansas-Nebraska Natural Gas Company, Inc., to construct during the calendar year 1965 the proposed facilities hereinbefore described, as more fully described

in the application, as amended, in this proceeding, and to operate such facilities to sell natural gas to direct customers and to distributors for resale as hereinafter provided.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set fort hin paragraphs (a) and (e) of Section 157.20 of said Regulations.

(C) The authorization granted in paragraph (A) above is hereby limited to construction during the calendar year 1965 and the total expenditures for facilities to be constructed thereunder are hereby limited to a maximum of $300,000, with the total deliveries to any one customer limited to a maximum of 100,000 Mcf of natural gas per year.

(D) Applicant shall submit within 60 days after the expiration of the authorization granted by paragraph (A) above a statement in compliance with Section 157.7(c)(8) of the Commission's Regulations under the Natural Gas Act.

(E) The certificate issued by paragraph (A) above is expressly conditioned upon Applicant's compliance with the provisions of Section 157.7(c)(7) of the aforesaid Regulations and, further, shall not entitle any industrial customer to whom firm deliveries are authorized herein to any priorities or rights to additional gas for meeting any future increases in their requirements at the expense of firm resale customers desiring to acquire additional gas to meet any future increases in their requirements.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

LONE STAR GAS COMPANY, DOCKET NO. CP65-104

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 15, 1964)

On October 16, 1964, Lone Star Gas Company (Applicant) filed in Docket No. CP65-104 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction during the calendar year 1965 and the operation of routine field facilities to enable Applicant to take into its certificated main pipeline system natural gas which will be purchased from producers thereof, all as more fully set forth in the application in this proceeding.

The purpose of this "budget-type" application is to augment Applicant's ability to act with reasonable dispatch in contracting for and connecting to its pipeline system new supplies of natural gas in various producing areas generally coextensive with said system.

Total cost of the facilities covered by this application will not exceed a maximum of $1,770,000, with no single project to exceed a cost of $442,500, which costs are proposed to be financed out of funds currently on hand.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on December 11, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

262-497—67——93

The Commission finds:

(1) Applicant, Lone Star Gas Company, a Texas corporation having its principal place of business in Dallas, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of April 11, 1944, in Docket No. G–442 (4 FPC 565).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that Applicant should submit within 60 days after the expiration of the authorization granted hereinafter, a statement in compliance with Section 157.7(b)(3) of the Commission's Regulations under the Natural Gas Act.

(6) Public convenience and necessity require that the certificate hereinafter issued and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a) and (e) of Section 157.20 of said Regulations.

(7) The authorization hereinafter granted should be limited to construction during the calendar year 1965 and the total expenditures for facilities to be constructed thereunder should be limited to a maximum of $1,770,000, with no single project to exceed a cost of $442,500.

The Commission orders:

(A) Upon the terms and conditions of this order, a certificate of public convenience and necessity be and the same is hereby issued authorizing Applicant, Lone Star Gas Company, to construct during the calendar year 1965, the proposed facilities hereinbefore described, as more fully described in the application in this proceeding, and to operate such facilities only to take natural gas supplies from producers who have received authorization from the Commission to sell natural gas to said Applicant.

(B) Applicant shall submit within 60 days after the expiration of the authorization granted by paragraph (A) above a statement in compliance with Section 157.7(b)(3) of the Commission's Regulations under the Natural Gas Act.

(C) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a) and (e) of Section 157.20 of said Regulations.

(D) The authorization granted in paragraph (A) above is hereby limited to construction during the calendar year 1965, and the total expenditures for facilities to be constructed thereunder are hereby limited to a maximum of $1,770,000, with no single project to exceed a cost of $442,500.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

MICHIGAN WISCONSIN PIPE LINE COMPANY, DOCKET NO. CP64–155

ORDER FURTHER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 15, 1964)

On September 23, 1964, Michigan Wisconsin Pipe Line Company (Applicant), filed in Docket No. CP64–155 an application to amend an order of the Commission issued June 2, 1964, 31 FPC 1333, in Docket No. CP64–155, authorizing among other things the delivery by Applicant of a Maximum Daily Quantity (MDQ) of 78,000 Mcf to Wisconsin Power & Light Company (Wisconsin Power), and a Maximum Daily Quantity of 4,000 Mcf to Stoughton Light & Fuel Company (Stoughton).

The application to amend requests modification of the said order so as to authorize an increase in deliveries to Wisconsin Power from 78,000 Mcf to 81,000 Mcf of MDQ under Applicants' Rate Schedule ACQ–1, and a deletion of the authorization for the sale and delivery to Stoughton of an MDQ of 4,000 Mcf under Applicant's Rate Schedule SGS–1, as a result of a merger of Wisconsin Power and Stoughton, all as more fully set forth in the application to amend.

Wisconsin Power has obtained approval of the merger from the Public Service Commission of Wisconsin, and has requested that the service agreements between Michigan Wisconsin and Wisconsin Power and Stoughton tendered for filing by Michigan Wisconsin on July 13, 1964, be superseded and that there be substituted in lieu thereof a new service agreement between Michigan Wisconsin and Wisconsin Power providing for an MDQ of 81,000 Mcf. Applicant requested an effective date of November 1, 1964.

Due notice of the filing of the application to amend and opportunity for hearing thereon have been given by publication in the Federal Register on November 19, 1964 (29 F.R. 15546). No protest or petition to intervene has been filed in the proceeding concerning this amendment.

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act, and the public convenience and necessity require (1) that the Commission's order issued June 2, 1964, in Docket No. CP64–155 be further amended as hereinafter ordered, and (2) the executed superseding service agreement filed with the Commission on September 23, 1964, be accepted for filing, effective on the date of the issuance of this order.

The Commission orders:

(A) The Commission's order issued June 2, 1964, in Docket No. CP64–155 be and the same is hereby further amended so as to authorize an increase in Maximum Daily Quantity (MDQ) of Wisconsin Power to 81,000 Mcf and a reduction in the Maximum Daily Quantity (MDQ) of Stoughton to zero quantity under Applicant's Rate Schedule ACQ–1, all as hereinbefore described and as set forth in the subject application to amend.

(B) The service agreement filed with the Commission on September 23, 1964, be accepted for filing, effective on the date of issuance of this order.

(C) In all other respects said order shall remain in full force and effect.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

MISSOURI NATURAL GAS COMPANY, DOCKET NO. CP65-83

FINDINGS AND ORDER DIRECTING PHYSICAL CONNECTION OF FACILITIES AND SALE OF NATURAL GAS

(Issued December 15, 1964)

On September 25, 1964, Missouri Natural Gas Company (Applicant), filed in Docket No. CP65-83 an application pursuant to Section 7(a) of the Natural Gas Act for an order of the Commission directing Mississippi River Transmission Corporation (Transmission) to establish a physical connection of its natural gas transportation facilities with the proposed gas distribution facilities of the Applicant at a point near the City of Annapolis, Iron County, Missouri and to serve natural gas for resale in that city and its environs, all as more fully set forth in the application.

Applicant states that its estimated third year peak-day and annual volume requirements will be 189 Mcf and 22,315 Mcf respectively. Applicant's presently authorized peak-day volume of 34,480 Mcf is sufficient to meet the requirements of the City of Annapolis and therefore no increase is necessary at this time.

The estimated cost of Applicant's proposed facilities is $51,100, which cost will be financed from funds on hand.

Applicant shows that it has been duly authorized to construct and operate all of the proposed facilities described and referred to in the application by the Public Service Commission of the State of Missouri, by the County Court of Iron County, Missouri and by the City of Annapolis, Missouri.

On October 8, 1964, Transmission filed its answer to the application stating that it has no objection to establishing the requested connection of its facilities with the proposed facilities of the Applicant.

Due notice of the filing of the application and opportunity for hearing thereon has been given by publication in the Federal Register on November 17, 1964 (29 F.R. 15397). No protest or petition to intervene or notice of intervention has been filed in this proceeding.

The Commission finds:

(1) Mississippi River Transmission Corporation, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of November 29, 1960, in Docket No. CP60-95 (24 FPC 1020).

(2) Applicant, Missouri Natural Gas Company, is a public utility company, duly organized under the laws of the State of Missouri and legally authorized to construct and operate gas distribution facilities and to sell and distribute natural gas within the said state and in the municipality of the City of Annapolis.

(3) It is necessary and convenient, desirable and in the public interest that Transmission be directed to establish a physical connection of its facilities with the facilities proposed to be constructed by Applicant and to deliver natural gas to Applicant the volumes as set forth in the application and as hereinafter ordered and conditioned.

(4) Applicant should be prepared to receive natural gas from Transmission within one year from the date of this order.

(5) The requirement that Transmission serve Applicant, as proposed, will not place an undue burden upon it nor will Transmission's ability to serve its existing customers adequately be impaired.

The Commission orders:

(A) Mississippi River Transmission Corporation be and is hereby directed to establish physical connection of its natural gas transmission system with proposed facilities of the Applicant and to deliver up to 189 Mcf of natural gas per day and 22,315 Mcf per year during and after the third year of service to the Applicant, all as hereinbefore described and as more fully set forth in the application.

(B) Applicant shall be prepared to receive natural gas through the connecting facilities from Transmission within one year from the date of this order.

(C) Transmission shall report to the Commission in writing the date of commencement of service to Applicant within ten days thereof.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

NATURAL GAS PIPELINE COMPANY OF AMERICA, DOCKET NO. CP65-106

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 15, 1964)

On October 22, 1964, Natural Gas Pipeline Company of America (Applicant) filed in Docket No. CP65-106 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction during the calendar year 1965 and the operation of routine field facilities to enable Applicant to take into its certificated main pipeline system natural gas which will be purchased from producers thereof, all as more fully set forth in the application in this proceeding.

The purpose of this "budget-type" application is to augment Applicant's ability to act with reasonable dispatch in contracting for and connecting to its pipeline system new supplies of natural gas in various producing areas generally coextensive with said system.

The total cost of the facilities covered by this application will not exceed a maximum of $3,500,000, with no single project to exceed a cost of $500,000, which costs are proposed to be financed out of funds on hand.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on December 11, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein and upon consideration of the record,

The Commission finds:

(1) Applicant, Natural Gas Pipeline Company of America, a Delaware corporation having its principal place of business in Chicago, Illinois, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of October 13, 1942, in Docket No. G-235 (3 FPC 830).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that Applicant should submit within 60 days after the expiration of the authorization granted hereinafter, a statement in compliance with Section 157.7(b)(3) of the Commission's Regulations under the Natural Gas Act.

(6) Public convenience and necessity require that the certificate hereinafter issued and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a) and (e) of Section 157.20 of said Regulations.

(7) The authorization hereinafter granted should be limited to construction during the calendar year 1965 and the total expenditures for facilities to be constructed thereunder should be limited to a maximum of $3,500,000, with no single project to exceed a cost of $500,000.

The Commission orders:

(A) Upon the terms and conditions of this order, a certificate of public convenience and necessity be and the same is hereby issued authorizing Applicant, Natural Gas Pipeline Company of America, to construct during the calendar year 1965, the proposed facilities hereinbefore described, as more fully described in the application in this proceeding, and to operate such facilities only to take natural gas supplies from producers who have received authorization from the Commission to sell natural gas to said Applicant.

(B) Applicant shall submit within 60 days after the expiration of the authorization granted by paragraph (A) above a statement in compliance with Section 157.7(b)(3) of the Commission's Regulations under the Natural Gas Act.

(C) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a) and (e) of Section 157.20 of said Regulations.

(D) The authorization granted in paragraph (A) above is hereby limited to construction during the calendar year 1965, and the total expenditures for facilities to be constructed thereunder are hereby limited to a maximum of $3,500,000, with no single project to exceed a cost of $500,000.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

SOUTHERN NATURAL GAS COMPANY, DOCKET NO. CP65-56

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 15, 1964)

On August 28, 1964, Southern Natural Gas Company (Applicant), filed in Docket No. CP65-56, an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the

construction and operation of facilities and the transportation of natural gas in interstate commerce to Triad Oil and Gas Company (Triad) in Smith County, Mississippi, all as more fully set forth in the application.

Applicant proposes to construct and operate a measuring station on its 18-inch South Line at M.P. 23.9 for the purpose of selling and delivering natural gas on an interruptible basis to Triad. Peak day and annual requirements of Triad of 500 Mcf and 129,600 Mcf, respectively, will be purchased at a cost of 33 cents per Mcf, and delivered at a pressure not less than 175 psig.

The cost of the proposed facilities is $4,100.00, and will be paid for by Triad. After Southern sells 120,000 Mcf to Triad this sum will be refunded to Triad.

After due notice no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on December 11, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorizations sought, and upon consideration of the record finds and orders as hereinafter stated.

The Commission finds:

(1) Applicant, Southern Natural Gas Company, a Delaware corporation, having its principal place of business in Birmingham, Alabama, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of October 6, 1942, in Docket No. G-296 (3 FPC 822).

(2) The proposed construction and operation of facilities and the transportation of natural gas in interstate commerce, as hereinbefore described and as more fully described in the application and exhibits filed in this proceeding are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed construction and operation of facilities and the transportation of natural gas are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3), (c)(4) and (e) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity be and the same is hereby issued to Applicant, Southern Natural Gas Company, in this proceeding authorizing the construction and operation of facilities, and the transportation of natural gas in interstate commerce, as hereinbefore described, all as more fully described in the application and exhibits filed in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are hereby conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3), (c)(4) and (e) of Section 157.20 of such Regulations.

(C) The facilities authorized by paragraph (A) above shall be constructed and placed in operation within 3 months from the date of the issuance of this order.

(D) The certificate issued by paragraph (A) above is granted on the express condition that the interruptible service authorized herein shall be subject to any curtailment or interruption required to meet existing or future contracted maximum delivery obligations of Applicant for firm service to its customers.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross, and David S. Black.

TEXAS GAS TRANSMISSION CORPORATION, DOCKET NO. CP65-89

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 15, 1964)

On October 1, 1964, Texas Gas Transmission Corporation (Applicant), filed in Docket No. CP65-89, an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of facilities, and the transportation of natural gas in interstate commerce, all as more fully set forth in the application.

Applicant proposes to construct and operate metering and regulating facilities and to receive, measure and transport for the account of Hope Natural Gas Company (Hope), gas to be produced by Hope together with gas to be purchased by Hope from the Exchange Oil & Gas Company (Exchange) and Sinclair Oil & Gas Company (Sinclair), all from one jointly owned well in the Chalkey Field, Cameron Parish, Louisiana.

The transportation of natural gas for the account of Hope will be rendered under the certificate authorization issued to Texas Gas on August 10, 1959, in Docket No. G-17335 and will not involve a change in the presently authorized transportation obligation of Applicant of 100,000 Mcf per day. The rate to be charged for such transportation will be as provided in Rate Schedule X-21 contained in Applicants' FPC Gas Tariff, Original Volume No. II.

The estimated cost of the proposed facilities is $2,790, and will be defrayed from cash on hand.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application, has been filed.

At a hearing held on December 11, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorizations sought, and upon consideration of the record finds and orders as hereinafter stated.

The Commission finds:

(1) Applicant, Texas Gas Transmission Corporation, a Delaware corporation having its principal place of business in Owensboro, Kentucky, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of March 30, 1948, in Docket No. G-855 (7 FPC 213).

(2) The proposed construction and operation of facilities, and the transportation of natural gas in interstate commerce, as hereinbefore described and as more fully described in the application, filed in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed construction and operation of facilities, and the transportation of natural gas in interstate commerce are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3), (c)(4) and (e) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity be and the same is hereby issued to Applicant, Texas Gas Transmission Corporation, authorizing the construction and operation of facilities, and the transportation of natural gas as hereinbefore described, all as more fully described in the application, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are hereby conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3), (c)(4) and (e) of Section 157.20 of such Regulations.

(C) The facilities hereby authorized shall be completed and placed in actual operation, and the transportation of gas authorized in paragraph (A) above shall commence as provided in paragraph (b) of Section 157.20 of the aforesaid Regulations within 3 months of the date on which this order issues.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

TURNBULL & ZOCH DRILLING CO. (OPERATOR), ET AL, DOCKET NO. G-17960, ET AL

ORDER ON APPEAL AFFIRMING ACTION OF THE SECRETARY

(Issued December 15, 1964)

On September 25, 1964, Bright & Schiff, the applicant in Docket No. CI61-1541 filed with the Secretary a document entitled, "Petition for Rehearing and Reconsideration of Order Issued September 11, 1964, And Order Dated May 28, 1964, and to Sever All Matters in Docket No. CI61-1541 from the above Consolidated Proceeding."

On October 7, 1964, by letter, the Secretary rejected this pleading explaining that it was a petition for rehearing of an order denying a motion for rehearing* and that the Natural Gas Act and the Commission's Rules of Practice and Procedure, promulgated thereunder, do not provide for such a pleading.

On November 2, 1964, Bright & Schiff filed a letter with the Secretary, appealing his action in rejecting the September 25 pleading and requesting that the Com-

---

*The order of September 11, 1964 [Unreported], herein, was entitled "Order Denying Alternative Motions for Rehearing of Order Consolidating Proceedings for Hearing or for Severance." The "Order Consolidating Proceedings for Hearing" was our procedural order of May 28, 1964 instituting this consolidated proceeding. [Unreported.]

mission render a decision on this pleading. Although this November 2 letter was not filed within the time prescribed, we shall treat it as an appeal under Section 1.7(d) of the Rules of Practice and Procedure, entertain the appeal and affirm the action of the Secretary.

The "Petition" of September 26, did not cite any provision of the Rules or Regulations under which it was filed. It simply restated and elaborated upon the arguments made in its "Motion for Rehearing of Order Issued May 28, 1964, Consolidating Applications; and, In the Alternative, Motion to Sever", of June 29, 1964, which was denied by our order of September 11, 1964. Clearly no useful purpose could be served by entertaining interlocutory pleadings which seek reconsideration after we have already reconsidered and affirmed our prior action. Compare orders issued September 30, 1964 and October 22, 1964, 32 FPC 879 and 1163, respectively, in *United Gas Pipe Line Company*, Docket No. RP63–1; *Philadelphia Electric Power Co.* v. *F.P.C.*, 156 F. 2d 648 (CA3–1946). Should Bright & Schiff be aggrieved by our final order herein, it will be free to file an application for rehearing under Section 1.34 of the Regulations and, should such application be denied, it will have its recourse to the courts.

The Commission orders:

The action of the Secretary of October 7, 1964, rejecting the "Petition for Rehearing and Reconsideration of Order Issued September 11, 1964 and Order Dated May 28, 1964, and To Sever All Matters in Docket No. CI61–1541 from the Above Consolidated Proceeding", is hereby affirmed for the reasons set out hereinabove.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

TOWN OF WELLMAN, IOWA, DOCKET NO. CP65–54

FINDINGS AND ORDER DIRECTING PHYSICAL CONNECTION OF FACILITIES AND SALE OF NATURAL GAS

(Issued December 15, 1964)

On August 26, 1964, as amended on October 5, 1964, the Town of Wellman, Washington County, Iowa, (Applicant) filed in Docket No. CP65–54 an application pursuant to Section 7(a) of the Natural Gas Act for an order of the Commission directing Natural Gas Pipeline Company of America (Natural) to establish physical connection of its transmission facilities with the proposed facilities of and to sell natural gas to Applicant for resale and distribution in Wellman, all as more fully set forth in the application, as amended, in this proceeding.

Applicant proposes to construct and operate a distribution system in Wellman and 7.4 miles of 2⅞-inch lateral pipeline connecting the facilities of Natural with the proposed distribution system.

Applicant's estimated third year peak day and annual natural gas requirements are 799 Mcf (14.73 psia) and 95,490 Mcf (14.73 psia), respectively.

The total estimated cost of transmission and distribution facilities for the project is $259,790 which cost will be financed by the issuance of gas revenue bonds.

On September 14, 1964, Natural filed an answer to the subject application stating that it had no objection to the issuance of the requested order.

Due notice of the filing of the application, as amended, and opportunity for hearing thereon has been given by publication in the Federal Register on Novem-

ber 18, 1964 (29 F.R. 15461). No protest or petition to intervene has been filed in this proceeding.

The Commission finds:

(1) Natural Gas Pipeline Company of America, a Delaware corporation having its principal place of business in Chicago, Illinois, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of October 13, 1942, in Docket No. G–235 (3 FPC 830).

(2) Applicant, the Town of Wellman, Iowa, is a municipal corporation incorporated under the laws of the State of Iowa and is empowered to engage in the distribution of natural gas in said town.

(3) It is necessary and desirable in the public interest that Natural be directed to establish physical connection of its natural gas transportation system with the proposed facilities of Applicant and to sell and deliver up to 799 Mcf (14.73 psia) of natural gas per day to Applicant, as set forth in the application, as amended, and as hereinafter ordered and conditioned.

(4) This order should be conditioned upon Applicant being prepared to receive gas from Natural, as proposed, within one year from the date on which said order issues.

(5) The requirement that Natural serve Applicant, as proposed, will not place any undue burden upon Natural nor impair its ability to render adequate service to its existing customers.

The Commission orders:

(A) Natural Gas Pipeline Company of America be and it is hereby directed to establish physical connection of its natural gas transportation system with the proposed facilities of Applicant and to sell and deliver up to 799 Mcf (14.73 psia) of natural gas per day to Applicant, all as hereinbefore described and as set forth in the application, as amended.

(B) Natural shall report to the Commission in writing the date of commencement of service to Applicant.

(C) This order is conditioned upon Applicant being prepared to receive natural gas from Natural, as proposed, within one year from the date on which said order issues.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

LONE STAR PRODUCING COMPANY, DOCKET NO. CI62–996

ORDER GRANTING RECONSIDERATION AND FURTHER AMENDING TEMPORARY CERTIFICATE

(Issued December 16, 1964)

On November 27, 1964, Lone Star Producing Company (Producing) filed a request for reconsideration and clarification of the Commission's letter order dated October 29, 1964, granting Producing's application for amendment of the temporary certificate issued September 7, 1962, in Docket No. CI62–996 to the extent of amending the temporary certificate to include sales of gas to Lone Star Gathering Company (Gathering) from the Alfred A. Koenig Lease located in DeWitt County, Texas, but failing to take any action on Producing's request to delete nearly 12,500 acres from approximately 19,200 acres of leasehold interests in DeWitt, Goliad, and Victoria Counties, Texas, which Producing had originally committed to the sale of gas to Gathering under its contract with Gathering dated November 2, 1961.

Producing's request for reconsideration alleges that Producing's request to delete acreage should be granted because: (1) the reserves underlying about 12,460.6 acres deleted by the amendment to Producing's contract with Gathering dated July 1, 1964, were excess when service was commenced; (2) no abandonment of service or facilities will result from the deletion of acreage; (3) the deletion of acreage does not impair Gathering's ability to deliver gas to Gathering's sole purchaser, United Gas Pipe Line Company (United); (4) no public need exists for the reserves underlying the deleted acreage; (5) United has the right under its contract with Gathering to require Gathering to delete acreage so as to restrict to no more than 248.2 MMMcf the total reserves committed by Gathering to making sales to United; (6) Gathering may have to make prepayments for substantial gas volumes if excess reserves are developed; (7) Producing has had to enter into a temporary agreement to sell its gas in intrastate commerce to Houston Pipe Line Company in order to prevent its uncommitted reserves from being drained by Atlantic Refining Company's sales to Houston Pipe Line Company, but even this temporary arrangement as to uncommitted reserves is subjecting Producing's surrounding leases under contract to Gathering to severe drainage; (8) Gathering's limited capacity and marketing outlet prevent it from being able to take Producing's gas fast enough to eliminate drainage of Producing's acreage by other producers selling gas to an intrastate purchaser, and as a direct result of these limitations on capacity and markets, Gathering is obligated under the terms of its contract with Producing to release acreage to the extent necessary to prevent drainage; (9) one of the prime considerations motivating United to enter into an agreement to purchase all of the facilities and to acquire the contracts by means of which Gathering is now supplying gas to United, as proposed in Gathering's and United's joint application filed October 30, 1964, in Docket No. CP65–118, was the understanding that Gathering would rid itself of the large amount of excess acreage which it holds under contract; and (10) Producing's request to delete acreage is required by the public interest because it frees Gathering from the "very real prospect" of having to pay for gas which cannot be taken, eliminates the problem of drainage, will enable Producing to make arrangement to sell gas from its shut-in S. F. Ruschaupt well located in Victoria County, Texas, on acreage to be deleted, and will remove Producing's "very real danger" of losing leases unless it can proceed "fairly promptly" with a development program on the leasehold interests which are the subject of its request to delete acreage.

Producing's request to delete acreage states that it has drilled two wells (Angerstein Nos. 1 and 2) in DeWitt County on acreage which is not covered by its basic contract with Gathering but that these two wells are unitized with 1,222.18 acres which are committed to the sale of gas to Gathering. The Atlantic Refining Company has completed its Schorre Unit No. 1 well in the same producing horizons as Producing's Angerstein Units Nos. 1 and 2. Since Atlantic Refining Company began delivering gas produced from its Schorre No. 1 well to Houston Pipe Line Company (Houston) on October 26, 1964, Producing alleges that its Angerstein Nos. 1 and 2 wells were subjected to drainage until it entered into a temporary arrangement with Houston whereby Producing is delivering gas to Houston at the rate of 16,000 Mcf per day until such time as Producing is able to commit the unitized acreage associated with its Angerstein Nos. 1 and 2 wells to the sale of gas to Houston. Since it appears that leases covering 1,222.18 acres of land are subject to drainage even under Producing's temporary arrangement with Houston, Producing has shown the existence of emergency conditions which justify the amendment of Producing's temporary certificate in Docket No. CI62–996 so as to permit the deletion of the 1,222.18 acres of leasehold interests which have been unitized with Producing's Angerstein Nos. 1 and 2 wells.

However, Producing's request for deletion of acreage asks that a total of about 12,460.60 acres be deleted from the contract under which it sells gas to Gathering. Neither in its request to delete acreage nor in its request for reconsideration has Producing demonstrated reasons showing that emergency conditions exist with respect to the 11,238.42 acres of land which remain committed to the sale of gas to Gathering after deletion of the 1,222.18 acres of land unitized with Producing's Angerstein wells. Producing does not contend that any drainage of the additional 11,238.42 acres will occur because of production of gas from its Angerstein Nos. 1 and 2 wells or because of Producing's plan to commence shortly the drilling of its Angerstein No. 3 well to compensate for the possibility that Sinclair Oil & Gas Company is contemplating the drilling of an offset well on acreage owned by Sinclair.

Producing's other claims regarding Gathering's limitations as to pipeline capacity and marketing arrangements with United have been rendered moot by the filing of Lone Star Gas Company's, Gathering's, and United's aforementioned joint application in Docket No. CP65–118. Under the arrangement contemplated in Docket No. CP65–118, United will become the purchaser of gas from Producing instead of Gathering and the service agreement between Gathering and United, which is the cause of Gathering's existing market limitations, will be cancelled. As to Gathering's alleged pipeline capacity limitations, the application in Docket No. CP65–118 does not indicate in any way that United will limit purchases from the producers in DeWitt, Goliad, and Victoria Counties to an average daily volume of 40,000 Mcf, nor, under the proposals in Docket No. CP65–118, will there be a limitation of 248.2 MMMcf on the quantity of reserves which can be committed to the sale of gas to United.

While it is true that Gathering proposes in Docket No. CP65–118 to assign to United its contract with Producing subject to the amendment of July 1, 1964, which deleted approximately 12,500 acres of the reserves originally committed to the performance of the contract, there is no statement in the application implying that United's take-or-pay problem will be aggravated merely because it is proposing to purchase Gathering's facilities and to acquire by assignment all of Gathering's contracts with the producers who presently supply gas to Gathering. Likewise, the obligation to allow the producers to delete acreage to prevent drainage is no longer dependent on Gathering's pipeline capacity but is rather dependent on United's plans for operation of the facilities which it proposes to acquire from Gathering.

As for Producing's claim that it must delete acreage in order to find a market for gas to be produced from its shut-in S. F. Ruschaupt well located in Victoria County, Texas, it is noted that one of United's flow diagrams in the application in Docket No. CP65–118 shows the proposed construction of new facilities for the purpose of attaching a newly-developed source of gas to its system. Additionally, Gathering itself has not indicated any difficulty in taking gas from producers who have recently received certificates authorizing them to sell substantial volumes of additional gas to Gathering, including the sale of gas to Gathering from acreage located in Victoria County, Texas, as proposed by Hugh Goodrich in his application filed September 8, 1964, in Docket No. CI65–215. Producing has given no explanation for Gathering's apparent ability to keep receiving new gas supplies offered by other producers while simultaneously having no capacity to receive any additional gas from Producing's shut-in S. F. Ruschaupt well.

There is no support in the proposals in Docket No. CP65–118 for other allegations made by Producing, such as the claim that no public need exists for the reserves underlying the acreage for which authorization to delete is requested,

or its argument that no abandonment of service or facilities will occur if the acreage is deleted as requested, or that the reserves underlying the acreage for which deletion is requested are excess to United's requirements. All of these allegations of fact and conclusions of law which are made by Producing are matters which will have to be determined before the Commission can reach a final decision regarding the application in Docket No. CP65–118.

The discussion above shows that Producing's request to delete acreage is inextricably interrelated with the proposals of Gathering and United in Docket No. CP65–118. The Commission's staff is presently endeavoring to obtain from the applicants in Docket No. CP65–118 considerable data which were not included in the application. Producing's application will be consolidated with the application in Docket No. CP65–118 and further action will be taken on both the application in Docket No. CP65–118 and Producing's request to delete acreage in Docket No. CI62–996 when the information sought by the staff regarding the application in Docket No. CP65–118 has been furnished.

The Commission finds:

(1) Emergency conditions exist which require the granting of Producing's request for amendment of its temporary certificate to permit deletion of 1,222.18 acres of unitized leases associated with Producing Angerstein Units Nos. 1 and 2.

(2) Producing has not shown that emergency conditions exist which require the granting of its request to amend its temporary certificate so as to permit the deletion of additional leasehold interests totaling approximately 11,238 acres.

(3) Decision regarding Producing's request to delete the additional acreage referred to in paragraph (2) should be deferred until such time as the applicants have furnished all requisite information needed for determining whether the interrelated application in Docket No. CP65–118 should be granted or denied.

The Commission orders:

(A) The temporary certificate issued September 7, 1962, in Docket No. CI62–996 is hereby amended to delete therefrom sales of gas to Lone Star Gathering Company from the unitized acreage associated with Lone Star Producing Company's Angerstein Units Nos. 1 and 2 as described in Producing's Second Supplement to its application filed September 24, 1964, in Docket No. CI62–996 and as shown on the plat accompanying Producing's request for reconsideration filed November 27, 1964.

(B) In all other respects, the temporary certificate issued September 7, 1962, shall remain unchanged and in full force and effect.

(C) Decision on that portion of Producing's request involving deletion of approximately 11,238 acres of additional leasehold interests is hereby deferred until such time as the Commission acts on the interrelated joint application filed October 30, 1964, by Lone Star Gas Company, Lone Star Gathering Company, and United Gas Pipe Line Company in Docket No. CP65–118.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

MISSISSIPPI RIVER FUEL CORPORATION, DOCKET NO. G–18686

FINDINGS AND ORDER DISMISSING APPLICATION

(Issued December 16, 1964)

On December 19, 1962, Mississippi River Fuel Corporation (Applicant) filed in Docket No. G–18686, an application to amend an order of the Commission issued June 30, 1959, 21 FPC 917, in Docket No. G–18686, authorizing the operation of facilities certificated in Docket No. G–2417 for the transportation and sale of natural gas on an interruptible basis to the purchaser of Applicant's chemical plant near Crystal City, Missouri. The application to amend seeks authorization to deliver to Armour and Company (Armour) a daily average of 23,000 Mcf of natural gas instead of the originally authorized 13,000 Mcf, all as more fully set forth in the application to amend.

The letter of intent of Armour and Company submitted with the application to amend states that Armour had not made a final decision to expand its plant but that in case of expansion, an additional 10,000 Mcf daily would be required in June, 1964. Since Armour has not indicated the need for the additional gas the application to amend the Commission's order of June 30, 1959, should be dismissed.

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act, and the public convenience and necessity require that the application to amend the order of the Commission issued on June 30, 1959, in Docket No. G–18686, be dismissed.

The Commission orders:

The application to amend the order of the Commission issued June 30, 1959, in Docket No. G–18686, filed in this proceeding on December 19, 1962, be and the same is hereby dismissed.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

PUGET SOUND POWER & LIGHT COMPANY, PROJECT NO. 2150

ORDER DETERMINING ACTUAL LEGITIMATE ORIGINAL PROJECT COST, NET CHANGE IN PROJECT COST, AND PRESCRIBING ACCOUNTING THEREFOR

(Issued December 16, 1964)

Puget Sound Power & Light Company, Licensee for Project No. 2150[1] filed a statement on March 23, 1962 pursuant to Section 4.1 of the Commission's

[1] The project is located on the Baker River, a tributary of the Skagit River in Whatcom and Skagit Counties, Washington. It consists of the Upper Baker River and the Lower Baker River Developments. The license, effective May 1, 1956, for a period of 50 years, authorized, among other things, construction of the Upper Baker River Development and the addition of a third generating unit in the constructed Lower Baker River Development.

Regulations under the Federal Power Act, claiming an actual legitimate original cost for the Upper Baker River Development as of December 31, 1960 in the amount of $46,075,055.53; a net addition to actual legitimate original project cost for the Lower Baker River Development for the period May 1, 1956 through December 31, 1960[2] in the amount of $10,513,684.76; an actual legitimate original cost of project property common to both developments as of December 31, 1960 in the amount of $823,691.93; and an actual legitimate original cost of intangible plant attributable to the project as of December 31, 1960, in the amount of $29,788.84.

The resulting total of all claimed project costs as of December 31, 1960 is $63,992,512.55, all as shown classified by development and by primary plant account in Schedule I attached.

The Commission's staff conducted a field examination of Licensee's books, records and other data for the purpose of ascertaining the correctness of the claimed amounts indicated above. Following the review, tentative agreement, subject to Commission approval, was reached between the staff and Licensee's representatives with respect to adjustments proposed by the staff which are summarized in the attached Schedule I. These adjustments result in (1) a reduction of $281,520 in the claimed actual legitimate original cost of the Upper Baker development as of December 31, 1960; (2) a revision of the previously determined initial cost of the Lower Baker development, a reduction of $4,625;[3] and (3) a reduction of $100,685 in the claimed cost of changes in project plant accounts of the Lower Baker development for the period from May 1, 1956 through December 31, 1960.

The proposed adjustments are to be accomplished by the following composite journal entry:

Account No.		Debit	Credit
101	Electric plant in service—Project No. 2150		$386,830.21
101	Electric plant in service—Nonproject		212,294.02
108	Accumulated provision for depreciation of electric plant in service—Project No. 2150		76,387.66
108	Accumulated provision for depreciation of electric plant in service—Nonproject	$121,523.58	
216	Unappropriated earned surplus	553,988.31	
	Totals	675,511.89	675,511.89

The Washington Utilities and Transportation Commission was advised by letter dated June 18, 1963, of the proposed adjustments and the resulting project

[2] By Commission order issued January 8, 1963 (29 FPC 54), the actual legitimate original cost of the constructed Lower Baker River Development as of May 1, 1956, the effective date of the license, was determined to be $6,550,291.49, the accrued depreciation as of that date to be in the credit amount of $652,227.00, and the resulting net investment as of that date to be $5,898,064.49.

[3] To reclassify land cost of $4,352.00 from Hydraulic Production Land and Land Rights, Lower Baker River Development to Transmission Land and Land Rights, Upper Baker River Development, and to eliminate the costs of land of $273.60 which was sold.

costs. By letter of June 24, 1963, that Commission concurred in the proposed adjustments and accounting disposition thereof.

The Commission finds:

(1) Licensee by its acceptance of the proposed adjustments, including the accounting dispositions and the resulting project cost as of December 31, 1960, and the Washington Utilities and Transportation Commission, by its concurrence in the staff recommendations herein have obviated the necessity for the notice and opportunity to protest, provided by Sections 4.4 and 4.5 of the Commission's Regulations under the Federal Power Act.

(2) The foregoing adjustments and accounting dispositions are reasonable and appropriate for the purposes of the Federal Power Act and therefore should be approved and directed as hereinafter provided.

(3) The actual legitimate original cost of the Upper Baker River development, common and intangible project plant as of December 31, 1960, is hereby determined to be $46,647,016.34, all as shown in attached Schedule I.

(4) The actual legitimate original cost of the constructed Lower Baker River development as of May 1, 1956, the effective date of the license, previously determined (29 FPC 54) to be $6,550,291.49 is hereby determined to be $6,545,665.89 resulting in a revised net investment of Licensee as of that date of $5,893,438.89. The net additions or change in project cost for the Lower Baker development for the period May 1, 1956, through December 31, 1960, is hereby determined to be $10,413,000.11 and the resulting actual legitimate original cost of the Lower Baker River as of December 31, 1960, is hereby determined to be $16,958,666 all as shown in the attached Schedule I.

(5) The total actual legitimate original cost of Project No. 2150 as of December 31, 1960, is hereby determined to be $63,605,682.34 all as classified by developments and primary plant accounts as shown in attached Schedule I.

The Commission orders:

(A) The provisions of Sections 4.4 and 4.5 of the Commission's Regulations under the Federal Power Act are hereby waived for the purposes of this order.

(B) The adjustments and accounting dispositions proposed by the staff, agreed to by the Licensee, are hereby approved and directed to be made by the Licensee.

(C) Licensee, to the extent that it has not already done so, shall establish and maintain control and detailed plant accounts for Project No. 2150, showing: the debit balance of $6,545,665.89 as the initial cost of the Lower Baker River development as of May 1, 1956, and the debit balance of $46,647,016.34 as the initial cost of the Upper Baker development including intangible and common plant, as to December 31, 1960; the debit amount of $10,413,000.11 as the net addition or change in project cost of the Lower Baker River development for the period from May 1, 1956 through December 31, 1960; and the debit balance of $63,605,682.34 as the actual legitimate original cost of the entire Project No. 2150 including common plant and intangible plant and classified by developments and primary plant accounts as shown in attached Schedule I.

262-497—67——94

(D) Licensee shall within 90 days file with the Commission, Federal Power Commission Form No. 7, showing compliance herewith, three copies to be filed with the Commission and two copies to be submitted to the Regional Accountant, San Francisco, California.

SCHEDULE I

Project No. 2150 (Baker River)

PUGET SOUND POWER & LIGHT COMPANY

SUMMARY BY DETAILED PLANT ACCOUNTS OF APPROVED INITIAL COST OF THE LOWER BAKER RIVER DEVELOPMENT AS OF MAY 1, 1956, CLAIMED COST OF CHANGES THERETO FROM MAY 1, 1956, THROUGH DEC. 31, 1960, AND CLAIMED INITIAL COST OF THE UPPER BAKER RIVER DEVELOPMENT AS OF DEC. 31, 1960, WITH ADJUSTMENTS THERETO AND BALANCE AS OF DEC. 31, 1960

TEXACO INC., DOCKET NO. CI65-366

ORDER DENYING APPLICATION FOR REHEARING

(Issued December 16, 1964)

On November 19, 1964, Texaco Inc. (Texaco) filed an "Application for Rehearing" of the Commission's letter order of November 5, 1964, in Docket No. CI65-366 wherein Texaco was granted temporary certificate authority to make sales of natural gas for resale in interstate commerce to Lone Star Gathering Company (Lone Star) from the Koenig Field located in Texas Railroad Commission District No. 2. The temporary certificate was subject to the following condition.

> (1) The total initial price for such service, including any tax reimbursement, shall be 16.0¢ per Mcf at 14.65 psia, subject to Texaco Inc., refunding to Lone Star Gathering Company, from the date of initial delivery, with interest at 7% per annum, any amounts collected in excess of the amounts resulting from the rate finally determined to be required by the public convenience and necessity in Docket No. CI65-366. Refunds shall not be required below 14.0¢ at 14.65 psia.

In its "Application for Rehearing" Texaco alleges that it is aggrieved by the Commission's order of November 5, 1964, because it makes Texaco's initial rate uncertain during the period of temporary authority and because it imposes a contingent refund obligation on the initial price which is within the price ceilings promulgated by the Commission in its Statement of General Policy No. 61-1, as amended. Hence, Texaco requests the Commission to modify its order of November 5, 1964, by deleting the contingent refund condition therefrom on the grounds that:

(1) The imposition of a contingent refund condition on a contract which complies with the ceiling price level is directly contrary to a policy which utilizes the initial price level as a ceiling, and;

(2) There is no reasonable basis for the 14 cents per Mcf refund floor.

It is obvious that Texaco is not aggrieved by the Commission's order. If the contingent refund condition were removed from the order Texaco's initial rate, by operation of law, would be subject to refund without a floor.[1]

The imposition of a contingent refund condition in the Commission's order was not inconsistent with past policy. This Commission has never held that it cannot impose a refund condition on a temporary certificate even though the proposed initial price is within the price ceiling promulgated in the Statement of General Policy. Moreover, twenty-four other producers have filed applications seeking authorization to sell natural gas for resale in interstate commerce to Lone Star from wells also located in Texas Railroad Commission District No.

[1] *Public Service Commission of New York, et al.* v. *F.P.C.*, 329 F. 2d 242; cert. denied, *sub nom.*, *Prado Oil & Gas Co.* v. *F.P.C.*, 377 U.S. 963 and *Skelly Oil Co.* v. *F.P.C.*, 377 U.S. 693.

2.[2] The initial price proposed was, in each case, within the Commission's guidelines.[3] Each applicant received temporary authorization to make the sales as proposed. Each of the temporary certificates was subject to a contingent refund obligation. Twenty-two of these temporary certificates contained refund floors of 14 cents per Mcf. The other two applications proposed the sale of sour gas at an initial price of 12 cents per Mcf and were subject to refund down to 11 cents per Mcf. Therefore, the Commission conditioned the temporary certificate granted to Texaco in order to be consistent with its past treatment of other producers seeking authority to make sales to Lone Star.

Texaco further contends that Opinion No. 412[4] requires that the refund floor cannot "* * * be less than the in-line price for contracts executed prior to the Policy Statement."[5] And, that, "[u]nless it is erroneously assumed that the in-line price for contracts executed four years after the Policy Statement is less than the in-line price of contracts executed prior to the Policy Statement, there would be no basis to have a refund floor lower than the in-line price determination in Opinion No. 412."

We disagree. Opinion No. 412 expressly left for a subsequent proceeding the determination of the in-line price applicable to contracts executed after September 28, 1960. Moreover, the refund floor will have no effect upon the Commission's subsequent determination of the in-line price applicable to the sale of gas proposed by Texaco in Docket No. CI65–366. It merely delimits the maximum extent of Texaco's refund obligation.

The Commission further finds:

The grounds for rehearing set forth in the "Application for Rehearing" filed by Texaco set forth no new facts or principles of law which were not fully considered by the Commission when it issued its letter order herein on November 5, 1964, or which now having been considered warrant any change or modification in said order.

The Commission orders:

The "Application for Rehearing" of Texaco filed on November 10, 1964, in Docket No. CI65–366 is hereby denied.

---

[2] See Docket Nos. CI62–698; CI62–780; CI62–824; CI62–889; CI62–959; CI62–961; CI62–962; CI62–996; CI62–1023; CI63–874; CP63–192; CI63–5; CI63–56; CI63–58; CI63–67; CI63–790; CI63–814; CI63–820; CI63–875; CP63–193; CI64–346; CI65–62; CI65–293; and CI65–386.

[3] All but one of these applications were filed prior to the Eighth Amendment to the Policy Statement (issued on December 9, 1963, 30 FPC 1435) at a time when the "guideline" price for Railroad District No. 2 was 18 cents per Mcf. After the Eighth Amendment the "guideline" price was 16 cents per Mcf. Texaco's contract was executed on September 1, 1964.

[4] *Hassie Hunt Trust, Operator, et al.*, Docket No. G–19115, *et al.*, issued December 9, 1963, 30 FPC 1438.

[5] The in-line price for contracts executed prior to the Policy Statement was 15 cents per Mcf, *Hassie Hunt Trust, supra.*

DUKE POWER COMPANY, PROJECT NO. 2232

ORDER DETERMINING ACTUAL LEGITIMATE ORIGINAL PROJECT COST, NET CHANGES THEREIN, ACCRUED DEPRECIATION, NET CHANGES IN ACCRUED DEPRECIATION AND PRESCRIBING ACCOUNTING THEREFOR

(Issued December 17, 1964)

Duke Power Company, Licensee for Project No. 2232[1] filed statements on April 1, 1963 and October 18, 1963, pursuant to Section 4.20 of the Commission's Regulations under the Federal Power Act, claiming as the actual legitimate original cost for the developments, as of September 1, 1958 (the effective date of the license), a total of $42,861,150; as accrued project depreciation as of that date, a total of $25,659,811 resulting in a claimed project net investment of $17,201,389 as of that date. Licensee's books indicate a recorded cost for the developments as of September 1, 1958 which exceeds its claimed cost by $4,020,373. Licensee has recorded a total, in the credit amount of $56,501, as the net changes to actual legitimate original cost for the period September 1, 1958 through December 31, 1962 and a total of $2,216,649 as the net increase in Accrued Depreciation for the same period. These would result in recorded project costs of $46,825,022 and accrued depreciation of $27,876,460 as of December 31, 1962. These claimed and recorded costs and changes in cost are shown classified by development in Schedule I and by primary plant accounts in Schedule I–A, attached. Claimed and recorded project accrued depreciation and changes therein through December 31, 1962 are shown classified by development in the attached Schedule II.

The Commission's staff conducted a field examination of Licensee's books, records and other data for the purpose of ascertaining the correctness of the claimed and recorded amounts indicated above. Following the review, tentative agreement, subject to Commission approval, was reached between the staff and Licensee's representatives with respect to adjustments proposed by the staff which are summarized in the attached Schedule I–A and II. These adjustments include (1) a reduction of $1,072,260 in the claimed actual legitimate original project cost as of September 1, 1958; (2) a reduction of $349,655 in the claimed initial accrued depreciation as of September 1, 1958, resulting from the disposition of plant account adjustments; and (3) a reduction of $600 in the claimed cost of changes in project plant accounts for the period from September 1, 1958, through December 31, 1962. In addition to the credit adjustment of $1,072,260 to the claimed initial cost, there is included in the agreement a credit adjustment of $4,020,373 to project recorded costs not claimed. These additional adjustments to recorded costs consist of the cost of nonutility lands and other related costs included in project accounts and are summarized in Schedule III.

The adjustments referred to above are to be accomplished by the following composite journal entry:

---

[1] The Project consists of 10 hydroelectric developments with 12 powerhouses constructed on the Catawba River in North Carolina and the Wateree River in South Carolina between 1905 and 1928. The Project License also provides for an additional development, Cowans Ford, now under construction, which is not included in the scope of this order.

Account No.			
101	Electric plant in service—Project No. 2232		$5,003,238
101	Electric plant in service—Nonproject		11,678
108	Accumulated provision for depreciation of electric plant in service—Project No. 2232	$350,255	
108	Accumulated provision for depreciation of electric plant in service—Nonproject	9,529	
121	Nonutility property	3,829,582	
216	Unappropriated earned surplus	915,545	
	Totals	5,104,911	5,104,911

This is all as more specifically shown in the Schedules appended hereto.

The North Carolina Utilities Commission and the South Carolina Public Service Commission were advised by letter of this Commission dated March 24, 1964, of the proposed adjustments, the resulting project costs and accrued depreciation. The North Carolina Utilities Commission by letter of March 27, 1964, and the South Carolina Public Service Commission by letter of June 8, 1964, have concurred in the proposed adjustments and accounting disposition thereof.

The Commission finds:

(1) Licensee by its acceptance of the proposed adjustments including the accounting dispositions and the resulting respective project cost, project reserve for depreciation and project net investment as of September 1, 1958, and the North Carolina Utilities Commission and South Carolina Public Service Commission, by their concurrence in the staff recommendations herein have obviated the necessity for the notice and opportunity to protest, provided by Sections 4.4, 4.5, 4.22 and 4.23 of the Commission's Regulations under the Federal Power Act.

(2) The foregoing adjustments and accounting dispositions are reasonable and appropriate for the purposes of the Federal Power Act and therefore should be approved and directed as hereinafter provided.

(3) The actual legitimate original cost of Project No. 2232 as of September 1, 1958 is $41,788,890, net change in actual legitimate original cost for the period September 1, 1958 to December 31, 1962 is in the credit amount of $57,101 and the resulting actual legitimate original cost as of December 31, 1962 is $41,731,789 classified by developments and by primary plant accounts as shown in Schedules I and I–A.

(4) The project accumulated provision for depreciation of the constructed plants as of September 1, 1958, the effective date of the license, is $25,310,156 classified by developments and functions as shown in Schedule II, the net change in project accumulated depreciation for the period September 1, 1958 to December 31, 1962 is $2,216,049 and the resulting accumulated provision for depreciation as of December 31, 1962 is $27,526,205, classified by developments and functional groups as shown in Schedule II.

(5) The resulting net investment in the project as of September 1, 1958, the effective date of the license, is $16,478,734.

The Commission orders:

(A) The provisions of Sections 4.4, 4.5, 4.22 and 4.23 of the Commission's Regulations under the Federal Power Act are hereby waived for the purposes of this order.

(B) The adjustments and accounting dispositions proposed by the staff and agreed to by the Licensee are hereby approved and directed to be made by the Licensee.

(C) Licensee, to the extent that it has not already done so, shall establish and maintain control and detailed plant accounts for Project No. 2232, showing: the debit balance of $41,788,890 as of September 1, 1958, the effective date of the license; the net change in actual legitimate original cost for the period September 1, 1958 through December 31, 1962, in the credit amount of $57,101; and the total debit balance of $41,731,789 as of December 31, 1962; all as more specifically shown by primary accounts of the Commission's Uniform System of Accounts prescribed for Public Utilities and Licensees as set forth in the attached Schedules I and I–A.

(D) Licensee, to the extent that it has not already done so, shall establish and maintain an account for accumulated provision for depreciation applicable to in-service property of Project No. 2232, showing: a credit balance of $25,310,156 as of September 1, 1958, the effective date of the license; the credit amount of $2,216,049 as the net increase or change in the project accumulated provision for depreciation for the period from September 1, 1958, through December 31, 1962; and the credit balance of $27,526,205 as of December 31, 1962, all classified by functional groups as shown in the attached Schedule II.

(E) Licensee shall, within 90 days from the issuance of the Commission's order, file with the Commission three certified copies of Licensee's FPC Form No. 7 and adjusting journal entries showing compliance with this order.

EL PASO NATURAL GAS COMPANY, DOCKET NO. CP65-82

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 17, 1964)

On September 25, 1964, El Paso Natural Gas Company (Applicant) filed in Docket No. CP65-82 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain pipeline facilities to be located in Power County, Idaho, consisting of approximately 3.41 miles of 6⅝-inch O.D. pipeline looping a portion of its Simplot-Westvaco lateral line and the installation, as replacements, of certain valves and regulators in its Simplot-Westvaco meter station, all as more fully set forth in the application.

Applicant states that the purpose of the proposed facilities is to provide Intermountain Gas Company with increased delivery pressures and additional natural gas for resale to J. R. Simplot Company (Simplot) due to the construction by Simplot of an anhydrous ammonia plant adjacent to Simplot's phosphate plant. Estimated third year added requirements are 840 Mcf per day on a firm sale basis and 3,692 Mcf per day on an interruptible basis, for a total of 4,532 Mcf per day on a maximum day; and 274,239 Mcf firm sales on an annual basis and 972,303 Mcf of interruptible gas on an annual basis, for a total of 1,246,542 Mcf annually.

The total estimated total cost of the proposed facilities is $77,000, which cost will be financed from funds on hand.

A temporary certificate was issued to Applicant by letter on October 23, 1964.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on December 11, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, El Paso Natural Gas Company, a Delaware corporation having its principal place of business in El Paso, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of October 29, 1942, in Docket Nos. G-242 and G-257 (3 FPC 851).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are proposed to be used in the transportation and sale of natural gas in interstate commerce subject to the jurisdiction of the Commission, and the construction and operation thereof and the transportation and sale of natural gas are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity, and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3), (c)(4) and (e) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity be and the same is hereby issued authorizing Applicant, El Paso Natural Gas Company to construct and operate the proposed facilities and to transport and sell natural gas as hereinbefore described, all as more fully described in the application, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3), (c)(4) and (e) of Section 157.20 of such Regulations.

(C) The certificate issued hereby is granted on the express condition that the interruptible service authorized herein shall be subject to any curtailment or interruption required to meet existing or future contracted maximum delivery obligations of Intermountain Gas Company and/or El Paso Natural Gas Company for firm service to its or their customers.

(D) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraph (c) of Section 157.7 of said Regulations.

(E) The construction of the facilities authorized by this order shall be completed and said facilities shall be placed in actual operation within six months from the date on which this order issues.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

AMENDING PARAGRAPH B OF ACCOUNT 255 OF THE UNIFORM SYSTEM OF ACCOUNTS AS PRESCRIBED FOR NATURAL GAS COMPANIES BY ORDER NO. 289

(Issued December 17, 1964)*

On November 2, 1964, the Commission issued Order No. 289 (32 FPC 1255, 29 F.R. 15020) in which it prescribed, among other things, a new Account 255, Accumulated deferred investment tax credits, for use by natural gas companies under the Natural Gas Act (15 U.S.C. 717g).

Concurrently herewith, we are issuing Order No. 290 in which we prescribe generally similar accounting requirements for public utilities and licensees under the Federal Power Act (16 U.S.C. 825). As a result of the comments received relating to public utilities and licensees in Docket No. R-232, we revised Para-

*Published in the Federal Register on December 23, 1964 (29 F.R. 18216).

graph B of Account 255, as originally proposed, to permit changes in accounting method with respect to other than electric utility operations. A similar change should be made, as well, to that account as it applies to natural gas companies. Accordingly, we are here amending Paragraph B of Account 255, as prescribed in Order No. 289 to clarify our intention that the instruction relates solely to gas utility property and related consumers.

The Commission finds:

(1) The amendment herein adopted is necessary and appropriate for the purpose of the administration of the Natural Gas Act.

(2) For the reasons expressed above and in Order No. 289, it is unnecessary to comply with the notice and effective date provisions of section 4 of the Administrative Procedure Act.

The Commission, acting pursuant to the authority set out in Order No. 289, *orders:*

(A) Effective upon the issuance of this order, Paragraph B of Account 255, prescribed by Order No. 289 as an amendment to Part 201, Subchapter F, Chapter I, Title 18 of the Code of Federal Regulations, is amended by changing the words "useful life of the property" to "useful life of gas utility property". As so amended, Paragraph B of Account 255 will read as follows:

"B. Where the company's accounting provides that investment tax credits are to be passed on to customers, this account shall be debited and Account 411.1 credited with a proportionate amount determined in relation to the average useful life of gas utility property to which the tax credits relate or such lesser period of time as may be adopted and used by the company. If, however, the deferral procedure provides that investment tax credits are not to be passed on to customers, the proportionate restorations to income shall be credited to Account 420."

[Secs. 8, 16, 52 Stat. 825, 830; 15 U.S.C. 717g, 717o]

(B) The caption of Docket No. R-232 is amended, for the purposes of this order, to read as set forth above.

(C) The Secretary shall cause prompt publication of this order to be made in the Federal Register.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

INVESTMENT TAX CREDIT UNDER 1962 AND 1964 AMENDMENTS TO INTERNAL REVENUE CODE; ACCOUNTING TREATMENT BY PUBLIC UTILITIES AND LICENSEES, DOCKET NO. R-232; INTERIM ACCOUNTING TREATMENT OF INVESTMENT TAX CREDIT UNDER 1962 AMENDMENTS TO INTERNAL REVENUE CODE BY PUBLIC UTILITIES, LICENSEES, AND NATURAL GAS COMPANIES, DOCKET NO. R-231

ORDER NO. 290

AMENDING THE UNIFORM SYSTEM OF ACCOUNTS AND ANNUAL REPORT F.P.C. FORM NO.1 PRESCRIBED FOR PUBLIC UTILITIES AND LICENSEES

(Issued December 17, 1964)*

The Commission, in this order, is concluding the portion of this proceeding wherein, by notice issued January 15, 1963 (28 F.R. 528), it proposed the prescrip-

*Published in the Federal Register on December 23, 1964 (29 F.R. 18214). Amended by order issued January 7, 1965, 33 FPC 27.

tion of accounting requirements with respect to public utilities and licensees to reflect the tax credit for investment in certain depreciable property (investment tax credit) provided under section 2 of the Internal Revenue Act of 1962 (26 U.S.C. 38).[1]

Following the receipt of numerous responses to the invitation in the notice for the submission of comments on the proposals, oral argument was had before the Commission on October 7, 1963. However, due to the pendency in the Congress of legislation dealing with the investment credit, further consideration was postponed until after the enactment of the Revenue Act of 1964 (P.L. 88-272, Feb. 26, 1964.)

Thereafter, on May 1, 1964, the Commission announced the accounting treatment it proposed to provide—that the accounting to be prescribed should afford the various choices afforded by the Congress in that Act to the companies affected. Then, as also there announced, the Commission issued, on September 1, 1964, a notice of proposed rule-making (29 F.R. 12735, September 9, 1964) with respect to public utilities and licensees. It is the subject matter of that notice which is now before us for action.

The September 1 notice provided for the submission of comments from interested parties by October 15, 1964. Comments were received from 31 sources including licensees, public utilities, distributors, State regulatory agencies, firms of accountants, the National Association of Railroad and Utilities Commissioners Committee on Accounts and one federal agency. The majority of the responses approve the basic accounting proposed in the notice. Some requested clarification in texts, 12 recommended deletion of the amendment (attachment C to the notice) which proposed an amendment with respect to annual reports to stockholders, 3 requested that we provide accounting for balances accumulated in 1962 and 1963 under the interim order of the Commission, 12 recommended removal of the provision that approval by the Commission is needed for accounting changes when a company changes its election to pass or not to pass on the benefits of the tax credit to consumers, 2 included recommendations for changes in the reporting schedules, 1, a public utility, questioned the authority to issue the regulations and requested a hearing, and 3 distribution companies requested opportunity to appear if a hearing should be held.

All comments, recommendations and objections have been carefully considered. Many of the clarifying suggestions have been adopted and we will provide, as requested by three respondents, for the disposition of the investment tax credits which have been accumulated in Account 253 pursuant to the Commission's Interim Order of January 9, 1963, in Docket No. R-231.

Many of the comments were most helpful, some with respect to substance and others which suggested pertinent clarifying changes in the text of the accounts. As a result, we are modifying certain language and account requirements that were originally proposed in the notice. Most significant is the change in paragraph A of Account 255, which we are modifying to permit changes in accounting methods used for the investment tax credits relating to nonelectric and other operations as authorized in paragraph C of that Account without specific authorization by the Commission. A similar conforming change has been made in Account 411.1. Paragraph B, as here adopted, refers solely to electric

[1] On Jan. 9, 1963, the Commission had prescribed an interim accounting treatment (Order No. 261 in Docket No. R-231, 29 FPC 62, 28 F.R. 402) to be followed by the companies in closing their books for the year 1962 and in accounting for income taxes. Order No. 261 was continued in effect by a subsequent Interim Order, still effective with respect to public utilities and licensees as of the date hereof, issued in the instant proceeding January 23, 1964 (31 FPC 175, 29 F.R. 1567). The portion of this proceeding relating to natural gas companies was concluded by Order No. 289, issued Nov. 2, 1964 (32 FPC 1255, 29 F.R. 15020).

utility property rather than to total property as was implied in the notice. Finally, paragraph D has been modified so that companies will not be required to keep records on each of the properties acquired but rather on total properties acquired during the year on a weighted-average service life basis. An addition to the account also provides that tax investment records related to property acquisitions are not necessary when tax credits are not deferred. Slight conforming modifications have been made in the schedules being added to the annual report forms, FPC Nos. 1 and 1-F.

Since the Commission's authority to prescribe the basic accounting to be followed by public utilities and licensees is firmly established, questions raised on that issue by certain of the respondents are clearly without merit.

Paragraphs 2 and 3 of the September 1 notice herein fully explain the provisions of the Revenue Acts of 1962 and 1964 upon which this proceeding is based and the conclusions the Commission reached with respect to the proper and adequate accounting treatment for investment tax credits. The statements there made are still pertinent.

As we previously indicated, under section 2 of the Revenue Act of 1962 (26 U.S.C. 38), a credit is provided against federal income tax, based on investment in certain depreciable property placed in service during the tax year. Limitations on the amount of the credit which may be applied against the tax in any one year are provided, as well as carry-back and carry-forward provisions. The amount of the credit is seven percent for qualified property with the exception of public utility property, for which a credit of three percent is allowed. Section 203(e) of the Revenue Act of 1964 places limitations on the amount of the investment tax credit which may be used by the Commission in any one year to reduce the federal income tax of public utilities and licensees for the purpose of establishing cost of service for these utilities. In the case of public utility property, the Commission may use for this purpose no more than "a proportionate part (determined with reference to the average useful life of the property with respect to which the credit was allowed) of the credit against tax allowed for any taxable year . . .," without the consent of the taxpayer. Section 203(e) specifically recognizes that such public utilities and licensees may voluntarily pass along the entire amount of the tax credit in the year that it is used to reduce tax liability to their customers in the form of lower rates. It should also be noted that the Revenue Act of 1964 does not restrict the states in their treatment of the investment tax credit for ratemaking purposes.

In interpreting section 203(e) the Commission has concluded that the accounting prescribed for public utilities and licensees should accommodate the choices afforded the public utilities and licensees by the Congress, and that it should give such companies the option in accounting for the investment tax credit to elect between (1) prorating the benefits of the investment tax credit over a period of years not to exceed the useful life of the property which gave rise to the credit, by means of a deferral account; or (2) reflecting the benefits of the investment tax credit in the income statement of the year in which the credit is used to reduce income taxes.

The accounting we have prescribed herein is sufficiently flexible to accommodate any requirement which might be imposed upon a company by one or more state regulatory bodies which might have cognizance over some of the company's operations. Accordingly, there should be no problems caused by the possibility of conflicts between state regulatory bodies or between such groups and this Commission.

Upon consideration of the entire record in this proceeding, *the Commission further finds*:

(1) The amendments herein adopted are necessary and appropriate for the purposes of the administration of the Federal Power Act.

(2) Since the amendments to the Uniform System of Accounts herein adopted will, in effect, supersede the interim accounting prescribed in Order No. 261, in Docket No. R-231, issued January 9, 1963, and the Interim Order in Docket No. R.-232, issued January 23, 1964, it is appropriate to terminate those orders insofar as they relate to accounting by public utilities and licensees.

(3) In view of the termination referred to in finding clause (2), above, it is necessary and appropriate for the purposes of the administration of the Federal Power Act to provide, as hereinafter ordered, for the disposition of amounts of investment tax credits which have been accumulated in Account 253, Other deferred credits, pursuant to the directions contained in Order No. 261.

(4) Since it is desirable that the new schedule being added to F.P.C. Form Nos. 1 and 1-F be made available for reporting for the year 1964, good cause exists for making the amendments herein effective forthwith.

The Commission, acting pursuant to the authority granted by the Federal Power Act, as amended, particularly sections 301, 304 and 309 thereof (49 Stat. 854, 855, 858; 16 U.S.C. 825(a), 825c(a) and 825h), *orders:*

(A) Parts 101, 104 and 105, Uniform System of Accounts prescribed for public utilities and licensees, Subchapter C of Chapter I, Title 18 of the Code of Federal Regulations, are amended by adding at appropriate points therein two new accounts, viz., Account 255, Accumulated deferred investment tax credits and Account 411.1, Investment tax credit adjustments, to read, respectively, as set out in Attachment A, hereto.

(B) F.P.C. Forms Nos. 1 and 1-F, prescribed for public utilities and licensees by §§ 141.1 and 141.2 Subchapter D, Chapter I, Title 18 of the Code of Federal Regulations, are amended, effective for the reporting year 1964, by adding at appropriate points therein, two new schedules, viz.: Investment Tax Credits Generated and Utilized and Accumulated Deferred Investment Credits (Account 255), to read as set forth in Attachment B, hereto.

(C) Paragraph (d) of the aforesaid § 141.1 and paragraph (c) of the aforesaid § 141.2 are amended respectively by inserting, to follow the line "Accumulated Deferred Income Taxes" in § 141.1(d), and to precede the line "Verification" in § 141.2(c) the following new schedule titles:

"Investment Tax Credits Generated and Utilized."

"Accumulated Deferred Investment Tax Credits."

(D) The aforesaid Part 141 is amended by adding a new § 141.100 to read as follows:

"§ 141.100 General requirements for annual reports to stockholders and others.

All annual reports to stockholders and others shall include an appropriate summary of the investment tax credits generated and utilized and a statement of the accounting method elected by the company in connection with the utilization of the credits."

[Secs. 301, 304, 309, 49 Stat. 854, 855, 858; 16 U.S.C. 825(a), 825c(a), 825h.]

(E) Effective upon the issuance of this order, the provisions of Order No. 261 in Docket No. R-231 and the Interim Order of January 23, 1964 in Docket No. R-232 are terminated to the extent that they relate to public utilities and licensees.

(F) In view of our order herein terminating Order No. 261, issued January 9, 1963, insofar as it relates to the interim accounting of public utilities and

licensees, such companies shall dispose of the amounts of accumulated investment tax credits in Account 253, Other deferred credits, accumulated in accordance with the interim procedure established by that order during 1962 and 1963, as follows:

1. Companies which will not follow deferral accounting for nonelectric and other operations whereby all or a part of the tax credits are not to be passed on to customers in accordance with the provisions of this order and the texts of accounts prescribed herein, shall credit all or such portion of those balances as applicable to Account 421, Miscellaneous Nonoperating Income, for the reporting period ending December 31, 1964.

2. Companies which will not follow deferral accounting whereby all or a part of the tax credits are to be passed on to electric utility customers in accordance with the provisions of this order and the texts of accounts prescribed herein, shall credit all or such portion of those balances as applicable to Account 411.1, Investment Tax Credit Adjustments, for the reporting period ending December 31, 1964.

3. Companies which will follow deferral accounting for all or a part of the investment tax credits in accordance with the provisions of this order and the texts of accounts prescribed herein, shall transfer the applicable balances from Account 253 to Account 255, Accumulated Deferred Investment Tax Credits. Any amounts in such balances shall be recorded in the same manner as if the procedures and instructions in texts of Accounts 255 and 411.1 as promulgated in this order, had been effective in 1962 and 1963. In other words, amounts under deferral accounting procedures pertaining to 1962 and 1963 that would have been amortized in those respective years to Account 411.1 or to nonelectric or to other operations accounts had this order been then in effect, shall be recorded in the same manner as the amounts to be amortized for 1964.

It is recognized that for 1964 the amounts that will be shown as credits to Account 411.1 and to other accounts will be overstated. It is believed that such amounts should not be sufficiently large in most instances to distort the net income of reporting companies. Separation of the amounts in Account 411.1 by years (1962, 1963 and 1964) will be shown in the schedules of F.P.C. Forms Nos. 1 and 1–F prescribed herein.

(G) The caption of Docket No. R–232 is amended, for the purposes of this order, to read as set forth above.

(H) The amendments herein made to Parts 101, 104 and 141 and to Annual Report F.P.C. Forms Nos. 1 and 1–F shall be effective upon the issuance of this order.

(I) The Secretary shall cause prompt publication of this order to be made in the Federal Register.

Commissioner O'Connor *dissenting in part.*

O'CONNOR, Commissioner, *dissenting in part:*

The addition of Section 141.100 to the Regulations Under the Federal Power Act implies that the accounting profession is presently not complying with a principle unanimously adopted by the Accounting Principles Board of the American Institute of Certified Public Accountants:

> The Board emphasizes that whichever method of accounting for the investment credit is adopted, it is essential that full disclosure be made of the method followed and the amounts involved, when material.[1]

[1] Opinion No. 4, Accounting for Investment Credit, issued March 1964.

This same implication was present in the addition of the identical section to the Regulations Under the Natural Gas Act,[2] and because of it, I could not join in its adoption.

I remain persuaded that the accounting profession does not need a statutory reminder of its obligation to report all material entries. Thus, because of its contrary premise, I must once again dissent to the adoption of this Regulation.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

UNAUTHORIZED OVERRUN PENALTY PROVISIONS TO BE INCLUDED IN FPC GAS PIPELINE TARIFFS FILED PURSUANT TO SECTION 4 OF THE NATURAL GAS ACT, DOCKET NO. R-242

ORDER TERMINATING PROCEEDING

(Issued December 17, 1964)*

The Commission issued a notice on July 15, 1963, wherein it proposed to amend § 154.38 of the Regulations Under the Natural Gas Act by prescribing uniform unauthorized overrun penalty provisions to be included in rate schedules filed, pursuant to section 4 of the Natural Gas Act, by natural gas pipeline companies where a contracted volume is specified. The notice was published in the Federal Register on July 20, 1963 (28 F.R. 7432) and mailed to persons who would be affected or interested including federal and state agencies. Comments on the proposed rule were received from 79 respondents, including 19 pipeline companies, 48 distributors, 12 state commissions, municipalities and municipal associations. Of these, sixty respondents strongly opposed the proposal for a variety of reasons.

We have concluded, in the light of the opposition expressed by all segments of the industry and various regulatory bodies, that the regulations as proposed are not necessary for general application at this time. We have decided to withdraw the proposal for the present. However, as indicated in paragraph (3) of the July 15, 1963 notice, the existence of overrun penalty provisions in contracts between pipeline companies and their buyers could result in discriminatory practices in administering the penalty provisions among buyers who seek or take overrun gas. Hence, while the regulations originally proposed in this proceeding may not be necessary for general application at this time, it is important that we obtain from the pipeline companies information as to their actual experience and practice in administering the overrun penalty provisions. We have, therefore, instructed the staff to prepare a notice of proposed rulemaking to add a schedule to FPC Form No. 2 for the purpose of obtaining such information.

The Commission, therefore, orders:

(A) Effective upon the issuance of this order, the proceeding in Docket No. R-242 is terminated.

(B) The Secretary shall cause prompt publication of this order to be made in the Federal Register.

---

[2] Section 260.100 adopted in Order No. 289, issued November 2, 1964.

*Published in the Federal Register on December 23, 1964 (29 F.R. 18233).

Before Commissioners: David S. Black, Acting Chairman; L. J. O'Connor, Jr. and Charles R. Ross.

ROCK CASTLE GAS COMPANY, DOCKET NO. RI64-136

ORDER CONDITIONALLY ACCEPTING OFFER OF SETTLEMENT, REQUIRING FILING OF NOTICE OF CHANGE, AND TERMINATING PROCEEDINGS

(Issued December 17, 1964)

On October 1, 1964, Rock Castle Gas Company (Rock Castle) submitted an offer of settlement in this proceeding pursuant to Section 1.18(e) of the Commission's Rules of Practice and Procedure. The offer involves a proposed increased rate for a sale of natural gas made to United Fuel Gas Company (United) under Rock Castle's FPC Gas Rate Schedule No. 1 in the Appalachian Field, Martin County, Kentucky. The proposed increased rate was suspended by the Commission by order issued September 13, 1963, until February 15, 1964, and has not been made effective.

Under the terms of the offer, Rock Castle proposes a settlement rate of 21¢ per Mcf rather than the proposed 23¢ per Mcf for which it filed.[1] Rock Castle's annual revenues will be approximately $1,872 less under the settlement rate than under the proposed rate which was suspended. No protests or objections have been filed to the offer.

However, Rock Castle's offer is a unilateral proposal, and the contract rate remains at 23¢ per Mcf. Therefore, we shall condition our approval of the offer to impose a moratorium of three years from the date of issuance of this order during which period Rock Castle may not file for an increase in rate under the subject rate schedule.

We desire to make it clear that our conditional acceptance of Rock Castle's offer of settlement shall not be construed as approval of any future rate increase that may be filed under the subject rate schedule, and is without prejudice to any findings or order of the Commission in any future proceedings, including area rate or other similar proceedings, involving Rock Castle's rate and rate schedule.

The Commission finds:

The proposed settlement of the above-designated proceeding, on the basis described herein, as more fully set forth in the offer of settlement filed with the Commission by Rock Castle on October 1, 1964, is in the public interest and appropriate to carry out the provisions of the Natural Gas Act and should be approved and made effective as hereinafter ordered.

The Commission orders:

(A) The offer of settlement filed with the Commission by Rock Castle October 1, 1964, is hereby approved in accordance with the provisions of this order.

(B) Rock Castle shall file, within 30 days from the date of issuance of this order, a notice of change in rate providing for the 21¢ per Mcf rate specified in its offer of settlement. The notice of change shall be submitted in accordance with Part 154 of the Commission's Regulations under the Natural Gas Act.

(C) Rock Castle shall file within thirty days of the issuance of this order its acceptance signed by a responsible officer of the condition hereby imposed that it may not file an increase in rate for this sale of natural gas to United within a period of three years from the date of this order.

[1] The settlement rate is not applicable to sales from additional acreage dedicated to the subject contract pursuant to a letter agreement between Rock Castle and United dated June 28, 1963. This additional acreage is tenatively covered under Supplement No. 1 to Rock Castle's FPC Gas Rate Schedule No. 1, and is involved in the pending certificate proceeding in Docket No. CI64-214.

(D) Upon notification by the Secretary of the Commission that Rock Castle has complied with the terms and conditions of the order, the rate and charge of 21¢ per Mcf at 15,325 psia, specified in its offer of settlement shall be effective as of the date of issuance of this order and the above proceeding shall be deemed terminated.

(E) The acceptance by the Commission of Rock Castle's offer of settlement is without prejudice to any findings or determinations that may be made in any proceeding now pending, or hereafter instituted by or against Rock Castle, including area rate or other similar proceedings.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

TEXAS GAS TRANSMISSION CORPORATION, DOCKET NO. CP64-107

ORDER FURTHER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 17, 1964)

On September 10, 1964, Texas Gas Transmission Corporation (Applicant), filed in Docket No. CP64-107, an application to further amend an order of the Commission issued May 26, 1964, 31 FPC 1292, in Docket No. CP64-107, granting a certificate of public convenience and necessity authorizing among other things the sale and delivery of natural gas to Mississippi Valley Gas Company (Mississippi Valley).

The application to amend states that the United States Gypsum Company has requested that a portion of its interruptible purchases from Mississippi Valley be converted to firm service beginning November 1, 1964, as a result of which Applicant proposes to increase the Contract Demand of Mississippi Valley to 82,500 Mcf beginning with the 1964-65 winter heating season and 85,500 Mcf for the 1965-66 winter heating season, all as more fully set forth in the application to amend.

Applicant states the proposed service will be rendered from unallocated excess capacity authorized heretofore in Docket No. CP64-107. No new facilities are required to render the increased service.

Due notice of the filing of the application to amend and opportunity for hearing thereon has been given by publication in the Federal Register on November 7, 1964 (29 F.R. 15109).

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued May 26, 1964, in Docket No. CP64-107 be further amended as hereinafter ordered.

The Commission orders:

(A) The Commission's order issued May 26, 1964, in Docket No. CP64-107 be and the same is hereby further amended so as to authorize Texas Gas Transmission Corporation to increase the Contract Demand of Mississippi Valley Gas Company by 1,500 Mcf, and thereby increase the total authorized Contract Demand of Mississippi Valley to 82,500 Mcf for the 1964-65 winter season and 85,500 Mcf for the 1965-66 winter season.

(B) In all other respects said order shall remain in full force and effect.

262-497—67——96

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

TEXAS GAS TRANSMISSION CORPORATION, DOCKET NO. CP64-107

ORDER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 17, 1964)

On September 30, 1964, Texas Gas Transmission Corporation (Applicant) filed in Docket No. CP64-107 an application to amend the order of the Commission issued May 26, 1964, 31 FPC 1292, which order among other things granted Applicant a certificate of public convenience and necessity authorizing the construction and operation of certain facilities in order to increase contract demand service to then existing customers. In the instant application to amend, Applicant seeks authority to construct and operate certain facilities in Knox County, Indiana, all as more fully set forth in the application.

Specifically, Applicant seeks authority to construct and operate two side valves and meters for the establishment of two new delivery points for delivery of natural gas to Hoosier Gas Corporation (Hoosier), an existing customer of Applicant, for resale by Hoosier to the incorporated community of Edwardsport, Indiana and the rural area of Freelandville, Indiana. Annual deliveries are estimated to be 22,239 Mcf and 30,435 Mcf respectively. No increase in the contract demand of Hoosier is proposed for this service.

The cost of the facilities is estimated to be $7,770 and will be financed with current funds.

Due notice of the subject application to amend has been given by publication in the Federal Register on November 7, 1964 (29 F.R. 15109). No protest, petition to intervene, or notice of intervention has been filed herein.

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued May 26, 1964, be amended as hereinafter ordered.

The Commission orders:

(A) The Commission's order issued May 26, 1964, in Docket No. CP64-107 be and the same is hereby amended by authorizing Applicant to construct and operate two side valves and meters for the establishment of two new delivery points for delivery of natural gas to Hoosier Gas Corporation.

(B) In all other respects said order shall remain in full force and effect.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

UNITED STATES DEPARTMENT OF THE INTERIOR, BONNEVILLE POWER ADMINISTRATION, DOCKET NOS. E-6887, E-6956, E-6611, E-6658, E-6905 AND E-7059

ORDER CONFIRMING AND APPROVING AMENDMENT OF RATE SCHEDULE AND EXTENDING CONFIRMATION AND APPROVAL OF RATE SCHEDULES AND RATE SCHEDULE PROVISIONS

(Issued December 17, 1964)

The Secretary of the Interior (Interior), acting on behalf of the Bonneville Power Administration (Bonneville) pursuant to the Bonneville Act (50 Stat.

731, 734–5, as amended 59 Stat. 546) and Section 5 of the Flood Control Act of 1944 (58 Stat. 887, 890) on October 15, 1964, requested that the confirmation and approval heretofore granted by Commission orders issued December 16, 1959 in Docket No. E–6887 and December 20, 1960 in Docket No. E–6956 both for periods ending December 20, 1964, be extended for one year to December 20, 1965 with respect to Bonneville Wholesale Rate Schedules A–4, C–4, E–4, R–1, H–3, and amended General Rate Schedule Provisions; and that amended Schedule F–4 be approved for a one-year period ending December 19, 1965. Also on October 15, 1964, the Secretary requested that the confirmation and approval heretofore granted by Commission orders issued in Docket Nos. E–6611, E–6658, E–6905 and E–7059 for periods all ending December 19, 1964 be extended for one year to December 20, 1965, regarding the special application of Bonneville's wholesale rates and charges contained in certain specified contracts.

The wholesale rate schedules referred to above constitute all of the general rate schedules for electric energy sold by Bonneville and relate to the following types of service:

Rate Schedule A–4, for at-site firm power. Available to purchasers at the power plant or points adjacent thereto.

Rate Schedule C–4, for transmission system firm power.

Rate Schedule E–4, a two-part rate for power purchased for resale, and for irrigation and drainage pumping use. This rate is used primarily by public bodies and cooperatives who have no generating facilities of their own.

Rate Schedule H–3, for dump energy. Available to purchasers who normally maintain electric generating facilities or have other sources of electric energy available to supply the purchaser's requirements when dump energy is not available. Also available for emergency and breakdown use and for experimental and testing purposes.

Rate Schdule R–1, applied to at-site and transmission system firm power used by railroads primarily for traction purposes.

Rate Schedule F–4, as presently approved, is a two-part rate available to purchasers of firm power delivered by Bonneville and as amended would also provide for the sale of peaking capacity.

The proposed amendment to Rate Schedule F–4 comprises a new Section 5, "Firm Capacity" and new Section 6, "Special Provisions Relating to Combination With C–4 Rate."

Section 5 provides that firm capacity may be purchased on a contract demand basis for supply during a contract year or during a contract season of May 1 through September 30. The minimum annual charge shall be as follows:

(1) Contract year service: $9.00 per kilowatt per year of the larger of the contract demand or measured demand for the contract year. Interim bills will be rendered monthly at the rate of $0.75 per kilowatt of billing demand starting with deliveries for the first month of each contract year.

(2) Contract season service: $5.00 per kilowatt per season of the larger of the contract demand or measured demand for the contract season. Interim bills will be rendered monthly at the rate of $1.00 per kilowatt of billing demand starting with deliveries for May of each contract season.

Contracts for the purchase of such firm capacity shall include provisions for the advance delivery or for return by the purchaser of energy accompanying the delivery of such capacity. Any such energy which is not supplied by the purchaser will be billed under Schedule H–3.

Section 6 provides that firm capacity may be purchased under Schedule F–4 in combination with the purchase of firm power under Schedule C–4.

Under such combination purchase, the billing demand for firm capacity under Schedule F–4 shall be the contract demand specified in the contract, which may

be increased by the purchaser on July 1 of any year by prior notice to the Administrator. Capacity deliveries under Schedule F–4 shall be deducted from total firm power peak measured and peak computed demands in determining the billing demand under Schedule C–4. Any adjustment for power factor on combination purchase deliveries shall be applied to the billing under Schedule C–4 by relating total reactive kilovolt-ampere-hours to energy deliveries under Schedule C–4.

The contract for purchase of firm capacity in combination with Schedule C–4 shall include provisions for the advance delivery or for return by the purchaser of energy accompanying the delivery of such capacity from actual generation at the purchaser's plants or by purchase of energy from sources other than contracts with Bonneville. Any such energy which is not supplied by the purchaser will be billed under Schedule H–3.

The special application of Bonneville rate schedules for which Interior has requested that approval be extended for a one-year period effective December 20, 1964, have heretofore been approved by orders of the Commission, all of which expire December 19, 1964. These orders were issued as follows:

(1) On January 21, 1960, in Docket No. E–6611, 23 FPC 119, approving rates for sale of provisional energy to any industrial customer purchasing both firm and interruptible energy. Twelve industrial firms in the metals and chemical fields are presently contracting for the purchase of provisional energy.

(2) On January 21, 1960, in Docket No. E–6658, 23 FPC 527, approving rates and charges for electric power sold under a contract with The Montana Power Company. The contract provides for the sale of power in accordance with Bonneville's Rate Schedule C–4, except that it limits the delivery of monthly energy to an 80 percent load factor. In addition, the contract provides that the parties will exchange excess and emergency energy, with net balances of exchange energy being settled at the rate specified in Rate Schedule H–3.

(3) On March 24, 1960, in Docket No. E–6905, 23 FPC 527, approving rates and charges for electric power, in addition to space heating requirements, contained in contracts with the City of Coulee Dam. On March 20, 1962, in Docket No. E–6905, 27 FPC 548, approving similar provisions in contracts with the City of Grand Coulee. The rates approved under Docket No. E–6905 are the same as those specified in Rate Schedule E–4, except the minimum billing limitation is deleted and a billing demand provision based on load factor is included in lieu of the 70 percent ratchet demand provision in Rate Schedule E–4.

(4) On December 6, 1962, in Docket No. E–7059, 28 FPC 950, approving modification of Rate Schedule E–4 contained in a contract with Public Utility District No. 1 of Okanogan County, and in similar contracts. The modification consists of a provision which precludes the possibility of dump energy sales for resale to customers having their own generating facilities being included in the determination of billing limitations of Section 4 of Rate Schedule E–4.

The Bonneville Act requires contracts for the sale of electric energy at wholesale to contain provisions for the adjustment of rates at intervals of not less than five years. Interior states that in keeping with this requirement, it had been Interior's intention to file a proposed new rate structure with revised rate provisions this year and that extensive studies had been made toward that end. Results of changes envisaged included increased revenues, a better balance between types of power and classes of customers, more flexibility of operation for utilities having their own generating facilities, a greater use of electricity, and an improved market for federal peaking power and secondary energy, large

amounts of which are now being wasted. Conferences were held with Bonneville's customers and interested parties where these matters were discussed and rate adjustments were proposed.

Following Interior's last proposal, many customers are said to have requested Bonneville to postpone for one year the adoption of higher rate schedules. They held that during the year the resolution of such matters as the Northwest-Southwest intertie and Canadian Treaty negotiations might have a material effect on the need for an increase in rates. Accordingly, an amendment which permits a general review of Bonneville rate schedules to be effective December 20, 1965, rather than December 20, 1964, was agreed to by all customers and incorporated in their contracts. The customers were advised, however, that, should the general rate adjustment be postponed, Bonneville would still file with the Commission a peaking capacity rate of $9.00 per kilowatt-year including a kilowatt-season rate of $5.00 for the period May 1–September 30, to be effective December 20, 1964. These are the rates in the amendment to Rate Schedule F–4. Interior looks to the peaking rate to assist in making the maximum use of capacity available from the federal system at a reasonable price, and says it will enable seasonal off-peak capacity from the Columbia River system to be sold to customers, particularly in the Pacific Southwest, who have summer peak loads due primarily to air-conditioning and irrigation requirements. Interior expects that sales of peaking capacity will range from 10 to 30 megawatts during the first year the peaking rate is effective and to continue to increase thereafter.

Written notice of the proposed amendments to Wholesale Rate Schedule F–4 was given to the Public Service Commission of the State of Washington and the Public Utility Commissioner for the State of Oregon and to the Governors of those States and was published in the Federal Register on November 7, 1964 (29 F.R. 15106), stating that any person desiring to comment or to make any representation with respect thereto should submit same on or before November 18, 1964, to the Federal Power Commission, Washington, D.C., 20426. No comment or representation has been received.

The Commission finds:

It is appropriate for the purposes of the Bonneville Act, and Section 5 of the Flood Control Act of 1944, that the confirmation and approval of Bonneville's existing Wholesale Rate Schedules A–4, C–4, E–4, R–1, H–3, and amended General Rate Schedule Provisions, heretofore granted, but expiring December 19, 1964, be extended and continued for a one-year period beginning December 20, 1964 and expiring December 19, 1965; that Rate Schedule F–4, as amended, be confirmed and approved for a one-year period beginning December 20, 1964 and ending December 19, 1965, and that the confirmation and approval of the special applications of Bonneville's wholesale rates and charges contained in certain specified contracts as set forth in Docket Nos. E–6611, E–6658, E–6905 and E–7059 be extended for a one-year period beginning December 20, 1964 and ending December 19, 1965.

The Commission orders:

The aforementioned wholesale rate schedules, rate schedule provisions and the special application of the Wholesale rates and charges as referred to in the above finding hereby are confirmed and approved for a one-year period beginning December 20, 1964 and terminating December 19, 1965.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

UNITED STATES DEPARTMENT OF THE INTERIOR, BUREAU OF RECLAMATION, EKLUTNA PROJECT, ALASKA, DOCKET NO. E-7045

ORDER CONFIRMING AND APPROVING RATE SCHEDULES

(Issued December 18, 1964)

The Acting Commissioner of the Bureau of Reclamation, United States Department of the Interior (Reclamation) on August 7, 1964, pursuant to the Eklutna Project Act of July 31, 1950 (64 Stat. 382; 48 U.S.C. 312), as amended, filed with the Federal Power Commission a request for confirmation and approval for a one-year period ending August 4, 1965 of rate schedules for the sale of electric power and energy generated at the Eklutna Project (Eklutna), located in the vicinity of Anchorage, Alaska. The rate schedules for which approval is requested are designated A–F3 (superseding A–F2), A–N2 and A–L2.

By order issued August 1, 1957, Eklutna Project, Alaska (18 FPC 97), the Commission confirmed and approved Rate Schedules A–F2 and related General Rate Schedule Provisions and Rate Schedules A–L2 and A–N2 for the sale of Eklutna electric power and energy during an interim period not to exceed five years from August 4, 1957. By order issued April 17, 1963, Eklutna Project, Alaska (29 FPC 770), the Commission extended its confirmation and approval of those rate schedules until August 4, 1964.

Except for the effective date, Rate Schedules A–N2 and A–L2 are identical with those of the same designation previously approved by the Commission. Proposed Rate Schedule A–F3, submitted to replace Rate Schedule A–F2, is identical with A–F2 except that an article has been added providing for auxiliary power service which contains provisions insuring that power and energy reserved in power sales contracts under that schedule will be purchased and used as a part of the customer's system power supply.

Rate Schedule A–N2 provides rates for non-firm service. It is applicable to customers normally maintaining generating facilities, or other sources of energy, sufficient to supply their requirements when dump energy is not available. Basic rates for non-firm service are: demand charge—none; energy charge—6.0 mills per kwh.

Rate Schedule A–L2 provides rates for domestic retail service. It is available at towns, camps, and installations operated in connection with construction, or operation and maintenance of Federal projects for service supplied over low voltage distribution systems owned by the United States. It is applicable to domestic or residential customers for light, heat (exclusive of house heating) and power service. Basic rates for domestic retail service for a four-week period are: demand charge—none; energy charge—first 50 kilowatt hours, 4 cents per kilowatt-hours; next 150 kilowatt-hours, 2 cents per kilowatt-hour; all additional kilowatt-hours, 1¼ cents per kilowatt-hour.

Proposed Rate Schedule A–F3 provides rates for wholesale firm power service. It is not applicable to standby or auxiliary service except that service auxiliary to other power supply will be permitted under appropriate contract terms. It provides for a monthly capacity (demand) charge of $2.25 per kw of billing demand (the highest 30-minute integrated demand during the month) and an energy charge of 6 mills per kwh. If delivery is taken by the customer at the transmission voltage a discount of 5%, representing savings of substation cost, will be allowed. If service is metered at the secondary side of the customer's

transformer, the meter readings will be increased 2% to compensate for losses. The minimum annual capacity charge is $21.60 per kilowatt for 80% of contract demand for the first year, for 90% of contract demand for the second year, and for 100% of contract demand for subsequent years.

An article has been added to this rate schedule which provides that the contractor shall have an obligation in each billing period to take and/or pay for not less than 90% of the power and energy for which the United States has obligated itself to supply.

The Bureau's request of July 18, 1962 for extending confirmation and approval of Rate Schedules A–F2, A–N2 and A–L2 was supported with a repayment study that showed the proposed rates would provide sufficient revenue to repay the total investment in the Eklutna Project allocated to power in the forty-first year of operations. The Commission, in a letter to the Secretary of the Interior dated November 9, 1962 pointed out that, if rates were established on the basis of amortizing the investment in the Eklutna Project in fifty years rather than in forty-one years, the rates could be lowered. On the basis of the reply by the Assistant Secretary of the Interior requesting temporary extension only of the existing rate schedules until August 4, 1964, pending receipt of recommendations of the President's Water Resource Policy Committee engaged in studying cost allocations and repayment practices of Federal hydroelectric projects, the Commission issued its order of April 17, 1963, approving the rate schedules until August 4, 1964.

The Bureau's current filing of August 7, 1964, does not reflect recommendations of the President's Water Resource Policy Committee since the work of that committee has not yet been completed. It does however, state that repayment studies (not furnished) have been made relative to the extension of present rate levels as well as to their downward revision. Two conclusions are said to result from these studies: first it would be financially inadvisable to reduce project rates at this time because of the uncertainty regarding the ultimate cost of damage caused by the earthquake on March 27, 1964, estimated to be more than three million dollars; second, the rate schedule for firm power service should be modified, as set forth in proposed Rate Schedule A–F3, so as to include an article on auxiliary power service, similar to that contained in the Fort Peck Rate Schedule R6–F4 (Docket No. IT–5891–Fort Peck, 16 FPC 841) which provides that the United States will be paid for not less than ninety percent of the power and energy which it is obligated to reserve for a customer.

Written notice of the request for approval of the three rate schedules was sent to state officials and other interested parties. Notice of the request was also published in the Federal Register on September 1, 1964 (29 F.R. 12486) stating that any person desiring to make comments or suggestions for Commission consideration with respect to said Rate Schedules should submit the same in writing on or before September 18, 1964. Comments and protests were received from the three customers for wholesale firm power service, namely, the City of Anchorage, Chugach Electric Association and Matanuska Electric Association. All three oppose the article concerning auxiliary power service in proposed Rate Schedule A–F3, and the City of Anchorage claims the proposed article would nullify and vitiate its contract with the Department of the Interior dated November 23, 1953. Also the two electric associations renew their request for a rate reduction based on a full 50-year "pay-out."

Copies of the letters of comment and protest from the three parties were sent to the Secretary of the Interior on September 9, 1964, and the views of the Department in response thereto were furnished the Commission in a letter dated

October 23, 1964 from Robert W. Nelson, Deputy Assistant Secretary of the Interior.

In response to the objection to the auxiliary power service article, the Department of the Interior points out that the Eklutna Project was constructed to serve primarily the City of Anchorage, the Matanuska Electric Association and the Chugach Electric Association, and the installed capacity of 30,000 kilowatts is under contract to these three customers.

Furthermore, Interior states that past operating experience at Eklutna shows indisputably that some of the customers are actually peak-loading with Eklutna project power. It is noted that the Bureau is obligated to supply energy to the City of Anchorage up to an annual load factor of 52 percent but that the City has been purchasing energy well below normal load factors. The result of this trend toward peaking Eklutna power casts doubt on whether sufficient revenues from the sale of energy will accrue so that the project investment will be amortized at the end of the 50-year period.

A similar problem arose in the marketing of Fort Peck power. There we pointed out that a large portion of hydro project costs, which are essentially of fixed costs, are collected under the energy portion of the rate and the rates may not pay out if the available energy is not sold, or is sold at the lower dump energy rates. We further noted that the auxiliary service provision insures that a customer will not peak-load or base-load on project power and thereby jeopardize the project's revenues or its commitments to others (Fort Peck Project, Docket No. IT–5981, 16 FPC 841). These observations and statements are equally applicable to the objections to the auxiliary power service article in the proposed Rate Schedule A–F3. Accordingly, we find that the proposed article is justified and consistent with the Eklutna Project Act of July 31, 1950 (64 Stat. 382; 48 U.S.C. 312).

Whether or not the proposed auxiliary power service article will nullify and vitiate the contract between the City of Anchorage and the Department of the Interior as claimed by the City but denied by the Department is a matter not subject to this Commission's jurisdiction. However, irrespective of the terms of the contract, the Eklutna Project Act requires that power generated at the project must be disposed of pursuant to rate schedules confirmed and approved by this Commission. No contract can vitiate the requirements of such rate schedules.

While we thus agree with the Department as to the appropriateness of the auxiliary service article, the level of rates may require revision to reflect more nearly the level necessary to provide a 50-year pay-out period. The marketing and repayment requirements set forth in the Eklutna Project Act of July 31, 1950, are virtually the same as those in Section 5 of the Flood Control Act of 1944, which provides that electric power and energy shall be disposed of in such a manner as to encourage the most widespread use thereof at the lowest possible rates to consumers consistent with sound business principles, and that the capital investment allocated to power shall be amortized over a reasonable period of years. In marketing power pursuant to the Flood Control Act of 1944, the Department of the Interior has made it a general practice to base its rate schedules on a 50-year period for amortizing investment cost allocated to power. The Commission has accepted and approved a 50-year period as satisfying the statutory requirement and that the capital investment be amortized in a "reasonable period of years", and has approved rate schedules established on this basis.

The repayment study furnished by the Bureau of Reclamation in support of the rate schedules filed July 18, 1962, shows the unpaid balance of the invest-

ment in the Eklutna Project at the end of fiscal year 1964 to be $26,813,737. Further, the study shows that, if all the energy estimated to be producible by the project is sold at the present rates, the total investment would be repaid in the forty-first year and that a surplus of $11,428,233 would be accumulated at the end of the fiftieth year. The present value of this estimated future surplus would be only a fraction of this total.

We are, of course, aware of the problem raised by the damage to the project resulting from the earthquake of March 27, 1964.

We note that during the second session of the 88th Congress, bills were introduced in both the House and the Senate providing that sums expended by the Secretary of the Interior in rehabilitating the Eklutna Project from damages caused by the earthquake, shall be nonreimbursable and nonreturnable, and not subject to the pay-out provisions of the Eklutna Project Act of July 31, 1950.

If similar legislation is adopted during the forthcoming Congress, the cost of repairing earthquake damage would be excluded from project costs to be paid from power revenues and would not need to be considered in establishing an equitable rate structure. However, at the present time, neither the amount of additional cost necessary to repair the damage nor the method of reimbursement for such costs have as yet been determined.

It therefore appears that a further period of time is necessary to consider whether there will be any additional cost as a result of the earthquake damage which will be required to be repaid from revenues of the project and in the light of those circumstances the extent to which adjustments in rates should be made by applying the normal 50-year repayment period. Accordingly, we will approve the rate schedules as filed by Reclamation for a period expiring August 4, 1965 pending the consideration of these matters.

The Commission finds:

It is appropriate for the purposes of the Eklutna Project Act of July 31, 1950 (48 U.S.C. 312), as amended, that Rate Schedules A–N2, A–L2 and A–F3 filed by Reclamation, for the sale of electric power from the Eklutna Project be confirmed and approved for a period beginning with the date of this order and expiring August 4, 1965, as hereinafter provided.

The Commission orders:

The Rate Schedules A–N2, A–L2 and A–F3 of Reclamation for the sale of electric power from the Eklutna Project are hereby confirmed and approved for a period beginning with the date of this order and expiring August 4, 1965.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

AREA RATE PROCEEDING, DOCKET NO. AR61–1; CLAUDE E. AIKMAN, ET AL., DOCKET NO. G–18466, ET AL.; NORTH CENTRAL OIL CORPORATION (OPERATOR), ET AL., DOCKET NO. CI60–435, ET AL.

ORDER ON RECONSIDERATION

(Issued December 21, 1964)

On December 1, 1964, *supra*, p. 1382, an order of the Commission granted leave to Oklahoma Independent Petroleum Association (OIPA), to Philadelphia Electric Company (Philadelphia), and to Associated Gas Distributors (AGD) to file briefs as amici curiae in this proceeding. On December 1 and 2 several

producer-respondents in this proceeding filed answers opposing the filing of such briefs by Philadelphia and AGD on the ground that their interests were basically those of parties rather than disinterested amici curiae, that the content of their briefs was improper at this stage of the proceeding, and that additional time would be needed for replies. (There was no opposition to the motion of OIPA for leave to file a brief as amicus curiae.)

Upon careful reading of the answers in opposition and full reconsideration, we find nothing which would cause us to change our original determination. In view of the far-reaching effects of the precedents which may be established in this case, we believe that the movants, who sought to be heard within the period for filing briefs on exceptions, should be allowed to present their views so that we may have the benefit of all possible suggestions in this pilot proceeding.

We have not considered, in making this determination, the content of any of the briefs on behalf of the movants. Respondents assert, as a reason for rejecting Philadelphia's brief, that Philadelphia has gone outside the evidentiary record in this proceeding in the preparation of an appendix to that brief. The fact that a brief contains material which should be disregarded is not a ground for refusing to receive the brief. The Commission will not rely on extra-record factual materials unless they are properly the subject of official notice. See Rules of Practice and Procedure, Section 1.26(d). If any of the briefs on exceptions, including the amicus briefs, contain improper factual materials, the reply briefs may inform us of the impropriety. On the other hand, if any of the briefs permissibly rely upon evidence of record to reach debatable conclusions of policy then the reply briefs are the appropriate vehicle for continuing the debate. Matters raised by the briefs on exceptions should be dealt with in the replies thereto for which adequate time has heretofore been granted.

The Commission finds:

In the answers of Amerada Petroleum Corporation, Continental Oil Company, Gulf Oil Corporation, Humble Oil & Refining Company, Pan American Petroleum Corporation, Phillips Petroleum Company, The Pure Oil Company, Shell Oil Company, Sinclair Oil & Gas Company, Socony Mobil Oil Company, Inc., Texaco Inc., and Warren Petroleum Corporation to the motions by Philadelphia Electric Company and Associated Gas Distributors for leave to file briefs as amici curiae, no new facts or legal principles have been presented which would warrant any change or modification in our prior order of December 1, 1964, in this proceeding.

The Commission orders:

The order of December 1, 1964, which granted leave to Oklahoma Independent Petroleum Association, Philadelphia Electric Company, and Associated Gas Distributors to file briefs on exceptions as amici curiae in this proceeding is hereby confirmed.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

CONTINENTAL OIL COMPANY, THE ATLANTIC REFINING COMPANY, TIDEWATER OIL COMPANY, CITIES SERVICE OIL COMPANY, DOCKET NO. RI64-129

ORDER AMENDING ORDER AND DENYING APPLICATION FOR REHEARING

(Issued December 21, 1964)

On November 23, 1964, the above-named respondents filed a joint application for rehearing of our order issued October 23, 1964, in the captioned proceeding[1] wherein we found and concluded, *inter alia*, that the transaction involved, namely the transfer and sale by respondents of certain leasehold interests in the Ship Shoal Field offshore Southern Louisiana to Tennessee Gas Transmission Company, constitutes a sale in interstate commerce of natural gas for resale subject to our jurisdiction under the Natural Gas Act and the requirements of subsections (c) and (e) of Section 7 of the Act. The order on which rehearing is now sought adopted the intermediate decision of the examiner in this proceeding as our own with the exception of his ultimate conclusion regarding the effect of the Fifth Circuit Court of Appeals decision in *M. H. Marr, et al.* v. *F.P.C.*, 336 F. 2d 320. As we observed therein, the mandate of the court in *Marr* had been stayed[2] at the time of our order and, pending the filing of a petition for a writ of certiorari with the Supreme Court[3] and the outcome thereof, the Commission would not accept the conclusion of the circuit court as binding.

In their application for rehearing respondents again attack the portion of the examiner's decision which supports the conclusion that the Commission has jurisdiction of the instant transaction and our failure to follow the reasoning of the *Marr* opinion. The arguments as now made are substantially the same as those contained in their brief on exceptions to the initial decision and require no elaboration of the discussion in Opinions No. 378, 378-A and 403, supporting our conclusion herein.

In addition, respondents contend that the Commission erred in its October 23, 1964, order in requiring them to make such filings as may be necessary to bring them into compliance with the provisions of the Natural Gas Act.

Ordering paragraph (B) of our order requires respondents to make the necessary compliance filings within six months of the date of issuance of the October 1964 order. This action is in the main consistent with a like requirement in Opinion Nos. 378 and 378-A wherein, rather than denying the pipeline's application outright, the Commission afforded it and the producers an opportunity to revise their contractual arrangements so as to furnish assurance that the transactions, already partially consummated, would be in the public interest.[4] Although no gas has yet begun to flow into Tennessee's lines from the Ship Shoal reserves respondents indicate in their filing that "There is no way to restore the parties to the 1960 lease sale transaction to their *status quo ante* . . . Millions of dollars in down payments and note installments have changed hands . . . The income tax hurdle, alone, is insurmountable." Respondents further state that "Exhibits 1, 2, 5 and 6, the subject matter and effectuating instruments of the

[1] Order Determining Jurisdiction on Order to Show Cause, 32 FPC 1167.

[2] The date of August 14, 1965, in the penultimate line on page 2 of the order should read August 14, 1964.

[3] *F.P.C.* v. *M. H. Marr, et al.*, No. 693, Oct. Term, filed November 16, 1964; see also *U.G.I.* v. *M. H. Marr, et al.*, No. 644, same term, filed November 2, 1964.

[4] *Tennessee Gas Transmission Co.*, Opinion No. 378, 29 FPC 249, 257-258; Opinion No. 378-A, 30 FPC 153, 156-157.

Ship Shoal transactions, do not lend themselves to initial certification as gas sales, nor to continuing regulation as rate schedules."

These allegations state the problems in meeting public interest requirements when private contractual arrangements are shaped in a manner inappropriate for obtaining necessary regulatory approval. In such a course of action the parties proceeded at their peril and they cannot now be heard to contend that the public interest should give way because of difficulties of their own making. The Commission has determined that as this transaction is now constituted it is impossible to exercise effective regulatory control over this attempted introduction of vast quantities of natural gas into interstate commerce.[5] Our requirement in paragraph (B) was intended to recognize the respondents' situation to the extent consistent with the public interest and to give them further opportunity to make filings of appropriate rate schedules and applications for certificates of public convenience and necessity. We did not intend to order the parties to execute a particular kind of contract or force them to arrive at any agreement whatsoever. In order to make our meaning clearer we shall revise finding (4) and ordering paragraph (B) as shown below.

The Commission further finds:

The assignments of error and grounds for rehearing set forth in the application for rehearing filed in this proceeding present no facts or principles of law which would warrant any change in the Commission's order issued October 23, 1964, except as specified below.

The Commission orders:

(A) Finding paragraph (4) of our order issued October 23, 1964, in this proceeding is amended to read:

(4) It is appropriate in the administration of the Natural Gas Act that opportunity be afforded for further filings on the part of respondents.

(B) Ordering paragraph (B) of our order issued October 23, 1964, in this proceeding is amended to read:

(B) Continental Oil Company, The Atlantic Refining Company, Tidewater Oil Company and Cities Service Oil Company are granted opportunity until six months after the date of issuance of this order to make filings of appropriate rate schedules and applications for certificates of public convenience and necessity and to take such further steps as may be necessary to bring them into compliance with this order, the public interest and the Natural Gas Act.

(C) The application for rehearing filed by respondents on November 23, 1964, is denied.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross, and David S. Black.

THE DAYTON POWER AND LIGHT COMPANY, COLUMBUS AND SOUTHERN OHIO ELECTRIC COMPANY, DOCKET NO. E-7189

ORDER AUTHORIZING SALE OF FACILITIES

(Issued December 21, 1964)

The Dayton Power and Light Company (Dayton) and Columbus and Southern Ohio Electric Company (Columbus), filed a joint application on November 9,

[5] ". . . It is difficult to envision how we could exercise our regulatory authority within the framework of such an arrangement." 30 FPC 759, 767.

1964, for an order pursuant to Section 203 of the Federal Power Act requesting authorization for the acquisition by Dayton from Columbus and the sale by Columbus to Dayton of a certain electric transmission line interconnecting the systems of the Applicants.

Dayton is incorporated under the laws of Ohio and doing business in the State of Ohio with its principal business office at Dayton, Ohio. Dayton is engaged in the production, transmission, distribution and sale of electric energy in 24 counties in southwestern Ohio. It supplies electric energy at wholesale to 19 municipal systems and five rural cooperative systems, and is also interconnected with Cincinnati Gas & Electric Company, Columbus and Southern Ohio Electric Company, Ohio Edison Company, and Ohio Power Company.

Columbus is incorporated under the laws of Ohio and doing business in the State of Ohio with its principal business office at Columbus, Ohio. Columbus is engaged in the production, transmission, distribution and sale of electric energy in 25 counties in south central Ohio. It supplies electric energy to four municipal systems and to five rural cooperative systems and is interconnected with Ohio Edison Company, Ohio Power Company, Ohio Valley Electric Corporation, and The Dayton Power and Light Company.

On October 20, 1964, Dayton and Columbus entered an Agreement whereby Dayton has agreed to acquire and Columbus has agreed to sell a 138,000 volt wooden H-frame transmission line which extends from Columbus' Delaware Substation No. 240, located at Liberty and Slack Roads, Delaware, Ohio (Delaware Sub) to Dayton's Darby Substation near Marysville, Ohio. The facilities to be transferred include all the wooden poles and conductors together with all related equipment and appurtenances beginning with and including the deadend insulator assembly attached to Columbus' Delaware Substation, thence, westerly from said insulator assembly to and including the deadend insulator assembly attached to Dayton's Darby Substation, together with all rights-of-way with respect to said line lying between the two substations. The sole purpose of the line is to interconnect the systems of Dayton and Columbus.

For the transfer of the transmission line, Dayton will pay and Columbus will receive $574,897 in cash. This amount includes $571,697 for the line itself and $3,200 for property tax applicable to the line. The consideration of $571,697 for the line itself compares with the line's depreciated original cost of $561,679. On the books of Dayton, an electric plant acquisition adjustment of $10,018 will be created and this will be eliminated by a debit to Account 426, Other Income Deductions. On the books of Columbus, a net gain of $1,518, after provision for Federal Income Tax liability associated with the tax gain on the sale, will be credited to Account 421, Miscellaneous Nonoperating Income.

Applicants represent that the principal benefit from the line at the present time, is to provide substantial emergency capacity to the Dayton system and some emergency capacity to the Columbus system. In addition, the line is available to provide a path for other interchange transactions between the companies. The electrical characteristics of the Applicants' systems are such that the benefits from the interconnection now flow to a greater extent to Dayton than to Columbus and will continue to do so in the future. Inasmuch as Dayton is not buying firm power across the line or paying the carrying charges on the investment on the line, although Dayton is now receiving and will continue to receive, the major benefit from the line, the Applicants believe that it is in the public interest that Dayton should own the line.

Applicants further represent that the proposed transaction will result in no change in any contract for the purchase, sale or interchange of electric energy other than possible amendment to the Agreement dated January 11, 1963, between

Dayton and Columbus, on file with the Commission, to reflect the change in ownership of the facilities, the subject of this application. There would be no change in rate schedules as such.

Written notice of the application was given to the Public Utilities Commission of Ohio and to the Governor of the State of Ohio. On November 20, 1964, the Public Utilities Commission of Ohio authorized the proposed purchase and sale. Notice was also published in the Federal Register on November 20, 1964 (29 F.R. 15590), stating that any person desiring to be heard or to make any protests with reference to said application, should on or before December 4, 1964, file with the Federal Power Commission, Washington, D.C., 20426 petitions or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). No petitions or protests or requests to be heard in opposition to the granting of the application has been received.

The Commission finds:

(1) Columbus, a corporation, is a public utility within the meaning of Section 203 of the Federal Power Act, subject to the jurisdiction of the Commission as heretofore described in the Commission's order issued May 9, 1962, *Columbus and Southern Ohio Electric Company, Ohio-Midland Light & Power Company and South Central Rural Electric Cooperative, Inc.*, Docket No. E-7036 (27 FPC 922).

(2) Dayton, a corporation organized and existing under the laws of the State of Ohio, owns and operates facilities, among others, for the transmission and sale at wholesale of electric energy which is generated in Kentucky and Indiana and consumed in Ohio, all of which facilities are in addition to, and do not include facilities used for the generation of electric energy, facilities used in local distribution, or only for the transmission of electric energy in intrastate commerce or facilities for the transmission of electric energy consumed wholly by the transmitter, and Dayton is therefore, a public utility within the meaning of that term as used in Section 203 of the Federal Power Act.

(3) By the proposed transaction, Columbus will dispose of part of its facilities subject to the jurisdiction of the Commission which have a value in excess of $50,000 and Dayton in acquiring such facilities will merge or consolidate its facilities subject to the jurisdiction of the Commission with those of Columbus, another person, all within the meaning and subject to the requirements of Section 203 of the Federal Power Act.

(4) The proposed sale of facilities by Columbus and the proposed acquisition of these facilities by Dayton, as described above upon the terms and conditions set forth in the application and subject to the provisions of this order will be consistent with the public interest as expressed in Section 203 of the Federal Power Act.

(5) The period of public notice given in this matter is reasonable.

The Commission orders:

(A) The proposed sale by Columbus and the proposed acquisition by Dayton of the aforementioned transmission line facilities and related rights-of-way, all as described above, are authorized and approved upon the terms and conditions and for the purposes set forth in the application subject to the provisions of this order.

(B) The Applicants shall record the proposed transaction herein authorized and the facilities and properties referred to above as provided in the Commission's Uniform System of Accounts Prescribed for Public Utilities and Licensees.

(C) This authorization shall expire unless the transaction herein authorized and approved is consummated within 90 days from the date of issuance of this order.

(D) The foregoing authorization is without prejudice to the authority of this Commission or any other regulatory body with respect to rates, service, accounts, valuations, estimates or determinations of cost, or any matter whatsoever now pending or which may come before this Commission or any other regulatory body and nothing herein shall be construed as an acquiescence by this Commission in any estimate or determination of cost or any valuation of property claimed or asserted by the Commission.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

NORTHERN NATURAL GAS COMPANY, DOCKET NO. CP64-255 (PHASE I)*

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 21, 1964)**

On April 28, 1964, as supplemented on June 29, 1964, September 1 and 24, 1964, and October 1, 5 and 6, 1964, Northern Natural Gas Company (Applicant) filed in Docket No. CP64-255 (Phase I) an application pursuant to Section 7 (c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain pipeline facilities in order to provide initial natural gas service to the Mesabi Iron Range Area of Minnesota, all as more fully set forth in the application, as supplemented (Phase I), in this proceeding.

Specifically, Applicant proposes to construct and operate approximately 31.5 miles of mainline loops in Iowa and Kansas and an additional 12,800 compressor horsepower at existing stations in Kansas, Iowa and Nebraska. Additionally, Applicant will extend its mainline some 48 miles into the Mesabi Area and construct and operate approximately 116 miles of branchlines, together with necessary regulating and metering stations, in Minnesota. These proposed facilities will enable Applicant to sell and deliver an additional 31,116 Mcf of natural gas per day.

Applicant proposes the following estimated third year peak day sales and deliveries and the same are hereinafter authorized:

Distribution	*Mcf*
Iron Ranges Natural Gas Company	5,823
Peoples Division of Applicant:	
Village of Hoyt Lakes	700
Erie Mining Company	14,500
Oglebay-Norton-Ford	5,700
Village of Hibbing, Minnesota	1,180
City of Virginia, Minnesota	980
Total	28,883

The above figures do not take into account unallocated mainline capacity of 2,233 Mcf per day which may subsequently be used for service to the Hanna Mining Company. Applicant has not as yet entered into a contract for service to Hanna. Hanna is to advise Applicant not later than January 1, 1965, as to whether it will construct a plant and purchase natural gas. Applicant will not

*This application, as supplemented, is divided into two Phases. This order pertains exclusively to Phase I of said application, as supplemented.

**Rehearing denied January 29, 1965, 33 FPC 126.

construct and operate the measuring facilities (estimated to cost $22,150) required for service to Hanna until such service has been authorized; the certificate hereinafter issued should not be construed to include authorization for the construction and operation of the measuring facilities for Hanna.

The total estimated cost of the facilities hereinafter authorized is $13,821,450, which cost will be financed initially with short-term borrowings. Permanent financing will be by the issuance of sinking fund debentures.

The communities of Hibbing and Virginia, Minnesota, have not as yet executed service agreements with Applicant; accordingly, Applicant should be required to file service agreements with said communities reflecting the precise volumes hereinafter authorized. Further, the application indicates that the contract demands with the two industrial customers range from 11,500 Mcf per day to 14,500 Mcf per day for Erie Mining Company and 4,000 Mcf per day to 5,700 Mcf per day for Oglebay-Norton-Ford. Applicant is requesting herein authorization to serve the higher volumes. The application indicates further that these industrial customers shall advise Applicant of the precise contract demand within a specified time after commencement of the use of natural gas in their respective plants. Accordingly, Applicant should file a petition to amend the subject order to authorize any lower contract demand for these customers should the precise contract demand be lower than the maximum volumes hereinafter authorized to be transported and delivered to Erie Mining (14,500 Mcf per day) and Oglebay-Norton-Ford (5,700 Mcf per day).

Several petitions to intervene and notices of intervention have been filed herein. None of said petitioners object to the grant of the certificate or request formal hearing in this proceeding. Inasmuch as the shortened procedure is being used herein, no further action on said petitions and notices appears necessary.

After due notice, no other petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on December 18, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application, supplements and exhibits (Phase I), submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Northern Natural Gas Company, a Delaware corporation having its principal place of business in Omaha, Nebraska, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of April 6, 1943, in Docket No. G–280 (3 FPC 967).

(2) The facilities hereinbefore described, as more fully described in the application, as supplemented, in this proceeding (Phase I), are to be used in the transportation and/or sale of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof and the proposed transportation and/or sales of natural gas by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities and the proposed transportations and/or sales of natural gas by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's

compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(2), (c)(3), (c)(4) and (e) of Section 157.20 of such Regulations.

(6) Within sixty days from the date of issuance of this order Applicant should file with the Commission service agreements with the communities of Virginia and Hibbing reflecting the precise volumes of 980 Mcf per day for Virginia and 1,180 Mcf per day for Hibbing hereinafter authorized.

(7) Applicant should file a petition to amend the subject order to authorize any lower contract demand for Erie Mining Company and Oglebay-Norton-Ford should the precise contract demand to be subsequently determined be lower than the maximum volumes hereinafter authorized to be transported and delivered to Erie Mining (14,500 Mcf per day) and Oglebay-Norton-Ford (5,700 Mcf per day).

(8) An excess mainline capacity of 2,233 Mcf per day should be reserved for service to the Hanna Mining Company provided Hanna advises Applicant on or before January 1, 1965, that it will construct a plant and enter into a contract to purchase natural gas from Applicant.

(9) This certificate should not entitle the industrial customers to whom firm deliveries are authorized herein to any priorities or rights to additional gas for meeting any future increases in their requirements at the expense of firm resale customers desiring to acquire additional gas to meet any future increases in their requirements.

The Commission orders:

(A) A certificate of public convenience and necessity be and the same is hereby issued authorizing Applicant, Northern Natural Gas Company, to construct and operate the proposed facilities and to sell, transport and deliver natural gas as hereinbefore described, all as more fully described in the application, as supplemented, in this proceeding (Phase I), upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(2), (c)(3), (c)(4) and (e) of Section 157.20 of such Regulations.

(C) The facilities hereby authorized shall be constructed and placed in actual operation and the sales, transportation and deliveries of natural gas authorized in paragraph (A) above shall commence, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within 12 months from the date on which this order issues.

(D) Within sixty days from the date of issuance of this order Applicant shall file with the Commission service agreements with the communities of Virginia and Hibbing reflecting the precise volumes of 980 Mcf per day for Virginia and 1,180 Mcf per day for Hibbing as authorized in paragraph (A) above.

(E) Applicant shall file a petition to amend the subject order to authorize any lower contract demand for Erie Mining Company and Oglebay–Norton–Ford should the precise contract demand to be subsequently determined be lower than the maximum volumes authorized by paragraph (A) above to be transported and delivered to Erie Mining (14,500 Mcf per day) and Oglebay–Norton–Ford (5,700 Mcf per day).

(F) An excess mainline capacity of 2,233 Mcf per day shall be reserved for service to the Hanna Mining Company provided Hanna advises Applicant on or before January 1, 1965, that it will construct a plant and enter into a contract to purchase natural gas from Applicant.

(G) This certificate shall not entitle the industrial customers to whom firm deliveries are authorized herein to any priorities or rights to additional gas for meeting any future increases in their requirements at the expense of other firm customers desiring to acquire additional gas to meet any future increases in their requirements.

[LETTER-ORDER FOR INTERIM PAYMENT OF HEADWATER BENEFITS]

Docket No. E-6684 December 21, 1964*

VIRGINIA ELECTRIC & POWER COMPANY
P.O. Box 1194
Richmond, Virginia, 23209

GENTLEMEN: Within 60 days of the date of this bill, please remit to the Federal Power Commission the charges listed below as an interim payment for headwater benefits provided by the Philpott and John H. Kerr reservoirs of the Department of the Army of the United States during the period August 1, 1955, through December 31, 1962, to the following project:

River Basin	Project	
	Name	License No.
Roanoke	Roanoke Rapids	2009

Headwater benefits assessment	$559,990.00
FPC administrative costs through April 10, 1964	33,900.00
Total	$593,890.00

This is an interim billing for payments pursuant to Section 10(f) of the Federal Power Act and Section 11.31 of Regulations under the Act. The amount billed for headwater benefits is taken from your letter of July 27, 1964, to the Federal Power Commission, commenting on the proposed staff report of April 1964. No offset may be allowed for reregulation benefits (*South Carolina Electric & Gas Company* v. *F.P.C.*, CA4, No. 9091, November 9, 1964).

The above billing is not to be considered as a final billing for the period specified or as acceptance of the Company's computations or basis of computation. It is an interim billing, to be supplemented at the time a final determination is made by the Commission.

By direction of the Commission.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

MONTANA-DAKOTA UTILITIES CO., DOCKET NO. CP63-351

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 22, 1964)

On June 24, 1963, Montana-Dakota Utilities Co. (Applicant) filed in Docket No. CP63-351 an application pursuant to Section 7(c) of the Natural Gas Act

*Rehearing denied February 11, 1965, 33 FPC 200. Affirmed, *Virginia Electric & Power Co.* v. *F.P.C.*, 351 F. 2d 408 (1965).

for a certificate of public convenience and necessity authorizing the construction and operation of approximately 1.4 miles of 4½-inch pipeline in Bowman County, North Dakota, together with a measuring and regulating station at the terminus of the proposed facility, all as more fully described in the application.

Applicant proposes to render gas service through the proposed facilities to the industrial plant of Kermac Nuclear Fuels Corporation for use in the production of uranium concentrates for the Atomic Energy Commission in volumes estimated at 550 Mcf on peak day demand and 103,680 Mcf annually.

The estimated cost of the proposed facilities is $19,900, which will be financed from funds on hand.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on December 18, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Montana-Dakota Utilities Co., a Delaware corporation having its principal place of business in Minneapolis, Minnesota, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of March 22, 1946, in Docket Nos. G–220 and G–402 (5 FPC 64).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are to be used in the transportation and delivery of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the subject facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a) and (e) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity be and the same is hereby issued authorizing Applicant, Montana-Dakota Utilities Co. to construct and operate the subject facilities for the purpose stated, all as more fully described in the applications herein, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a) and (e) of Section 157.20 of such Regulations.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

SIERRA PACIFIC POWER COMPANY, DOCKET NO. E-7195

ORDER AUTHORIZING ISSUANCE OF PROMISSORY NOTES

(Issued December 22, 1964)

Sierra Pacific Power Company (Applicant), a corporation organized under the laws of the State of Maine and doing business in the States of Nevada and California, with its principal business office in Reno, Nevada, filed an application on December 1, 1964, as amended on December 8, 1964, for authorization pursuant to Section 204 of the Federal Power Act to issue unsecured, short-term Promissory Notes in a principal amount not to exceed $12,000,000 outstanding at any one time.

The proposed notes payable to such bank or banks from which Applicant may borrow funds will be issued for periods not exceeding 12 months from the date of original issue or renewal thereof, as the case may be and will have maturity dates not later than December 31, 1965. Said notes will bear interest at the rate per annum not in excess of one-quarter of one percent over the prime rate in effect in New York City at the time of the borrowing or renewal of the loans. By order issued December 13, 1963, 30 FPC 1513 (Docket No. E-7134), Applicant was authorized to issue up to $12,000,000 short-term notes for periods not exceeding 12 months from the date of original issue or renewal thereof, as the case may be, such notes to have maturity dates not later than December 31, 1964. The Applicant has discharged all notes issued under the Commission's order of December 13, 1963, and it now has outstanding notes of $3,000,000 issued under Section 204(e) of the Act.

The proposed application would authorize the issuance of short-term Promissory Notes in the aggregate principal amount up to but not exceeding $12,000,000 including the notes for $3,000,000 issued under Section 204(e) of the Act, with maturity dates not later than December 31, 1965.

The Applicant proposes to apply and use the net proceeds obtained from the unsecured Promissory Notes, pending permanent financing to reimburse Applicant for construction expenditures and together with cash from operations to carry out Applicant's construction programs contemplated and now in progress for 1964 and 1965. These programs will require approximately $13,033,500 in 1964 and $13,945,000 in 1965 and will provide for the expenditure of approximately $10,082,400 for electric facilities and $9,726,000 for its gas and water facilities. Principal items in Applicant's electric program are: $4,206,400 in 1964 and $2,600,000 in 1965 for the Tracy Steam Unit #2; $216,000 in 1965 for Tracy Steam Unit #3; $1,241,000 for Geothermal Plant near Battle Mountain; 4,000 in 1964 and $585,000 in 1965 for the Purchase Bolster Plant; $480,000 for the Tracy-Steamboat 120 kv line; $262,900 in 1964 for the Mayers 120 kv Substation and 14.4 kv feeders; $135,200 in 1964 for the Tracy Substation Additions and the Wadsworth line; $140,000 in 1965 for the Buckeye Substation; $956,200 in 1964 and $180,000 in 1965 for various distribution substations and improvements to transmission and distribution system; $815,000 for an office building in Reno, Nevada.

Written notice of the application has been given to the Public Service Commission of Nevada and the Public Utilities Commission of California, and to the

Governor of each of those States. Notice has also been given by publication in the Federal Register on December 12, 1964 (29 F.R. 17055), stating that any person desiring to be heard or to make any protest with reference to the application should file a petition or protest on or before December 21, 1964, with the Federal Power Commission, Washington, D.C., 20426. No protest, petition, or request to be heard in opposition to the granting of the application has been received.

The Commission finds:

(1) Applicant, a corporation, is a public utility within the meaning of Section 204 of the Federal Power Act, subject to the jurisdiction of the Commission, as heretofore described and set forth in the Commission's order issued May 14, 1959, *In the Matter of Sierra Pacific Power Company*, Docket No. E–6873 (21 FPC 684).

(2) The proposed issuance of Promissory Notes in the aggregate principal amount of $12,000,000 all as described above will constitute an issuance of securities within the purview of Section 204 of the Act.

(3) The proposed issuance of Promissory Notes in the aggregate principal amount of $12,000,000 all as described above, will be in excess of 5 percent of the par value of the other securities of Applicant, and, therefore, will not be exempt by virtue of Section 204(e) from the requirements of Section 204(a) of the Act.

(4) Applicant is not organized and operating in a State, under the laws of which the security issue here involved is regulated by a State Commission within the meaning of Section 204(f) of the Act, and the proposed issuance is, therefore, not exempt by virtue of that Section from the requirements of Section 204 of the Act.

(5) The proposed issuance of Promissory Notes will be exempt from the competitive bidding requirements of Section 34.1a of the Commission's Regulations under the Federal Power Act by reason of Paragraph 34.1a(a)(2) thereof.

(6) The proposed issuance of securities, as hereinafter authorized, will be for a lawful object, within the corporate purposes of Applicant and compatible with the public interest, which is appropriate for and consistent with the proper performance of service by Applicant as a public utility, and which will not impair its ability to perform that service, and is reasonably necessary and appropriate for such purposes.

(7) The period of public notice given in this matter is sufficient.

The Commission orders:

(A) The proposed issuance of Promissory Notes in the aggregate principal amount of $12,000,000 outstanding at any one time, whether an original issue or a renewal note, upon the terms and conditions and for the purposes set forth in the application, all as described above, is hereby authorized, subject to the provisions of this order.

(B) This authorization is expressly conditioned upon the final maturity of all notes to be issued pursuant thereto being not later than December 31, 1965.

(C) The foregoing authorization is without prejudice to the authority of this Commission or any other regulatory body with respect to rates, service, accounts, valuation, estimates or determinations of cost or any other matter whatsoever now pending or which may come before this Commission.

(D) Nothing in this order shall be construed to imply and guarantee or obligation on the part of the United States in respect to any security to which this order relates.

OPINION NO. 445–A

SUN OIL COMPANY, ET AL., DOCKET NO. G–8592, ET AL.

OPINION AND ORDER DENYING APPLICATIONS FOR REHEARING

(Issued December 22, 1964)

Syllabus

1. It is well settled that Commission does not determine price line at highest price. P. 1498.
2. Commission *rejects* contention it has collaterally attacked *South Georgia* in determining price line here. P. 1499.
3. Since large volumes of gas are moving under *South Georgia* sales, they cannot be wholly ignored without doing injustice to producers. P. 1499.
4. While past sales are taken into account in determining price line, they do not justify granting of exception to producer merely because proposed sale is made under similar circumstances or adjacent to sale made under certificates already granted. P. 1499.
5. Commission *stays* certain provisions of prior order and *denies* applications for rehearing.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

O'CONNOR, *Commissioner:*

General American Oil Company of Texas, on November 17, 1964; Union Producing Company, on November 23, 1964; and Pan American Petroleum Corporation, California Oil Company (Calco), Humble Oil & Refining Company with Texaco Inc., and the Public Service Commission of the State of New York, on November 25, 1964, have filed applications under Section 19 of the Natural Gas Act for rehearing of our Opinion No. 445 and Order, issued October 26, 1964, 32 FPC 1183, in the above-entitled proceedings. Motions for stay have been filed by Humble, Texaco, Pan American, Calco, and General American.

In Opinion No. 445 and Order we granted permanent certificates of public convenience and necessity under Section 7 of the Natural Gas Act to a number of producers for sales of gas from fields in the State of Mississippi conditioned on a price of 20.6 cents per Mcf at 15.025 psia, including an allowance for tax reimbursement, and we provided for refunds and for a moratorium on filing increases above 24 cents per Mcf until January 1, 1968. Most of the issues set forth in the applications for rehearing have already been considered and discussed in Opinion No. 445. Therefore, further discussion can be limited to a few points.

The producers contend that in determining the price line we have, in effect, ignored the 20.25- and 21.5-cent base prices, that is exclusive of taxes, for gas sold from the Dexter and Cranfield fields. As stated in Opinion No. 445, we did not ignore them, but we did give them less weight for the reasons stated. It is clear that if these sales were completely excluded the highest base price in the Mississippi area would be 20 cents. It is well settled that we do not determine the price line at the highest price. Therefore, we have necessarily given some consideration to the Dexter and Cranfield sales in prescribing an in-line base price of 20 cents. Furthermore, if these sales were excluded, the weighted average of the other sales considered in this proceeding would have been only 18.16 cents compared to the substantially higher base price of 20 cents.

The producers contend further that we have collaterally attacked a final Commission order by failing to give full weight to the decision in *South Georgia Natural Gas Co.*, 22 FPC 211 (August 7, 1959), where the Commission approved the price for the Cranfield sales along with sales at the same price in the South Louisiana area. We fully recognize that the *South Georgia* order is a valid order of the Commission issuing certificates for certain sales to Southern Natural Gas Company at 21.5 cents exclusive of tax. We are not collaterally attacking this order in arriving at a determination of the price line in the present proceeding, which involves different sales, but the question here relates to the effect to be given *South Georgia*. Because of the development of the law and administrative policy since the *South Georgia* case was decided, we probably would not reach the same conclusion were it before us again. However, the sales approved in *South Georgia* represent an economic reality in the area. Large volumes of gas are moving under them. Contrary to the contents of the New York Commission, they cannot wholly be ignored without doing injustice to the producers. We have therefore determined the in-line price, exclusive of tax allowance, to be 20 cents per Mcf.

Union contends that its proposed sale in the present proceeding relates to additional acreage immediately adjacent to that covered by an existing permanent certificate issued on May 1, 1959, and therefore there is no reason for arriving at a different price for the sale proposed here. As we have already indicated, sales were certificated in the past under somewhat different standards than prevail today. While these sales are taken into account in determining the price line, they do not justify the granting of an exception for a producer merely because his proposed sale is made under similar circumstances or adjacent to sales made under certificates already granted. Compare *The Superior Oil Co.*, 32 FPC 241, Opinion No. 437, Docket No. G–6067, July 23, 1964.

Several of the producers point out that in determining the tax component of the "floor" used in computing refunds with respect to Humble, G–19200 (original application); Calco, G–19345; and Pan Am. CI60–128, we failed to take into account the 1/10 mill tax imposed by the State Oil and Gas Board. Therefore, our floor figure appearing in paragraph (E) should be changed from 21.27632 cents to 21.28632 cents to reflect this additional tax. Furthermore, to be consistent with our rounding of the in-line price, we think it is reasonable to round this figure to 21.3 cents.

It has come to our attention that in certain respects our Opinion No. 445 and Order does not conform to our order of October 1, 1964, approving a rate settlement for Sun Oil Company in Docket No. G–8288, *et al.*, 32 FPC 894. In the present proceeding there are involved Sun Sales in G–19015 (Rate Schedule 111), CI62–156 (R.S. 137), and CI63–283 (R.S. 152). In the settlement order the prices in the three dockets, settled at 21.5 cents per Mcf, were specifically made subject to the present proceeding, and therefore must conform to Opinion No. 445. The settlement, however, provides for a moratorium only until August 1, 1967, for all of the rate schedules involved in the settlement in contrast to the moratorium until January 1, 1968, with a 24-cent ceiling we have provided in the present proceeding. The settlement further provides, with respect to Rate Schedule Nos. 111, 137, and 152, that the refund period shall run from the date of issuance of the final order in Docket No. G–8592 retroactively only to the order approving the settlement (October 1, 1964). We shall accordingly amend the ordering clauses of Opinion No. 445 to make them conform to the Sun settlement with respect to the moratorium and the refund period.

The producers variously have asked for stays of paragraphs (B), (C), (D), (E), (F), (G), and (H) of our previous order. Paragraph (B) conditions the certificates with respect to price; (C) provides the moratorium; (D) provides

for filing new rates; (E) provides for refunds; (F) provides for defering the question of refunds where there is no refund condition in the temporary certificate; (G) provides for reporting of refunds and, as amended below, for a limitation on the refund period with respect to Sun; and (H) provides a certificate condition with respect to take-or-pay provisions in the producer contracts. There is no reason to stay paragraphs (B), (C), (F), and (H). Paragraphs (D), (E), and (G) have already been stayed thirty days by notice of the Secretary and will be stayed further until the completion of review proceedings.

The Commission further finds:

The assignments of error and grounds for rehearing set forth in the applications for rehearing filed in this proceeding present no fact or legal principles which would warrant any change or modification in the Commission's Opinion No. 445 and Order except as specified below.

The Commission orders:

(A) The applications for rehearing filed by General American, Pan American, Calco, Humble, Texaco, Union, and P.S.C. of New York are hereby denied.

(B) The amount of "21.27632 cents" appearing in paragraph (E) is amended to "21.3 cents."

(C) Paragraph (C) is amended to read as follows:

(C) Each certificate issued in paragraph (A) is further conditioned to provide for a moratorium on the filing of all price increases in excess of 24 cents per Mcf, inclusive of tax reimbursement until January 1, 1968, but in the case of Sun Docket Nos. CI62–156, CI63–283, and G–19015, the moratorium imposed by the settlement agreement in Docket No. G–8288 shall apply.

(D) The following shall be added to the present paragraph (G):

with respect to Sun in Docket Nos. CI62–156, CI63–283, and G–19015, the period covered by any refunds shall commence October 1, 1964.

(E) The completion of the acts and compliance with the requirements set forth in ordering paragraphs (D), (E), and (G) of the Order accompanying Opinion No. 445 are hereby stayed for a period of 30 days after conclusion of judicial review of said Opinion or until the Order otherwise becomes final, provided, however, that with respect to all amounts that would be refundable under the provisions of paragraphs (E) and (G) as amended herein, each applicant shall execute and file within 60 days an agreement and undertaking to refund all such amounts with interest at 7 percent per annum from the date of receipt to the date of payment, upon affirmation of the Order.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

TRANSCONTINENTAL GAS PIPE LINE CORPORATION AND UNITED NATURAL GAS COMPANY, DOCKET NO. CP65–109

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 22, 1964)

On October 26, 1964, Transcontinental Gas Pipe Line Corporation (Transco) and United Natural Gas Company (United) hereinafter referred to as Applicants filed a joint application in Docket No. CP65–109 for a certificate of public

convenience and necessity pursuant to Section 7(c) of the Natural Gas Act authorizing the exchange of volumes of natural gas between the respective applicants through the existing interconnection facility between their respective pipeline systems at a point in the Wharton Storage Pool, Potter County, Pennsylvania, and through future unspecified interconnections, all as more fully set forth in the application. No new connection facilities are proposed to be constructed to effectuate the exchange of gas contemplated by Applicants.

Applicants state that the purpose of the proposed exchange is to insure the continuity of deliveries of natural gas to their respective customers during emergencies.

Inasmuch as Applicants have only one existing interconnection between their respective systems and inasmuch as no new facilities are proposed herein, the proposed exchange will be limited to that which can be made through the existing facilities.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on December 18, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicants, Transcontinental Gas Pipe Line Corporation, a Delaware corporation having its principal place of business in Houston, Texas and United Natural Gas Company, a Pennsylvania corporation having its principal place of business in Oil City, Pennsylvania, are "natural-gas companies" within the meaning of the Natural Gas Act as heretofore found by the Commission.

(2) The exchange of volumes of natural gas through existing facilities, as hereinbefore described and as more fully described in the application, constitutes the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the operation of said facilities and exchange of natural gas by the Applicants is subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicants are able and willing properly to do the acts and to perform the service proposed and to conform to provisions of the Natural Gas Act and the requirements, rules and regulations thereunder.

(4) The operation of the existing facilities and the exchange of natural gas between the applicants in the manner proposed are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

The Commission orders:

(A) A certificate of public convenience and necessity be and the same is hereby issued authorizing Applicants to operate existing facilities as hereinbefore described, all as more fully described in the application, and to exchange natural gas as proposed, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon the Applicants' compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the terms and conditions set forth in paragraphs (a) and (e) of Section 157.20 of said Regulations.

(C) The proposed exchange of natural gas shall be made only through the existing interconnection between Applicants' natural gas pipeline system in Potter County, Pennsylvania.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

TRANSWESTERN PIPELINE COMPANY, DOCKET NO. CP65-112

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY AND DISMISSING APPLICATION

(Issued December 22, 1964)

On October 26, 1964, Transwestern Pipeline Company (Applicant) filed in Docket No. CP65-112 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing it to continue the sale for resale of natural gas to Pioneer Natural Gas Company (Pioneer) for a period ending September 30, 1966.

Applicant states that gas is needed during this period by Pioneer to serve the irrigation and residential requirements of small farm customers located in Parmer County, Texas, and that it has ample gas supplies to perform this service.

Applicant further shows that by letter order issued July 24, 1962, in Docket No. CP63-19 it received a temporary certificate to sell natural gas to Pioneer for resale to the domestic and agricultural customers for a period ending on September 30, 1964.

The volume of gas to be sold for resale to Pioneer for the purposes stated above is estimated at a maximum of 10,000 Mcf per day on a "best efforts" basis and a maximum of 500,000 Mcf on an annual basis. No facilities are to be constructed by Applicant.

A temporary certificate was issued in Docket No. CP65-112 on November 5, 1964.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been received.

At a hearing held on December 18, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Transwestern Pipeline Company, a Delaware corporation having its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of August 10, 1959, in Docket No. G-14871, *et al.* (22 FPC 391).

(2) The sale of natural gas hereinbefore described, as more fully described in the application in this proceeding, will be made in interstate commerce, subject to the jurisdiction of the Commission, and said sale and operation of facilities therefor by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The continued sale and delivery of natural gas by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned. The pending application in Docket No. CP63-19 is moot and should be dismissed.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a) and (e) of Section 157.20 of said Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity be and the same is hereby issued authorizing Applicant to sell and deliver to Pioneer Natural Gas Company up to 10,000 Mcf of natural gas per day, with a maximum of 500,000 Mcf of natural gas per annum, for resale to domestic and agricultural customers in Parmer County, Texas, for a period ending on September 30, 1966.

(B) The application of Transwestern Pipeline Company on file with the Commission in Docket No. CP63-19 seeking a certificate of public convenience and necessity authorizing the sale of gas by Applicant to Pioneer Natural Gas Company for a limited period ending September 30, 1964, is hereby dismissed.

(C) The certificate issued by paragraph (A) above is conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a) and (e) of Section 157.20 of said Regulations.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black

MONTHLY STATEMENT OF NATURAL GAS PIPELINE COMPANIES—REVISION OF FPC FORM NO. 11, DOCKET NO. R-262

ORDER NO. 291

REVISING MONTHLY STATEMENT FORM NO. 11

(Issued December 23, 1964)*

1. By notice of proposed rulemaking issued May 19, 1964, and published in the Federal Register of May 23, 1964 (29 F.R. 6807), the Commission proposed to revise the reporting requirements of certain of the larger natural gas pipeline companies by revising FPC Form No. 11, submission of which is now required monthly by Section 260.3 of the Commission's regulations, and by requiring the early reporting of some of the Form No. 11 information in a new Form No. 11A. Upon further consideration, the Commission has decided to withdraw its proposal for the new Form. For the reasons given herein we are promulgating the revision of FPC Form No. 11.

2. Existing Form No. 11 is required of all Class A and B natural gas pipeline companies and is a monthly report, due 30 days after the end of the reported month, covering certain revenue, expense, and gas volume data. We believe that reports by more than half of the companies now reporting may be discontinued and reporting may be confined to those 31 Class A and B companies selling, storing, and transporting about 90% of the natural gas subject to Commission rate regulation. At the same time, to facilitate individual regulation and to guide Commission policy formulation, the Commission plans to obtain in revised Form

*Published in the Federal Register on December 31, 1964 (29 F.R. 19237).

11 certain additional data which cannot be determined from the present report, such as current wellhead and city gate prices for interstate pipeline gas and accrued revenues and expenditures of pipelines under producer and pipeline rate increases not yet approved by the Commission. The total information to be derived from revised Form 11 should enable the Commission to appraise more accurately for its regulatory needs such facts as the current level of natural gas activity, the current consumption of and prices charged for gas sold by pipelines, seasonal variations in use of capacity by customer category, the effect of storage upon the monthly peak demand, and the extent of fluctuations in receipts of gas by pipelines from the various sources. In view of the greater detail required by the revised Form 11, the period for reporting is being changed from 30 days to 40 days.

3. Comments were received from 19 of the pipeline companies affected, in addition to the Independent Natural Gas Association of America, and from the California Public Utilities Commission, one consulting firm, one brokerage company, and one private individual. There was some criticism of the additional administrative burden entailed; on the other hand, there were useful comments and suggestions which have been adapted or incorporated in the forms and regulations. Thus, peak day delivery figures in Table 4 are being limited to the winter months and such other months in which they are measured by the company. Definitions have been supplied for such terms as "imports", and "off-peak", and Table 5 identifies the monthly reporters and other interstate pipelines.

The Commission finds:

In view of the foregoing and upon consideration of all relevant matters presented, it is necessary and appropriate in carrying out the provisions of the Natural Gas Act that FPC Report Form No. 11 be revised and promulgated in form as hereinafter ordered.

The Commission, acting pursuant to the Natural Gas Act, as amended, particularly Sections 10 and 16 thereof (52 Stat. 826, 830; 15 U.S.C. 717i, 717o), *orders:*

(A) FPC Form No. 11 is revised as set out in Attachment A hereto.

(B) Section 260.3, Subchapter G of Chapter I, Title 18 of the Code of Federal Regulations is amended to read as follows:

§ 260.3, Form No. 11, Natural gas pipeline company monthly statement.

(a) The form of the monthly statement for natural gas companies designated therein, entitled FPC Form No. 11 is prescribed for the Month beginning December 1964, and thereafter.

(b) Each natural gas company, as defined in the Natural Gas Act, whose combined gas sales for resale and gas transported or stored for a fee exceeded 50 million Mcf at 14.73 psia (60° F.) in the previous calendar year shall prepare and file with the Commission for the month beginning December 1964, and for each month thereafter, two copies of Monthly Statement, FPC Form No. 11. Such copies shall be filed within 40 days after the end of the reported month and shall be signed by the Chief Accounting Officer of the reporting company, but is not required to be under oath.

(C) The title of this proceeding shall read as set forth in the caption above.

(D) Companies presently filing existing Form 11 which are not required to file the new Form 11, herein promulgated, shall continue to report on the form heretofore in use through the reporting month of December 1964.

(E) This amendment shall become effective upon issuance of this order.

(F) The Secretary shall cause prompt publication of this order to be made in the Federal Register.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

SOUTHERN UNION PRODUCTION COMPANY, DOCKET NO. RI65-287

ORDER DENYING MOTION FOR RECONSIDERATION

(Issued December 23, 1964)

Southern Union Production Company (Supco) on November 23, 1964, filed an application for rehearing[1] of the Commission's order issued October 23, 1964 in the above-entitled proceeding which suspended a proposed increase from 13¢ to 14.0593¢ per Mcf[2] for sales to Southern Union Gathering Company, an affiliate of Supco, from the San Juan Basin area under its Rate Schedule No. 3. Supco requests that the suspension period be shortened from five months to one day.

In support of its request, Supco asserts that permanent certificate authorization in Docket No. CI61-1265 was not granted until September 16, 1964, despite the fact that Supco filed its application on June 3, 1963, because of the then prevailing Commission policy toward permanent certification of sales involving affiliates. Supco further states that during the interim period it was prohibited under the terms of its temporary certificate from filing for contractually authorized rate increases with respect to the acreage involved here, even though a higher rate of 14.0617¢ was in effect subject to refund during this period for sales from acreage dedicated under the basic contract. Supco claims this price differential unduly discriminates between similar wells producing substantially the same quality gas.

Contrary to Supco's assertion, permanent authorization for the instant sale was not delayed because of any Commission policy against certificating sales to affiliates. The reason for the delay was the failure of Supco to agree prior to July 6, 1964, to accept permanent authorization at the guideline initial rate ceiling of 13¢ per Mcf. In the absence of such an agreement it would have been necessary to set the matter for formal hearing. The prohibition in Supco's temporary against filing for rate increases was imposed because of the Commission policy of including such a condition when the initial rate sought by applicant was above the guideline initial rate ceiling set forth in the Commission's Statement of General Policy No. 61-1, as was the situation in Supco's case. Had Supco promptly submitted its agreement to accept the initial ceiling rate, Supco would have received permanent authorization at a much earlier date and relieved itself of the prohibition against rate increase filings imposed in the temporary. Under these circumstances we conclude that Supco has not shown sound justification for shortening the suspension period herein. We shall therefore deny Supco's motion for reconsideration.

The Commission orders:

For the reasons set forth above, Supco's motion for reconsideration is hereby denied.

---

[1] An application for rehearing of an interlocutory order, such as involved here, may not properly be filed [Section 1.30(e) of the Rules of Practice and Procedure (18 CFR 1.30(e))]. As requested by Supco in the alternative, the instant tender has been considered as a motion for reconsideration pursuant to Section 1.12 of the Commission's Rules of Practice and Procedure.

[2] The proposed increase relates only to gas produced from acreage added by Supplement Nos. 20 and 23 to Supco's Rate Schedule No. 3.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

UNION PRODUCING COMPANY, DOCKET NOS. G-13811 AND G-18354, ET AL[1]

ORDER APPROVING RATE SETTLEMENT PROPOSAL, SEVERING AND TERMINATING PROCEEDINGS AND PRESCRIBING REFUNDS

(Issued December 23, 1964)

There is before us for consideration a Motion for Approval of Settlement Proposal, Termination of Rate Proceeding, and for Shortened Procedure Certification filed on December 18, 1964, by Union Producing Company (Union) encompassing the rates for 22 of Union's currently effective FPC Gas Rate Schedules, for which there are 122 pending proposed rate increases. In summary, the settlement proposal as filed by Union provides:

(1) Settlement rates, including tax reimbursement, based upon cost of service studies utilized by the parties to these proceedings in accordance with our Opinion Nos. 414 and 414-A, 31 FPC 41, 503.

(2) Union waives the right to file for contractually authorized increased rates until December 1, 1967, for all of the rate schedules involved in the settlement. However, Union reserves the right to file for any increased rates, if contractually authorized, up to the applicable area-rate levels established by any order or rule of the Commission, or to file for any contractually authorized increase in tax reimbursement; provided, that by agreeing to this reservation neither the staff nor any other party thereto prejudices its contention that Union's production should not be treated differently from production by the producing arm of a pipeline.

(3) Refunds with interest at the applicable rates, under rate schedules where collection was made subject to refund, in accordance with the Commission's Opinion Nos. 414 and 414-A for the period June 15, 1961 to and including December 31, 1962, with applicable interest, and, of the difference between the revenues actually collected subject to refund and those which would have been collected at the settlement rate, in each instance, commencing with January 1, 1963, to December 1, 1964 for all of Union's rate schedules.

(4) Exclusion from the settlement proposal of two sales for which previous settlement proposals have been approved.

(5) Union will, within ten days after this order becomes final, file application for dismissal of its petition in the United States Court of Appeals for the Fifth Circuit (Cause No. 21339) by which it seeks review of our Opinion Nos. 414 and 414-A.

As heretofore indicated, refunds for the period from June 15, 1961, through December 31, 1962, are those required by our Opinion Nos. 414 and 414-A. For subsequent periods the parties utilized cost of service studies to determine refunds to be made by Union and the gas purchase costs for sales by Union to its affiliate, United Gas Pipe Line Company. Rates for sales by Union to United were designed to afford Union revenues consistent with such costs.

For all of the reasons set forth in our order in Humble Oil & Refining Company, Docket Nos. G-9287 and G-9288, *et al.*, 32 FPC 49, order issued July 8, 1964, we shall require Union to retain the amounts of refund ordered herein to purchasers other than United and to report thereon as hereinafter ordered. Our

[1] The additional dockets involved herein are set forth in Appendices A, B, and C, attached hereto.

order issued today in connection with United's settlement adequately provides for disposition of refunds by Union to United. Applicable interest shall be paid on all of the refunds through November 30, 1964. Such refunds will be approximately $3,350,000 plus interest. Union's future revenues will be decreased approximately $1,060,000 annually as a result of the settlement.

As to the other purchasers of natural gas from Union who come under our jurisdiction (who are entitled to only 3% of the refunds provided for herein) we shall require Union to retain such monies, with no further interest obligation, pending further order of this Commission.

Union, in its proposal, assigns a rate of 20¢ per Mcf of gas for a sale made by it to its affiliate, United, in the Maxie-Pistol Ridge Field in the State of Mississippi. The initial rate under Union's FPC Gas Rate Schedule No. 92 for this sale was 15¢ per Mcf and it might appear that by approving Union's settlement proposal we are hereby granting it an exception to our area rate ceilings as they have been fixed, and amended. However, that is not so. The instant settlement is based upon cost of service determinations made by the several parties to the proceedings who participated in the settlement conferences, and the assignment of the various rates to the rate schedules involved herein was made by Union so as not to disrupt its historical contract pattern, and is approved by us for that reason.

The settlement proposal includes rates for which issuance of related permanent certificates is pending, some of which are for sales presently being made under temporary certificates.[2] We shall set such applications for abridged hearing in accordance with Section 7 of the Natural Gas Act, providing that the settlement rates shall be the initial rates.

We believe that the principles underlying the present settlement proposal are consistent with the public interest and the provisions of the Natural Gas Act.

Our action herein should not be construed as constituting approval of any future rate increases, if any, that may be filed under the subject rate schedules, and is without prejudice to any findings or order of the Commission in future proceedings, including area rate or similar proceedings, involving Union's rates and rate schedules.

The Commission finds:

The proposed settlement of the subject proceedings on the basis described, herein, as more fully set forth in the Settlement Proposal filed by Union on December 18, 1964, is in the public interest and it is appropriate in carrying out the provisions of the Natural Gas Act, that it be approved and made effective as hereinafter ordered, and good cause exists for approving the settlement rates, for severing and terminating certain proceedings and providing for refunds.

The Commission orders:

(A) The settlement of these proceedings on the basis of the settlement proposal, filed by Union on December 18, 1964, is approved.

(B) The applicable settlement rates set out in Appendix A hereto are approved, and such rates shall be effective as of December 1, 1964, except that the settlement rates under Union's FPC Gas Rate Schedule Nos. 70 and 81 shall be effective January 1, 1965, and under its Rate Schedule No. 210 shall be effective January 18, 1965.

(C) The approved settlement rates shall be applicable during the moratorium period herein provided for to all sales of natural gas from all acreage dedicated as of the date of issuance of this order under each of the rate schedules cur-

[2] See Appendix B attached hereto.

rently on file with the Commission whether such sales are made by Union, its successors or assignees.

(D) Union shall compute the difference between the rates collected subject to refund and the rate not subject to refund for the period from June 15, 1961 to and including December 31, 1962, together with interest as specified in each docket. Additionally, it shall compute the difference between the rate collected subject to refund and the related settlement rates or rate not subject to refund whichever rate is the greater for the period from January 1, 1963 to December 1, 1964, together with applicable interest in each docket. Union shall within 45 days from the date of this order submit a report to the Commission, and serve a copy on each of the purchasers involved, setting out by purchasers the amount of refunds related to each rate schedule (showing separately the principal and applicable interest), the bases used for such determination and the periods covered.

(E) Union shall retain the amounts shown in the report required under paragraph (D) above, subject to further order of the Commission directing the disposition of those amounts, *provided*, however, Union shall within 90 days from the date of this order, (1) refund with interest as specified in each docket computed to December 31, 1964, the difference between the rates collected subject to refund in accordance with Paragraph (D) hereinabove, to the date of this order for all of such of Union's Rate Schedules, where the rates were collected subject to refund for sales of natural gas to United and (2) report to the Commission in writing, the amount of refunds made to United showing separately the amount of principal and interest so paid, and the bases used for such determination, together with releases from United showing receipt of the refunds in conformity with the settlement proposal as approved herein.

(F) If Union elects to commingle the retained refunds with its general assets and use them for its corporate purposes, it shall pay interest thereon at the rate of 6% per annum on all funds thus available from February 5, 1965, to the date on which they are paid over to the person ultimately determined to be entitled thereto in a final order of the Commission.

(G) If Union elects to deposit the retained refunds in a special escrow account, Union shall tender for filing on or before February 5, 1965, an executed Escrow Agreement, conditioned as set out below accompanied by certificate showing service of a copy thereof upon each of its jurisdictional customers. Unless notified to the contrary by the Secretary within 30 days from the date of filing thereof, the Escrow Agreement shall be deemed to be satisfactory and to have been accepted for filing. The Escrow Agreement shall be entered into between Union and any bank or trust company used as a depositor for funds of the United States Government and the agreement shall be conditioned as follows:

(1) Union, the bank or trust company, and the successors and assigns of each, shall be held and formally bound unto the Federal Power Commission for the use and benefit of those entitled thereto, with respect to all amounts and the interest thereon deposited in a special escrow account, subject to such Agreement, and such bank or trust company shall be bound to pay over to such person or persons as may be identified and designated by final order of the Commission and in such manner as may be therein specified, all or any portion of such deposits and the interest thereon.

(2) The bank or trust company may invest and reinvest such deposits in any short-term indebtedness of the United States or any agency thereof or in any form of obligation guaranteed by the United States which is, respectively, payable within 120 days as the said bank or trust company in the exercise of its sound discretion may select.

(3) Such bank or trust company shall be liable only for such interest as the invested funds described in Paragraph (2) above will earn and no other interest may be collected from it.

(4) Such bank or trust company shall be entitled to such compensation as is fair, reasonable and customary for its services as such, which compensation shall be paid out of the escrow account to such bank or trust company. Said bank or trust company shall likewise be entitled to reimbursement for its reasonable expenses necessarily incurred in the administration of this escrow account, which reimbursement shall be made out of the escrow account.

(5) Such bank or trust company shall report to the Secretary quarterly, certifying the amount deposited in the trust account for the quarterly period.

(H) The pending certificates proceedings set out in Appendix B hereto shall not be terminated on the basis of the approval of the settlement proposal, but shall be determined after hearing in accordance with Section 7 of the Natural Gas Act.

(I) Within 60 days from the date of this order, Union shall make such filings under its rate schedules as are required to make effective the terms of the settlement proposal.

(J) Upon full compliance by Union with all the terms and provisions of this order, the Section 4(e) proceedings listed in Appendix A hereto, and the Section 5(a) proceeding in Docket No. G–18354 shall terminate.

(K) Upon termination of the Section 4(e) proceedings listed in Appendix C hereto, in accordance with Paragraph (J) above, said proceedings shall be severed from the consolidated proceedings in Docket Nos. AR61–2, AR64–1, and AR64–2, respectively; the Section 7(c) proceedings listed in Appendix B are hereby severed from their respective consolidated proceedings, and the consolidation order issued April 29, 1959, in Docket No. G–13811, *et al.*, is rescinded.

(L) This order is without prejudice to any findings or orders which have been or may be made hereafter by the Commission, and is without prejudice to claims or contentions which may be made by Union, the Commission staff, or any affected party hereto, in any proceedings now pending, including area rate or similar proceedings, or hereafter instituted by or against Union or any other companies, person or parties affected by this order.

*Initial rate.
[1] Does not include oil well gas added by Supplement 7, which is included in Exhibit B.
[2] Abandoned. Notice of termination filed 8-11-61.
[3] Rate stated at 14.65 psia. Contract price is 6.0768¢ at 16.7 psia.
[4] Rate Schedule No. 245 superseded Rate Schedules Nos. 73 and 74.
[5] Rate Schedules have been combined for reporting as contracts are identical as to prices, etc.
[6] No production since prior to 6-7-54. FPC rescinded on 3-18-60 the prior acceptance of this rate schedule.
[7] Increase to 13.35¢ effective 1-1-65, Supplement 17 to Rate Schedule No. 70.
[8] Change in rate filing made 10-26-64 for price increase to 13.1248¢, to be effective 1-1-65.
[9] Application for abandonment filed 3-16-60.
[10] Abandonment authorized by FPC order issued 1-12-62 in Docket CI61-1609. Production ceased on 8-9-60. Last effective rate was 10.3¢ less downward Btu adjustment of 9.1%. Docket G-19822 consolidated in Docket AR64-2, et al.
[11] Rate schedule filed on percentage type contract was canceled. Gas is sold under plant operator's rate schedule.
[12] Abandoned. Notice of termination filed 4-23-62.
[13] Does not include oil well gas added by Supplement 12, which is included in Exhibit B.
[14] Rate schedule canceled in October 1957, effective 2-2-55.
[15] Does not include downward Btu adjustment applied monthly. 1.0¢ for gathering to be deducted.
[16] Abandoned. Notice of cancellation accepted 6-15-59 in Docket G-18893.
[17] Rate stated at 15.025 psia. Contract price is 6.223¢ at 16.7 psia.
[18] Rate stated at 15.025 psia. Contract price is 6.723¢ at 16.7 psia.
[19] Gas sold at wellhead.
[20] Gas sold at outlet of gasoline plant.
[21] Change in rate filing made 12-18-64 for price increase to 13.05076 to be effective 1-18-65.
[22] Rate Schedule No. 219 superseded Rate Schedules Nos. 204 and 205.
[23] Cancelled. Gas sales to Louisiana Nevada since 3-21-60 have been made under CVOC (Operator) Rate Schedule No. 1.
[24] Notice of termination filed 9-26-63.
[25] Rate Schedule No. 215 superseded Rate Schedule No. 85.
[26] Rate Schedule No. 216 superseded Rate Schedule No. 43.
[27] Rate Schedule No. 218 superseded Rate Schedule No. 62.
[28] Rate Schedule No. 228 superseded Rate Schedule No. 68.
[29] Rate Schedule No. 229 superseded Rate Schedule No. 69.
[30] Rate Schedule No. 234 superseded Rate Schedule No. 75.
[31] Does not include acreage added by Supplement 1, which is included in Exhibit B.
[32] Rate Schedule No. 235 superseded Rate Schedule No. 203.
[33] Applicable to Sibley Unit only.
[34] Order permitting abandonment issued 6-14-63 in Docket G-7825 et al.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

UNITED GAS PIPE LINE COMPANY, DOCKETS NOS. RP61–18, RP63–1, AND RP65–1

ORDER APPROVING RATE SETTLEMENT AND REQUIRING RETENTION OF CERTAIN REFUNDS

(Issued December 23, 1964)

The settlement proposals in the above-identified dockets relate to all presently pending rate proceedings, before the Commission and the United States Circuit Court of Appeals for the Fifth Circuit, arising from proposed increases in rates and charges tendered for filing by United Gas Pipe Line Company (United), pursuant to Section 4 of the Natural Gas Act.

By leave of the Presiding Examiner in Docket No. RP65–1, the formal hearings then in progress in that docket were recessed on November 19, 1964, to permit all parties actively participating in such proceedings to engage in settlement conferences. Upon the successful conclusion of such negotiations, on December 16, 1964, United, the Commission's Staff, United's pipeline customers, as well as the distributor customers and noncustomer interveners taking part in such formal proceedings unanimously agreed to the provisions of the settlement on the record. The Presiding Examiner, acting upon the motion of such parties, admitted into evidence as Exhibit No. 20–1, a Stipulation and Agreement (appended hereto)* setting forth a proposed settlement of these proceedings, and certified the record and such proposal to the Commission for its consideration.

Docket No. RP61–18 covers the period from June 15, 1961, through June 30, 1962, and the period from July 1, 1962, through December 31, 1962. The parties to this proceeding entered into a stipulation and agreement on February 16,

*Omitted in printing.

1962, which was approved by a Commission order issued on March 12, 1962, 27 FPC 504. That settlement agreement required the submission of post-audit reports by United and provided procedures for disposing of objections thereto. An informal conference on the issues thus raised was held on November 14, 1962, but failed to resolve all outstanding issues. Subsequently, the Commission issued an order on January 7, 1963, 29 FPC 36, authorizing United to make refunds in the principal amount of $4,837,232, of which some $228,498 was to be retained pending the resolution of a previously reserved issue relating to the design of United's PLC rates.

The proposed settlement would resolve all remaining controversies in this docket and contemplates additional refunds of $602,303 for the earlier rate period ending June 30, 1962, and $2,194,396 for the later period ending December 31, 1962. These refunds would be made without interest, except for interest received on supplier refunds. The proposed settlement also perpetuates United's existing obligations, under the earlier settlement agreement governing Docket No. RP61–18, to flow through supplier refunds (including Union[1]) applicable to gas purchases made between June 15, 1961, and December 31, 1962. Finally, United will pay the previously withheld principal amount of $228,498 to Mississippi River Fuel Corporation and Texas Eastern Transmission Corporation, together with interest at the rate of 7 percent per annum through November 30, 1964. The settlement agreement appears to represent a reasonable compromise of the disputed issues raised by the post-audit in Docket No. RP61–18.

Docket No. RP63–1 covers the rate periods from January 1, 1963, through August 31, 1964, and from September 1, 1964, through January 31, 1965. Rates for this period have been finally determined by the Commission in its Opinions and Orders (No. 428, 31 FPC 1180, 428–A and 428–B, 32 FPC 687, 879) entered in this docket. United's appeal therefrom is presently pending in the Fifth Circuit.

The proposed settlement contemplates that United will make refunds of the excess jurisdictional revenues collected from January 1, 1963, to February 1, 1965 (when the settlement rates in Docket No. RP65–1 will become effective) in accordance with the cost-of-service, allocation and rate design principles and methods prescribed by the Commission in Docket No. RP63–1. United, Texas Gas Transmission Corporation, Texas Eastern Transmission Corporation, and Natural Gas Pipeline Company of America will withdraw and obtain the dismissal of their respective appeals from such Commission opinions taken to that Circuit Court except insofar as such appeals relate to the Commission's use of a consolidated effective tax rate instead of the applicable statutory tax rate for the purpose of computing the federal income tax allowance component in United's cost-of-service and to the Commission's order compelling United to hold and retain monies to be refunded pending a determination of equitable entitlement thereto as between United's pipeline customers subject to the regulatory powers of this Commission and distributors regulated by State Commissions. The policy underlying this order permits, however, the immediate release of refunds payable by United to state-regulated distributor customers which purchase gas directly from United.

United would refund a principal amount of $16,279,830 for the rate period ending August 31, 1964, together with interest at the rate of 7 percent per annum through November 30, 1964.

Until February 1, 1965, United will continue to bill its jurisdictional customers at the RP63–1 substitute rates, which became effective on January 1, 1963, and

[1] As used herein, "Union" refers to Union Producing Company.

are presently in force. However, on or before March 31, 1965, United shall refund to its jurisdictional customers all revenues collected under the substitute rates which are above the level of proper compliance rates, determined in accordance with Opinion No. 428.[2] Such refund shall be determined for each customer by applying the differential between such rates to the actual volumes of gas taken between September 1, 1964, and January 31, 1965. United is obligated to invest such excess revenues as are actually received from its jurisdictional customers during this refund period in short term debt obligations of the United States Government and to also refund the interest thereby earned.

United's existing obligation in Docket No. RP63–1, under Opinion No. 428, to pass on gas supplier refunds is continued during the period when the future settlement rates will remain in effect. It shall flow through the jurisdictional portion of refunds received, or to be received, from producers (including Union) not yet flowed through which are within the scope of its obligations under Article V of the Stipulation and Agreement and applicable to gas purchases between January 1, 1963, and January 31, 1965. Since the future settlement rates, in Docket No. RP65–1, take effect only on February 1, 1965, United shall also flow through, by way of refunds, the jurisdictional portion of producer rate reductions which have not already been refunded or reflected in those prospective rates and are within the scope of its obligations under Article V of the Stipulation and Agreement and applicable to gas purchases between September 1, 1964, and February 1, 1965.

The refunds United will make under the settlement agreement, for the RP63–1 rate period, exceed those proposed in its compliance filing of October 17, 1964. The compliance filing proposed to offset earnings deficiencies in the Central Zone under the rates prescribed by the Commission for the year 1963 against refunds otherwise due. No such offset has been made in the computation of the settlement refunds. These refunds have been determined in compliance with the cost-of-service, allocation, rate design and rate adjustment principles and method underlying Opinion No. 428, with a relatively minor exception as to the date to which interest thereon would be payable. On the other hand, the dismissal of all pending appeals taken from Opinion No. 428 is a substantial benefit to jurisdictional customers stemming from the Stipulation and Agreement.

Docket No. RP65–1 covers the future rate period beginning on February 1, 1965 which represent the date when the increased rates filed by United, on July 15, 1964, will supersede the presently effective substitute rates filed by United, on December 19, 1962, thereby transforming Docket No. RP63–1 from a future rate period to a past rate period. United has tendered for filing, pursuant to the settlement agreement, revised tariff sheets to be effective on February 1, 1965. Each of the rate schedules reflected in such revised tariffs represents, on the basis of a single-part unit average rate per Mcf, a reduction below the level applied for by United in Docket No. RP65–1. Such settlement rates are also, on the same basis of computation, significantly below the presently effective rates in Docket No. RP63–1. In addition, such settlement rates are subject to later reduction to pass on consolidated tax savings having substantial impact on United's annual jurisdictional revenues if the pending litigation now before the Fifth Circuit results in a final decision, on the merits, sustaining the Commission's legal power to use a federal tax rate lower than the statutory rate in order to reflect actual tax savings realized by the filing of a consolidated tax return in the cost-of-service. The question of the proper consolidated tax rate to be used in Docket No. RP65–1 has been reserved for later determination, by the Com-

[2] As set forth in Appendix F to the Stipulation and Agreement.

mission, in further proceedings in that docket. The future settlement rates are based on the cost-of-service, allocation, and rate design principles and methods underlying Opinion No. 428 as applied to a new test period reflecting more recent operating experience during the two year interval between the respective test periods in Docket Nos. RP63–1 and RP65–1, with only minor exceptions. Similarly, the flow through conditions of the proposed settlement adhere to the substance and pattern of the ordering clauses of Opinion No. 428 except that the settlement agreement permits an offset of supplier price increases against the purchased gas cost reduction to be flowed through by reductions in United's cost-of-service and also to be reflected in lower jurisdictional rates.

Apart from the foregoing considerations, some of the benefits under the settlement such as the moratorium on rate increase filings and an end to prolonged and costly litigation, would not be available to the parties if this docketed proceeding continued through the hearing and decision process.

The bases for the proposed settlement are the post-audit cost of service reports filed in Docket No. RP61–18; the evidence in Docket Nos. RP63–1 and RP65–1 (including detailed rate filings under Section 154.63) and the Commission's Opinions and Orders entered in Docket No. RP63–1.

The principal provisions of the settlement agreement are summarized in part, as follows:

(1) Effective February 1, 1965 United's jurisdictional rates will be reduced to the level of the revised tariff sheets set forth in Appendix B of the attached Stipulation and Agreement.

(2) United agrees that it will not make any rate filing which would increase, to be effective prior to February 1, 1967 after having given effect to the expiration of any statutory suspension period, any rate or rates initially or subsequently established under the Stipulation and Agreement.

(3) The future settlement rates in Docket No. RP65–1 are based upon a cost-of-service reflecting the application of a 48 percent statutory tax rate. The issue of whether such tax rate or any lesser consolidated effective tax rate which may later be determined by the Commission, in further proceedings, should be used for the purpose of calculating United's federal income tax allowance in its settlement cost-of-service in Docket No. RP65–1 has not been disposed of by agreement of the parties, but, rather, has been reserved and made subject to the final judgment and decision to be entered on the merits of United's petition for review of the Commission's Opinion Nos. 428, 428–A and 428–B now pending in the Fifth Circuit and therein docketed as *United Gas Pipe Line Company* v. *F.P.C.*, Nos. 21872 and 21958. If such litigation eventuates in a final and nonappealable decision, by the court of last resort, which is adverse to United's position on this question, United is obligated to make such reductions in the rates initially or subsequently established under the settlement agreement in Docket No. RP65–1 as the Commission may order, within 60 days after a final determination of the effective tax rate to be utilized in that docket. In addition to this obligation to reduce prospectively such future settlement rates, United is also obligated to refund to its jurisdictional customers any amounts collected between February 1, 1965, and the effective date of such prospective rate reductions which are in excess of the amounts which would have been collected if such changed rates had been in effect on February 1, 1965 together with simple interest at the rate of 7 percent per annum thereon. Such refunds shall be made within 30 days from the date when any prospective rate reduction United is obliged to make under Article VII of the stipulation and agreement becomes final and non-appealable. In addition, United is also obligated to make such prospective rate reductions and refunds in the event that it voluntarily withdraws or fails to prosecute the petitions for review in the above-captioned appeals.

The agreement further provides that the question of whether a consolidated effective tax rate should be used in determining the federal income tax allowance component of United's cost-of-service in Docket No. RP63–1 shall be subject to and shall be governed by the final judgment and decision thereon to be entered in the pending review proceedings before the Fifth Circuit.

(4) The future settlement rates, in Docket No. RP65–1, provided for in this settlement agreement reflect a working capital allowance in the rate base which includes accumulated gas prepayments balances of $22,659,478. If such prepayments are finally allowed, by the Internal Revenue Service, as tax deductions for the year when the prepayment was made, United shall recalculate and reduce such working capital allowance by reflecting as a credit thereto the appropriate federal income tax related to said accumulated gas prepayment. In such event, United is obligated to reduce prospectively the rates initially or subsequently established, in Docket No. RP65–1, and also to make refunds in Docket No. RP63–1 for the period from January 1, 1963 to January 31, 1965 and in Docket No. RP65–1 during the life of the future settlement rates, as initially established or subsequently established under the Stipulation and Agreement. Such rate reductions and refunds shall reflect the jurisdictional portion of the reduction in cost-of-service resulting from such crediting. Such prospective rate reductions shall be made effective the first day of the month following the month through which refunds have been computed and paid or February 1, 1965 whichever is later.

If such gas prepayments are not allowed, as tax deductions for the year when the prepayment was made, but the gas prepayments balance on United's books is reduced below $22,659,478 by make-up or forfeiture of the prepaid gas and the allowance thereof as tax deductions in the year of such book balance reduction, United is obligated to reduce the future settlement rates initially or subsequently established under this Stipulation and Agreement in the manner provided for in Article VI thereof. No such rate reduction need be made prior to February 1, 1966. However, the future settlement rate shall be reduced prospectively from and after February 1, 1966 to reflect any such reduction in the gas prepayments balance on United's books as of December 31, 1965 below the $22,659,478. In the same manner, United is also obligated to reduce its rates prospectively from and after February 1, 1967 to reflect any such reduction in the gas prepayments balances on its books as of December 31, 1966 below the $22,659,478 or such lower balance as may have been previously reflected in reduced rates, effective on February 1, 1966, except that if United has filed increased rates to become effective February 1, 1967, this latter rate reduction shall not be required.

(5) If the federal tax rate imposed on corporate income earned during the calendar years 1965 and/or 1966 is increased or decreased, as compared to the statutory federal tax rate of 48 percent underlying the future settlement rates in Docket No. RP65–1, United shall file incremental rates to pass on such tax savings and may file incremental rates to recoup such additional tax expenses. Such incremental rates will be designed to reflect only the effect of increases and decreases in federal income tax rates and shall become effective on the date when the changed tax rate takes effect.

(6) If United receives any purchased gas cost reduction on or after February 1, 1965 with respect to any rates of producers on file with the Commission which are included in the cost-of-service underlying the future settlement rates, initially or subsequently established under the Stipulation and Agreement, or has received any purchased gas cost reduction prior to February 1, 1965 which has not been used to reduce that cost-of-service, United shall reduce its jurisdictional rates to reflect such reduced costs to the extent that such reduced costs

are not offset by increases in the cost of gas to United as provided in Section 6 of Article V thereof.

Therefore, if, as a result of final Commission decisions (including judicial review where sought) there is a purchased gas cost reduction (*i.e.*, resulting from a reduction in the aforesaid contingent rates of United's gas suppliers) and United's current weighted average cost per Mcf of gas purchased under rate schedules on file with the Federal Power Commission is decreased below a cost of gas of 17.39¢ per Mcf at 14.9 psia or the cost of gas computed by reducing the 17.39¢ per Mcf figure by the amount of the weighted average unit cost reduction obtained by dividing the total purchased gas cost reduction (which occasioned the preceding United rate reduction determined under Section 6 of Article V) by the annual purchase volume related thereto, whichever is less, which lesser cost is hereinafter referred to as the "base cost" of gas, United shall reduce its jurisdictional rates to reflect such reductions if the current weighted average cost is less than the base cost.

The amount of the reduction in United's cost of service shall be determined by multiplying the difference in such unit cost by the volumes of gas purchased under rate schedules on file with the Federal Power Commission during the twelve-month period ending with the month in which the last producer rate decrease has become effective, but such amount shall not exceed the annualized effect of the rate reductions for the producer or producers involved.

United is not obligated to flow through supplier price reductions resulting from any Commission orders entered in proceedings conducted under Section 5(a) of the Natural Gas Act. In addition, it is not obligated to flow through any Union rate reductions in Docket No. RP65–1 since its allowable gas costs for purchases made from that affiliated supplier have been based on the latter's actual cost-of-service, rather than its filed rates.

(7) If United receives, or has received, any rate refunds from producers or suppliers with respect to gas purchases included in the purchased gas expense component of the cost-of-service allowed, respectively, in Docket Nos. RP63–1 and RP65–1, which refunds are applicable to gas purchases made after January 1, 1963 and not yet flowed through, United is obligated to flow through the jurisdictional portion of such supplier refunds and any interest thereon received by it.

Refunds received from Union shall be flowed through with respect to gas purchases made between January 1, 1963 and January 31, 1965. However, United may retain refunds received from Union with respect to gas purchases made after February 1, 1965 since the future settlement rates in Docket No. RP65–1 reflect reductions in Union's filed rates, determined on an actual cost basis, and the treatment of Union as the integrated production arm of United.

(8) Article III of the Stipulation and Agreement provides that the settlement is specifically conditioned upon the Commission's approval of the payment of refunds due jurisdictional customers in Docket No. RP63–1 for the period between September 1, 1964 and January 31, 1965, on or before March 31, 1965, without any further proceedings as to such payment by United to its customers and that United shall not be obligated to pay interest on the amounts so refunded. The Agreement recites that such refunds are payable by virtue of the agreement of all parties that the RP63–1 substitute rates made effective on January 1, 1963 shall continue in effect until superseded by the settlement rates in RP65–1 on February 1, 1965. Absent such a stipulation, the reduced rates prescribed by the Commission in Opinion Nos. 428 and 428–A would have been in effect during this period.

The Stipulation and Agreement also expressly provides that the foregoing condition does not apply to supplier refunds and/or rate reductions applicable

to gas purchases made during the period from September 1, 1964 through January 31, 1965 which are to be flowed through by United under Article V thereof.

(10) The Stipulation and Agreement is also expressly conditioned upon the Commission's approval of all of the terms and conditions thereof, and upon the Commission's approval of a settlement of all of Union's pending rate proceedings.

In addition to the foregoing provisions the Stipulation and Agreement contains the following requests and reservations:

(1) United and those of its customers joining in the Stipulation and Agreement by expressing their concurrence therewith on the record in Docket No. RP65–1 have requested, in Article II thereof, that the Commission permit United to make the refunds provided for in that Article, excluding any portion of such refunds representing frozen supplier refunds applicable to United, within 30 days after the date of the issuance of a Commission order approving that Stipulation and Agreement. Article II deals with refunds payable in Docket No. RP61–18 and with the rate period extending from January 1, 1963 to August 31, 1964 in Docket No. RP63–1. The parties to the agreement making this request have further requested the Commission to release such frozen supplier refunds in order that United may thus immediately pay all refunds called for by Article II directly to such customers.

Neither the Staff nor any of the other parties participating in Docket No. RP65–1 have joined in this request and it does not constitute, in our Opinion, a term or provision of the Stipulation and Agreement. Nevertheless, we recognize that if we provide for the retention of refunds payable by United we shall be imposing a requirement upon the requesting parties which they have not voluntarily assumed in the subject settlement agreement.

(2) The Commission is also requested to waive compliance by United with the requirements of the Commission's general rules and regulations, to the extent necessary to effectuate all of the provisions of the agreement.

(3) A reservation has been made to the effect that the Stipulation and Agreement shall not constitute an agreement by the private parties to the agreement on rate making principles and methods employed or underlying the determination of the dollar amounts specified in the distribution thereof, but is only a dollar settlement of United's pending rate proceedings.

The Commission finds:

(1) The settlement of these rate proceedings upon the basis of the Stipulation and Agreement (identified as Exhibit No. 20–1), as above-discussed and summarized, is reasonable, proper, and in the public interest in carrying out the provisions of the Natural Gas Act and the proposed rate settlement based thereon should be approved and made effective subject to the terms and conditions hereinafter ordered.

(2) The rates and charges filed by United in Docket No. RP65–1 and contained in Second Revised Sheet No. 9–A; Fifth Revised Sheet No. 99; Seventh Revised Sheet Nos. 34, 35, 44, and 45; Eighth Revised Sheet Nos. 8 and 14; Ninth Revised Sheet Nos. 4, 6, 10, 12, 21, 23, 25, 27, 28, 30, and 32, have not been shown to be just and reasonable or otherwise lawful under the provisions of the Natural Gas Act, and should be disallowed and denied as hereinafter ordered.

(3) Good cause exists for the Commission to waive its applicable rules and regulations under the Natural Gas Act, in order that the tariff sheets included as Appendix B of the Stipulation and Agreement may become effective on February 1, 1965.

(4) The request of United and those of its customers joining in the Stipulation and Agreement, by expressing their concurrence therewith on the record in Docket No. RP65–1, that the Commission shall authorize United to refund immediately

and directly to such customers the amounts of any refunds due under Article II thereof, upon approval of said settlement agreement by the Commission, and their further request that the Commission release, all frozen supplier refunds otherwise payable to United should be denied and all such refunds, as well as the supplier refunds and/or rate reductions applicable to gas purchases made between September 1, 1964 and January 31, 1965 which are to be flowed through to jurisdictional customers by United under Article V thereof, and not subject to the condition in Paragraph (b) of Article III shall be subject to the terms and conditions hereinafter ordered respecting the retention of such refunds and converted supplier rate reductions flowed through by way of refunds.

The Commission orders:

(A) The proposed increased rates filed by United and referred to in finding clause (2), above, are hereby disallowed and denied.

(B) The settlement of these proceedings upon the basis set forth in the Stipulation and Agreement, as hereinabove discussed and summarized, is hereby approved and made effective as proposed therein subject to the terms and conditions hereinafter ordered.

(C) United shall, within 15 days from the date of this order, submit in triplicate a report to the Commission and serve a copy on each of its customers identifying each such customer which does not have rate schedules and tariffs on file with this Commission, relating to the transportation or sale of natural gas subject to its regulatory authority under the Natural Gas Act and is either a State regulated distributor or an ultimate consumer of the gas purchased, from United, which said purchases generated the refunds involved. Any customer of United believing that it has been improperly omitted from the listing contained in such report, shall file a request for classification as a State regulated distributor or ultimate consumer of natural gas within 30 days thereafter. The Commission will review the data contained in such report and such requests and authorize United to pay any and all refunds owing to customers so classified, under the terms of the Stipulation and Agreement and this order, and promptly direct United to make appropriate refund payments to all eligible customers. Pending such Commission authorization, or any further order of the Commission directing the disposition of refunds thus determined to pipeline customers, United shall retain all amounts shown in Appendix A of the attached Stipulation except those subject to paragraph (b) of Article III under the terms and conditions specified in ordering paragraphs (H) and (I) of Opinion No. 428–A, entered in Docket No. RP63–1 on September 2, 1964.

(D) As further refunds become due and payable, under the terms of the Stipulation and Agreement and this order, United shall within 20 days after the computation of such refunds is made, submit in triplicate a report to the Commission and serve a copy on each of the purchasers involved setting out by purchasers and dockets the amount of refund related to each rate schedule (showing separately the principal and applicable interest), the basis used for such determination and the periods covered. United shall likewise include in such report the listing described in ordering paragraph (C), above, and, also, retain the amount shown in such report on the terms and conditions specified in that paragraph.

(E) United shall comply with each of the provisions of the Stipulation and Agreement and of this order.

(F) The 30 day notice provision of Section 154.22 of the Commission's Regulations under the Natural Gas Act is hereby waived and the revised tariff sheets included in the Stipulation and Agreement (Exhibit No. 20–1) as Appendix B shall become effective as of February 1, 1965, subject to the terms and condi-

tions of this order and of the Stipulation and Agreement, if tendered for filing by United within 7 days from the date of this order.

(G) Upon compliance with the terms and conditions of this order, the proceedings in Docket No. RP65–1 are hereby terminated, except with respect to such further proceedings as may be required to determine the appropriate consolidated effective tax rate to be utilized in fixing an income tax allowance for the purposes of that docket and such further proceedings as may be required to determine the identity of the person or persons equitably entitled to the refunds to be made hereunder by United, subject to the terms of the Stipulation and Agreement as to all parties assenting thereto, by agreeing on the record or by failure to object within the time hereinafter provided.

(H) Upon compliance with the terms and conditions of this order, the proceedings in Docket No. RP63–1 are hereby terminated, subject to the terms of the Stipulation and Agreement as to all parties assenting thereto, by agreeing on the record or by failure to object within the time hereinafter provided.

(I) Within 30 days from the date United makes refunds pursuant to this order and the Stipulation and Agreement, the pending appeals in the United States Court of Appeals for the Fifth Circuit in the hereinabove identified litigation shall be withdrawn to the extent provided in Article VIII thereof, without prejudice to the positions taken by the petitioners therein.

(J) United shall, over the signature of a responsible officer, file with the Commission within 7 days from the date of this order, in writing and under oath, an original and one copy of its acceptance or rejection of the terms and conditions of this order.

(K) Within 7 days from the date of this order, any person which is a party to the proceedings in Docket No. RP61–18, or Docket No. RP63–1, or Docket No. RP65–1 shall file written objections to the stipulation and agreement and/or to this order.

(L) Within 7 days from the date of this order any customer which is not a party within the purview of Paragraph (K) above and is affected thereby may file written objections to the stipulation and agreement and/or to this order.

(M) Except for ordering paragraphs (J), (K), and (L), the provisions of this final order shall become effective only in the event that they are not modified or superseded by further order of the Commission entered prior to December 31, 1964.

(N) This order is without prejudice to any findings or orders which have been or may be made hereafter by the Commission, and is without prejudice to claims or contentions which may be made by the Commission, United, the Commission staff, or any affected party herein, in any proceeding now pending or hereafter instituted by or against United or any other companies, persons, or parties affected by this order.

Before Commissioners: David S. Black, Acting Chairman; L. J. O'Connor, Jr. and Charles R. Ross.

UNITED STATES DEPARTMENT OF THE INTERIOR, SOUTHEASTERN POWER ADMINISTRATION, DOCKET NO. E–7188

ORDER CONFIRMING AND APPROVING RATES AND CHARGES

(Issued December 23, 1964)

Pursuant to Section 5 of the Flood Control Act of 1944 (59 Stat. 887), the Assistant Secretary of the Interior (Secretary), on behalf of the Southeastern

Power Administration (SEPA) on October 16, 1964 filed a request for confirmation and approval of Wholesale Power Rate Schedule CR–1 applicable to the sale of power generated by Dale Hollow, Center Hill, Wolf Creek, Cheatham, and Old Hickory Projects. On November 3, 1964, the Secretary filed an amendment to this request.

The proposed rate schedule encompasses and supersedes Wholesale Power Rate Schedule OHC–1 applicable to the sale of power from the Old Hickory and Cheatham Projects heretofore approved by the Commission by order issued July 23, 1963, Docket No. E–6999, 30 FPC 398, and is in substitution of the rates and charges for the sale of power generated by Wolf Creek, Dale Hollow and Center Hill Projects which were disapproved by the Commission by order issued May 20, 1958, Docket No. E–6645, 19 FPC 774. The Secretary requests approval of the proposed rate schedule for a period ending June 30, 1969. All of the power and energy generated by the five projects mentioned above is sold to the Tennessee Valley Authority (TVA).

The revenue and repayment studies heretofore submitted by the Secretary in 1958 in Docket No. E–6645, relative to the application of the proposed rate schedule for the sale of power and energy generated by the Wolf Creek, Dale Hollow and Center Hill Projects, were based on an incremental allocation of costs to power and an interest rate of 2% per annum on the investment allocated to power. The revenue and repayment studies submitted by the Secretary on October 16, 1964, and as amended November 3, 1964, contemplated a single rate schedule for the five projects. These studies are based on the Separable Costs-Remaining Benefits method of cost allocation with respect to the Old Hickory and Cheatham Projects, and are based on the incremental method of cost allocation to power with respect to the Wolf Creek, Dale Hollow and Center Hill Projects. The interest rate of 2.5% on the power investment, which has heretofore been applicable to the Old Hickory and Cheatham Projects is made applicable in the study to the Wolf Creek, Dale Hollow and Center Hill Projects. The increased costs resulting from the application of the 2.5% interest charge instead of the 2% with respect to the Wolf Creek, Dale Hollow and Center Hill Projects for the period prior to June 30, 1964, were computed. The study contemplated that the repayment of such costs with interest compounded annually will be deferred until all other costs are amortized.

There is no change in annual charges applied to the repayment of the investment in the Old Hickory and Cheatham Projects heretofore submitted in the repayment studies upon which the rates and charges were approved by the Commission in Docket No. E–6999. In our previous order rejecting the rates filed for the three other projects, alone, we held that the incremental method of cost allocation should not be utilized and that the use of a 2% interest rate was inappropriate. On further study of the problem, we have concluded that the Secretary's utilization of this method of cost allocation with respect to these projects is proper under the applicable laws. The Secretary now adopts a 2.5% interest rate for these projects.

The revenue and repayment studies now before the Commission show that the Wholesale Power Rate Schedule CR–1, which is attached hereto and made a part of this order,* applied to the sale of power and energy produced by the five projects mentioned above, will produce revenue which, together with revenue collected to date, in sufficient to repay the investment allocated to power within 50 years from the time that the investment in each project became revenue producing, with the exception of the deferred interest costs associated with the Wolf Creek, Dale Hollow, and Center Hill Projects mentioned above.

*Omitted in printing.

The Commission finds:

The proposed rates and charges of SEPA for the wholesale sale of electric power and energy from the Wolf Creek, Dale Holow, Center Hill, Cheatham and Old Hickory Projects, as set forth in Wholesale Power Rate Schedule CR–1, referred to above, for a period beginning with the date of the issuance of this order and terminating June 30, 1969 will not be inconsistent with the provisions of the Flood Control Act of 1944.

The Commission orders:

The proposed rates and charges for wholesale sale by SEPA to TVA of electric power and energy from the Wolf Creek, Dale Hollow, Center Hill, Cheatham and Old Hickory Projects, as set forth in Wholesale Power Rate Schedule CR–1, attached hereto and made a part hereof, are hereby confirmed and approved for a period beginning with the date of issuance of this order and ending June 30, 1969.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

ARIZONA PUBLIC SERVICE COMPANY, DOCKET NO. E–7181

ORDER DISMISSING APPLICATION PURSUANT TO SECTION 203 OF THE FEDERAL POWER ACT

(Issued December 24, 1964)

Arizona Public Service Company (Public Service) incorporated under the laws of the State of Arizona, doing business in the States of Arizona and New Mexico, with its principal place of business in Phoenix, Arizona, filed an application on September 11, 1964, pursuant to Section 303 of the Federal Power Act, requesting an order authorizing the sale of certain steam and electric generating facilities to Southwest Forest Industries, Inc. (Southwest) or in the alternative, Applicant seeks a disclaimer of jurisdiction in regard thereto.

Southwest is a corporation engaged in the lumbering and wood products business and operates a lumber mill at McNary, Arizona. Southwest presently purchases its steam and electric energy requirements from Public Service.

The facilities to be sold are located at McNary, Arizona and consist of a 7,900 kw steam-electric generating unit, boiler plant equipment, accessory electrical equipment, and miscellaneous power plant facilities. No transmission or substation equipment is included in the proposed sale.

The application recites that the consideration will be $75,000 which amount was determined by negotiation as set forth in an agreement between the parties dated April 1, 1964. Applicant states that the sale of facilities will eliminate the use of inefficient and outmoded plant with consequentially high relative operating and maintenance cost, substituting in place thereof, lower cost power from Applicant's normal generation sources.

Section 201(b) of the Federal Power Act exempts generating facilities from the Commission's jurisdiction except as specifically provided in Parts II and III of the Act. Section 203 makes no exception to this exemption regarding the disposition of facilities. The facilities proposed to be sold in this matter are confined to electric generating facilities and their disposition by the Applicant is, therefore, not subject to the requirements of Section 203 and thus the application should be dismissed.

262–497—67——99

Written notice of the application has been given to the Arizona Corporation Commission and to the Governor of that State. Notice of the application was also given by publication in the Federal Register on September 24, 1964 (29 F.R. 13285), stating that any person desiring to be heard or to make any protest with reference to the application should file with the Commission a petition or protest on or before October 5, 1964. No protest or petition or request to be heard has been received.

The Commission finds:

(1) Public Service is a public utility within the meaning of Section 203 of the Federal Power Act, subject to the jurisdiction of the Commission as heretofore described and set forth in the Commission's order issued July 6, 1961, in *Arizona Public Service Company*, Docket No. E-6961 (26 FPC 36).

(2) Southwest is not a public utility within the meaning of that term as used in the Federal Power Act.

(3) The facilities to be disposed of by Public Service are used only for the generation of steam and electric energy and as such are not subject to the requirements of Section 203 by virtue of Section 201(b) of the Act.

The Commission orders:

The application of Public Service filed in the above-entitled matter be and the same is hereby dismissed for want of jurisdiction of this Commission pursuant to Section 203 of the Federal Power Act.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

PAN AMERICAN PETROLEUM CORPORATION, DOCKET NO. G-3216

ORDER GRANTING IN PART AND DENYING IN PART PETITION FOR WAIVER AND DECLARATORY ORDER

(Issued December 24, 1964)

On October 8, 1964, Pan American Petroleum Corporation (Pan American) filed in Docket No. G-3216 a petition for waiver of Commission Order Nos. 232,[1] 232-A,[2] and 242 [3] with respect to certain pricing provisions contained in a certain gas sales contract and the issuance of a declaratory order clarifying the applicability of such orders. For the reasons hereinafter stated, said petition will be granted in part and denied in part.

On December 26, 1963, Pan American filed an application, pursuant to Section 7(c) of the Natural Gas Act, requesting that its certificate in Docket No. G-3216 [4] be amended so as to authorize sales of natural gas to United Fuel Gas Company from certain additional acreage located in the South Pecan Lake, *et al.*, Fields, Cameron Parish, Louisiana. Pan American proposes to sell the gas from the additional acreage under the terms of the original contract, as amended, in Docket No. G-3216. The original contract is dated May 27, 1952, and is on file with the Commission as part of Pan American's Rate Schedule No. 173. The supplemental letter dedicating the additional acreage in accordance with Article IV, Paragraph

---

[1] 26 F.R. 1983, March 8, 1961, 25 FPC 379.
[2] 26 F.R. 2850, April 6, 1961, 25 FPC 609.
[3] 27 F.R. 1356, February 14, 1962, 27 FPC 339.
[4] Certificate issued October 28, 1954.

(9) of the original contract is dated December 2, 1963.[5] On July 17, 1964, Pan American requested temporary authorization to commence the sale from the additional acreage described above and, on September 9, 1964, by letter order, such authorization was granted upon condition, *inter alia*, that Pan American file an amendment to the December 2, 1963, letter eliminating therefrom the pricing provisions, incorporated therein by reference to the May 27, 1952, basic contract, that are proscribed by Section 154.93 of the Commission's Regulations. Section 154.93 of the Regulations as amended by Order Nos. 232, 232–A and 242 defines the permissible price changing provisions of gas sales contracts submitted as proposed rate schedules. Section 154.93 of the Regulations provides for the following permissible contract rate changing provisions:

(a) Provisions that change a price in order to reimburse the seller for all or any part of the changes in production, severance, or gathering taxes levied upon the seller;

(b) Provisions that change a price to a specific amount at a definite date; and

(c) Provisions that, once in five-year contract periods during which there is no provision for a change in price to a specific amount (paragraph (b) of this section), change a price at a definite date by a price redetermination based upon, but not higher than, a producer rate or producer rates *which are subject to the jurisdiction of the Commission are not in issue in suspension or certificate proceedings*. . . . (Emphasis added.)

Paragraph (2) of Article V of the May 27, 1952, Contract, as amended, provides for a 0.5¢ per Mcf increase in the base price should the dedicated reserves exceed 750,000 MMcf and 0.5¢ per Mcf for each 250,000 MMcf of additional reserves.[6]

Paragraph (3) of Article V of the May 27, 1952, Contract, as amended, provides for a price redetermination within six months prior to April 1, 1966, for each year of the three-year period ending April 1, 1969, and within six months prior to the end of each five-year period thereafter. Although no periodic escalation is provided during this period, the redetermination is based upon three highest prices in the area but without the limitations set forth in Section 154.93(c), *i.e.*, that the prices must be for jurisdictional sales and not in issue in suspension or certificate proceedings.

Paragraph (5) of Article XVIII of the May 27, 1952, contract constitutes what is generally known as a favored-nation provision.

Pan American does not request waiver of the proscription of the favored-nation provision but states that unless the price redetermination provision of Paragraph (3) of Article V of the basic contract is applicable to the additional acreage dedicated by the letter of December 2, 1963, ". . . no orderly procedure exists for changing the contract price applicable to such acreage, and Pan American is involuntarily relegated to the remedy of unilateral price changes."[7] Pan American further states that the price re-negotiation and re-determination provision, if allowed, cannot result in the proliferation of rate filings or the complicated Commission hearings on contract price disputes, or the unreason-

[5] Designated Supplement No. 18 to Pan American's F.P.C. Gas Rate Schedule No. 173.

[6] Since the dedicated reserves were determined to have been in excess of 750,000 MMcf (but less than 1,000,000 MMcf) prior to initial deliveries, the 0.5¢) per Mcf reserve incentive was part of the initial price under the basic contract.

[7] Petition p. 3. Pan American does not state under what authority it could make unilateral rate changes.

able disruption of rates, recited by the Commission as the basis for issuance of Orders Nos. 232, 232–A and 242.

Finally, Pan American states that it is uncertain as to whether or not Section 154.93 of the regulations proscribes the reserve-incentive-pricing provision contained in Paragraph (2) of Article V of the basic contract. The contention is made that such pricing provision performs valid economic functions by encouraging and facilitating the development of natural gas reserves and the commitment of such reserves to the existing sale.

Pan American requests an evidentiary hearing on these matters.

We are not persuaded by Pan American's arguments for a waiver of Section 154.93 of our Regulations to allow the price redetermination provision. Nor has Pan American stated any good reason for holding an evidentiary hearing on these matters. We have determined that indefinite pricing provisions of this nature are not in the public interest and our conclusion has been sustained by the Supreme Court. *F.P.C.* v. *Texaco Inc.*, 377 U.S. 33 (1964). In its petition herein the substance of Pan American's arguments is that if waiver is not granted, the contract will have no price increasing provisions related to the additional acreage. The simple answer to that argument is either amend the agreement to include permissible price changing provisions or execute a new contract for the sale of gas from the additional acreage.

The reserve-incentive-pricing provision in Paragraph (2) of Article V does not come within the permissible rate-changing provisions of Section 154.93 of the Regulations. However, since the reserve-incentive-pricing provision does not appear to be contrary to the public interest as are favored-nations and other indefinite pricing provisions in general, we shall grant a waiver of Section 154.93 insofar as it would otherwise prohibit the acceptance of the contract (and certificate application based thereon) containing Paragraph (2) of Article V. This provision appears to perform a valid function and does not depend upon indefinite actions taken by other parties to activate it. Only Pan American, by dedicating additional reserves, can cause the contract price to increase. In this regard it is somewhat the converse of provisions in contracts which reduce the contract price if the reserves turn out to be less than a specified amount. It is also analogous to provisions which adjust the price should the delivery pressure vary from a stated pressure. It has been the Commission's practice to accept contracts containing these analogous provisions although they too, technically, do not conform to Section 154.93 of the Regulations. Of course, as in the case of any permissible escalation clause, to the extent that such clauses bring the total price above our appropriate ceilings, we shall not certificate the sale at such price and would suspend rate increases pending determination of the just and reasonable rate.

The Commission orders:

(A) Section 154.93 of the Regulations Under the Natural Gas Act is hereby waived so as not to prohibit the filing and the effectiveness of Paragraph (2) of Article V of the May 27, 1952, contract between Pan American Petroleum Corporation and United Fuel Gas Company as part of a rate schedule amendment and certificate application.

(B) For the reasons set forth hereinabove, the petition for waiver and declaratory order filed by Pan American Petroleum Corporation on October 8, 1964, is hereby denied, except insofar as it is granted hereinabove.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

UNITED FUEL GAS COMPANY, DOCKET NO. G–20270; ATLANTIC SEABOARD CORPORATION, DOCKET NO. G–20272

ORDER ACCEPTING REVISED TARIFF SHEETS FOR FILING, ACCEPTING REVISED TARIFF SHEETS AND REPORT OF REFUNDS AND RATE REDUCTIONS CONDITIONALLY, MODIFYING ORDERS APPROVING RATE SETTLEMENTS AND DIRECTING WITHHOLDING CERTAIN REFUNDS IN ESCROW

(Issued December 24, 1964)*

On November 20, 1964, United Fuel Gas Company (United) and Atlantic Seaboard Corporation (Seaboard) filed revised tariff sheets[1] to effectuate reductions in their rates, proposed to be made effective as of October 1, 1964, and also filed reports of their computations of rate reductions and refunds of excess charges and of gas supplier refunds, all pursuant to paragraphs (B) and (C) of the Commission's Opinion No. 430, issued June 2, 1964, 31 FPC 1342 as modified by Opinion No. 430–A, issued October 14, 1964, 32 FPC 1106. The proposed reduced rates are set forth in Appendix A hereto together with the increased rates proposed by Respondents which have been in effect subject to refund since April 5, 1960.

United's report indicates that its total refunds to jurisdictional customers covering the period April 5, 1960, through September 30, 1964, will amount to $59,951,266. This amount is the aggregate of three sums of principal due on September 30, 1964, and interest thereon to November 30, 1964: (1) $40,745,548 arising from successive computations of rate reductions (18 in number) which give effect to the stipulated cost of service adjustments approved in these proceedings and a succession of gas supplier rate reductions, (2) $18,240,759 resulting from flow-through of gas supplier refunds, and (3) $964,959 representing interest earned on investment of gas supplier refunds. The amounts of principal and interest included in "(1)", above, have been reduced by United's taking appropriate credits for interim refunds made on September 18, 1962.

Seaboard's report indicates that the total refunds and interest due its jurisdictional customers covering the period April 5, 1960 through September 30, 1964 amount to $28,048,411. This amount is the aggregate of three sums of principal to on September 30, 1964, and interest thereon due November 30, 1964: (1) $20,678,777 arising from successive computations of rate reductions (23 in number) which give effect to the stipulated cost of service adjustments approved in these proceedings, (2) $7,024,711 resulting from gas supplier refunds, and (3) $344,923 representing the straight flow-through of interest received from United earned on investment of gas supplier refunds. The amounts of principal and interest included in "(1)", above, have been reduced by Seaboard's taking appropriate credits for interim refunds made on September 18, 1962.

United's increased rates which have been effective subject to refund since April 5, 1960, included a proposed annual increase of $14,614,488 based upon sales for the test year ended June 30, 1959. By order issued March 20, 1962,

* Rehearing denied January 28, 1965, 33 FPC 123.

[1] *United*—Fifth Revised Sheet No. 7, Third Revised Sheet No. 8, Third Revised Sheet No. 9, Sixth Revised Sheet No. 22, Fifth Revised Sheet No. 27 and Fifth Revised Sheet No. 33, all to United's FPC Gas Tariff, Eighth Revised Vol. No. 1.

Seaboard—Fifth Revised Sheets Nos. 7, 12, 16–A, 16–C, 17–A & 17–C. Fourth Revised Sheets Nos. 8, 9, 13, 14, 16–D, 17–D, 26 & 28. Third Revised Sheets Nos. 10, 15, 16–F & 17–F. Sixth Revised Sheets Nos. 22 & 24, all to Seaboard's FPC Gas Tariff, Seventh Revised Volume No. 1.

27 FPC 538, in Docket No. G-20270, the Commission approved a settlement agreement and provided for limited hearing of the issues finally determined in Opinion Nos. 430 and 430–A. The settlement agreement provided for annual reductions in United's cost of service in the amount of $8,949,300 for the period April 5, 1960 through April 30, 1961, and in the amount of $8,325,000 for the succeeding year ending April 30, 1962. These reductions were based upon sales for the twelve months ended March 31, 1960, adjusted to reflect increased purchased gas costs for the second of the two periods. However, due to the pending rate design issues, no rate reductions have yet been made in United's rates, although by order of September 14, 1962, United was permitted to make interim refunds in the amount of $16,636,214 plus interest, covering the rate period April 5, 1960, through May 31, 1962.

Seaboard's increased rates which have been effective subject to refund since April 5, 1960, included a proposed annual increase of $4,383,000 based upon sales for the test year ended June 30, 1959. By order issued December 29, 1961, 26 FPC 945, as amended in order issued February 19, 1962, in Docket No. G–20272, 27 FPC 369, the Commission approved a settlement agreement and provided for limited hearing of the issues finally determined in Opinion Nos. 430 and 430–A. The settlement agreement provided for annual reductions in Seaboard's cost of service in the amount of $926,000 for the period April 5, 1960 through April 30, 1961, and in the amount of $662,000 for the succeeding year ending April 30, 1962. These reductions were based upon sales for the twelve months ended March 31, 1960, adjusted to reflect increased purchased gas costs for the second of the two periods. However, due to the pending rate design issues, no rate reductions have yet been made in Seaboard's rates, although by order of September 14, 1962, Seaboard was permitted to make interim refunds in the amount of $7,749,331 plus interest, covering the period April 15, 1960, through May 31, 1962.

In their letters transmitting the tariff sheets and reports United and Seaboard make several ancillary proposals: (1) Since the reduced rates filed herein will, if accepted, become effective as of October 1, 1964, they be permitted to recompute their customers October bills and credit the November bills with the indicated reductions, (2) That the respective gas supplier refund flow-through obligations of United and Seaboard be modified by the Commission to provide that they are not obligated to pass on such refunds until the amounts have accumulated to $500,000 and $150,000, respectively, in lieu of the lesser amounts now contained in their settlement agreements heretofore approved by the Commission, (3) That their respective obligations to reflect gas supplier rate reductions also be modified, so that they shall not be required to pass on such reductions until the accumulated annual effect is equal to or greater than one-tenth of one cent per Mcf, (4) That both United and Seaboard be exonerated from paying more interest on gas supplier refunds than that received from such suppliers and passed on with the refunds to their customers, (5) That the responsibility for interest accruals on refunds generated by cost of service and rate reductions be discontinued as of November 30, 1964, the final date to which interest has been computed in the filed refund reports, citing the loss of time and expense of making additional computations.

The Respondents' letter of transmittal state that they are incurring substantial interest costs and they have requested each customer served with a copy of the reports and rate filings to advise the Commission by November 27, 1964, that such customers have no objection to said reports and refund and rate proposals and that they do not intend to seek court review of the Commission's Opinion Nos. 430 and 430–A.

Responses have been received from all customer companies with the exception of Zebulon Gas Association, Inc., E. L. Lusher and Luther Lusher.[2] No customer or intervener has raised objections regarding the computation of refunds or rate reductions, and the responses contain no objection to United's or Seaboard's ancillary proposals. In filed responses, Washington Gas Light Company (Washington Gas) and Lynchburg Gas Company (Lynchburg Gas) expressed neither agreement nor disagreement with the rate reductions and refund computations. Washington questioned the propriety of Seaboard's filing of revised tariff sheets to reflect a reduction in its CDS–PR Rate Schedules,[3] saying that it considered those schedules "terminated" by the decision of the court in the *Lynchburg* case.[4] Lynchburg filed a protest to the same effect, requesting that the Commission reject such filings. It should be sufficient to answer Washington's position and Lynchburg's request by pointing out that the court remanded Opinion No. 368, 28 FPC 860 and the PR rate schedule issue to the Commission for further proceedings, and the proper disposition of those schedules is a pending matter before the Commission in Docket No. G–16401, *et al.* Without prejudgment of the issues in the proceedings and until the Commission takes further action, it is appropriate for Seaboard to file a reduction in the rate levels contained in the PR rate schedules corresponding to that in other rate schedules, subject, of course, to the Commission's further order in Docket No. G–16401, *et al.* We will so provide.

In paragraph (E) of Opinion No. 430 we provided that all jurisdictional natural gas companies which receive refunds as a consequence of our orders herein, either directly or indirectly from Respondents, shall pass on all such refunds to their jurisdictional customers. Further, we provided that if any such customer natural gas company objects to such requirement, it shall be afforded a hearing before being required to pass on such refunds if it files a protest with the Commission. Shenandoah Gas Company on November 24, 1964, filed a letter protesting the applicability to it of the requirements of paragraph (E) of the opinion. In support of its protest, it stated that it has not passed on the increased rates which have been the subject of these proceedings, and, in addition, it has not earned a reasonable rate of return during the period in question from its sales of gas subject to this Commission's jurisdiction, to its one customer in that category, Martinsburg Gas and Heating Company (Martinsburg Gas). The latter company, on December 18, 1964, filed an answer to Shenandoah's protest claiming the right to have these refunds be passed on it.

The sales by Seaboard to Shenandoah are made under a single service agreement in which both Washington Gas and Shenandoah, its affiliate, buy gas under a single contract demand. Under these circumstances Seaboard renders composite billing to Washington and Shenandoah. Therefore, it would not be appropriate to require Seaboard to withhold Shenandoah's portion of the refunds until we have given consideration to Shenandoah's protest against the requirements of paragraph (E) of Opinion No. 430. However, by letter filed December 21, 1964, Washington Gas offers to hold in escrow and report to the Commission the portion of the refunds applicable to Shenandoah's purchases from Seaboard; and states it has no objection to Respondents' refund and rate reduction proposals provided refunds are made before January 1, 1965.

Respondents' reports of refunds and rate reductions have been found to be in substantial compliance with the requirements and provisions of Opinion Nos. 430

[2] Public Service Commission of West Virginia filed a letter stating that it has no objection to the refund and rate proposals and does not intend to contest Opinion Nos. 430 and 430–A.

[3] Seaboard's FPC Gas Tariff Seventh Revised Volume No. 1: Third Revised Sheets Nos. 16F and 17F, Fourth Revised Sheets Nos. 16D and 17D, and Fifth Revised Sheets Nos. 16A, 16C, 17A and 17C.

[4] *Lynchburg Gas Company* v. *F.P.C.*, 336 F. 2d 942, (decided June 26, 1964, in CADC No. 17738).

and 430–A, with the exception discussed below, and the revised tariff sheets and rate reductions contained therein have been found to be appropriate and in compliance with our opinion and order and should be accepted for filing, with provisional acceptance of the CDS-PR rate schedules as indicated above.

In its report of refunds and rate reduction computations, United lists Bluefield Gas Company (Bluefield Gas) as its customer, but [5] shows that, according to its view, inasmuch as Bluefield Gas was not billed for the increased costs herein, no refunds should be made or passed on to Bluefield Gas. United explains that on October 1, 1963, it acquired Amere Gas Company, (Amere) an affiliate, which had formerly purchased gas from Seaboard and sold gas to Bluefield Gas, and that United had assumed Amere's FPC Gas rate applicable to the latter sales. Except for the merger, Amere would have been required to pass on applicable refunds to Bluefield as required by paragraph (E) of Opinion No. 430. In view of the merger, it would appear that United should be required to report the refunds which would be applicable to Amere's and its own sales to Bluefield Gas and, in the absence of justification for withholding such refunds, should be required to make refunds to Bluefield in accordance with our refund flow-through policy directed in said paragraph (E).

Respondents' requests that they be exonerated from interest accruals on rate reduction refunds after November 30, 1964, should be denied. No substantial justification for changes in Respondents' obligations in this respect has been shown. Respondents' requests that they be permitted to credit billings to reflect the rate reduction effective as of October 1, 1964, is reasonable and should be granted. However, since billings for the October and November deliveries have presumably both been rendered, Respondents should also credit interest computed in the same manner as utilized in their refund reports and file supplemental reports with the Commission of the amounts of principal and interest so paid, within 30 days after such bills have been rendered. Additionally, Respondents' requests to be relieved of any obligation to pay additional interest upon gas supplier refunds appears to have overlooked the fact that their respective settlement agreements, as approved by prior Commission orders, already provide for such exoneration from additional interest.

Respondents' proposals to modify their settlement agreements, as now approved by the Commission, to provide that gas supplier refund and rate reduction flow-throughs be activated by larger accumulations are reasonable and similar to provisions common to such ancillary provisions in many other natural gas company settlements. Moreover, most of Respondents' customers who have responded indicated acceptance of the proposed modifications and none has objected to them.

The Commission orders:

(A) The plans of refunds and rate reductions filed by United and Seaboard on November 20, 1964, are hereby accepted as being in substantial compliance with the Commission's Opinion No. 430 as modified by Opinion No. 430–A, subject to the conditions and provisions of this order.

(B) The revised tariff sheets, as described above, filed by United and Seaboard on November 20, 1964, pursuant to Opinion No. 430 and Opinion No. 430–A, are hereby accepted for filing; *provided* that all such tariff sheets which contain provisions relating to the Partial Requirements, or PR, rate schedules, are accepted conditionally, subject to further order of the Commission in the proceedings in Docket No. G–16401, *et al.*

(C) Respondents are hereby permitted to credit billings to reflect the rate reduction effective as of October 1, 1964, and thereafter until the reduced rates are utilized for billing purposes; *provided* that Respondents shall also credit

[5] Footnote "(a)" to schedule A–2

interest at 7 percent per annum computed in the same manner as utilized in their refund reports and shall within 30 days after bills have thus been credited file reports with the Commission and interested State commissions of the amounts of refund principal and interest so credited.

(D) Respondents' requests that they be exonerated from interest accruals after November 30, 1964, on refunds generated from rate reductions, are hereby denied.

(E) United's and Seaboard's respective gas supplier refund flow-through obligations are hereby modified to provide that the Respondents are not obligated to pass on such refunds until the amounts have accumulated to $500,000 and $150,000, respectively, in lieu of the lesser amounts now contained in their settlement agreements approved by prior orders issued herein; and United's and Seaboard's obligations to reflect gas supplier rate reductions are hereby modified to provide that they shall not be required to pass on such reductions until the accumulated annual effect is equal to or greater than one-tenth of one cent per Mcf.

(F) Seaboard is hereby directed to refund all amounts due Washington Gas and Shenandoah to Washington Gas and the latter is hereby directed to hold in escrow, subject to our further order, the portion of such refunds which is due Shenandoah; and Washington Gas is further directed to file a report with the Commission (and serve copies upon Shenandoah, Martinsburg Gas and interested State commissions) within 30 days of the receipt of such refunds showing the computations and amounts due Shenandoah, subject to Commission approval.

(G) United is hereby directed to report to the Commission within 45 days of the date of this order the portion of the refunds being made by both Seaboard and United which are applicable to the sales by Amere and United to Bluefield Gas Company, and is further directed to make refunds to Bluefield Gas of the appropriate portion of such refunds in accordance with paragraph (E) of Opinion No. 430, or if it objects, to file a protest with the Commission within 15 days of the date of this order and to serve copies thereof upon Bluefield Gas and interested State commissions.

PAN AMERICAN PETROLEUM CORPORATION, DOCKET NO. RI64-738

ORDER CONDITIONALLY ACCEPTING OFFER OF SETTLEMENT, REQUIRING FILING OF CONTRACTUAL AMENDMENT, ACCEPTING RATE FILING AND TERMINATING PROCEEDING

(Issued December 28, 1964)

On November 23, 1964, Pan American Petroleum Corporation (Pan American) submitted an offer of settlement in this proceeding pursuant to Section 1.18(e) of the Commission's Rules of Practice and Procedure. The offer involves a proposed favored-nation increase in rate from 13.0¢ to 14.0256¢ per Mcf at 15.025 psia for Pan American's jurisdictional sale of natural gas under its FPC Gas Rate Schedule No. 4 to Montana-Dakota Utilities Co. from the Manderson Unit Area, Big Horn County, Wyoming.

In its offer of settlement, Pan American proposed to eliminate from its contract comprising the subject rate schedule all price escalations and indefinite price provisions except those clauses which provide for reimbursement of future tax increases, in return for the acceptance of a life-of-contract[1] settlement rate of 14.0256¢ per Mcf and termination of the proceeding in Docket No. RI64-738. Concurrently therewith, Pan American submitted a notice of change, hereby designated Supplement No. 6 to Pan American's FPC Gas Rate Schedule No. 4, to effectuate the settlement offer.

The current rate of 13.0¢ per Mcf, now in effect subject to refund in Docket No. RI64-738, was suspended for one day because it is a "fractured" rate, being lower than the contractually authorized rate, unaccompanied by a waiver of the right for a further rate increase above the area ceiling. Although the proposed settlement rate is also a "fractured" rate, the waiver of contractual rights as proposed in the settlement offer provides a settlement consistent with the Seventh and Ninth Amendments to the Statement of General Policy No. 61-1. As no protests or objections have been filed to the subject offer, we accepted the offer of settlement subject to the provisions of this order by telegram dated December 23, 1964, in order to provide an effective date of December 24, 1964, for said Supplement No. 6. No refund of monies is due.

We desire to make it clear that our conditional acceptance of Pan American's offer of settlement, the condition being the requirement that it file a contractual amendment effecting its settlement proposals, is without prejudice to any findings or order of the Commission in any future proceedings, including area rate or other similar proceedings, involving Pan American's rate and rate schedule.

The Commission finds:

The proposed settlement of the above-designated proceeding, on the basis described herein, as more fully set forth in the offer of settlement filed with the Commission by Pan American on November 23, 1964, is in the public interest and appropriate to carry out the provisions of the Natural Gas Act and should be approved and made effective as hereinafter ordered.

---

[1] The term of the contract is for twenty years from the date of initial delivery, such date being February 13, 1953.

The Commission orders:

(A) The offer of settlement filed with the Commission by Pan American on November 23, 1964, is hereby approved in accordance with the provisions of this order.

(B) Pan American shall file, within forty-five days from the date of issuance of this order, an executed contractual amendment eliminating, from its contract dated December 15, 1953, comprising its Rate Schedule No. 4, all price escalations and indefinite price provisions, except for provisions for future tax reimbursements as provided in the offer of settlement.

(C) Upon notification by the Secretary of the Commission that Pan American has complied with the provisions of this order, Supplement No. 6 to Pan American Petroleum Corporation's FPC Gas Rate Schedule No. 4 is accepted for filing to become effective as of December 24, 1964, and the proceeding in Docket No. RI64–738 is terminated.

(D) The acceptance by the Commission of Pan America's offer of settlement is without prejudice to any findings or determinations that may be made in any proceeding now pending, or hereafter instituted by or against Pan American, including area rate or other similar proceedings.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

AREA RATE PROCEEDING (HUGOTON-ANADARKO AREA), DOCKET NO. AR64–1, ET AL.; AREA RATE PROCEEDING (TEXAS GULF COAST AREA), DOCKET NO. AR64–2, ET AL.

ORDER DENYING MOTIONS FOR RECONSIDERATION OF ORDER DECLINING TO ISSUE SMALL PRODUCER REPORT FORM

(Issued December 29, 1964)

By order of November 4, 1964, 32 FPC 1266, the Commission declined to issue a draft report form (Form 20) designed for response by producers who are subject to these new area rate proceedings and whose 1962 company-wide jurisdictional sales were under 10,000,000 Mcf; we did, however, make copies of Form 20 available as a trial aid to small producers or others who wanted to gather data from small producers and, if the data appeared material and representative for substantial numbers of producers or substantial volumes of gas, to present the data in these proceedings.

On December 2, 1964, Oklahoma Independent Petroleum Association (OIPA) and 17 respondents[1] filed a motion for reconsideration urging that we require Form 20 to be answered by medium size producers (those with 1962 IDC of $250,000 or more or with 1962 jurisdictional sales of 500,000 to 10,000,000 Mcf); that would cover the 17 moving respondents plus about eight to 33 more producers in Oklahoma. OIPA says they have the data and want to answer the

F. Smith, Statex Petroleum, Woods Petroleum Corporation.

report, but will not gather the data privately because the results may be found unrepresentative.

On December 7, 1964, Marathon Oil Company, *et al.*[2] also filed a motion for reconsideration urging that Form 20 be mandatory for "all producers making jurisdictional sales of natural gas, regardless of the size of such producers" or, alternatively, that the Commission terminate further collection and compilation of data obtained through the all-areas questionnaire issued to major producers on October 30, 1964, and prohibit the use of the data. These major producers accuse the Commission of a prejudgment in favor of exempting small producers because we declined to require Form 20 to be answered. We have not yet judged the exemption issue for these or any other proceedings.

We adhere to the view set out in our order of November 4, 1964.

The Commission finds:

No facts or principles of law have been presented by OIPA, *et al.* or Marathon Oil Company, *et al.* in their motions for reconsideration which either were not fully considered by the Commission prior to its order issued November 4, 1964, or, having now been considered, warrant further hearing, modification, reconsideration or revocation.

The Commission orders:

The motions for reconsideration filed herein by OIPA, *et al.* and Marathon Oil Company, *et al.* are hereby denied.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

ARKANSAS POWER & LIGHT COMPANY, DOCKET NO. E-7190

ORDER AUTHORIZING ACQUISITION OF FACILITIES

(Issued December 29, 1964)

Arkansas Power & Light Company (Applicant), incorporated under the laws of the State of Arkansas and doing business in the States of Arkansas, Tennessee, Missouri and Louisiana, with its principal place of business office at Little Rock, Arkansas, filed an application on November 10, 1964, for an order pursuant to Section 203 of the Federal Power Act, requesting authority to acquire certain electric facilities from the City of North Little Rock, Arkansas (City).

Applicant is a public utility engaged in the generation, transmission, purchase, distribution and sale of electric energy. Substantially all of its operations are in the State of Arkansas, where it renders electric service in 61 of the 75 counties in the State. In addition, it serves 5 customers in Missouri, 75 in Tennessee and 266 in Louisiana. The Applicant, along with Louisiana Power & Light Company, Mississippi Power & Light Company and New Orleans Public Service Inc., make up the operating companies of Middle South Utilities, Inc., a holding company.

---

[2] Sinclair Oil & Gas Company, Continental Oil Company, Texaco Inc., Gulf Oil Corporation, Socony Mobil Oil Company, Inc., Shell Oil Company, Warren Petroleum Corporation, Cities Service Oil Company, Humble Oil & Refining Company, Phillips Petroleum Company.

The City is a municipal corporation organized and existing under the laws of the State of Arkansas. The City owns and operates an electric distribution system within its city limits and a limited area outside its limits allocated to it by the Arkansas Public Service Commission. All of its electric distribution facilities to be sold are located in the Maumelle Industrial Area which contains approximately 5,213 acres. The Maumelle Industrial Area is about five miles from the corporate limits of the City and is located entirely within the service area allocated to the Applicant by the Arkansas Public Service Commission.

The property which the Applicant proposes to acquire consists of an overhead electric distribution system constructed by the United States Government in connection with an Ordnance Plant which was deactivated in 1945. The Plant was maintained on a standby basis by a contractor for the United States Army until June 8, 1961, at which time the entire Ordnance Plant and all lands, including the electric distribution system were sold as surplus property to the Perry Equipment Corporation. The lands and some improvements, as well as the electric distribution facilities, were acquired on December 1, 1961, by the City for development into an industrial park.

By an agreement dated June 11, 1964, as amended by an agreement dated October 12, 1964, the City has agreed to sell and Applicant has agreed to acquire all the electric distribution facilities owned by the City in the Maumelle Industrial Area for a cash consideration of $79,219. The Applicant has determined that the original cost of the property to be acquired is $149,912.95. The deduction of the consideration of $79,219 from the original cost of $149,912.95 leaves $70,693.95, "which amount is considered by the Company to be reasonably representative and adequate for accrued depreciation existing in the facilities at the date of acquisition." The $70,693.95 is equivalent to 47.2% of the total original cost of $49,912.95.

The Applicant represents that it is in the public interest for the Company to acquire the electric distribution properties of the City in the Maumelle Industrial Area because the Applicant has transmission and distribution facilities in the immediate vicinity which are adequate to serve the load growth of the area, and it is anticipated that the electric requirements of the Area will within a reasonable period increase and the Applicant is in a better position to serve these demands and requirements.

The Applicant further represents that after the acquisition of the subject electric distribution facilities, it will continue the interconnection of the facilities with its interconnected system. The consummation of the proposed transaction will not affect any contract for the purchase, sale, or interchange of electric energy.

Written notice of the application has been given to the Public Service Commission of the State of Arkansas and to the Governor of that State. Notice was published in the Federal Register on November 24, 1964 (29 F.R. 15791), stating that any person desiring to be heard or to make any protest with reference to the application, should on or before December 7, 1964, file petitions or protests with the Federal Power Commission, Washington, D.C., 20426. No petition or protest or request to be heard in opposition to the granting of the application has been received.

The Commission finds:

(1) Applicant, a corporation, is a public utility within the meaning of Section 203 of the Federal Power Act, subject to the jurisdiction of the Commission as

heretofore described and set forth in the Commission's order issued June 16, 1961, *Arkansas Power & Light Company*, Docket No. E–6989 (25 FPC 1151).

(2) By the proposed acquisition of facilities, Applicant will merge or consolidate its facilities subject to the jurisdiction of the Commission with those of the City, another person, within the meaning and subject to the requirements of Section 203 of the Federal Power Act.

(3) The proposed acquisition of facilities by Applicant, as described above, on the terms and conditions set forth in the application, and subject to the provisions of this order will be consistent with the public interest as expressed in Section 203 of the Federal Power Act.

(4) The period of public notice given in this matter is reasonable.

(5) Applicant, a subsidiary company of Middle South Utilities, Inc., a registered holding company, is not, with respect to the proposed transaction, as described above, subject to any requirement of the Public Utility Holding Company Act of 1935 or a rule, regulation or order thereunder, and is, therefore, not exempt from the requirements of Section 203 of the Federal Power Act by reason of Section 318 thereof.

The Commission orders:

(A) The proposed acquisition by Applicant of the aforementioned distribution facilities, all as described above, is authorized and approved upon the terms and conditions and for the purposes set forth in the application, subject to the provisions of this order.

(B) Applicant shall record the proposed transaction herein authorized and the facilities and properties referred to above as provided in the Commission's Uniform System of Accounts Prescribed for Public Utilities and Licensees. This authorization shall expire unless the transaction herein authorized and approved is consummated within 90 days from the date of issuance of this order.

(C) This authorization is without prejudice to the authority of this Commission or any other regulatory body with respect to rates, service, accounts, valuations, estimates or determinations of cost, or any other matter whatsoever now pending or which may come before this Commission or any other regulatory body, and nothing herein shall be construed as an acquiescence by this Commission in any estimate or determination of cost or any valuation of property claimed or asserted by this Commission.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

ATLANTIC SEABOARD CORPORATION, DOCKET NO. CP64–117, ET AL.

FINDINGS AND ORDER AMENDING ORDER ISSUED JUNE 24, 1964

(Issued December 29, 1964)

By Commission order of June 24, 1964, 31 FPC 1581, in Docket No. CP64–117 Atlantic Seaboard Corporation (Atlantic) was issued a certificate of public convenience and necessity authorizing the construction, acquisition and operation of certain facilities in order to activate and operate a proposed storage field in Randolph and Pocahontas Counties, West Virginia. Said order also terminated

the certificates of certain companies from whom Atlantic proposed to acquire the necessary acreage for the storage field in the beforementioned West Virginia counties.

By letter of August 27, 1964, Tidewater Oil Company (Tidewater) advised that its sales authorized in Docket No. G–14148 have terminated since the gas sold was produced from part of the acreage to be acquired by Atlantic for its proposed storage project authorized in Docket No. CP64–117. The certificate issued in Docket No. G–14148 was not one of those terminated by the order of June 24, 1964; accordingly, said order should be amended to terminate, along with those certificates thereinbefore terminated, Tidewater's certificate in Docket No. G–14148.

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued June 24, 1964, in Docket No. CP64–117 be amended as hereinafter ordered.

The Commission orders:

(A) The Commission's order issued June 24, 1964, in Docket No. CP64–117 be and the same is hereby amended to terminate the certificate heretofore issued in Docket No. G–14148, all as hereinbefore described.

(B) In all other respects said order shall remain in full force and effect.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

CONTINENTAL OIL COMPANY (OPERATOR), DOCKET NO. RI64–36

ORDER ACCEPTING DECREASED RATE FILINGS AND TERMINATING PROCEEDING

(Issued December 29, 1964)

Continental Oil Company (Operator) (Continental), on November 23, 1964, tendered for filing two proposed rate decreases from 16.3570¢ per Mcf to 16.0¢ per Mcf reflecting discontinuance of collection of 0.357¢ per Mcf tax reimbursement for sales of residue gas to Transwestern Pipeline Company (Transwestern) from Continental's El Mar and Maljmar Gasoline Plants in Lea County, New Mexico. These sales are made under the terms of the contracts dated March 25, 1960, which comprise Continental's Rate Schedules Nos. 177 and 178, respectively. Continental's gas supply for these sales is raw gas that it purchases from a number of suppliers under percentage-type contracts.

The tax changes involved herein were filed by Continental on July 1, 1963, to reflect partial reimbursement for the increase in the New Mexico Emergency School Tax from 2.0 to 2.55%, effective April 1, 1963. The increases, being only tax changes, were subsequently suspended in Docket No. RI64–36 for only one day. Continental now states that it has been collecting the above suspended tax in error, and in this connection it has filed a letter agreement dated November 3, 1964, between Continental and Transwestern, which clarifies the tax liability under the contracts involved. In essence, the error apparently arose from Continental's mistaken belief that it was responsible to reimburse its suppliers for the above tax under the percentage-type contracts. The amount of such reim-

bursement was in turn the amount that Transwestern reimbursed Continental. Continental in reviewing these contracts, discovered that no such tax liability existed under its suppliers' contracts, except one, which Continental proposes to ignore in view of the small amount involved. Continental has reimbursed Transwestern a total of $17,654.92, as full settlement for the tax reimbursement collected in error.

In view of the fact that the refund is the result of Continental receiving reimbursement for tax payments to which it was not entitled and the refund and related rate change are to correct an error, Transwestern should be permitted to retain the full amount of the refund. Continental's two proposed rate decreases should be accepted for filing and permitted to become effective as of December 24, 1964, the date following the date of expiration of the required statutory notice, and the rate suspension proceeding in Docket No. RI64–36 should be terminated.

The Commission finds:

It is necessary and proper in carrying out the provisions of the Natural Gas Act and the Regulations thereunder to accept Continental's two proposed rate decreases to become effective as of December 24, 1964, the first day after expiration of the statutory notice, and to terminate the rate suspension proceedings in Docket No. RI64–36.

The Commission orders:

Continental's two rate decreases designated in the Appendix hereof are accepted for filing to become effective as of December 24, 1964, and the rate suspension proceedings in Docket No. RI64–36 is hereby terminated.

262-497—67——100

DUKE POWER COMPANY, DOCKET NO. E-7185

ORDER AUTHORIZING ACQUISITION OF FACILITIES

(Issued December 29, 1964)

Duke Power Company (Duke), a corporation organized under the laws of the State of North Carolina, filed an application on October 1, 1964, for an order pursuant to Section 203 of the Federal Power Act, requesting authorization to acquire the electric distribution facilities of Pisgah Mt., Electric Company (Pisgah).

Duke is engaged principally in the business of generating, purchasing, transmitting, distributing and selling electric energy in all or part of 37 counties in North Carolina and 15 counties in South Carolina. It also operates transportation systems in 4 towns and water supply systems in 3 towns. It is interconnected with and interchanges electric energy with a number of neighboring electric systems and supplies the entire requirements of a large number of municipal and cooperative electric systems.

Pisgah is a small electric utility engaged in the business of distributing electric energy to retail consumers in parts of Lincoln and Gaston Counties in North Carolina. Its system extends southward from near Lincolnton, North Carolina along U. S. Highway 321 and intersecting roads to just south of the Lincoln-Gaston County line. It has no generating capacity and for a number of years has purchased energy from Duke to meet its requirements. It now serves about 650 customers which it classifies as rural-residential and commercial.

Duke and Pisgah entered into an agreement on November 12, 1963, for Duke to acquire the electric facilities owned and operated by Pisgah. The facilities consist primarily of a distribution system serving about 650 consumers. Approximately 30 miles of three-phase 4,160 volt lines and numerous single-phase 2,400 tap lines are included in the system. These lines extend from Duke's Lincolnton-Maine Substation southward, generally along U. S. Highway 321 and side roads to Long Shoals.

Duke, in payment for Pisgah's facilities will issue 4,000 shares of its Common Stock to Pisgah. Pisgah, in turn, will distribute Duke's 4,000 common shares to its two stockholders, Mr. James C. Kiser, its President, and Mr. F. D. Kiser, its Secretary. Duke's Common Stock is traded on the New York Stock Exchange. For the purpose of the acquisition, Duke has acquired the 4,000 shares of its Common Stock on the market at $63 per share. Duke's total cost of its stock was $252,298.

According to the application, Pisgah's facilities to be acquired by Duke have an original cost of $115,064, an accumulated provision for depreciation of $49,965, and an original cost depreciated of $65,099. Duke's Common Stock consideration, therefore will result in the creation of an electric plant acquisition adjustment of $187,199 (consideration of $252,298 less original cost depreciated of $65,099). Duke has stated that the acquisition adjustment of $187,100 will be eliminated by a debit to Earned Surplus.

According to the application, Pisgah, which for the past several years has purchased all of its electric power requirements from Duke, is now experiencing low voltage on the ends of some of its lines, and that Pisgah's system needs rebuilding to the higher voltage used by Duke. Duke represents that Pisgah, with its

limited financial resources, would have difficulty raising the additional capital necessary to finance this rebuilding. Duke further represents that this transaction will not affect any contract for the purchase, sale or interchange of electricity except that Applicant's schedule of rates on file with the North Carolina Utilities Commission will be placed into effect with respect to Pisgah's electric power customers with the resulting decrease in cost of electric power to virtually all such customers.

Written notice of the application was given to the North Carolina Utilities Commission and to the Governor of that State. By order dated June 9, 1964, the North Carolina Public Utilities Commission approved this transaction. Notice was also published in the Federal Register on October 15, 1964 (29 F.R. 14205), stating that any person desiring to be heard or to make any protest with reference to said application, should on or before October 30, 1964, file with the Federal Power Commission, Washington, D.C., 20426, petitions or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). No petitions or protests or requests to be heard in opposition to the granting of the application have been received.

The Commission finds:

(1) Duke, a corporation, is a public utility within the meaning of Section 203 of the Federal Power Act subject to the jurisdiction of the Commission as heretofore described and set forth in the Commission's order issued December 29, 1955, *Duke Power Company*, Docket No. E–6652 (14 FPC 1163).

(2) By the proposed transaction, Duke will merge or consolidate its facilities subject to the jurisdiction of the Commission with those of Pisgah, another person, within the meaning and subject to the requirements of Section 203 of the Federal Power Act.

(3) The proposed acquisition of facilities by Duke, as described above, upon the terms and conditions set forth in the application and subject to the provisions of this order will be consistent with the public interest as expressed in Section 203 of the Federal Power Act.

(4) The period of public notice given in this matter is reasonable.

The Commission orders:

(A) The proposed acquisition by Duke of the aforementioned distribution facilities, all as described above, is authorized and approved upon the terms and conditions and for the purposes set forth in the application subject to the provisions of this order.

(B) Duke shall record the proposed transaction herein authorized and the facilities and properties referred to above as provided in the Commission's Uniform System of Accounts Prescribed for Public Utilities and Licensees.

(C) This authorization shall expire unless the transaction herein authorized and approved is consummated within 90 days from the date of issuance of this order.

(D) The foregoing authorization is without prejudice to the authority of this Commission or any other regulatory body with respect to rates, service, accounts, valuations, estimates or determinations of cost, or any matter whatsoever now pending or which may come before this Commission or any other regulatory body and nothing herein shall be construed as an acquiescence by this Commission in any estimate or determination of cost or any valuation of property claimed or asserted by the Commission.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

ROGER MILLIKEN, ET AL., DOCKET NO. RI65-195

ORDER ACCEPTING OFFER OF SETTLEMENT, REQUIRING FILING OF NOTICE OF CHANGE AND CONTRACT AMENDMENT, AND TERMINATING PROCEEDING

(Issued December 29, 1964)

On October 21, 1964, Roger Milliken, *et al.* (Milliken) submitted an offer of settlement in this proceeding pursuant to Section 1.18(e) of the Commission's Rules of Practice and Procedure. The offer involves a proposed increased rate for sales of natural gas made to United Gas Pipe Line Company (United) by Milliken. The offer relates to a sale made under Milliken's FPC Gas Rate Schedule No. 2 in Fox Field, Refugio County, Texas (Texas R.R. Com. District #2). The proposed increased rate of 15.1920¢ per Mcf was suspended by order of the Commission until April 19, 1965.

Under the terms of the offer, Milliken proposes to eliminate the future periodic escalations of 1¢ occuring on November 19, 1969 and 1974, from its rate schedule, and to establish a 15.0¢ per Mcf rate for the subject sale. Under its proposal Milliken retains the right to file rate increases to cover future tax increases. No protests or objections have been filed to the offer.

The proposed settlement is consistent with the provisions of the Second Amendment to the Commission's Statement of General Policy No. 61-1, issued December 20, 1960, 24 FPC 1107, as amended by Order No. 264, issued March 27, 1963, 29 FPC 589, and its acceptance would serve the public interest.

While Milliken has agreed unilaterally to waive the periodic escalations in its contract, we think it more appropriate as required herein that Milliken execute a contract amendment with its purchaser, United, to effectuate the proposed elimination.

However, we desire to make clear that acceptance of Milliken's offer of settlement shall not be construed as approval of any future increased rate filed in accordance with its reservation of the right to file increases to cover future tax increases as provided in its offer of settlement, and is without prejudice to any findings or order of the Commission in any future proceedings, including area rate or other similar proceedings, involving Milliken's rate and rate schedule.

The Commission finds:

The proposed settlement of the above-designated proceeding, on the basis described herein, as more fully set forth in the offer of settlement filed with the Commission by Milliken on October 21, 1964, is in the public interest and appropriate to carry out the provisions of the Natural Gas Act and should be approved and made effective as hereinafter ordered.

The Commission orders:

(A) The offer of settlement filed with the Commission by Milliken on October 21, 1964, is hereby approved in accordance with the provision of this order.

(B) Milliken shall file, within 30 days from the date of issuance of this order, a notice of change in rate providing for the 15.0¢ per Mcf rate for the instant sale and an executed contractual amendment to its FPC Gas Rate Schedule No. 2,

eliminating the periodic escalation provisions therefrom as specified in its offer of settlement. The notice of change and contractual amendment shall be submitted in accordance with Part 154 of the Commission's Regulations under the Natural Gas Act.

(C) Upon notification by the Secretary of the Commission that Milliken has complied with the terms and conditions of the order, the rate and charge of 15.0¢ per Mcf, specified in its offer of settlement, shall be effective as of the date of issuance of this order, and the above designated proceeding shall be deemed terminated.

(D) The acceptance by the Commission of Milliken's offer of settlement is without prejudice to any findings or determinations that may be made in any proceeding now pending, or hereafter instituted by or against Milliken including area rate or other similar proceedings.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

PANHANDLE EASTERN PIPE LINE COMPANY, DOCKET NO. CP64-18

ORDER AMENDING ORDER ISSUED JULY 24, 1964

(Issued December 29, 1964)

On September 29, 1964, Panhandle Eastern Pipe Line Company (Petitioner) filed in Docket No. CP64-18 a petition to further amend the Commission's order issued July 24, 1964, as amended by order issued in said docket on October 21, 1964, 32 FPC 349—by increasing the volume of summer contract demand for natural gas to The Gas Service Company (Kansas) during the months of June, July and August up to 2,100 Mcf from 1,900, 1,700 and 1,700 Mcf respectively.

Petitioner states that it has adequate system capacity and adequate gas reserves to provide for the increased contract demand volume.

Due notice of the filing of the petition to amend and opportunity for hearing thereon has been given by publication in the Federal Register on November 14, 1964 (29 F.R. 15303). No protest, petition to intervene or request for hearing has been filed in this proceeding.

The Commission finds:

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued July 24, 1964, as amended on October 21, 1964, in Docket No. CP64-18 be further amended as hereinafter ordered.

The Commission orders:

(A) The Commission's order of July 24, 1964, as amended, in Docket No. CP64-18 be and the same is hereby further amended by authorizing Petitioner to increase the volumes of natural gas during the summer months of June, July and August up to 2,100 Mcf from the lesser volumes now specified, all as heretofore described and as set forth in the petition.

(B) In all other respects said order, as amended, shall remain in full force and effect.

Before Commissioners: Joseph C. Swidler, Chairman; L. J. O'Connor, Jr., Charles R. Ross and David S. Black.

THE PURE OIL COMPANY, DOCKET NO. CI65-485

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY AND ACCEPTING FPC GAS RATE SCHEDULE FOR FILING

(Issued December 29, 1964)

On November 20, 1964, The Pure Oil Company (Applicant) filed in Docket No. CI65-485, an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce to El Paso Natural Gas Company at an initial price of 16.0¢ from the Red Hills Area, Lea County, New Mexico, all as more fully set forth in the application.

Concurrently with the subject application Applicant submitted a copy of the related contract which will hereinafter be accepted for filing as Applicant's FPC gas rate schedule.

After due notice, no petition or notice to intervene or protest to the granting of the application has been received.

At a hearing held on December 22, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits thereto, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission.

(2) The sale of natural gas hereinbefore described, as more fully described in the application herein, will be made in interstate commerce, subject to the jurisdiction of the Commission, and such sale by Applicant, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, is subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The sale of natural gas by Applicant, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, is required by the public convenience and necessity, and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(5) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that the related contract submitted by Applicant should be accepted for filing and designated as Applicant's FPC gas rate schedule.

The Commission orders:

(A) A certificate of public convenience and necessity be and the same is hereby issued, upon the terms and conditions of this order, authorizing the sale by Applicant of natural gas in interstate commerce for resale, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary for such sale, all as hereinbefore described and as more fully described in the application and exhibits in this proceeding.

(B) The certificate granted in paragraph (A) above is not transferable and

shall be effective only so long as Applicant continues the acts or operations hereby authorized in accordance with the provisions of the Natural Gas Act and the applicable rules, regulations and orders of the Commission.

(C) The grant of the certificate issued in paragraph (A) above shall not be construed as a waiver of the requirements of Section 4 of the Natural Gas Act or of Part 154 or Part 157 of the Commission's Regulations thereunder, and is without prejudice to any findings or orders which have been or may hereafter be made by the Commission in any proceeding now pending or hereafter instituted by or against Applicant. Further, our action in this proceeding shall not foreclose nor prejudice any future proceedings or objections relating to the operation of any price or related provisions in the gas purchase contract herein involved. Nor shall the grant of the certificate aforesaid for service to the particular customer involved imply approval of all of the terms of the contract, particularly as to the cessation of service upon termination of said contract, as provided by Section 7(b) of the Natural Gas Act. Nor shall the grant of the certificate aforesaid be construed to preclude the imposition of any sanctions pursuant to the provisions of the Natural Gas Act for the unauthorized commencement of any sale of natural gas subject to said certificate.

(D) The related contract dated November 18, 1964, submitted by Applicant is accepted for filing and designated as The Pure Oil Company FPC Gas Rate Schedule No. 86 to be effective on the date of initial delivery.

Before Commissioners: Joseph C. Swidler, Chairman; Charles R. Ross and David S. Black.

MIDWESTERN GAS TRANSMISSION COMPANY, DOCKET NOS. RP61-19 AND RP62-7; NATURAL GAS PIPELINE COMPANY OF AMERICA, DOCKET NO. RP63-6

ORDER APPROVING PROPOSED SETTLEMENT

(Issued December 30, 1964)

Midwestern Gas Transmission Company (Midwestern), on November 12, 1964, filed an application for rehearing and reconsideration of Opinion No. 444, and accompanying order issued October 13, 1964, 32 FPC 993, in these proceedings. As part of its application, Midwestern also submitted a proposal for final disposition of cost of service issues. Midwestern states therein that in the interest of bringing the cost of service aspects of these proceedings to any early conclusion and of avoiding further litigation of these matters, including judicial review with respect to Opinion No. 444, it is proposing a basis for settling these remaining cost of service issues. On December 11, 1964, *supra*, p. 1406, the Commission issued an order granting rehearing for purposes of more adequate consideration of Midwestern's tender.

Following discussions between members of the Commission Staff and representatives of Midwestern, the settlement proposal was modified in certain aspects, and telegrams were sent to all parties in these proceedings setting out the terms of the modified proposal. The only objection to that modified proposal was filed by the City of Chicago. Thereafter, a conference was held among representatives of the City of Chicago, Midwestern, and the Commission Staff, at which the following terms of settlement of these proceedings were agreed to:

(1) Midwestern will put into effect as of October 13, 1964, the rates and charges set forth on pages 1 and 2 of Appendix B to its application for rehearing filed November 11, 1964, and will refund to its customers the difference between the amounts collected under the existing rates and those set forth on the aforementioned pages (appended hereto).

(2) Effective January 1, 1965, Midwestern's jurisdictional rates, referred to in paragraph (1) above, will be reduced to reflect the decrease in the Federal income tax rate from 50 percent to 48 percent. Midwestern will file appropriate tariff sheets, subject to approval of the Commission, not later than January 25, 1965.

(3) Midwestern will refund to its jurisdictional customers the amount of $3,569,600 of accumulated deferred taxes in the following manner: Midwestern shall segregate the portions of such amount applicable to its Northern and Southern systems separately; it shall then distribute such refund to each customer upon the basis of the ratio that the total revenues received from such customer bears to the total revenue received from that system, both such revenues to be cumulated from the date on which Midwestern first began the use of liberalized depreciation, through December 31, 1963.

(4) Midwestern shall flow through to its customers in the Southern System all rate reductions and refunds received from Tennessee Gas Transmission in FPC Docket Nos. G–11980, G–17166 and G–19983, and any refunds or rate reduction made by Tennessee to reflect the decrease in Federal income tax rate to 48 percent, until such time as Midwestern's rates are revised as a result of a proceeding under either Section 4 or 5 of the Natural Gas Act.

(5) Midwestern will not file under Section 4 of the Act to make any increase in rates effective prior to April 1, 1966, other than a rate change to reflect a change in the official Canadian dollar rate of exchange as provided in ordering paragraph (E) of Opinion No. 444.

(6) The question remanded to the examiner for hearing by ordering paragraph (D) of Opinion No. 444 shall proceed to hearing in accordance with the procedures to be prescribed either by the Commission or the Presiding Examiner. The adjustment, if any, to Midwestern's rates to reflect the Commission's final disposition of this issue, as referred to in said paragraph (D), shall be effective as of October 13, 1964. All parties reserve whatever rights they may have to seek review of any final Commission order on this issue.

(7) This settlement shall not constitute or be deemed to constitute an agreement on rate-making principles or methods underlying the determination of the dollar amounts herein contained, but is only a dollar settlement of Midwestern's pending rate proceedings covered by this settlement. This settlement shall in no way prejudice the rights of any party to these proceedings in any other court or Commission proceeding involving rate levels or refunds.

(8) Except as modified in the above seven paragraphs, Opinion No. 444 remains final and binding.

The aforegoing terms of settlement revise the modified proposal submitted to the parties by telegram, as mentioned above, in two aspects. First, the required flow through by Midwestern of refunds and rate reductions received from Tennessee is enlarged to include refunds and rate reductions, if any, reflecting the decrease in the Federal income tax rate. Second, the hearing referred to the examiner by paragraph (D) of Opinion No. 444 will not be dismissed as contemplated in the original settlement offer, but will proceed to hearing as contemplated by that Opinion. The practical effect of these revisions could result only in further benefit to Midwestern's customers and ultimate consumers as compared with the modified settlement to which the parties to the proceedings, other than the City of Chicago, did not object.

The Commission is of the view that the terms of the settlement as set out above are in the public interest and should be approved.

The Commission finds:

The settlement of the proceedings in Docket Nos. RP61–19 and RP62–7 on the basis of the terms of settlement set out above, is reasonable, proper and in the public interest in carrying out the provisions of the Natural Gas Act, and should be approved and made effective subject to the terms and conditions hereinafter ordered.

The Commission orders:

(A) Midwestern shall make the refunds required by paragraphs (1) and (3) above, on or before January 1, 1965, and within 15 days thereafter shall report to the Commission, in writing under oath, the amount of the refund made to each customer, together with a detailed statement showing the method of calculation of such refunds, shall submit a release from each of its customers with respect to such refunds, and shall serve a copy of such report upon each of its customers, and upon the interested State commissions.

(B) The refunds and rate reductions required by paragraph (4) above shall be made in accordance with the methods set out in ordering paragraph (B) of Opinion No. 444.

(C) On or before January 25, 1965, Midwestern shall file appropriate revised tariff sheets, subject to approval of the Commission, to reflect the rates and charges to be effective as of January 1, 1965, as provided in paragraph (2) above.

(D) Midwestern shall comply with each of the provisions of the settlement, set out above, and of this order.

(E) Upon compliance with the terms of the settlement and the terms and conditions of this order, the proceedings at Docket Nos. RP61–19 and RP62–7 are hereby terminated, except as provided in paragraph (6) above and except, further, as to the rate design issues in the above-captioned consolidated proceedings, as stated in Opinion No. 444.

(F) This order is without prejudice to any findings or orders which have been or may be made hereafter by the Commission, and is without prejudice to claims or contentions which may be made by the Commission, Midwestern, the Commission Staff, or any other party affected by this order, in any proceeding now pending or hereinafter instituted by or against Midwestern or any other companies, persons or parties affected by this order.

SOUTHWESTERN PUBLIC SERVICE COMPANY, DOCKET NO. E-7038

ORDER GRANTING LEAVE TO FILE BRIEF

(Issued December 30, 1964)

The Secretary of Agriculture on behalf of the Rural Electrification Administration and its Administrator, by petition for leave to intervene filed December 2, 1964, seeks to participate in the above entitled proceeding. The Secretary's petition is tendered for the purpose of affording opportunity for presentation of arguments in opposition to an intermediate decision of a hearing examiner of this Commission, issued September 1, 1964. The views expressed in opposition to the intermediate decision are set forth in a "Supplemental Statement of Position" of the Administrator submitted to the Commission's Secretary on October 29, 1964. This order accepts the Administrator's Supplemental Statement as a brief *amicus curiae*.

Prior to the submission of the Administrator's Supplemental Statement, representatives of the Secretary and the Administrator attended various sessions of the hearing in this proceeding. In the course of the oral hearings before the examiner, representatives of the Secretary and Administrator proffered an earlier "Statement of Position", which was acknowledged by the Examiner as a statement of argument and position.[1] That statement was submitted December 3, 1963. The hearing record in this proceeding was closed December 18, 1963.

[1] At the time this was submitted, the Presiding Examiner stated to the Administrator's representative: "You understand that in the absence of a formal intervention it would appear to me that any statement you would make would be considered in the nature of a brief, and would not of course be evidence." (Tr. pp. 7–8.)

Intervention status was not sought until December 2, 1964, approximately twelve months subsequent to the closing of the record in this proceeding and three months subsequent to rendition of the examiner's decision. Oral argument was held before the presiding examiner on May 5, 1964. The Secretary did not seek to participate in the oral argument.

The Commission considers the Administrator's Supplemental Statement as being in the nature of a brief *amicus curiae*. Its acceptance will serve the purposes of the Secretary and will not prejudice the rights of any party to this proceeding. The Commission's Rules of Practice and Procedure, Section 1.31(a) (18 C.F.R. 1.31(a)) authorize the filing of exceptions to intermediate decisions by *parties* to a proceeding or Staff Counsel.

Community Public Service Company, an intervenor in this proceeding, objects to the Secretary's petition insofar as it may suggest that the Secretary is now seeking status as a party to this proceeding. Our examination of the Secretary's petition for leave to intervene indicates that he accepts the record as perfected and seeks to direct the Commission's attention to alleged factual and legal errors of the presiding examiner. The alleged errors are set forth in the Supplemental Statement of Position. Therefore, the interests of the Secretary will be adequately protected by acceptance of the Administrator's "Supplemental Statement of Position" as a brief *amicus curiae*. Good cause has not been shown pursuant to Section 1.8(d) of the Commission's Rules of Practice and Procedure (18 C.F.R. 1.8(d)) for granting intervention to the Secretary out of time.

The Commission finds:

It is necessary and appropriate for purposes of the Federal Power Act and the Commission's Regulations thereunder (Section 1.29 Rules of Practice and Procedure) (18 C.F.R. 1.29), to accept for filing as a brief *amicus curiae* the Supplemental Statement of Position tendered by the Administrator, Rural Electrification Administration on October 29, 1964.

The Commission orders:

The Supplemental Statement of Position referred to above is hereby accepted for filing and its receipt shall be noted in the docket in the above-entitled proceeding through this order. Insofar as the Secretary's petition for leave to intervene seeks other relief, it is hereby denied.

Before Commissioners: Joseph C. Swidler, Chairman; Charles R. Ross and David S. Black.

TENNESSEE GAS TRANSMISSION COMPANY, DOCKET NO. CP65-65

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 30, 1964)

On September 4, 1964, Tennessee Gas Transmission Company (Applicant) filed in the above-styled proceeding an application, supplemented by a filing made on December 8, 1964, for a certificate of public convenience and necessity pursuant to Section 7(c) of the Natural Gas Act authorizing the transportation and sale of natural gas on an interruptible basis to certain of Applicant's customers in its New England Zone who purchase their entire requirements of natural gas from Applicant under Applicant's General Service (G) Rate Schedule, all as more fully set forth in the application as supplemented.

Applicant, by its application, as supplemented, seeks authority to render a new service, Economy Replacement (ERS) Service, to those customers in the New England Zone who purchase natural gas under Applicant's (G) Rate Schedule and who own and operate facilities for producing gas, other than natural gas, for distribution and sale in the same area for which natural gas is purchased under the (G) Rate Schedule. The ERS Service would be rendered in accordance with the terms of the form of ERS Rate Schedule which Applicant submitted as a part of the supplement to its application filed on December 8, 1964.

By the terms of its application, as supplemented, Applicant has agreed that (1) it will make the proposed service available to any general service customer located in Pennsylvania, New York and New Jersey east of its storage fields, as well as to those customers located in the New England States, (2) it will not install main line capacity in the future in order to render the service or dedicate to such service any unallocated firm capacity which it may have from time to time and (3) it will prorate among its customers on an equitable basis the natural gas available to render the proposed service. Applicant has agreed that any certificate issued be conditioned accordingly.

Applicant estimates approximately 571,300 Mcf annually will be available for sale under the ERS Rate Schedule and that it will be able to deliver an average volume of approximately 5,000 Mcf daily during periods of peak responsibility on its system. This seasonal and interruptible service is to be rendered during a period beginning with November 1 of any year and ending with the next succeeding April 30th of the following year.

The form of the proposed ERS Rate Schedule under which Applicant proposes to render the service was served upon each of Applicant's customers and the state commissions in those states in which Applicant operates. No objection to the form of the Rate Schedule has been interposed by any customer or state commission.

The unit cost per Mcf of natural gas under the ERS Rate Schedule would be 85 cents which includes a nomination charge of 15 cents per Mcf and a commodity charge of 70 cents per Mcf.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on December 30, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application submitted in support of the authorization, as supplemented, and upon consideration of the record finds and orders as hereinafter stated.

The Commission finds:

(1) Applicant, Tennessee Gas Transmission Company, a Delaware corporation having its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of July 15, 1947, in Docket No. G–910 (6 FPC 777).

(2) The proposed sale and delivery of natural gas, as hereinbefore described and as more fully described in the application, as supplemented in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed sale and delivery of natural gas to be effective as of the date of issuance of this order are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a) and (e) of Section 157.20 of such Regulations.

(6) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that certain conditions relating to the proposed Economy Replacement Service be attached to the Commission's order authorizing the proposed service, and as related hereinbefore.

The Commission orders:

(A) A certificate of public convenience and necessity be and the same is hereby issued to Tennessee Gas Transmission Company, authorizing as of the date of issuance of this order the sale and delivery of natural gas as more fully described in the application as supplemented in this proceeding, subject to the jurisdiction of the Commission, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are hereby conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a) and (e) of Section 157.20 of such Regulations.

(C) The Applicant shall file within 7 days from the date of issuance of this order the Economy Replacement (ERS) Rate Schedule in the form submitted in the supplement to its application filed December 8, 1964, and served on its customers. Good cause exists for permitting such rate schedule to be effective as of the date of issuance of this order.

(D) The Applicant will (1) make the proposed service available to any general service customer located in Pennsylvania, New York and New Jersey east of its storage fields as well as to those customers located in the New England States, (2) not install main line capacity in the future in order to render the service or dedicate to such service any unallocated firm capacity which it may have from time to time, and (3) prorate among its customers on an equitable basis the natural gas available to render the proposed service.

Before Commissioners: Joseph C. Swidler, Chairman; Charles R. Ross and David S. Black.

THE ATLANTIC REFINING COMPANY, DOCKET NO. G–17741

ORDER ACCEPTING OFFER OF SETTLEMENT, SEVERING AND TERMINATING PROCEEDING, AND PRESCRIBING REFUNDS

(Issued December 31, 1964)*

By order issued October 8, 1964, in Docket Nos. G–9283 and G–9284, *et al.*, 32 FPC 933, we approved a general rate settlement proposal of The Atlantic Refining Company (Atlantic) for most of its jurisdictional sales of natural gas, including a partial settlement of the issues in Docket No. G–17741 relating to Atlantic's FPC Gas Rate Schedule Nos. 118, 147 and 150 for its sales to Transcon-

*Amended 33 FPC 326.

tinental Gas Pipe Line Corporation (Transco) from various fields in South Louisiana. In the settlement order, we accepted a settlement rate of 17.50¢ per Mcf for these three rate schedules effective as of August 1, 1964, in lieu of 23.55¢ per Mcf rate collected subject to refund in Docket No. G–17741, and provided for a moratorium on the filing for increased rates under said rate schedules; however, we noted that the matters relating to refund obligations and to the termination of the proceeding in Docket No. G–17741 were excluded from the settlement proposal.

On November 24, 1964, Atlantic submitted a settlement proposal seeking to resolve the remaining issues in Docket No. G–17741. Under the instant offer, Atlantic proposes to refund approximately $2,780,000, exclusive of interest, to Transco. This refund is the amount collected above the 17.50¢ per Mcf settlement rate from April 10, 1961 to August 1, 1964, the effective date of the settlement rate. In addition, Atlantic proposed to file a letter agreement with Transco providing that deficiency gas for the contract year of 1965 will be paid for at 17.50¢ per Mcf and that its rates for deficiency gas for the years 1960 through 1963 will be adjusted to reflect the difference between the rate which the deficiency gas was paid for and the rate in effect when the gas is taken.

The Philadelphia Gas Works Division of the United Gas Improvement Company (UGI), on December 14, 1964, filed a concurrence to the proposed instant settlement and urges approval thereof because it would free Atlantic from possible liability in this docket arising out of a decision in *United Gas Improvement Company* v. *F.P.C.*, CADC, No. 18339. No protest to the proposed settlement was received.

In accepting this settlement proposal we desire to make it clear that our action herein should not be construed as constituting approval of any future rate increases that may be filed under the subject rate schedules, and is without prejudice to any findings or orders of the Commission in any future proceedings, including area rate or other similar proceedings, involving Atlantic's rates and rate schedules.

The Commission finds:

The proposed settlement of the above-captioned proceeding on the basis described herein, as more fully set forth in the settlement proposal filed with the Commission by Atlantic on November 24, 1964, is in the public interest and appropriate to carry out the provisions of the Natural Gas Act and should be approved and made effective as hereinafter ordered.

The Commission orders:

(A) The settlement of the proceeding in Docket No. G–17741 on the basis of the settlement proposal, filed by Atlantic on November 24, 1964, is hereby approved.

(B) Atlantic shall compute the difference between the rate collected subject to refund and the related settlement rate for the period from April 10, 1961 to August 1, 1964, together with interest as specified in Docket No. G–17741 to November 1, 1964. Atlantic shall within 45 days from the date of this order submit a report to the Commission, and serve a copy on Transco, setting out the amount of refunds related to each rate schedule (showing separately the principal and applicable interest), the basis used for such determination and the period covered.

(C) Atlantic shall retain the amounts shown in the report required under paragraph (B) above, subject to further order of the Commission directing the disposition of those amounts.

(D) If Atlantic elects to commingle these retained refunds with its general assets and use them for its corporate purposes, it shall pay interest thereon at the rate of 6 percent per annum on all funds thus available from February 15, 1965, to the date on which they are paid over to the person ultimately determined to be entitled thereto in a final order of the Commission.

(E) If Atlantic elects to deposit the retained refunds in a special escrow account, Atlantic shall tender for filing on or before February 15, 1965, an executed Escrow Agreement, conditioned as set out below accompanied by certificate showing service of a copy thereof upon Transco. Unless notified to the contrary by the Secretary within 30 days from the date of filing thereof, the Escrow Agreement shall be deemed to be satisfactory and to have been accepted for filing. The Escrow Agreement shall be entered into between Atlantic and any bank or trust company used as a depositor for funds of the United States Government and the agreement shall be conditioned as follows:

(1) Atlantic, the bank or trust company, and the successors and assigns of each, shall be held and formally bound unto the Federal Power Commission for the use and benefit of those entitled thereto, with respect to all amounts and the interest thereon deposited in a special escrow account, subject to such Agreement, and such bank or trust company shall be bound to pay over to such person or persons as may be identified and designated by final order of the Commission and in such manner as may be therein specified, all or any portion of such deposits and the interest thereon.

(2) The bank or trust company may invest and reinvest such deposits in any short-term indebtedness of the United States or any agency thereof or in any form of obligation guaranteed by the United States which is, respectively, payable within 120 days as the said bank or trust company in the exercise of its sound discretion may elect.

(3) Such bank or trust company shall be liable only for such interest as the invested funds described in Paragraph (2) above will earn and no other interest may be collected from it.

(4) Such bank or trust company shall be entitled to such compensation as is fair, reasonable and customary for its services as such, which compensation shall be paid out of the escrow account to such bank or trust company. Said bank or trust company shall likewise be entitled to reimbursement for its reasonable expenses necessarily incurred in the administration of this escrow account which reimbursement shall be made out of the escrow account.

(5) Such bank or trust company shall report to the Secretary quarterly, certifying the amount deposited in the trust account for the quarterly period.

(F) Within 90 days from the date of this order, Atlantic shall file under its rate schedules involved herein, a letter agreement with Transco relating to its deficiency gas proposal.

(G) Upon full compliance by Atlantic with the terms and conditions of this order, Docket No. G–17741 is severed from the consolidated proceedings in Docket No. AR61–2, *et al.*, and the proceeding in Docket No. G–17741 is terminated.

(H) This order is without prejudice to any findings or orders which have been or may be made hereafter by the Commission, and is without prejudice to claims or contentions which may be made by Atlantic, the Commission staff, or any affected party hereto, in any proceedings now pending, including area rate or similar proceedings, or hereafter instituted by or against Atlantic or any other companies, persons or parties affected by this order.

Before Commissioners: Joseph C. Swidler, Chairman; Charles R. Ross and David S. Black.

RATON NATURAL GAS COMPANY, DOCKET NO. CP65-101

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued December 31, 1964)

On October 13, 1964, Raton Natural Gas Company (Applicant), filed an application in Docket No. CP65-101, pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of a meter station on the outskirts of the City of Raton, New Mexico, and the sale and delivery of natural gas to the San Morcol Pipeline, Inc. (San Morcol) for resale, all as more fully set forth in the application.

Applicant proposes to sell and deliver natural gas to San Morcol for resale to the communities of Maxwell, Springer, Wagon Mound and Las Vegas, New Mexico. San Morcol proposes to construct and operate 50 miles of 8-inch pipeline from the point of connection with Applicant's proposed meter station to a point near Colmor, New Mexico, midway between the cities of Raton and Las Vegas, New Mexico.[1] The community of Las Vegas will construct, own and operate the remaining 50 miles of 8-inch pipeline extending from Colmor to Las Vegas. San Morcol, however, will make the sales for resale to all of the above-mentioned communities. Annual and peak day requirements for three initial years are stated to be:

	1965	*1966*	*1967*
Annual	667, 073	721, 508	765, 234
	1964-65	*1965-66*	*1966-67*
Peak Day	4, 200	6, 000	6, 490

Applicant proposes to make the sale to San Morcol under its proposed CD-1 Rate Schedule to be filed with the Commission upon the granting of certificate authorization. The rate schedule provides for a demand charge of $1.10 per Mcf and a commodity charge of 22.5 cents per Mcf, and for an interruptible service under a proposed Rate Schedule I-1 at a rate of 26 cents per Mcf.

Applicant was authorized in Docket No. CP62-131 to construct and operate approximately 20.5 miles of 8-inch line extending from a point of connection with Colorado Interstate Gas Company's (CIG) facilities at Trinidad, Colorado, to Raton, New Mexico.

The cost of the proposed meter station at Raton is estimated at $7,490, and will be paid for from cash on hand.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on December 30, 1964, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits submitted in support of the authorization, and upon consideration of the record finds and orders as hereinafter stated.

---

[1] The application filed by San Morcol Pipeline, Inc., on October 13, 1964, in Docket No. CP65-100 pursuant to Section 1(c) of the Natural Gas Act for an exemption from the provisions of the Act over its 8-inch line from Raton to Colmor, New Mexico, is being granted contemporaneously herewith, *infra*, p. 1558.

The Commission finds:

(1) Applicant, Raton Natural Gas Company, a New Mexico corporation having its principal place of business in Raton, New Mexico, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of July 19, 1963 in Docket No. CP62–131 (30 FPC 356).

(2) The proposed construction and operation of facilities and sale and delivery of natural gas by Applicant to San Morcol Pipeline, Inc., as hereinbefore described, and as more fully described in the application and exhibits in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed sale and delivery of natural gas are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3), (c)(4) and (e) of Section 157.20 of such Regulations.

The Commission orders:

(A) A certificate of public convenience and necessity be and the same is hereby issued to the Applicant in this proceeding, authorizing the construction and operation of facilities and the sale and delivery of natural gas to San Morcol Pipeline, Inc., as more fully described in the application and exhibits in this proceeding, subject to the jurisdiction of the Commission, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are hereby conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3), (c)(4) and (e) of Section 157.20 of such Regulations.

(C) The facilities hereby authorized shall be constructed and placed in actual operation as provided in paragraph (b) of Section 157.20 of the aforesaid Regulations within sixty days of the date on which this order issues.

(D) Raton Natural Gas Company shall file within 30 days after the issuance of this order its tariff and service agreement executed in accordance with the Commission's Regulations reflecting the terms and conditions of the sale and delivery of natural gas to the San Morcol Pipeline, Inc.

Before Commissioners: Joseph C. Swidler, Chairman; Charles R. Ross and David S. Black.

SAN MORCOL PIPELINE, INC., DOCKET NO. CP65–100

DECLARATION OF EXEMPTION

(Issued December 31, 1964)

San Morcol Pipeline, Inc. (Applicant), filed an application on October 13, 1964, for exemption of its facilities described in paragraph (2) below from the provisions of the Natural Gas Act, pursuant to Section 1(c) thereof.

Upon the basis of the application filed, the exhibits appended thereto, and the files of the Commission, it appears that:

(1) Applicant is a New Mexico corporation operating as a public utility in the State of New Mexico where it will be engaged in the distribution of natural gas subject to the jurisdiction of the public service commission of New Mexico. The gas to be so distributed is produced in part in Texas and other states and is transported in interstate commerce pursuant to certificate authorization from the Federal Power Commission.

(2) Applicant's New Mexico market will be served by an 8-inch intrastate line extending from a point near the City of Raton, New Mexico, to a point near Las Vegas, New Mexico.

(3) Applicant proposes to purchase gas from the Raton Natural Gas Company (Raton)[1] under the terms of an agreement which provides that Raton will deliver such gas to Applicant at a point near Raton, New Mexico, inside the State of New Mexico where the same will be delivered into Applicant's intrastate line.

(4) All natural gas received by Applicant for transportation through said line is to be consumed ultimately within the State of New Mexico and all of the subject facilities are located within said state; and

(5) The New Mexico Public Service Commission has certified to the Federal Power Commission that it has and will be exercising regulatory jurisdiction over the rates, service and facilities of Applicant.

Wherefore, the Commission declares, by reason of the foregoing:

San Morcol Pipeline, Inc., with respect to the operation of its 8-inch line is exempt from the provisions of the Natural Gas Act, and the orders, rules and regulations of this Commission issued thereunder.

Before Commissioners: Joseph C. Swidler, Chairman; Charles R. Ross and David S. Black.

UNITED GAS PIPE LINE COMPANY, DOCKET NOS. RP61–18, RP63–1, AND RP65–1

ORDER DENYING REQUEST FOR RECONSIDERATION OF SEVERABLE PROVISION REQUIRING RETENTION OF CERTAIN REFUNDS

(Issued December 31, 1964)*

On December 23, 1964, *supra*, p. 1515, we issued an order in the above dockets approving a proposed rate settlement which had been submitted by the parties, and providing in paragraph (C) thereof that, pending further order directing the ultimate disposition thereof, United should retain the amounts of refunds shown in Appendix A of the settlement stipulation as stemming from previous payments in excess of the agreed rates by United's pipeline customers. Ordering paragraph (K) of this order provided for the filing of objections thereto by the parties to the proceeding within seven days.

On December 28, 1964, the Commission received a telegram from Texas Eastern Transmission Corporation, a party in the several proceedings and a pipeline

---

[1] The application filed by Raton Natural Gas Company on December 13, 1964, in Docket No. CP65–101, for a certificate authorization covering proposed facilities providing natural gas to San Morcol Pipeline, Inc., is being granted contemporaneously herewith, *supra*, p. 1557.

*Order issued February 19, 1965, rejecting application for rehearing, etc., 33 FPC 304.

customer of United, objecting to the provisions of the order of December 23, 1964, insofar as it requires retention of refunds by United pending further determination by the Commission as to Texas Eastern or its customers are legally and equitably entitled thereto. Texas Eastern had previously objected to a similar provision in our opinion and order in Docket No. RP63–1 and had filed a petition for review in the United States Court of Appeals for the Fifth Circuit (Case No. 22041), challenging, *inter alia*, the legality of such provision. It renews its objections here. Considering Texas Eastern's renewed objections as a petition for reconsideration of our action in our December 23rd order requiring such retention of refunds by United, we shall deny the request.[1] In our opinion, the procedure which we have established for determining whether United's immediate pipeline customers, or the customers of such customers, are legally and equitably entitled to retain refunds, and requiring United to retain such refunds pending such determination, is both appropriate and necessary if we are to fully discharge our obligations of insuring that our rate regulation affords a full degree of protection to the ultimate consumers of natural gas.

Texas Eastern states its understanding that, in the light of Article VIII reserving its right to retain its pending appeal on this issue (and on the consolidated tax question), it is not required to agree to the severable provisions of the Commission's December 23rd order requiring United to retain refunds, as a prerequisite to the settlement becoming effective, and that the Commission's order contemplates that the settlement will be made effective without prejudice to any rights the parties might otherwise have to appeal this reserved issue. Texas Eastern makes clear that, subject to this reservation, it is accepting the United settlement in its totality and that it agrees that the settlement shall remain effective irrespective of the outcome of any petitions for review it might bring, challenging the provision of the order requiring retention of refunds by United. We think that Texas Eastern is correct in these assertions and that its retention of the right to litigate the validity of the Commission's order directing United to withhold refunds from it pending their ultimate disposition does not affect the validity of our order of December 23, 1964.

The Commission orders:

Texas Eastern's objection to the provisions of our order issued December 23, 1964, directing United to retain certain refunds pending their ultimate disposition hereby is denied.

Before Commissioners: Joseph C. Swidler, Chairman; Charles R. Ross and David S. Black.

UNITED STATES DEPARTMENT OF THE INTERIOR, SOUTHWESTERN POWER ADMINISTRATION, DOCKET NO. E–7172

ORDER TEMPORARILY EXTENDING CONFIRMATION AND APPROVAL OF RATES AND CHARGES

(Issued December 31, 1964)

The Secretary of the Interior, acting on behalf of the Southwestern Power Administration (SWPA) and pursuant to the Flood Control Act of 1944 (58 Stat. 887) has filed with the Federal Power Commission a request for the extension

[1] Since our action ordering United to retain the refunds pending further order as to their disposition is merely interlocutory, we do not believe any petition for rehearing would lie. (See § 1.34 of our Rules of Practice and Procedure.)

of confirmation and approval of rate schedules and contractual rates and charges applicable to the integrated system of SWPA.

By order issued August 7, 1964, 32 FPC 562, the Commission, pending review and final action of the Commission temporarily extended the confirmation and approval of the existing rate schedules and contractual rates and charges to December 31, 1964, or to such earlier date as the Commission's final action is taken. The Commission has not completed its review.

The Commission orders:

The confirmation and approval of Rate Schedules F–1, P–1, IC and EE, and the Contractual Rates and Charges set forth in contracts between SWPA and Texas Power and Light Company (Contract Ispa 177), Southwestern Electric Power Company (Contract 14–02–001–782), and Oklahoma Gas and Electric Company and Public Service Company of Oklahoma (Contract Ispa 356) are hereby temporarily extended to February 15, 1965, or to such earlier date as the Commission's final action is taken.

Before Commissioners: Joseph C. Swidler, Chairman; Harold C. Woodward; and David S. Black.

GULF OIL CORPORATION, DOCKET NO. CI64–1122; RATE SCHEDULE NO. 274; SUPPLEMENT NO. 1

FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY, ACCEPTING FOR FILING RATE SCHEDULE NO. 274 AND APPROVING SUPPLEMENTAL RATE SCHEDULE NO. 1 THERETO

(Issued July 6, 1964)

Gulf Oil Corporation (Applicant) on March 24, 1964, filed an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing it to make short-term sales of natural gas from unspecified producing properties to Texas Eastern Transmission Corporation (Texas Eastern) for periods of limited duration as may be agreed upon by Applicant and Texas Eastern from time to time during a period of 20 years. The gas which Applicant proposes to sell to Texas Eastern would be produced from leaseholds owned by Applicant.

The sale would be made in accordance with the terms of a 20-year basic sales agreement between Applicant and Texas Eastern entered into February 28, 1964. This basic sales agreement would be filed with the Commission as Applicant's filed rate schedule. As sales are contemplated, Applicant and Texas Eastern would enter into supplemental agreements specifying (1) point or points of delivery, (2) quantity of gas to be sold and purchased, (3) price and (4) duration of the supplemental agreement.

The deliveries of gas would be made at points on or near Texas Eastern's pipeline system mutually agreed upon by the parties. The quantity would be that specified in the supplemental agreement. The price would not exceed the then effective area price fixed by the Commission for permanent sales in the area in which deliveries are proposed to be made and would normally be substantially below such price. The sale would be made for the short-term period agreed upon by the parties.

Each of the supplemental agreements between the parties would be filed with the Commission as a proposed supplement to Applicant's rate schedule (basic

agreement of February 28, 1964) subject to the approval of the Commission. Simultaneously therewith and as a part of such filing Applicant would file a certificate of service showing service of the filing upon Texas Eastern's customers and interested state commissions. If the Commission does not accept such supplemental agreement and permit the same to become effective within 30 days from the filing date, the supplemental agreement will automatically terminate and be of no further force and effect. Such filing would then be withdrawn if it has not theretofore been rejected by the Commission.

Illustrative of how the certificate would operate, Applicant has submitted a supplemental agreement setting forth the details of the first sale proposed to be made under the basic agreement. Applicant proposes to sell an average of 6,000 Mcf of gas per day for a period of 5 years from the Veltin Field, St. Landry Parish, Louisiana, at 15.0 cents at 15.025 psia. This price is substantially lower that the established ceiling price for this area.

Applicant states that the authorization requested will enable it to negotiate short-term agreements and more promptly begin sales of natural gas to avoid payment of shut-in gas well royalties, to avoid flaring casinghead gas, to prevent drainage, to test new discoveries and to hold leases.

This is a matter of first impression being the first such proposal to be considered by the Commission. It is however, a form of "budget type" application covering proposed independent producer sales somewhat similar to "budget type" pipeline purchase facilities application for which provision is made by Section 157.7 of the Commission's Regulations under the Natural Gas Act, as amended by Order No. 280 issued March 31, 1964, 31 FPC 754. One distinct difference exists between the instant application and those covering "budget type" purchase facility applications. That is, our Regulations permit the filing of pipeline "budget type" applications covering facilities which are to be constructed within a one-year period, whereas here the application requests an overall certificate for a period of 20 years to be made operable through the issuance from time to time of other authorizations of more limited duration. However, we are not committing the Commission to the effectuation of this plan for such a lengthy period since if it develops in practice to be detrimental to the public interest we can refuse to approve the necessary supplemental authorization. We are of the opinion that to be of practicable benefit to the "independent producer", a certificate giving it reasonable assurance that it will have a market for sales of limited duration at an appropriate price during a reasonable future period would not be contrary to the public interest.

We recognize that we are dealing with what may be termed an "experimental application". While we have established procedures which have greatly expedited the handling of noncontested independent producer applications, we are of the opinion that it would further the public interest to grant the certificate requested by Applicant to test the feasibility of operations thereunder. In granting the basic certificate at this time we believe we should advise the parties that, in the absence of a showing of extraordinary circumstances, we will not approve supplemental filings for short-term sales, due to the spot nature thereof, at prices which are either above the purchaser's average cost of purchased gas or are not made at a realistic discount from the area ceiling for permanent certificates dedicating gas to the interstate market. Nor will we permit the procedure being instituted here to be abused by the establishment of any pattern of building up gas fields through short-term jurisdictional sales followed at termination by long-term non-jurisdictional sales. We recognize that at the termination of the short-term authorization Gulf will be free to renegotiate a permanent sale at any price at or below the appropriate area ceiling with Texas Eastern or any

other purchaser, but we will expect that such sales will normally fall into jurisdictional channels. Finally we reserve the right to hold a formal hearing on any supplemental agreement in the event a protest thereto is filed. Gulf, of course, will be free under such circumstances to withdraw the supplemental filing.

In view of the foregoing, we feel that it would be inappropriate to grant a 20-year term certificate as sought by Gulf. It would be more appropriate to limit the initial term of the certificate to a term of 5 years subject to extension or renewal at the expiration of such initial term. During the initial period of the certificate we will have an opportunity to examine the manner in which Gulf is conducting its operations thereunder and determine whether they are in accordance with the views expressed herein and whether the form of arrangement has led to discrimination among sellers or purchasers of gas in the areas where Gulf is selling gas to Texas Eastern. We shall, of course, permit Gulf to continue for the full term of any supplemental agreement any sale of natural gas which had been approved during the period the certificate remains in effect.

We will, therefore, grant to Gulf a certificate limited to a term of 5 years and accept for filing as Gulf's FPC Gas Rate Schedule No. 274 the basic purchase agreement between Gulf and Texas Eastern dated February 28, 1964, and as Supplement No. 1 thereto the supplemental agreement between the same parties dated February 28, 1964.

After due notice of the application no protest to the granting thereof has been received. Petitions to intervene were filed by Texas Eastern Transmission Corporation, Philadelphia Electric Company and Public Service Electric and Gas Company. A notice of intervention was filed by the Pennsylvania Public Utility Commission. Petitioners and the State Commission desire to participate only in the event a formal hearing is held on the application.

At a hearing held on July 2, 1964, the Commission on its own motion received and made part of the record in this proceeding all evidence, including the application and exhibits thereto, submitted in support of the authorization sought herein, and upon consideration of the record,

The Commission finds:

(1) Applicant, Gulf Oil Corporation, is engaged in the sale and delivery of natural gas in interstate commerce for resale for ultimate public consumption, subject to the jurisdiction of the Commission, and is, therefore, a "natural-gas company" within the meaning of the Natural Gas Act.

(2) The prospective sales of natural gas hereinbefore described, as more fully described in the application in this proceeding, will be made in interstate commerce subject to the jurisdiction of the Commission, and such sales by Applicant, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The public convenience and necessity require that the initial term of the certificate issued hereby be limited to a term of 5 years subject to renewal or extension upon the expiration of the initial term upon a showing that the public convenience and necessity so require. Sales of natural gas being made pursuant to a supplemental agreement filed and approved during the effective period of the certificate issued hereby should continue for the unexpired portion of the term of such supplemental agreement.

(4) Applicant is able and willing properly to do the acts and to perform the service proposed in the supplemental agreement of Februray 28, 1964, relating to the sale of gas from Veltin Field, St. Landry Parish, Louisiana, and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(5) The sales of natural gas by Applicant, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, as proposed in the supplemental agreement described above are required by the public convenience and necessity, and a certificate therefor should be issued as hereinafter ordered and conditioned.

The Commission orders:

(A) A certificate of public convenience and necessity limited to an initial term of 5 years from the date of issuance of this order be and the same is hereby issued, upon the terms and conditions of this order, authorizing such sales by Applicant of natural gas in interstate commerce for resale on a short-term or spot-sale basis for the period of limited duration specified in each supplemental agreement, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, as Applicant and Texas Eastern may subsequently agree upon provided that such supplemental agreement (after being servd on Texas Eastern's customers and the state commissions having jurisdiction over such customers) is filed and approved by the Commission, all as hereinbefore described and as more fully described in the application and exhibits in this proceeding.

(B) The certificate issued in paragraph (A) above is not transferable and shall be effective only so long as Applicant continues the acts and operations hereby authorized in accordance with the provisions of the Natural Gas Act and the applicable rules, regulations and orders of the Commission.

(C) The basic agreement of February 28, 1964, between Applicant and Texas Eastern be accepted for filing as Gulf's FPC Gas Rate Schedule No. 274 and the supplemental agreement between the parties dated February 28, 1964, as Supplement No. 1 thereto effective as of the date of this order.

(D) At the time of the filing of each supplemental agreement Applicant shall submit a statement showing (1) the total contract volumes of gas deliverable under earlier filed supplemental agreements and (2) the total volumes of gas delivered under such earlier filed supplemental agreements.

(E) The certificate issued in paragraph (A) above is subject to renewal or extension at the expiration of the initial term upon a showing that the public convenience and necessity so require. Sales of natural gas being made pursuant to a supplemental agreement filed and approved during the effective period of the certificate issued in paragraph (A) above shall continue for the unexpired portion of the term of such supplemental agreement.
